- D. Scrap the vendor rating system until the company can figure out what is wrong.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 24

An ISO 9001 supplier demonstrates which of the following characteristics?

- A. Uses a six sigma quality system
- B. Has adopted the principles of total quality management (TQM)
- C. Has documented procedures and follows those procedures
- D. Purchases their raw material from another ISO 9001 certified supplier

Answer: ([SHOW ANSWER](#))

Section: Mixed questions

Explanation:

ISO 9001 is the international standard that specifies requirements for a quality management system (QMS).

Organizations use the standard to demonstrate the ability to consistently provide products and services that meet customer and regulatory requirements. It is the most popular standard in the ISO 9000 series and the only standard in the series to which organizations can certify. Successful businesses understand the value of an effective Quality Management System that ensures the organization is focussed on meeting customer requirements and they are satisfied with the products and services that they receive.

NEW QUESTION: 25

The most likely benefit of implementing a collaborative transportation management system is:

- A. lower distribution center operating costs.

NEW QUESTION: 80

The value that logistics provides within the supply chain can best be summarized as:

- A. providing accurate in-transit and delivery information to customers and salespeople.
- B. satisfying customer expectations about availability and delivery at an acceptable total cost.
- C. meeting promised location and on-time delivery goals with minimal use of expediting.
- D. establishing inventory and delivery goals with various customers that fulfill the firm's profit objectives.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 81

All of the following are dimensions of flexibility EXCEPT:

- A. product pricing
- B. rerouting
- C. product mix
- D. design changeover
- E. product volume

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 82

A company utilizing supplier relationship management (SRM) will be concerned primarily about which of the following factors when selecting a supplier?

- A. Lowest cost
- B. Shortest lead time
- C. Culture
- D. Risk aversion

Answer: ([SHOW ANSWER](#)**)**

Section: Mixed questions

NEW QUESTION: 83

One of the drawbacks to using ISO 26000 is that it:

- A. only provides guidance and cannot be certified as can other ISO standards
- B. is one of the most expensive ISO standards to implement
- C. is only recognized by a few countries, due to the strict standards
- D. incorporates different standards for different countries

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 84

A company that manufactures complex mechanical assemblies to customer order and ships them directly to the customer is implementing manufacturing cells. The benefit most likely to result from this effort is a reduction in the:

- A. number of component shortages.
- B. production planning horizon.
- C. time to fill customer orders.
- D. response time to a request for quote.

Answer: ([SHOW ANSWER](#))

Section: Implementation and Operations

NEW QUESTION: 85

A manufacturer of consumer packaged goods with a single plant and nine regional distribution centers is considering reducing the number of distribution centers in its system. Reducing the number of distribution centers most likely will reduce fixed warehousing and the cost of:

- A. transportation from the distribution centers to the customer.
- B. transportation from the plant to the distribution centers.
- C. storing finished-goods inventory at the manufacturing plants.
- D. storing cycle inventory in the distribution centers.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 86

An information technology system that couples enterprise resources planning and an advanced planning system would be most appropriate for which of the following types of business operations?

- A. Multiple plants in multiple industries
- B. Multiple plants in the same supply chain
- C. Multiple supply chains of different products
- D. Multiple supply chains of the same product

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 88

Which of the following types of lead times is related most closely to a supplier performance measure?

- A. Process
- B. Replenishment
- C. Fulfillment
- D. Overall

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 89

Which of the following principles is included in the United Nations (UN) Global Compact?

- A. Anti-corruption
- B. Trading blocs
- C. Risk management
- D. Accounting standards

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 90

What impact does lumping have on the demand signal in terms of timing?

- A. it has no effect on the timing
- B. it minimizes the need for signals
- C. it delays the timing
- D. it speeds up the timing

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 91

A company currently produces custom goods for a limited market. To increase market share, the company will implement a strategy to reduce the number of products it produces and reduce delivery lead time. The company can increase its chances of achieving the strategy by:

- A. using benchmark data for products in the same product groups.
- B. incorporating results from market surveys.
- C. involving customers in the product design process.
- D. using electronic communications to receive customer complaints.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 92

Which of the following circumstances should trigger a company to consider tax implications from a supply chain perspective?

- I. multi-national supply chain operations
- II. pursuing aggressive cost-reduction goals
- III. merger, acquisition or restructuring

- A. I and II
- B. II
- C. II and III
- D. I, II and III
- E. I and III

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 93

Which of the following tools is most appropriate to use to determine projects that will achieve the greatest net benefits?

- A. Operation process chart
- B. Process flow diagram
- C. Fishbone diagram
- D. Pareto diagram

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 94

Which of the following processes ensures that functional plans are consistent?

- A. Strategic planning
- B. Sales and operations planning
- C. Project planning
- D. Master scheduling

Answer: B ([LEAVE A REPLY](#))

Section: Implementation and Operations

NEW QUESTION: 95

Which of the following objectives is the primary driver in the design and implementation of lean process management?

- A. Decreasing the cash-to-cash cycle
- B. Integrating processes between departments
- C. Satisfying customer requirements
- D. Reducing the level of inventory

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 96

What would the percentage of supply chain expenses need to be in order to achieve a 50% increase in gross profits? The current percentages are 100% for revenue, 10% for supply chain expense, 80% for other expenses, and hence, gross profit is 10%. Assume the revenues remain constant and the other expenses percentage remains constant at 80%.

- A. 150 percent
- B. 5 percent
- C. 10 percent
- D. 1 percent
- E. 50 percent

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 97

Which of the following responses to risk best describes the evolving concept of flexibility in supply chain risk management?

- A. The practice of adjusting capacities in a manufacturing environment
- B. The ability to produce high volume stock keeping units (SKUs) in multiple locations
- C. The ability to react quickly to changes or events while maintaining customer service levels
- D. The ability to produce complex configurations of a product within the standard lead time

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 98

An organization is partnering with a supplier. The most appropriate tool to ensure that the supplier has the necessary capabilities is:

- A. supplier certification.
- B. a supplier-input-process-output-customer diagram.
- C. supplier relationship management.
- D. supplier performance evaluation.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 99

The customer who provides point-of-sale data remains the sole decision-maker regarding order quantities when what type of inventory strategy is used?

- A. Continuous replenishment
- B. Advanced continuous replenishment
- C. Vendor-managed replenishment
- D. Quick response

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 100

Which of the following benefits of supplier relationship management typically results from collaboration with a few critical suppliers?

- A. Elimination of formal contracts
- B. Automation of supplier sales activities
- C. Reduction in customer and supplier inventories

There currently are no competitors with nationwide distribution for this category of soft drinks. Which of the following supply chain strategies would be most appropriate for the two product families?

- A. Produce the current product family to forecast and the new product family to order.
- B. Produce the current product family to order and the new product family to forecast.
- C. Produce both product families only after receipt of a distributor order.
- D. Produce both product families to forecast and push through the distribution system.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 128

Activity costing (ABC) is an example of:

- A. Cost allocation technique.
- B. Inventory classification system.
- C. Generally accepted accounting principles.
- D. Asset cost estimate technique.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 129

A company currently produces custom goods for a limited market. To increase market share, the company will implement a strategy to reduce the number of products it produces and reduce delivery lead time. The company can increase its chances of achieving the strategy by:

- A. using electronic communications to receive customer complaints.
- B. involving customers in the product design process.
- C. using benchmark data for products in the same product groups.
- D. incorporating results from market surveys.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 130

The most cost-effective way to increase the velocity of goods in a supply chain is to:

- A. improve the way the supply chain handles goods that are not in motion.
- B. establish warehouses near major retail outlets.
- C. subcontract with multiple third-party logistics (3PL) providers who are located at strategic locations.
- D. switch to a faster mode of transportation.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 131

Distribution from which of the following types of sites enables goods to enter a country, undergo further modification, and then be exported without paying customs duties?

- A. Public warehouse
- B. Value-added territory
- C. Free trade zone
- D. Customs clearing house

Answer: C ([LEAVE A REPLY](#))

Section: Supply Chain Strategy, Design, and Compliance

NEW QUESTION: 132

Which formula below is used to calculate cash-to-cash cycle time?

- A. inventory days of supply minus average payment period for materials
- B. days of outstanding sales

- C. inventory days of supply plus days of sales outstanding
- D. inventory days of supply plus days of sales outstanding minus average payment period for materials
- E. days of sales outstanding minus inventory days of supply

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 133

Which of the following actions is most appropriate when implementing a strategy to create customer-affordable value?

- A. Employ lean principles.
- B. Increase safety stock.
- C. Extend product warranty.
- D. Use a more rapid transportation mode.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 134

A company has adequate average available capacity but does not maintain surge capacity. With a distribution route to manage, which of the following actions will provide the most capacity relief?

- A. Increasing order-fulfillment lead times
- B. Implementing allocation
- C. Increasing prices with a 30-day effective date
- D. Increasing product queue times

Answer: A ([LEAVE A REPLY](#))

Section: Implementation and Operations

NEW QUESTION: 135

All of the following are level 1 processes EXCEPT:

- A. make
- B. deliver
- C. enable
- D. return
- E. source

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 136

Which of the following statements represents a major assumption needed to effectively use days of supply as a measure?

- A. The reorder point for the inventory has been calculated correctly.
- B. The item is subjected to statistical process control (SPC) during production.
- C. The forecast for the item usage is reasonably accurate.
- D. The item is in the growth phase of the product life cycle.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 167

Which of the following is associated with products in the grocery industry?

- A. low demand uncertainty and economies of scale important
- B. low demand uncertainty and economies of scale unimportant

- C. high demand uncertainty and economies of scale important
- D. high demand uncertainty and economies of scale unimportant

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 168

Point-of-sale information fails to measure actual demand most likely because:

- A. holidays interrupt typical sales patterns.
- B. inventory levels are inaccurate.
- C. there is lag time in the system.
- D. data about lost sales cannot be captured.

Answer: D ([LEAVE A REPLY](#))

Section: Implementation and Operations

Explanation/Reference:

NEW QUESTION: 169

Which of the following consequences is a result of shipping directly from the point of manufacture to the customer rather than through a distribution network?

- A. Order-fill rate is decreased.
- B. Delivery lead times are consistent.
- C. Risk pooling benefits are negated.
- D. Distribution overhead is increased.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 170

Which source would most likely be helpful in gauging customer attitudes toward the company?

- A. sales representatives
- B. transaction records
- C. service representatives
- D. distribution points
- E. purchased data

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 171

All of the following are modules of a transportation management system EXCEPT:

- A. yard management
- B. carrier management
- C. vehicle routing
- D. delivery scheduling
- E. shipment tracking

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 172

In an advanced planning and scheduling (APS) system, which of the following processes feeds the master schedule?

- A. Fulfillment planning
- B. Demand planning
- C. Purchasing planning
- D. Distribution planning

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 173

A firm has increased finished-goods inventories for several products to compensate for increased variability in demand. The firm analyzed shipment data and determined that the variability was due to a few customers placing large orders for single shipments to obtain discounts. Which of the following actions is the firm most likely to take to maintain sales and reduce variability in demand?

- A. Implementing extrinsic forecasting methods
- B. Encouraging high-volume customers to place blanket orders
- C. Increasing the level of safety stock on high-volume products
- D. Reducing discounts for large orders

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 174

When choosing a supplier in a market-responsive supply chain, a company most appropriately would make the selection on the basis of quality and:

- A. product cost
- B. product development capabilities
- C. cost of delivery
- D. speed

Answer: ([SHOW ANSWER](#))

Section: Mixed questions

Explanation/Reference: <https://precoro.com/blog/four-basic-stages-of-supplier-selection/>

NEW QUESTION: 175

Variation in upstream requirements can be reduced by increasing:

- A. demand visibility.
- B. product features.
- C. safety stock.
- D. production capacity.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 176

Which of the following ISO standards is used to assist organizations with sustainable development?

- A. ISO 31000
- B. ISO 26000
- C. ISO 14001
- D. ISO 9001

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 177

A company that is having difficulties prioritizing resources against a long list of improvement projects should use which of the following processes?

- A. Control chart
- B. Competitive benchmarking
- C. Pareto analysis
- D. Six Sigma

Answer: C ([LEAVE A REPLY](#))
