### NEW QUESTION: 1

When viewing the Avaya Aura System Manager (SMGR) alarms, which alarm information is particularly useful for finding more information in the available documentation?

- A. Source IP address
- B. M/E Ref Number/SysOID
- C. Event ID
- D. NotificationOID
- E. Status

**Answer: C (LEAVE A REPLY)**

### NEW QUESTION: 2

A SIP station to SIP station call on a single Feature or Evolution Server uses four signaling legs between CM and SM (not including the initial off-hook imorig). When does Communication Manager insert the shortcut flag during call processing?

- A. during the termination phase (imsterm) of call processing
- B. during the initialization phase (imsinit) of call processing
- C. during the origination phase (imorig) of call processing
- D. during the routing phase (imsroute) of call processing
- E. during the dialing analysis phase (imsdialana) of call processing

**Answer: C (LEAVE A REPLY)**

### NEW QUESTION: 3

What are two functions performed by System Manager? (Choose two.)

- A. If 'Initial IP-IP Direct Media' is enabled, SIP-SIP two party calls will use direct media.
- B. If 'Direct IP-IP Auto Connections, H.323-H.323 two-party calls will shuffle to establish a direct media.
- C. It delivers a set of shared management services and a common console.

- D. It provides SIP registration and authentication.
- E. It provides centralized management of enterprise-wide dial plans.

**Answer: C,E ([LEAVE A REPLY](#))**

**NEW QUESTION: 4**

Using the Avaya Aura Session Manager (SM) command line interface, which Linux command will display a quick, at-a-glance status of SM internal services?

- A. smconfig
- B. statapp
- C. smstatus
- D. statSM
- E. traceSM

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 5**

Which additional area may require trouble-shooting for a remote worker connected to a public network, over an office worker connected to the corporate private network?

- A. System Parameters ip-options in Communication Manager
- B. Session Border Controller configuration
- C. System Manager SIP User Communication Profile (remote worker settings)
- D. Media Server (AAMS) Public Network settings

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 6**

Which three SIP requests are used to allow an AST endpoint to use features provided by an Avaya Aura Communication Manager (CM)? (Choose three.)

- A. INVITE
- B. OPTIONS
- C. REGISTER
- D. SUBSCRIBE
- E. NOTIFY
- F. CANCEL

**Answer: B,D,E ([LEAVE A REPLY](#))**

Explanation

Source: <https://downloads.avaya.com/css/P8/documents/100182495>

**NEW QUESTION: 7**

Where can you access Product Change Notifications (PCNs), Documentation, Knowledge-based articles, and make Parts/Service requests?

- A. support.avaya.org
- B. avaya.com

- C. pids.avaya.com
- D. avaya-learnintj.com
- E. support.avaya.com

**Answer: E ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 8**

When a call is made between two Avaya SIP Telephones (AST) users, Session Manager processes the call through various phases. What is the maximum number of phase tags that Session Manager uses, and what are they called?

- A. Four - imsortig, origdone, imsterm, termdone
- B. Three - ingress, process, egress
- C. Two - origappseq and termappseq
- D. Two - imsortig and imsterm
- E. Five - start, connect, progress, alert, end

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 9**

Which event packages would you expect to see an AST Endpoint subscribe to?

- A. diag, avaya-cm-feature-status, avaya-ccs-profile, reg and message-summary
- B. avaya-ccs-profile, network status and message-summary dialog
- C. avaya-cm-feature-status, entity links, reg and message-summary
- D. diag, avaya-cm-feature-status, avaya ccs profile and network status
- E. entity links, avaya-cm-feature-status, avaya-ccs-profile and reg

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 10**

Which event packages would you expect to see an AST Endpoint subscribe to in Avaya Aura System Manager?

- A. entity links, avaya-cm-feature-status, avaya-ccs-profile and reg
- B. avaya-cm-feature-status, entity links, reg and message-summary
- C. dialog, avaya-cm-feature-status, avaya-ccs-profile and network status
- D. avaya-ccs-profile, network status and message-summary dialog
- E. dialog, avaya-cm-feature-status, avaya-ccs-profile, reg and message

**Answer: E ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 11**

A company's remote workers were unable to make calls to their office co-workers, and the SIP trace showed that no PPM Responses were coming from Avaya Aura Communication Manager (CM). However, the administrator discovered that CM had not been administered as a sequenced application in the endpoint's SIP Communication Profile. If CM had been added to the SIP

Communication Profile as a sequenced application, which step would have been missing in the call flow?

- A. PPM is downloaded to the Remote Worker telephone from Avaya Aura Session Manager (SM) via Avaya Session Border Controller for Enterprise (SBCE).
- B. PPM is downloaded to the Remote Worker telephone from Avaya Aura System Manager (SMGR).
- C. PPM is downloaded to Avaya Aura System Manager (SMGR) from CM.
- D. PPM is downloaded to Avaya Aura Session Manager (SM) from CM.
- E. PPM is downloaded to the Remote Worker telephone from CM.

**Answer: A ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 12**

Which statement is true about Interfaces and IP addresses on an Avaya Session Border Controller for Enterprise (SBCE) used for SIP Trunking and Remote Worker services?

- A. SIP Trunking and Remote Worker services must use different IP addresses and interfaces.
- B. SIP Trunking and Remote Worker services cannot run on the same SBCE.
- C. SIP Trunking and Remote Worker services can share the same IP address and interface.
- D. Only one interface should be configured per IP address.

**Answer: A ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 13**

How can you obtain a list of Avaya Aura Communication Manager (CM) alarms that have been raised today, including previous alarms that are no longer active using CM SAT?

- A. Run the display alarmsprevious command and submit the form.
- B. Run the display alarmscommand, then change the 'Previous?' field from N to Y and submit the form.
- C. Run the display alarmscommand, then change the 'Historical?' field from N to Y and submit the form.
- D. Run the display alarmscommand, then change the 'Resolved?' field from N to Y and submit the form.

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 14**

A customer called Avaya Support stating that shortly after some maintenance work was done, they cannot make or receive calls. Which command in Avaya Aura Communication Manager (CM) can the administrator execute to determine if the H.248 Gateways were placed in a maintenance busy state?

- A. Status health
- B. Trace trunk x
- C. Status maintenance busy
- D. Status media-gateways

E. Status signaling group x

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 15**

What is the primary benefit of a Virtual (Intervening) Network Region in Avaya Aura Communication Manager?

- A. To allow one Network Region to temporarily use bandwidth allocated to another Network Region if it runs out of bandwidth
- B. To allow Inter-Gateway Alternate Routing (IGAR)
- C. To simplify bandwidth management between Network Regions connected via a WAN
- D. To optimize the quality of audio and video between endpoints in different Network Regions.
- E. To provide temporary overflow bandwidth when the direct allocation of bandwidth between connected Network Regions is not available

**Answer:** C ([LEAVE A REPLY](#))

**NEW QUESTION: 16**

Which of the following commands can you use to check whether the Avaya Aura Session Manager (SM) application processes are running?

- A. On the SM dashboard, select Status Applications from the Service State pull-down menu.
- B. Use the Linux command `ps -ef | grep -i "SM"`
- C. On the SM dashboard, select Status Applications from the Shutdown System pull-down menu.
- D. Execute the SM CLI `statapp` command.
- E. Execute the SM `status all` command.

**Answer:** B,D ([LEAVE A REPLY](#))

**NEW QUESTION: 17**

What information can be found when viewing the Monitoring > Active Sessions page on an Avaya Aura Media Server? (Choose two.)

- A. Callee extension number
- B. Element status
- C. Utilized Codecs
- D. QOS Analytics

E. Caller extension number

**Answer: A,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 18**

In the context of the 8D Troubleshooting Methodology, what Discipline is associated with the decision to temporarily use TCP in place of TLS?

- A. Discipline 1 - Establish the Team
- B. Discipline 3 - Develop Interim Containment Actions
- C. Discipline 2 - Describe the Problem
- D. Discipline 4 - Determine Root Cause
- E. Discipline 5 - Choose and Verify Corrective Actions

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 19**

A customer states they are having voice quality issues when they make calls over a WAN link. You would like to see what the Quality of Service is for a call, as the customer makes the call. Which Avaya Aura Communication Manager (CM) SAT command will display packet loss and jitter for a call in progress?

- A. status media-gateway
- B. list monitor qos
- C. list trace station xxxx, where XXXX is the station number.
- D. monitor station qos xxxx, where XXXX is the station number
- E. status station qos xxxx, where XXXX is the station number
- F. list trace h248

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 20**

A customer calls Avaya support after their telecom administrator was unable to add 50 new telephones for new hires. Avaya support determines that the number of telephone exceeds the capacity that the system supports.

Which pre-installation step was omitted and therefore caused this problem?

- A. Checking the required number of SIP trunks
- B. Accessing support.avaya.com to verify customer systems compatibility
- C. Verifying the version installed is compatible with existing versions
- D. Providing accurate licensing specifications

**Answer: D ([LEAVE A REPLY](#))**

**NEW QUESTION: 21**

When a 96xx telephone with SIP firmware boots up, it goes through a number of steps. These steps include:

1. Phone Registration

2. Download PPM.
3. Obtain IP Address and http/https server address from DHCP Server.
4. Check if firmware upgrade is required and download 46xxsettings.txt file.
5. Send Subscribe (avaya-cm-feature-status) to Avaya Aura Communication Manager (CM) via Avaya Aura Session Manager (SM).

What is the correct sequence of these steps?

- A. 4, 3, 1, 2, 5
- B. 3, 5, 1, 2, 4
- C. 3, 4, 1, 5, 2
- D. 3, 4, 2, 1, 5

**Answer: (SHOW ANSWER)**

### **NEW QUESTION: 22**

When a 96xx telephone with SIP firmware boots up, it goes through a number of steps. These steps include:

Phone Registration.

Download PPM.

Obtain IP Address and Utility Server address from DHCP Server.

Check if firmware upgrade is required and download 46xxsettings.txt file.

Send Subscribe (avaya-cm-feature-status) to Avaya Aura Communication Manager (CM) via Avaya Aura Session Manager (SM).

What is the correct sequence of these steps?

- A. 3, 1, 5, 1, 2
- B. 3, 5, 1, 2, 4
- C. 3, 4, 2, 1, 5
- D. 3, 4, 1, 5, 2
- E. 4, 3, 1, 2, 5
- F. 5, 3, 1, 2, 4

**Answer: D (LEAVE A REPLY)**

Explanation

Source: <https://downloads.avaya.com/css/P8/documents/100182495>

### **NEW QUESTION: 23**

What information can be found when viewing the Monitoring > Active Sessions page on an Avaya Aura Media Server? (Choose three.)

- A. Caller location
- B. QOS Analytics
- C. Destination IP address
- D. Element status
- E. Utilized Code
- F. Caller ID

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 24**

Which Linux command allows you to view the installed certificates on Avaya Aura Communication Manager (CM)?

- A. viewcerts
- B. displaycertificates
- C. show certs
- D. tlscertmanage
- E. start certmanager -f

**Answer: D ([LEAVE A REPLY](#))**

**NEW QUESTION: 25**

Which statements describe the 8D Troubleshooting Methodology? (Choose three.)

- A. It is eight steps that ensure a faster time to resolution.
- B. It is eight steps that define how to escalate third-party integration issues.
- C. It is eight steps that are only applicable to hardware issues.
- D. It is eight steps that guarantee a logical way to isolate an issue.
- E. It is eight steps that used to guarantee systems are operational after an implementation.
- F. It is eight steps that guarantee a thorough analysis of a failure, containment actions, full resolution, prevention for the future.

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 26**

Where are Avaya Aura Communication Manager (CM) translation files stored?

- A. /etc/home/defty
- B. /craft/home/xlations
- C. /var/home/Avaya/xln/
- D. /usr/local/cm/translations
- E. /var/home/ftp/pub
- F. /var/home/cm/translations

**Answer: F ([LEAVE A REPLY](#))**

**NEW QUESTION: 27**

A customer reports that when they make a call from an H.323 endpoint at the Main office to an H.323 telephone at the Branch office across the WAN, the call fails due to codec mismatch. Which five Avaya Aura Communication Manager (CM) System Administration Terminal (SAT) forms can be used to troubleshoot this problem? (Choose five.)

- A. ip-network-region
- B. codec
- C. media-gateway

- D. ip-network-map
- E. ip-services
- F. ip-codec-set
- G. network-region-control

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 28**

You are preparing to enable EASG to provide Avaya Services local and remote access for performing support and system optimization.

What are the three methods to enable EASG during the implementation? (Choose three.)

- A. Using the SDM after the deployment
- B. During the OVA deployment
- C. Using SMGR web GUI, check the "Enable EASG" check box on the desired component in the Inventory/Manage Elements screen
- D. Using the CLI command EASGManage after deployment
- E. Using SSH to access Avaya servers
- F. Open a ticket to Avaya services and request to enable it

**Answer:** B,C,D ([LEAVE A REPLY](#))

#### **NEW QUESTION: 29**

When comparing two Remote Worker SIP clients, one is an Avaya Communicator soft client and the other is a

96X1SIP hardphone, which statement is true?

- A. Avaya Communicator registers with SM via SBCE whereas the 96X1SIP telephone registers with CM via SBCE.
- B. The Avaya Communicator receives its SIP Controller List via 46xxsettings.txt file download, whereas the 96x1 receives its SIP Controller List by PPM download.
- C. If required, Avaya Communicator and 96X1SIP clients will automatically upgrade themselves from software stored on the SBCE.
- D. Avaya Communicator registers with CM via SBCE whereas the 96X1SIP telephone registers with SM via SBCE.
- E. Both Avaya Communicator and 96X1SIP clients register with SM via SBCE and receive their SIP Controller List by PPM download.

**Answer:** E ([LEAVE A REPLY](#))

#### **NEW QUESTION: 30**

When an Avaya SIP Telephone (AST) makes a call to another AST on the same Avaya Aura Communication Manager (CM), which of the following statements is true about the use of SIP trunk?

- A. It is used up to the point where calls are shuffled to establish a direct media path.
- B. It is not used at all.

- C. It is used only when the media path is established.
- D. It is used for the entire duration of the call.
- E. It is used just during call establishment and clear down only.

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 31**

How can you show that a session is actually reaching the Avaya Aura Media Server (AAMS)?

- A. From SSH, go to the AAMS and issue the list active sessions current.command
- B. In AAMS Element Manager select Monitoring > Active Sessions.
- C. From Avaya Aura System Manager (SMGR) home page, click on the Media Server, and click on the link: list active sessions.
- D. In AAMS Element Manager, Select System Status > Element Status > More Actions > displays active sessions.

**Answer: ([SHOW ANSWER](#))**

**Valid 72201X Dumps** shared by Actual4test.com for Helping Passing 72201X Exam!

**NEW QUESTION: 32**

You are submitting a package of information to Avaya Support for a case you are raising. The files that you are sending include a trace taken using WireShark.

Which file format will the file be in?

- A. jpg
- B. pcap
- C. ws
- D. rar

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 33**

When does Communication Manager insert the shortcut flag during call processing?

- A. During the origination phase (imsorig) of call processing
- B. During the termination phase (imsterm) of call processing
- C. During the dialing analysis phase (imsdialana) of call processing
- D. During the initialization phase (imsinit) of call processing

**Answer: D ([LEAVE A REPLY](#))**

**NEW QUESTION: 34**

Avaya support is monitoring a telephone system that is going down several times per day. They discovered a software error that keeps triggering an auto restart.

Which command can be used to determine the root cause?

- A. display restart all
- B. display interchangestatus
- C. display reset 4 all
- D. display server-status all
- E. display initcauses

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 35**

Which four traces options can be useful when troubleshooting SIP endpoint registration issues with a phone using TCP protocol? (Choose four.)

- A. SIP Registration
- B. RTP Flow
- C. Network Interface
- D. SIP Signaling
- E. TLS handshaking
- F. Call Processing
- G. PPM

**Answer:** A,D,E,F ([LEAVE A REPLY](#))

**NEW QUESTION: 36**

In which two ways can you verify the Avaya Aura Communication Manager (CM) license status? (Choose two.)

- A. Using the CM System Administration Terminal, run the status license command.
- B. Using the System Manager Web GUI, access the CM element > license menu.
- C. Using the CM Linux console interface, run the statuslicense command.
- D. Using the CM System Administration Interface, access the WebLM > status license menu.
- E. Using the CM System Administration Terminal, run the test license command.

**Answer:** C,E ([LEAVE A REPLY](#))

**NEW QUESTION: 37**

Which three statements regarding Full and Half call model processing are true? (Choose three.)

- A. Avaya Aura Communication Manager (CM) configured as a Feature Server performs Full call model processing.
- B. Avaya Aura Session Manager (SM) always performs Half call model processing.
- C. Avaya Aura Session Manager (SM) always performs Full call model processing.
- D. CM performs Half call model processing when it acts as a SIP user agent.

E. Avaya Aura Communication Manager (CM) configured as an Evolution Server performs Full call model processing.

F. CM performs Full call model processing when it acts as a SIP registrar.

**Answer: A,B,D (LEAVE A REPLY)**

### NEW QUESTION: 38

A customer wants to implement CAC Sharing between the Session Manager (SM) in Main office and Communication Manager located in a branch location. What are the steps involved in implementing CAC Sharing?

**A.** Configure Network Regions and Network Regions Group in Communication Manager, assign Bandwidth limits to the location, enable Shared Bandwidth Management for CM SIP entity in Session Manager.

**B.** Configure Network Regions and Network Regions Group in Communication Manager, assign Bandwidth limits to the Entity Link, enable Shared Bandwidth Management for CM SIP entity in Session Manager.

**C.** Configure Network Regions and Network Regions Group in Communication Manager, enable Shared Bandwidth Management, assign Bandwidth limits to the location, enable Shared Bandwidth Management for CM SIP entity in Session Manager.

**D.** Configure Network Regions and Shared Bandwidth Management Groups in Communication Manager, assign Bandwidth limits to the location, enable Shared Bandwidth Management for CM SIP entity in Session Manager.

**E.** Configure Network Regions and Shared Bandwidth Management Groups in Communication Manager, enable Shared Bandwidth Management, assign Bandwidth limits to the location, enable Shared Bandwidth Management for Network Region SIP entity in Session Manager.

**Answer: (SHOW ANSWER)**

Explanation

Graphical user interface, text, application Description automatically generated

The screenshot displays the Avaya Aura Configuration Manager interface. On the left is a navigation menu with options: Adaptations, SIP Entities (selected), Entity Links, Time Ranges, Routing Policies, Dial Patterns, Regular Expressions, and Defaults. The main content area shows configuration options for SIP Entities, including:

- Securable:
- Call Detail Recording: both
- Loop Detection Mode: Off
- SIP Link Monitoring: Use Session Manager Configuration
- CRLF Keep Alive Monitoring: CRLF Monitoring Disabled
- Supports Call Admission Control:
- Shared Bandwidth Manager:
- Primary Session Manager Bandwidth Association: SessionManager
- Backup Session Manager Bandwidth Association: SessionManager\_02

Watermarks for 'freepdfdumps.com' and 'AVAYA' are visible over the interface.

### NEW QUESTION: 39

Which two traceSM options can be useful when trouble-shooting SIP endpoint registration issues with a phone using TCP protocol? (Choose two.)

- A. SIP Registration
- B. PPM
- C. TLS Handshaking
- D. Call Processing

**Answer: A,C ([LEAVE A REPLY](#))**

**NEW QUESTION: 40**

Which two critical pieces of Avaya Aura Communication Manager (CM) information can be obtained from the ECS log located in the /var/log/ecs directory? (Choose two.)

- A. Denial events
- B. A log of systems restarts
- C. Capacity and certificate status
- D. Alarms and errors
- E. Licensing status

**Answer: B,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 41**

What do SIP messages captured using the traceSM with "a=showSM" option display as opposed to a regular SIP trace?

- A. The message flow details from the SM100 to the SIP registrar
- B. The message flow details from the SM100 to the Avaya Aura Session Manager (SM) Call Processing element
- C. The message flow details from SM100 to the PPM servlet
- D. The message flow details from the network to the SIP container
- E. The message flow details from the SM100 to Avaya Aura Communication Manager (CM)

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 42**

Why is the initial REGISTER request from a SIP endpoint rejected by Avaya Aura Session Manager (SM)?

- A. It must confirm the reliable delivery of this initial REGISTER request.
- B. System Manager needs time to look-up the Communication Address in its database.
- C. The initial REGISTER request does not contain authentication details.
- D. The initial REGISTER request is rejected only if the user provided the wrong security code/password.

**Answer: D ([LEAVE A REPLY](#))**

**NEW QUESTION: 43**

Which screen in the Avaya Aura Media Server will display the Media Server service status and Operational State?

- A. Monitoring
- B. Element Status
- C. Server Status
- D. Cluster Status
- E. System Manager Dashboard

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 44**

SIP user 1011111 and SIP user 1011112 are both based on the same Session Manager with access to a CM Evolution server. Given the following actions:

Session Manager searches for the called party in the SIP registry, finds it, registers it and routes the call to it.

SIP user 1011111 calls SIP user 1011112, and an Invite request is sent to Session Manager.

Session Manager verifies SIP user 1011111 in the SIP registry and authenticates it. Session Manager checks the SIP user's profile for sequenced applications and (in this example) routes the request to Communication Manager.

Endpoints negotiate codecs and media, and RTP is sent between endpoints.

Communication Manager receives the request from Session Manager, carries out full-call model processing for both endpoints, and routes the call back to Session Manager.

If 1011111 makes a call to 1011112, in which order will the actions take place?

- A. 2, 3, 5, 4, 1
- B. 2, 3, 5, 1, 4
- C. 2, 1, 3, 5, 4
- D. 1, 2, 3, 5, 4
- E. 2, 3, 1, 4, 5

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 45**

Avaya Aura System Manager (SMGR) holds a copy of the Avaya Aura Communication Manager (CM) database, and it is important that the database is kept identical between SMGR and CM.

If they become un-synchronized, what should be done to restore synchronization again?

- A. Go to the Inventory > Synchronize > Communication System, and send the database from SMGR to CM.
- B. Go to the Replication page and issue a Repair of the database on SMGR.
- C. Issue a save translations allcommand in CM.
- D. Go to the Inventory > Synchronize > Communication System, and synchronize the database from CM to SMGR.

**Answer: D ([LEAVE A REPLY](#))**

**NEW QUESTION: 46**

Which critical Avaya Aura Communication Manager (CM) information can be obtained from the ECS log located in the /var/log/ecs directory? (Choose all that apply.)

- A. Capacity and certificate status
- B. Denial events
- C. Licensing status
- D. A log of system restarts
- E. Status of System Manager
- F. Alarms and errors

**Answer: D,F ([LEAVE A REPLY](#))**

**Valid 72201X Dumps** shared by Actual4test.com for Helping Passing 72201X Exam! **NEW QUESTION: 47**

What are the three types of certificates used in the Avaya Aura server?

- A. Root or a Certificate Authority (CA) certificate and Server Identity certificates
- B. Root or a Certificate Authority (CA) and SIP default certificates
- C. Site Root certificates and Security certificates
- D. Backup server and default certificates
- E. Intermediate certificates and Domain certificates

**Answer: ([SHOW ANSWER](#))**

Explanation

Source: <https://downloads.avaya.com/css/P8/documents/100181346>

**NEW QUESTION: 48**

Immediately after registration, how does an Avaya SIP telephone learn if any of its Call Forward features are active right now?

- A. It sends a Subscribe - avaya-ccs-profile event package to Avaya Aura Session Manager (SM); Avaya Aura Session Manager (SM) in turn replies with a Notify-avaya ccs-profile.
- B. It queries the LDAP database for active feature status.
- C. It sends a PPM getDeviceData request to Avaya Aura Session Manager (SM); Avaya Aura Session Manager (SM) replies with a getDeviceData response.
- D. It sends a Subscribe - avaya-cm-feature-status event package to Avaya Aura Communication Manager (CM) via Avaya Aura Session Manager (SM).

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 49**

During installation, the Trust Management Service establishes trust between different entities through the exchange of security certificates. Which three entities does the Trust Management Service establish trust between?

- A. Media Gateway Controller
- B. Identity Management
- C. Certificate Authority
- D. System Manager
- E. Communication Manager
- F. Session Manager

**Answer:** C,E,F ([LEAVE A REPLY](#))

**NEW QUESTION: 50**

A customer called Avaya Support stating that shortly after some maintenance work was done, they cannot make or receive calls.

Which command in Avaya Aura Communication Manager (CM) can the administrator execute, to determine if the links to the H.248 Gateways are up?

- A. Status signaling group x
- B. Status media-gateways
- C. Trace trunk x
- D. Status health

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 51**

A customer reports that when they make a call from an H.323 endpoint at the main office to an H.323 telephone at the branch office across the WAN, the call fails due to codec mismatch.

If misconfigured, which three Avaya Aura Communication Manager (CM) forms can be causing this problem? (Choose three.)

- A. node-names ip
- B. ip-services
- C. ip-network-region
- D. ip-codec-set
- E. ip-network-map

**Answer:** C,D,E ([LEAVE A REPLY](#))

**NEW QUESTION: 52**

In a SIP trace capturing PPM messages, which device sends the getCallHistory PPM request, and what is it requesting?

- A. Communication Manager; It is requesting the call log history from System Manager.

- B. the SIP endpoint; It is requesting its contact list to be retrieved from Session Manager.
- C. System Manager; It is requesting the call log history from Communication Manager.
- D. the SIP endpoint; It is requesting its call log to be retrieved from Session Manager.
- E. the Avaya Aura Session Manager (SM) server; It is requesting the call history from System Manager.

**Answer: D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 53**

A customer called Avaya Support after their telecom administrator was unable to add 50 new telephones for new hires. Avaya Support determined that the number of telephones exceeded the capacity the system could support. Which pre-implementation step was omitted?

- A. Testing all third-party equipment and software.
- B. Providing accurate licensing specifications.
- C. Accessing support.avaya.com to verify customer systems compatibility.
- D. Ensuring that the hardware meets the requirements.
- E. Verifying that the version installed is compatible with existing versions.

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 54**

A customer has added a CS1000 SIP Entity and Entity Link using TLS port 5061, but users are unable to call any Avaya Aura users that are connected via the same Avaya Aura Session Manager (SM). Which two of the following traces or logs are most relevant to debugging this problem and should be included in the trouble ticket raised with Tier 3 support?

- A. traceSM with TLS handshaking enabled on SM
- B. the ppm.log in /var/log/Avaya/jboss/SessionManager on SM
- C. "tshark -i eth1 -w <capturefilename>" on SM
- D. the latest /var/log/ecs logfile on Avaya Aura Communication Manager
- E. "list trace tac xxx", where xxx is the TAC of the trunk group between Avaya Aura Communication Manager and SM
- F. System Event Log (SEL) on the CS1000

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 55**

How can you show that a session is actually reaching the Avaya Aura Media Server (AAMS)?

- A. In AAMS Element Manager select Monitoring > Active Sessions.
- B. Use the command 'show sessions' on the Media Server CLI.
- C. From Avaya Aura System Manager (SMGR) home page, click on the Media Server, and click on the link: list active sessions.
- D. In AAMS Element Manager, Select System Status > Element Status > More Actions > display active sessions.
- E. From SSH, go to the AAMS and issue the list active sessions current. command.

Answer: A ([LEAVE A REPLY](#))
