NEW QUESTION: 1

There are four policy types available for each policy package. What are those policy types?

- A. Access Control, Threat Prevention, Mobile Access and HTTPS Inspection
- B. Access Control, Custom Threat Prevention, Autonomous Threat Prevention and HTTPS Inspection
- C. There are only three policy types: Access Control, Threat Prevention and NAT.
- D. Access Control, Threat Prevention, NAT and HTTPS Inspection

Answer: D (LEAVE A REPLY)

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_SecurityManagement_AdminGuide/Topics-SECMG/Working-with-Policy-Packages.htm

NEW QUESTION: 2

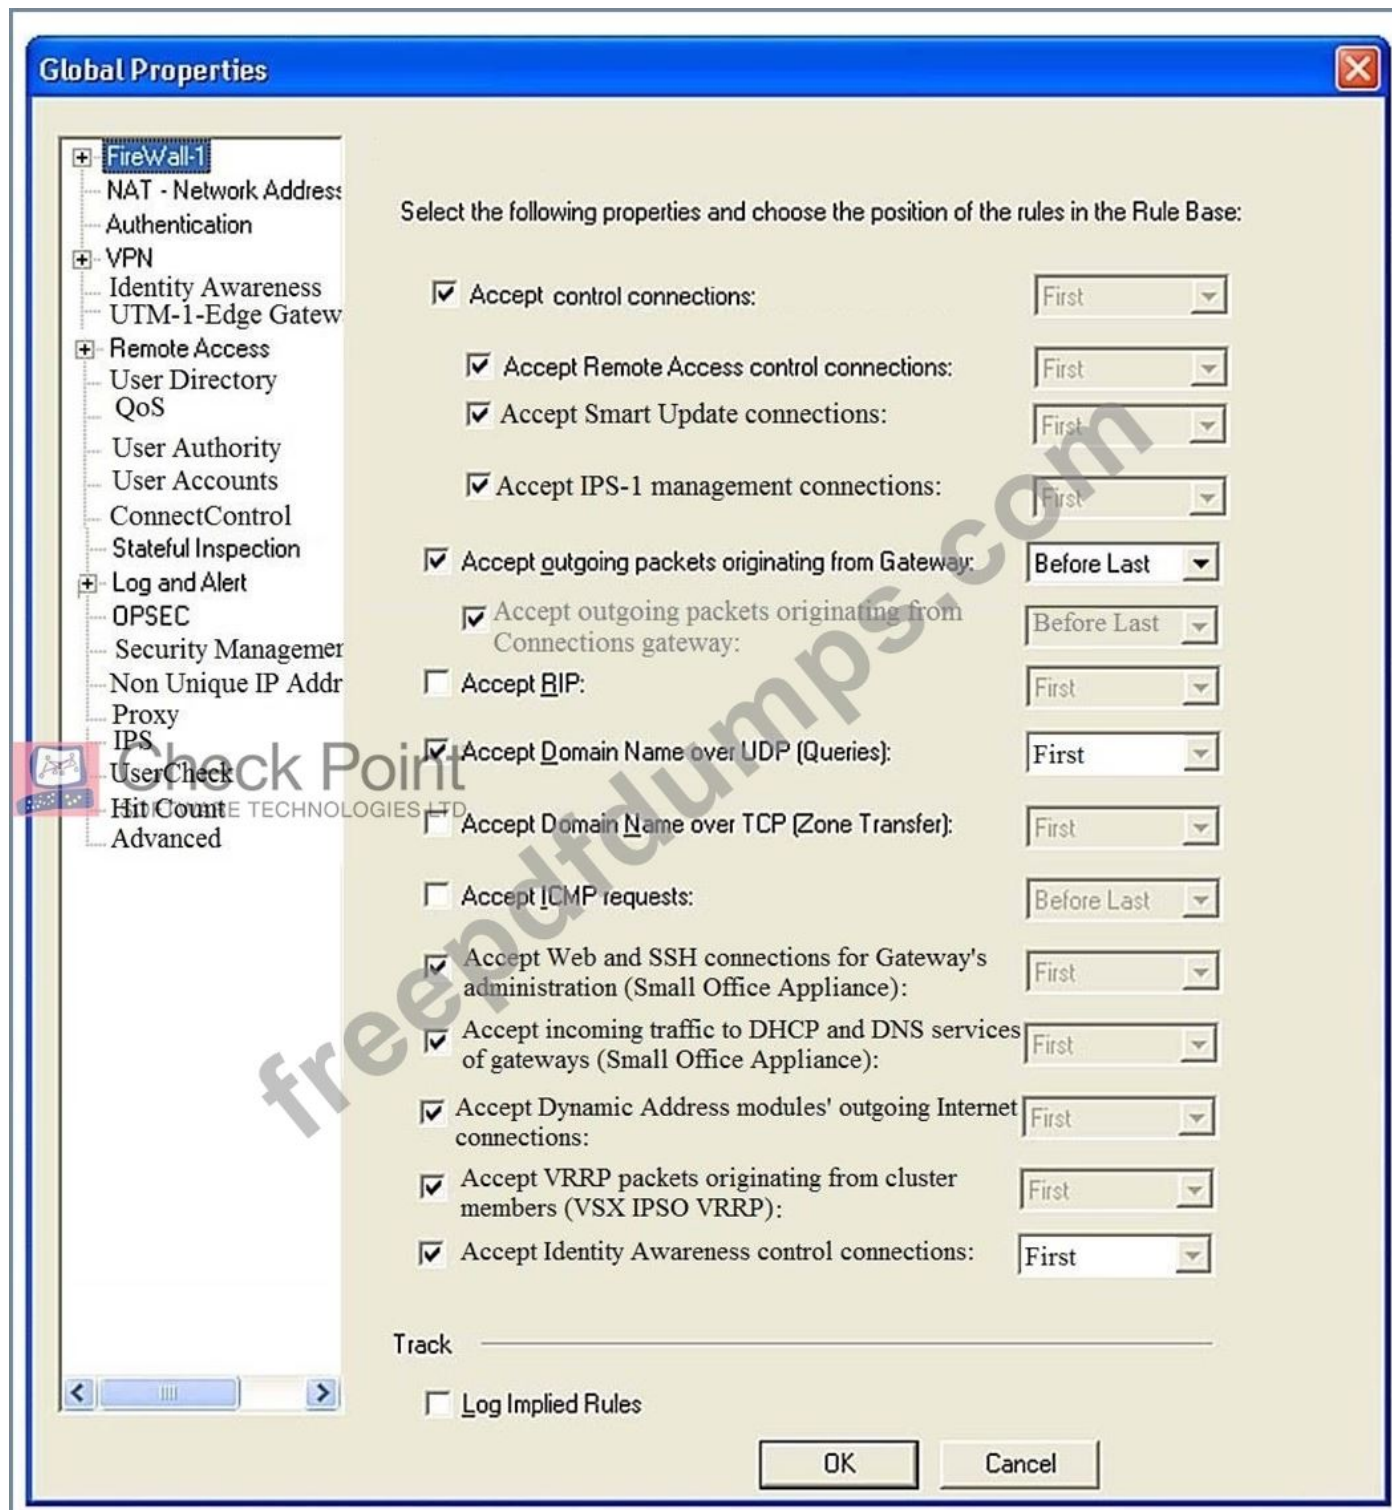

What is the best sync method in the ClusterXL deployment?

- A. Use 1 cluster + 1st sync
- B. Use 1 dedicated sync interface
- C. Use 3 clusters + 1st sync + 2nd sync + 3rd sync
- D. Use 2 clusters + 1st sync + 2nd sync

Answer: B (LEAVE A REPLY)

NEW QUESTION: 3

Consider the Global Properties following settings:

The selected option "Accept Domain Name over UDP (Queries)" means:

- A. All UDP Queries will be accepted by the traffic allowed by first explicit rule written by Administrator in a Security Policy.
- B. No UDP Queries will be accepted by the traffic allowed through all interfaces and this will be done before first explicit rule written by Administrator in a Security Policy.
- C. UDP Queries will be accepted by the traffic allowed only through interfaces with external anti-spoofing topology and this will be done before first explicit rule written by Administrator in a Security Policy.
- D. All UDP Queries will be accepted by the traffic allowed through all interfaces and this will be done before first explicit rule written by Administrator in a Security Policy.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 4

Choose what BEST describes a Session

- A. Sessions ends when policy is pushed to the Security Gateway.
- B. Sessions locks the policy package for editing.
- C. Starts when an Administrator publishes all the changes made on SmartConsole
- D. Starts when an Administrator logs in through SmartConsole and ends when the Administrator logs out.

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 5

Fill in the blank: Service blades must be attached to a _____.

- A. Management container
- B. Security Gateway
- C. Management server
- D. Security Gateway container

Answer: [B \(LEAVE A REPLY\)](#)

NEW QUESTION: 6

Which tool provides a list of trusted files to the administrator so they can specify to the Threat Prevention blade that these files do not need to be scanned or analyzed?

- A. ThreatWiki
- B. IPS Protections
- C. Whitelist Files
- D. AppWiki

Answer: [A \(LEAVE A REPLY\)](#)

NEW QUESTION: 7

True or False: The destination server for Security Gateway logs depends on a Security Management Server configuration.

- A. True, all Security Gateways will only forward logs with a SmartCenter Server configuration
- B. False, log servers are enabled on the Security Gateway General Properties
- C. True, all Security Gateways forward logs automatically to the Security Management Server
- D. False, log servers are configured on the Log Server General Properties

Answer: [A \(LEAVE A REPLY\)](#)

NEW QUESTION: 8

The SmartEvent R80 Web application for real-time event monitoring is called:

- A. SmartView
- B. SmartView Monitor
- C. SmartEventWeb
- D. There is no Web application for SmartEvent

Answer: [C \(LEAVE A REPLY\)](#)

NEW QUESTION: 9

What is the main difference between Static NAT and Hide NAT?

- A. Static NAT only allows incoming connections to protect your network.
- B. Static NAT allow incoming and outgoing connections. Hide NAT only allows outgoing connections.
- C. Static NAT only allows outgoing connections. Hide NAT allows incoming and outgoing connections.
- D. Hide NAT only allows incoming connections to protect your network.

Answer: B (LEAVE A REPLY)

Hide NAT only translates the source address to hide it behind a gateway.

NEW QUESTION: 10

Which method below is NOT one of the ways to communicate using the Management API's?

- A. Sending API commands over an http connection using web-services
- B. Typing API commands from a dialog box inside the SmartConsole GUI application
- C. Typing API commands using the "mgmt_cli" command
- D. Typing API commands using Gaia's secure shell (clash)19+

Answer: A (LEAVE A REPLY)

NEW QUESTION: 11

What needs to be configured if the NAT property 'Translate destination on client side' is not enabled in Global properties?

- A. Use the file local.arp to add the ARP entries for NAT to work
- B. Enabling 'Allow bi-directional NAT' for NAT to work correctly
- C. Nothing, the Gateway takes care of all details necessary
- D. A host route to route to the destination IP

Answer: C (LEAVE A REPLY)

NEW QUESTION: 12

What command from the CLI would be used to view current licensing?

- A. show license -s
- B. cplic print
- C. license view
- D. fw ctl tab -t license -s

Answer: B (LEAVE A REPLY)

NEW QUESTION: 13

What are the three deployment options available for a security gateway?

- A. Standalone, Distributed, and Bridge Mode
- B. Bridge Mode, Remote, and Standalone
- C. Remote, Standalone, and Distributed
- D. Distributed, Bridge Mode, and Remote

Answer: A (LEAVE A REPLY)

https://sc1.checkpoint.com/documents/R76/CP_R76_Installation_and_Upgrade_Guide-webAdmin/86429.htm

NEW QUESTION: 14

Name the file that is an electronically signed file used by Check Point to translate the features in the license into a code?

- A. Both License (.lic) and Contract (.xml) files
- B. cp.macro
- C. Contract file (.xml)
- D. license File (.lie)

Answer: ([SHOW ANSWER](#))

https://supportcenter.checkpoint.com/supportcenter/portal?eventSubmit_doGoviewsolutiondetails=&solutionid=sk96217

NEW QUESTION: 15

What is the main objective when using Application Control?

- A. To filter out specific content.
- B. To assist the firewall blade with handling traffic.
- C. To see what users are doing.
- D. Ensure security and privacy of information.

Answer: ([SHOW ANSWER](#))

<https://www.checkpoint.com/cyber-hub/network-security/what-is-application-control/>

NEW QUESTION: 16

SmartEvent does NOT use which of the following procedures to identify events:

- A. Matching a log against local exclusions
- B. Create an event candidate
- C. Matching a log against each event definition
- D. Matching a log against global exclusions

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 17

Which statement describes what Identity Sharing is in Identity Awareness?

- A. Management servers can acquire and share identities with Security Gateways
- B. Users can share identities with other users
- C. Security Gateways can acquire and share identities with other Security Gateways

D. Administrators can share identities with other administrators

Answer: (SHOW ANSWER)

Identity Sharing

Best Practice - In environments that use many Security Gateways and AD Query, we recommend that you set only one Security Gateway to acquire identities from a given Active Directory domain controller for each physical site. If more than one Security Gateway gets identities from the same AD server, the AD server can become overloaded with WMI queries.

Set these options on the Identity Awareness > Identity Sharing page of the Security Gateway object:

NEW QUESTION: 18

Examine the sample Rule Base.

No.	Name	Source	Destination	VPN	Services & Applications	Action	Track
No Log (1)							
1	Do not log	* Any	* Any	* Any	NBT	Drop	None
Management Rules (2-3)							
2	Allow Mgmt	Admins	ext-gateway mgmt	* Any	https ssh	Accept	Log
3	Stealth Rule	* Any	mgmt ext-gateway	* Any	* Any	Drop	Log
Inbound Rules (4-5)							
4	Web Inbound	* Any	webserver	* Any	http https	Accept	Log
5	Mail Inbound	* Any	mailserver	* Any	* Any	Accept	Log
New Section (6)							
6	Webmaster access to servers	* Any	webserver	* Any	https ssh ftp	Accept	Log
Clean Up (7)							
7	Cleanup rule	* Any	* Any	* Any	* Any	Drop	Log

What will be the result of a verification of the policy from SmartConsole?

- A. Verification Error. Empty Source-List in Rule 5 (Mail Inbound)
- B. No errors or Warnings
- C. Verification Error. Rule 4 (Web Inbound) hides Rule 6 (Webmaster access)
- D. Verification Error. Rule 7 (Clean-Up Rule) hides Implicit Clean-up Rule

Answer: C (LEAVE A REPLY)

NEW QUESTION: 19

An administrator wishes to use Application objects in a rule in their policy but there are no Application objects listed as options to add when clicking the "+" to add new items to the "Services & Applications" column of a rule. What should be done to fix this?

- A. The "Application Control" blade should be enabled on a gateway
- B. The administrator should first create some applications to add to the rule.
- C. The administrator should drag-and-drop the needed Application objects from the Object Explorer into the new rule
- D. "Applications & URL Filtering" should first be enabled on the policy layer where the rule is being created.

Answer: (SHOW ANSWER)

NEW QUESTION: 20

Fill in the blanks: A ____ license requires an administrator to designate a gateway for attachment whereas a _____ license is automatically attached to a Security Gateway.

- A. Central; local
- B. Local; central
- C. Formal; corporate
- D. Local; formal

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

Which command shows the installed licenses in Expert mode?

- A. cplic print
- B. show licenses
- C. fwlic print
- D. print cplic

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 22

Which of the following is used to enforce changes made to a Rule Base?

- A. Install policy
- B. Activate policy
- C. Save changes
- D. Publish database

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 23

Which SmartConsole tab shows logs and detects security threats, providing a centralized display of potential attack patterns from all network devices?

- A. Manage Setting
- B. Gateway and Servers
- C. Security Policies
- D. Logs and Monitor

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 24

To ensure that VMAC mode is enabled, which CLI command you should run on all cluster members? Choose the best answer.

- A. cphaprob -a if
- B. fw ctl get int fwha_vmac_global_param_enabled; result of command should return value 1
- C. fw ctl set int fwha vmac global param enabled
- D. fw ctl get int fwha vmac global param enabled; result of command should return value 1

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 25

Check Point ClusterXL Active/Active deployment is used when:

- A. Only when there is Multicast solution set up
- B. There is Load Sharing solution set up
- C. There is High Availability solution set up
- D. Only when there is Unicast solution set up

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 26

What is the purpose of a Stealth Rule?

- A. A rule that allows administrators to access SmartDashboard from any device.
- B. A rule at the end of your policy to drop any traffic that is not explicitly allowed.
- C. To drop any traffic destined for the firewall that is not otherwise explicitly allowed.
- D. A rule used to hide a server's IP address from the outside world.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

What kind of NAT enables Source Port Address Translation by default?

- A. Automatic Static NAT
- B. Manual Hide NAT
- C. Automatic Hide NAT
- D. Manual Static NAT

Answer: ([SHOW ANSWER](#))

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_SecurityManagement_AdminGuide/Topics-SECMG/NAT-Rules.htm

NEW QUESTION: 28

Which software blade does NOT accompany the Threat Prevention policy?

- A. Anti-virus
- B. Threat Emulation
- C. Application Control and URL Filtering
- D. IPS

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 29

What is the BEST command to view configuration details of all interfaces in Gaia CLISH?

- A. ifconfig -a
- B. show interfaces detail
- C. show configuration interface
- D. show interfaces

Answer: C (LEAVE A REPLY)

NEW QUESTION: 30

What is true about the IPS-Blade?

- A. in R80, IPS is managed by the Threat Prevention Policy
- B. in R80, the GeoPolicy Exceptions and the Threat Prevention Exceptions are the same
- C. in R80, IPS Exceptions cannot be attached to "all rules"
- D. in R80, in the IPS Layer, the only three possible actions are Basic, Optimized and Strict

Answer: A (LEAVE A REPLY)

NEW QUESTION: 31

R80 is supported by which of the following operating systems:

- A. Gaia only
- B. Gaia, SecurePlatform, and Windows
- C. SecurePlatform only
- D. Windows only

Answer: A (LEAVE A REPLY)

NEW QUESTION: 32

Which two Identity Awareness daemons are used to support identity sharing?

- A. Policy Activation Point (PAP) and Policy Decision Point (PDP)
- B. Policy Manipulation Point (PMP) and Policy Activation Point (PAP)
- C. Policy Enforcement Point (PEP) and Policy Manipulation Point (PMP)
- D. Policy Decision Point (PDP) and Policy Enforcement Point (PEP)

Answer: D (LEAVE A REPLY)

https://supportcenter.checkpoint.com/supportcenter/portal?eventSubmit_doGoviewsolutiondetails=&solutionid=sk88520

NEW QUESTION: 33

Which of the following is NOT a tracking option? (Select three)

- A. Network log
- B. Log
- C. Partial log
- D. Full log

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 34

To enforce the Security Policy correctly, a Security Gateway requires:

- A. a routing table
- B. awareness of the network topology
- C. a Demilitarized Zone
- D. a Security Policy install

Answer: B ([LEAVE A REPLY](#))

The network topology represents the internal network (both the LAN and the DMZ) protected by the gateway. The gateway must be aware of the layout of the network topology to:

NEW QUESTION: 35

What are the advantages of a "shared policy" in R80?

- A. Allows the administrator to share a policy between all the users identified by the Security Gateway
- B. Allows the administrator to share a policy between all the administrators managing the Security Management Server
- C. Allows the administrator to share a policy so that it is available to use in another Policy Package
- D. Allows the administrator to install a policy on one Security Gateway and it gets installed on another managed Security Gateway

Answer: C ([LEAVE A REPLY](#))

Ref: https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_SecurityManagement_AdminGuide/Topics-SECMG/SmartConsole-Toolbars-Shared-Policies.htm

NEW QUESTION: 36

Which of the following commands is used to monitor cluster members?

- A. cphaprob state
- B. cphaprob status
- C. cluster state
- D. cphaprob

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 37

Fill in the blank: When tunnel test packets no longer invoke a response, SmartView Monitor displays _____ for the given VPN tunnel.

- A. Inactive
- B. Down
- C. No Response
- D. Failed

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 38

What is the Transport layer of the TCP/IP model responsible for?

- A. It transports packets as datagrams along different routes to reach their destination.
- B. It defines the protocols that are used to exchange data between networks and how host programs interact with the Application layer.
- C. It manages the flow of data between two hosts to ensure that the packets are correctly assembled and delivered to the target application.
- D. It deals with all aspects of the physical components of network connectivity and connects with different network types.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 39

When using Monitored circuit VRRP, what is a priority delta?

- A. When an interface fails the priority delta decides if the other interfaces takes over
- B. When an interface fails the priority delta is subtracted from the priority
- C. When an interface fails the delta claims the priority
- D. When an interface fails the priority changes to the priority delta

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 40

Which of the following is NOT a valid deployment option for R80?

- A. Distributed
- B. Bridge Mode
- C. All-in-one (stand-alone)
- D. CloudGuard

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 41

Which type of Check Point license is tied to the IP address of a specific Security Gateway and cannot be transferred to a gateway that has a different IP address?

- A. Formal
- B. Central
- C. Corporate
- D. Local

Answer: ([SHOW ANSWER](#))

Local licensing is associated with the IP address of the Security Gateway, to which the license will be applied. Each time the IP address of the Security Gateway changes, a new license must be generated and installed.

https://supportcenter.checkpoint.com/supportcenter/portal?eventSubmit_doGoviewsolutiondetails=&solutionid=sk62685

NEW QUESTION: 42

The Network Operations Center administrator needs access to Check Point Security devices mostly for troubleshooting purposes. You do not want to give her access to the expert mode, but she still should be able to run tcpdump. How can you achieve this requirement?

- A. Create a new access role. Add expert-mode access to the role. Create new user with any UID and assign role to the user.
- B. Add tcpdump to CLISH using add command. Create a new access role. Add tcpdump to the role. Create new user with any UID and assign role to the user.
- C. Create a new access role. Add expert-mode access to the role. Create new user with UID 0 and assign role to the user.
- D. Add tcpdump to CLISH using add command. Create a new access role. Add tcpdump to the role. Create new user with UID 0 and assign role to the user.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 43

Which tool allows you to monitor the top bandwidth on smart console?

- A. Logs & Monitoring
- B. Smart Event
- C. Gateways & Servers Tab
- D. SmartView Monitor

Answer: (SHOW ANSWER)

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_LoggingAndMonitoring_AdminGuide/Topics-LMG/Monitoring-Traffic-or-System-Counters.htm

NEW QUESTION: 44

Fill in the blank: Once a certificate is revoked from the Security GateWay by the Security Management Server, the certificate information is _____.

- A. Sent to the Internal Certificate Authority.
- B. Sent to the Security Administrator.
- C. Stored on the Security Management Server.
- D. Stored on the Certificate Revocation List.

Answer: (SHOW ANSWER)

NEW QUESTION: 45

How many users can have read/write access in Gaia Operating System at one time?

- A. One
- B. Three
- C. Two
- D. Infinite

Answer: A (LEAVE A REPLY)

if another user has r/w access, you need to use "lock database override" or "unlock database" to claim r/w access. Ref:

https://sc1.checkpoint.com/documents/R80.20_GA/WebAdminGuides/EN/CP_R80.20_Gaia_AdminGuide/html_frameset.htm?topic=documents/R80.20_GA/WebAdminGuides/EN/CP_R80.20_Gaia_AdminGuide/162435

NEW QUESTION: 46

True or False: More than one administrator can log into the Security Management Server with SmartConsole with write permission at the same time.

- A. True, every administrator works on a different database that is independent of the other administrators
- B. False, this feature has to be enabled in the Global Properties.
- C. True, every administrator works in a session that is independent of the other administrators
- D. False, only one administrator can login with write permission

Answer: C (LEAVE A REPLY)

Multiple R/W admins can log into SmartConsole and edit rules but they can't edit a rule that is being worked on by another admin.

Valid 156-215.81 Dumps shared by Actual4test.com for Helping Passing 156-215.81 Exam! NEW QUESTION: 47

What is a reason for manual creation of a NAT rule?

- A. In R80 all Network Address Translation is done automatically and there is no need for manually defined NAT-rules.
- B. The public IP-address is different from the gateway's external IP
- C. Network Address Translation of RFC1918-compliant networks is needed to access the Internet.
- D. Network Address Translation is desired for some services, but not for others.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 48

You want to store the GAiA configuration in a file for later reference. What command should you use?

- A. write mem <filename>
- B. save configuration <filename>
- C. save config -o <filename>
- D. show config -f <filename>

Answer: B (LEAVE A REPLY)

NEW QUESTION: 49

Fill in the blank: _____ is the Gaia command that turns the server off.

- A. sysdown
- B. shut-down
- C. exit
- D. halt

Answer: D (LEAVE A REPLY)

NEW QUESTION: 50

What are the three types of UserCheck messages?

- A. inform, ask, and block
- B. block, action, and warn
- C. action, inform, and ask
- D. ask, block, and notify

Answer: A (LEAVE A REPLY)

Inform User

Inform

Shows when the action for the ruleClosed is inform. It informs users what the company policy is for that site.

Blocked Message

Block

Shows when a request is blocked.

Ask User

Ask

Shows when the action for the rule is ask. It informs users what the company policy is for that site and they must click OK to continue to the site.

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_DataLossPrevention_AdminGuide/Topics-DLPG/UserCheck-Page.htm?tocpath=UserCheck%20Interaction%20Objects%7C_____3

NEW QUESTION: 51

Gaia includes Check Point Upgrade Service Engine (CPUSE), which can directly receive updates for what components?

- A. The Security Gateway (SG) and Security Management Server (SMS) software and the CPUSE engine.
- B. Licensed Check Point products for the Gaia operating system and the Gaia operating system itself.
- C. The CPUSE engine and the Gaia operating system.
- D. The Gaia operating system only.

Answer: (SHOW ANSWER)

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_Gaia_AdminGuide/Topics-GAG/CPUSE.htm

NEW QUESTION: 52

When changes are made to a Rule base, it is important to _____ to enforce changes.

- A. Install policy
- B. Publish database
- C. Activate policy
- D. Save changes

Answer: B (LEAVE A REPLY)

NEW QUESTION: 53

When configuring LDAP with User Directory integration, changes applied to a User Directory template are:

- A. Not reflected for any users unless the local user template is changed.
- B. Not reflected for any users who are using that template.
- C. Reflected for all users who are using that template and if the local user template is changed as well.

D. Reflected immediately for all users who are using that template.

Answer: D ([LEAVE A REPLY](#))

You can change the User Directory templates. Users associated with this template get the changes immediately. If you change user definitions manually in SmartConsole, the changes are immediate on the server.

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_SecurityManagement_AdminGuide/Topics-SECMG/Managing-Users-on-User-Directory-Server.htm

NEW QUESTION: 54

To view the policy installation history for each gateway, which tool would an administrator use?

- A. Installation history
- B. Gateway installations
- C. Gateway history
- D. Revisions

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 55

Which is a suitable command to check whether Drop Templates are activated or not?

- A. fw ctl templates -d
- B. fw ctl get int activate_drop_templates
- C. fwaccel stats
- D. fwaccel stat

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 56

Which Threat Prevention Software Blade provides comprehensive protection against malicious and unwanted network traffic, focusing on application and server vulnerabilities?

- A. Anti-bot
- B. Anti-Spam
- C. Anti-Virus
- D. IPS

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 57

Fill in the blank: In order to install a license, it must first be added to the _____.

- A. User Center
- B. Package repository
- C. License and Contract repository
- D. Download Center Web site

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 58

To increase security, the administrator has modified the Core protection 'Host Port Scan' from 'Medium' to 'High' Predefined Sensitivity. Which Policy should the administrator install after Publishing the changes?

- A. The Access Control and Threat Prevention Policies.
- B. The Access Control Policy.
- C. The Access Control & HTTPS Inspection Policy.
- D. The Threat Prevention Policy.

Answer: D (LEAVE A REPLY)

<https://supportcenter.checkpoint.com/supportcenter/portal?>

NEW QUESTION: 59

What Check Point technologies deny or permit network traffic?

- A. ACL, SandBlast, MPT
- B. IPS, Mobile Threat Protection
- C. Packet Filtering, Stateful Inspection, Application Layer Firewall.
- D. Application Control, DLP

Answer: (SHOW ANSWER)

NEW QUESTION: 60

Which tool is used to enable ClusterXL?

- A. SmartConsole
- B. SmartUpdate
- C. sysconfig
- D. cpconfig

Answer: (SHOW ANSWER)

NEW QUESTION: 61

Access roles allow the firewall administrator to configure network access according to:

- A. remote access clients.
- B. a combination of computer or computer groups and networks.
- C. users and user groups.
- D. All of the above.

Answer: (SHOW ANSWER)

To create an access role:

The Access Role window opens.

Your selection is shown in the Networks node in the Role Preview pane.

A window opens. You can search for Active Directory entries or select them from the list.

You can search for AD entries or select them from the list.

The access role is added to the Users and Administrators tree.

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_SecurityManagement_AdminGuide/Topics-SECMG/Access-Roles.htm

NEW QUESTION: 62

What is the default tracking option of a rule?

- A. Tracking
- B. Log
- C. None
- D. Alert

Answer: (SHOW ANSWER)

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_LoggingAndMonitoring_AdminGuide/Topics-LMG/Tracking-Options.htm

NEW QUESTION: 63

Customer's R80 management server needs to be upgraded to R80.10. What is the best upgrade method when the management server is not connected to the Internet?

- A. CPUSE online upgrade
- B. SmartUpdate upgrade
- C. Export R80 configuration, clean install R80.10 and import the configuration
- D. CPUSE offline upgrade

Answer: (SHOW ANSWER)

NEW QUESTION: 64

Which Threat Prevention Software Blade provides protection from malicious software that can infect your network computers?

(Choose the best answer.)

- A. IPS
- B. Anti-Virus
- C. Anti-Malware
- D. Content Awareness

Answer: (SHOW ANSWER)

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_ThreatPrevention_AdminGuide/Topics-TPG/The_Check_Point_Threat_Prevention_Solution.htm

"Check Point Antivirus Software Blade prevents and stops threats such as malware, viruses, and Trojans from entering and infecting a network"

NEW QUESTION: 65

When using Automatic Hide NAT, what is enabled by default?

- A. Source Port Address Translation (PAT)
- B. Static NAT
- C. Static Route
- D. HTTPS Inspection

Answer: A ([LEAVE A REPLY](#))

Hiding multiple IP addresses behind one, gateway, IP address requires PAT to differentiate between traffic.

NEW QUESTION: 66

R80.10 management server can manage gateways with which versions installed?

- A. Versions R77 and higher
- B. Versions R76 and higher
- C. Version R75 and higher
- D. Versions R75.20 and higher

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 67

Which of the following is considered to be the more secure and preferred VPN authentication method?

- A. Pre-shared secret
- B. MD5
- C. Certificate
- D. Password

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 68

Where is the "Hit Count" feature enabled or disabled in SmartConsole?

- A. On each Security Gateway
- B. On the Policy Package
- C. On the Policy layer
- D. In Global Properties for the Security Management Server

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 69

In SmartEvent, a correlation unit (CU) is used to do what?

- A. Collect security gateway logs, Index the logs and then compress the logs.
- B. Receive firewall and other software blade logs in a region and forward them to the primary log server.
- C. Analyze log entries and identify events.
- D. Send SAM block rules to the firewalls during a DOS attack.

Answer: C ([LEAVE A REPLY](#))

https://sc1.checkpoint.com/documents/R80.40/WebAdminGuides/EN/CP_R80.40_LoggingAndMonitoring_AdminGuide/Topics-LMG/SmartEvent-Correlation-Unit.htm

NEW QUESTION: 70

SmartConsole provides a consolidated solution for everything that is necessary for the security of an organization, such as the following

- A. Security Policy Management. Log Analysis. System Health Monitoring. Multi-Domain Security Management.
- B. Security Policy Management and Log Analysis
- C. Security Policy Management. Threat Prevention rules. System Health Monitoring and Multi-Domain Security Management.
- D. Security Policy Management Log Analysis and System Health Monitoring

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 71

Which of the following is NOT a valid deployment option for R80?

- A. SmartEvent
- B. Log server
- C. All-in-one (stand-alone)
- D. Multi-domain management server

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 72

CPU-level of your Security gateway is peaking to 100% causing problems with traffic. You suspect that the problem might be the Threat Prevention settings.

The following Threat Prevention Profile has been created.

Check Point
Company TP Profile
SOFTWARE TECHNOLOGIES LTD.

Provide very wide coverage for all products and protocols, with noticeable performance impact.

General Policy

- IPS
- Anti-Bot
- Anti-Virus
- Threat Emulation
- Malware DNS Trap

Blades Activation

IPS Anti-Bot Anti-Virus Threat Emulation

Activate Protections

Performance Impact:

Severity:

Activation Mode

High Confidence:

Medium Confidence:

Low Confidence:

OK Cancel

How could you tune the profile in order to lower the CPU load still maintaining security at good level? Select the BEST answer.

- A. Set the Performance Impact to Very Low Confidence to Prevent.
- B. The problem is not with the Threat Prevention Profile. Consider adding more memory to the appliance.
- C. Set the Performance Impact to Medium or lower.
- D. Set High Confidence to Low and Low Confidence to Inactive.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 73

What are the two types of NAT supported by the Security Gateway?

- A. Destination and Hide
- B. Hide and Static
- C. Static and Source
- D. Source and Destination

Answer: ([SHOW ANSWER](#))

A Security Gateway can use these procedures to translate IP addresses in your network:

NEW QUESTION: 74

When should you generate new licenses?

- A. After an RMA procedure when the MAC address or serial number of the appliance changes.

- B. When the existing license expires, license is upgraded or the IP-address where the license is tied changes.
- C. Only when the license is upgraded.
- D. Before installing contract files.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 75

You noticed that CPU cores on the Security Gateway are usually 100% utilized and many packets were dropped. You don't have a budget to perform a hardware upgrade at this time. To optimize drops you decide to use Priority Queues and fully enable Dynamic Dispatcher. How can you enable them?

- A. fw ctl multik pq enable
- B. fw ctl multik dynamic_dispatching on
- C. fw ctl multik set_mode 9
- D. fw ctl multik dynamic_dispatching set_mode 9

Answer: C (LEAVE A REPLY)

NEW QUESTION: 76

When defining group-based access in an LDAP environment with Identity Awareness, what is the BEST object type to represent an LDAP group in a Security Policy?

- A. Access Role
- B. Group Template
- C. User Group
- D. SmartDirectory Group

Answer: (SHOW ANSWER)

NEW QUESTION: 77

Due to high CPU workload on the Security Gateway, the security administrator decided to purchase a new multicore CPU to replace the existing single core CPU. After installation, is the administrator required to perform any additional tasks?

- A. Go to clash-Run cpconfig | Configure CoreXL to make use of the additional Cores | Exit cpconfig | Reboot Security Gateway
- B. Administrator does not need to perform any task. Check Point will make use of the newly installed CPU and Cores
- C. Go to clash-Run cpstop | Run cpstart
- D. Go to clash-Run cpconfig | Configure CoreXL to make use of the additional Cores | Exit cpconfig | Reboot Security Gateway | Install Security Policy

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 78

What is the RFC number that act as a best practice guide for NAT?

- A. RFC 1939
- B. RFC 1950
- C. RFC 1918
- D. RFC 793

Answer: ([SHOW ANSWER](#))

<https://datatracker.ietf.org/doc/html/rfc1918>

NEW QUESTION: 79

Name the authentication method that requires token authenticator.

- A. SecureID
- B. Radius
- C. DynamicID
- D. TACACS

Answer: ([SHOW ANSWER](#))

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_SecurityManagement_AdminGuide/Topics-SECMG/Configuring-SecurID-Authentication.htm

NEW QUESTION: 80

Which of the following is NOT an identity source used for Identity Awareness?

- A. UserCheck
- B. RADIUS
- C. Remote Access
- D. AD Query

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 81

Where can administrator edit a list of trusted SmartConsole clients?

- A. WebUI client logged to Security Management Server, SmartDashboard: Manage and Settings > Permissions and Administrators > Advanced > Trusted Clients, via cpconfig on a Security Gateway.
- B. cpconfig on a Security Management Server, in the WebUI logged into a Security Management Server.
- C. In cpconfig on a Security Management Server, in the WebUI logged into a Security Management Server, in SmartConsole: Manage and Settings > Permissions and Administrators > Advanced > Trusted Clients.
- D. Only using SmartConsole: Manage and Settings > Permissions and Administrators > Advanced > Trusted Clients.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 82

Which of the following blades is NOT subscription-based and therefore does not have to be renewed on a regular basis?

- A. Anti-Virus
- B. Application Control
- C. Advanced Networking Blade
- D. Threat Emulation

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 83

Most Check Point deployments use Gaia but which product deployment utilizes special Check Point code (with unification in R81.10)?

- A. Enterprise Network Security Appliances
- B. Scalable Platforms
- C. Rugged Appliances
- D. Small Business and Branch Office Appliances

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 84

What is the purpose of a Clean-up Rule?

- A. Clean-up Rules do not server any purpose.
- B. Provide a metric for determining unnecessary rules.
- C. To drop any traffic that is not explicitly allowed.
- D. Used to better optimize a policy.

Answer: ([SHOW ANSWER](#))

These are basic access control rules we recommend for all Rule Bases:

There is also an implied rule that drops all traffic, but you can use the Cleanup rule to log the traffic.

NEW QUESTION: 85

When a Security Gateways sends its logs to an IP address other than its own, which deployment option is installed?

- A. Bridge
- B. Distributed
- C. Standalone

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 86

When a Security Gateway sends its logs to an IP address other than its own, which deployment option is installed?

- A. Bridge Mode
- B. Targeted
- C. Standalone
- D. Distributed

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 87

Which Check Point software blade provides Application Security and identity control?

- A. Identity Awareness
- B. Data Loss Prevention
- C. URL Filtering
- D. Application Control

Answer: D (LEAVE A REPLY)

Check Point Application Control provides the industry's strongest application security and identity control to organizations of all sizes.

NEW QUESTION: 88

What type of NAT is a one-to-one relationship where each host is translated to a unique address?

- A. Static
- B. Hide
- C. Destination
- D. Source

Answer: A (LEAVE A REPLY)

NEW QUESTION: 89

When connected to the Check Point R80 Management Server using the SmartConsole the first administrator to connect has a lock on:

- A. The entire Management Database and all sessions and other administrators can connect only as Read-only.
- B. Only the objects being modified in his session of the Management Database and other administrators can connect to make changes using different sessions.
- C. The entire Management Database and other administrators can connect to make changes only if the first administrator switches to Read-only.
- D. Only the objects being modified in the Management Database and other administrators can connect to make changes using a special session as long as they all connect from the same LAN network.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 90

The _____ software blade package uses CPU-level and OS-level sandboxing in order to detect and block malware.

- A. Next Generation Threat Emulation
- B. Next Generation Threat Extraction
- C. Next Generation Threat Prevention
- D. Next Generation Firewall

Answer: A (LEAVE A REPLY)

NEW QUESTION: 91

URL Filtering employs a technology, which educates users on web usage policy in real time. What is the name of that technology?

- A. WebCheck

- B. UserCheck
- C. Harmony Endpoint
- D. URL categorization

Answer: (SHOW ANSWER)

UserCheck alerts users while attempting to browse a suspicious/blocked or otherwise policy-limited website through a message in their web browsers shown before the actual page loads.

NEW QUESTION: 92

What are the three deployment considerations for a secure network?

- A. Distributed, Bridge Mode, and Remote
- B. Remote, Standalone, and Distributed
- C. Bridge Mode, Remote, and Standalone
- D. Standalone, Distributed, and Bridge Mode

Answer: A (LEAVE A REPLY)

NEW QUESTION: 93

Which of the following Windows Security Events will NOT map a username to an IP address in Identity Awareness?

- A. Kerberos Ticket Requested
- B. Kerberos Ticket Timed Out
- C. Account Logon
- D. Kerberos Ticket Renewed

Answer: (SHOW ANSWER)

NEW QUESTION: 94

When configuring Spoof Tracking, which tracking actions can an administrator select to be done when spoofed packets are detected?

- A. Log, send snmp trap, email
- B. Drop packet, alert, none
- C. Log, alert, none
- D. Log, allow packets, email

Answer: (SHOW ANSWER)

Configure Spoof Tracking - select the tracking action that is done when spoofed packets are detected:

NEW QUESTION: 95

How do you manage Gaia?

- A. Through SmartDashboard only
- B. Through CLI and WebUI
- C. Through CLI, WebUI, and SmartDashboard
- D. Through CLI only

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 96

Name the pre-defined Roles included in Gaia OS.

- A. AdminRole, and MonitorRole
- B. ReadWriteRole, and ReadyOnly Role
- C. AdminRole, cloningAdminRole, and Monitor Role
- D. AdminRole

Answer: ([SHOW ANSWER](#))

Reference:

[topic=documents/R80.30/WebAdminGuides/EN/CP_R80.30_Gaia_AdminGuide/198188](https://sc1.checkpoint.com/documents/R80.30/WebAdminGuides/EN/CP_R80.30_Gaia_AdminGuide/198188)

NEW QUESTION: 97

Choose what BEST describes users on Gaia Platform.

- A. There are two default users and neither can be deleted.
- B. There are two default users and one cannot be deleted.
- C. There is one default user that can be deleted.
- D. There is one default user that cannot be deleted.

Answer: A ([LEAVE A REPLY](#))

These users are created by default and cannot be deleted:

admin

Has full read/write capabilities for all Gaia features, from the Gaia Portal and the Gaia Clish.

This user has a User ID of 0, and therefore has all of the privileges of a root user.

monitor

Has read-only capabilities for all features in the Gaia Portal and the Gaia Clish, and can change its own password.

You must give a password for this user before the account can be used.

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_Gaia_AdminGuide/Topics-GAG/Users.htm

NEW QUESTION: 98

Phase 1 of the two-phase negotiation process conducted by IKE operates in _____ mode.

- A. Main
- B. Authentication
- C. Quick
- D. High Alert

Answer: A ([LEAVE A REPLY](#))

Phase I modes

Between Security Gateways, there are two modes for IKE phase I. These modes only apply to IKEv1:

NEW QUESTION: 99

Name one limitation of using Security Zones in the network?

- A. Security zones will not work in Automatic NAT rules
- B. Security zone will not work in Manual NAT rules
- C. Security zones will not work in firewall policy layer
- D. Security zones cannot be used in network topology

Answer: ([SHOW ANSWER](#))

https://supportcenter.checkpoint.com/supportcenter/portal?eventSubmit_doGoviewsolutiondetails=&solutionid=sk128572

NEW QUESTION: 100

The "Hit count" feature allows tracking the number of connections that each rule matches. Will the Hit count feature work independently from logging and Track the hits even if the Track option is set to "None"?

- A. No, it will not work independently. Hit Count will be shown only for rules with Track options set as Log or alert
- B. No, it will not work independently because hit count requires all rules to be logged
- C. Yes, it will work independently because when you enable Hit Count, the SMS collects the data from supported Security Gateways
- D. Yes, it will work independently as long as "analyze all rules" tick box is enabled on the Security Gateway

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 101

What is the purpose of the CPCA process?

- A. Monitoring the status of processes
- B. Sending and receiving logs
- C. Generating and modifying certificates
- D. Communication between GUI clients and the SmartCenter server

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 102

Fill in the blanks: The _____ collects logs and sends them to the _____.

- A. Log server; Security Gateway
- B. Log server; security management server
- C. Security management server; Security Gateway
- D. Security Gateways; log server

Answer: ([SHOW ANSWER](#))

Gateways send their logs to the log server.

NEW QUESTION: 103

John is the administrator of a R80 Security Management server managing r R77.30 Check Point Security Gateway. John is currently updating the network objects and amending the rules using SmartConsole. To make John's changes available to other administrators, and to save the database before installing a policy, what must John do?

- A. Logout of the session
- B. File > Save
- C. Install database
- D. Publish the session

Answer: ([SHOW ANSWER](#))

Installing and Publishing

It is important to understand the differences between publishing and installing.

You must do this:

After you did this:

Publish

Opened a session in SmartConsole and made changes.

The Publish operation sends all SmartConsole modifications to other administrators, and makes the changes you made in a private session public.

Install the database

Modified network objects, such as servers, users, services, or IPS profiles, but not the Rule Base.

Updates are installed on management servers and log servers.

Install a policy

Changed the Rule Base.

The Security Management Server installs the updated policy and the entire database on Security Gateways (even if you did not modify any network objects).

NEW QUESTION: 104

When comparing Stateful Inspection and Packet Filtering, what is a benefit that Stateful Inspection offers over Packet Filtering?

- A. Stateful Inspection does not use memory to record the protocol used by the connection.
- B. Stateful Inspection offers no benefits over Packet Filtering.
- C. Only one rule is required for each connection.
- D. Stateful Inspection offers unlimited connections because of virtual memory usage.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 105

Application Control/URL filtering database library is known as:

- A. Application database
- B. AppWiki
- C. Application-Forensic Database
- D. Application Library

Answer: ([SHOW ANSWER](#))

https://supportcenter.checkpoint.com/supportcenter/portal?eventSubmit_doGoviewsolutiondetails=&solutionid=sk113795

NEW QUESTION: 106

Identity Awareness allows easy configuration for network access and auditing based on what three items?

- A. Client machine IP address.
- B. Gateway proxy IP address.
- C. Log server IP address.
- D. Network location, the identity of a user and the identity of a machine.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 107

What protocol is specifically used for clustered environments?

- A. Control Cluster Protocol
- B. Synchronized Cluster Protocol
- C. Cluster Control Protocol
- D. Clustered Protocol

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 108

Which GUI tool can be used to view and apply Check Point licenses?

- A. cpconfig
- B. Management Command Line
- C. SmartConsole
- D. SmartUpdate

Answer: D ([LEAVE A REPLY](#))

SmartUpdate GUI is the recommended way of managing licenses.

NEW QUESTION: 109

To view statistics on detected threats, which Threat Tool would an administrator use?

- A. IPS Protections
- B. ThreatWiki
- C. Protections
- D. Profiles

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 110

Can multiple administrators connect to a Security Management Server at the same time?

- A. Yes, every administrator has their own username, and works in a session that is independent of other administrators
- B. Yes, but only one has the right to write
- C. Yes, all administrators can modify a network object at the same time
- D. No, only one can be connected

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 111

In the Check Point Security Management Architecture, which component(s) can store logs?

- A. Security Management Server
- B. Security Management Server and Security Gateway
- C. SmartConsole
- D. SmartConsole and Security Management Server

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 112

An administrator wishes to enable Identity Awareness on the Check Point firewalls. However they allow users to use company issued or personal laptops. Since the administrator cannot manage the personal laptops, which of the following methods would BEST suit this company?

- A. Browser-Based Authentication
- B. Identity Agents
- C. Terminal Servers Agent
- D. AD Query

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 113

In order for changes made to policy to be enforced by a Security Gateway, what action must an administrator perform?

- A. Save changes
- B. Publish changes
- C. Install policy
- D. Install database

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 114

How is communication between different Check Point components secured in R80? As with all questions, select the best answer.

- A. By using ICA
- B. By using IPSEC
- C. By using SIC

D. By using 3DES

Answer: C (LEAVE A REPLY)

NEW QUESTION: 115

Which product correlates logs and detects security threats, providing a centralized display of potential attack patterns from all network devices?

- A. SmartDashboard
- B. SmartEvent
- C. SmartView Monitor
- D. SmartUpdate

Answer: (SHOW ANSWER)

SmartEvent correlates logs from all Check Point enforcement points, including end-points, to identify suspicious activity from the clutter. Rapid data analysis and custom event logs immediately alert administrators to anomalous behavior such as someone attempting to use the same credential in multiple geographies simultaneously. Ref:

<https://www.checkpoint.com/products/smartevent/>

NEW QUESTION: 116

Security Zones do not work with what type of defined rule?

- A. Application Control rule
- B. Manual NAT rule
- C. IPS bypass rule
- D. Firewall rule

Answer: (SHOW ANSWER)

<https://community.checkpoint.com/t5/Management/Workaround-for-manual-NAT-when-security-zones-are-used/td-p/9915>

NEW QUESTION: 117

Vanessa is attempting to log into the Gaia Web Portal. She is able to login successfully. Then she tries the same username and password for SmartConsole but gets the message in the screenshot image below. She has checked that the IP address of the Server is correct and the username and password she used to login into Gaia is also correct.

What is the most likely reason?

- A. Check Point Management software authentication details are not automatically the same as the Operating System authentication details. Check that she is using the correct details.

- B.** Authentication failed because Vanessa's username is not allowed in the new Threat Prevention console update checks even though these checks passed with Gaia.
- C.** Check Point R80 SmartConsole authentication is more secure than in previous versions and Vanessa requires a special authentication key for R80 SmartConsole. Check that the correct key details are used.
- D.** SmartConsole Authentication is not allowed for Vanessa until a Super administrator has logged in first and cleared any other administrator sessions.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 118

Of all the Check Point components in your network, which one changes most often and should be backed up most frequently?

- A.** SmartManager
- B.** Security Management Server
- C.** Security Gateway
- D.** SmartConsole

Answer: B (LEAVE A REPLY)

NEW QUESTION: 119

Tom has connected to the Management Server remotely using SmartConsole and is in the process of making some Rule Base changes, when he suddenly loses connectivity. Connectivity is restored shortly afterward. What will happen to the changes already made?

- A.** Tom will have to reboot his SmartConsole computer, clear the cache, and restore changes.
- B.** Tom's changes will be lost since he lost connectivity and he will have to start again.
- C.** Tom will have to reboot his SmartConsole computer, and access the Management cache store on that computer, which is only accessible after a reboot.
- D.** Tom's changes will have been stored on the Management when he reconnects and he will not lose any of his work.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 120

A layer can support different combinations of blades What are the supported blades:

- A.** Firewall. NAT, Content Awareness and Mobile Access
- B.** Firewall (Network Access Control). Application & URL Filtering. Content Awareness and Mobile Access
- C.** Firewall. URLF, Content Awareness and Mobile Access
- D.** Firewall (Network Access Control). Application & URL Filtering and Content Awareness

Answer: D (LEAVE A REPLY)

NEW QUESTION: 121

What is the most complete definition of the difference between the Install Policy button on the SmartConsole's tab, and the Install Policy within a specific policy?

- A.** The Global one can install multiple selected policies at the same time.
- B.** The second one pre-select the installation for only the current policy and for the applicable gateways.

- C. The Global one also saves and published the session before installation.
- D. The local one does not install the Anti-Malware policy along with the Network policy.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 123

For Automatic Hide NAT rules created by the administrator what is a TRUE statement?

- A. Source Port Address Translation (PAT) is enabled by default
- B. Automate NAT rules are supported for Network objects only.
- C. Automatic NAT rules are supported for Host objects only.
- D. Source Port Address Translation (PAT) is disabled by default

Answer: (SHOW ANSWER)

NEW QUESTION: 124

Which type of Endpoint Identity Agent includes packet tagging and computer authentication?

- A. Full
- B. Complete
- C. Custom
- D. Light

Answer: A (LEAVE A REPLY)

NEW QUESTION: 125

Which path below is available only when CoreXL is enabled?

- A. Medium path
- B. Accelerated path
- C. Firewall path

D. Slow path

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 126

What are the types of Software Containers?

- A. Security Management, Security Gateway, and Endpoint Security
- B. Security Management, Standalone, and Security Gateway
- C. Security Management, Log & Monitoring, and Security Policy
- D. Smart Console, Security Management, and Security Gateway

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 127

Why is a Central License the preferred and recommended method of licensing?

- A. Central Licensing is actually not supported with Gaia.
- B. Central Licensing is the only option when deploying Gaia
- C. Central Licensing ties to the IP address of a gateway and can be changed to any gateway if needed.
- D. Central Licensing ties to the IP address of the management server and is not dependent on the IP of any gateway in the event it changes.

Answer: D ([LEAVE A REPLY](#))

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_ThreatPrevention_AdminGuide/Topics-TPG/The_Check_Point_ThreatCloud.htm

NEW QUESTION: 128

Identify the ports to which the Client Authentication daemon listens on by default?

- A. 256, 257
- B. 80, 256
- C. 259, 900
- D. 8080, 529

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 129

What is the most recommended installation method for Check Point appliances?

- A. SmartUpdate installation
- B. DVD media created with Check Point ISOMorphic
- C. USB media created with Check Point ISOMorphic
- D. Cloud based installation

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 130

Under which file is the proxy arp configuration stored?

- A. \$FWDIR/conf/local.arp on the management server

- B. \$FWDIR/state/_tmp/proxy.arp on the security gateway
- C. \$FWDIR/state/proxy_arp.conf on the management server
- D. \$FWDIR/conf/local.arp on the gateway

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 131

Which part of SmartConsole allows administrators to add, edit delete, and clone objects?

- A. Object Navigator
- B. Object Editor
- C. Object Explorer
- D. Object Browser

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 132

What are the three main components of Check Point security management architecture?

- A. SmartConsole, Security policy, and Logs & Monitoring
- B. SmartConsole, Security Management, and Security Gateway
- C. Smart Console, Standalone, and Security Management
- D. GUI-Client, Security Management, and Security Gateway

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 133

You are going to perform a major upgrade. Which back up solution should you use to ensure your database can be restored on that device?

- A. backup
- B. logswitch
- C. Database Revision
- D. snapshot

Answer: D ([LEAVE A REPLY](#))

The snapshot creates a binary image of the entire root (lv_current) disk partition. This includes Check Point products, configuration, and operating system.

Starting in R77.10, exporting an image from one machine and importing that image on another machine of the same type is supported.

The log partition is not included in the snapshot. Therefore, any locally stored FireWall logs will not be saved.

NEW QUESTION: 134

You have successfully backed up your Check Point configurations without the OS information. What command would you use to restore this backup?

- A. restore_backup
- B. import backup
- C. migrate import

D. cp_merge

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 135

True or False: In a Distributed Environment, a Central License can be installed via CLI on a Security Gateway

- A. True, CLI is the prefer method for Licensing
- B. False, Central License are handled via Security Management Server
- C. False, Central License are installed via Gaia on Security Gateways
- D. True, Central License can be installed with CPLIC command on a Security Gateway

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 136

Full synchronization between cluster members is handled by Firewall Kernel. Which port is used for this?

- A. TCP port 256
- B. TCP port 265
- C. UDP port 265
- D. UDP port 256

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 137

Which of the following methods can be used to update the trusted log server regarding the policy and configuration changes performed on the Security Management Server?

- A. Install Policy
- B. Save Policy
- C. Save session
- D. Install Database

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 138

What are the two elements of address translation rules?

- A. Original packet and translated packet
- B. Untranslated packet and manipulated packet
- C. Manipulated packet and original packet

D. Translated packet and untranslated packet

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 139

Which of the following is NOT supported by Bridge Mode Check Point Security Gateway

- A. Application Control
- B. NAT
- C. Antivirus
- D. Data Loss Prevention

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 140

Fill in the blank: In Security Gateways R75 and above, SIC uses _____ for encryption.

- A. AES-128
- B. 3DES
- C. AES-256
- D. DES

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 141

In which scenario will an administrator need to manually define Proxy ARP?

- A. When they configure an "Automatic Static NAT" which translates to an IP address that does not belong to one of the firewall's interfaces.
- B. When they configure an "Automatic Hide NAT" which translates to an IP address that does not belong to one of the firewall's interfaces.
- C. When they configure a "Manual Hide NAT" which translates to an IP address that belongs to one of the firewall's interfaces.
- D. When they configure a "Manual Static NAT" which translates to an IP address that does not belong to one of the firewall's interfaces.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 142

Fill in the blank: An LDAP server holds one or more _____.

- A. Account Servers
- B. Administrator Units
- C. Account Units
- D. Server Units

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 143

Which information is included in the "Extended Log" tracking option, but is not included in the "Log" tracking option?

- A. data type information
- B. application information
- C. destination port
- D. file attributes

Answer: B (LEAVE A REPLY)

NEW QUESTION: 144

Fill in the blank RADIUS protocol uses _____ to communicate with the gateway

- A. HTTP
- B. TDP
- C. CCP
- D. UDP

Answer: (SHOW ANSWER)

NEW QUESTION: 145

When a SAM rule is required on Security Gateway to quickly block suspicious connections which are not restricted by the Security Policy, what actions does the administrator need to take?

- A. SmartView Monitor should be opened and then the SAM rule/s can be applied immediately. Installing policy is not required.
- B. The policy type SAM must be added to the Policy Package and a new SAM rule must be applied. Simply Publishing the changes applies the SAM rule on the firewall.
- C. The administrator must work on the firewall CLI (for example with SSH and PuTTY) and the command 'sam block' must be used with the right parameters.
- D. The administrator should open the LOGS & MONITOR view and find the relevant log. Right clicking on the log entry will show the Create New SAM rule option.

Answer: A (LEAVE A REPLY)

A Security GatewayClosed with SAM enabled has Firewall rules to block suspicious connections that are not restricted by the security policyClosed. These rules are applied immediately (policy installation is not required).

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_LoggingAndMonitoring_AdminGuide/Topics-LMG/Monitoring-Suspicious-Activity-Rules.htm

NEW QUESTION: 146

Which of the following technologies extracts detailed information from packets and stores that information in state tables?

- A. INSPECT Engine
- B. Next-Generation Firewall
- C. Packet Filtering
- D. Application Layer Firewall

Answer: B (LEAVE A REPLY)

Check Point FireWall-1's Stateful Inspection overcomes the limitations of the previous two approaches by providing full application-layer awareness without breaking the client/server model. With Stateful Inspection, the packet is intercepted at the network layer, but then the INSPECT Engine takes over. It extracts state-related information required for the security decision

from all application layers and maintains this information in dynamic state tables for evaluating subsequent connection attempts. This provides a solution which is highly secure and offers maximum performance, scalability, and extensibility.

NEW QUESTION: 147

Using R80 Smart Console, what does a "pencil icon" in a rule mean?

- A. This rule can't be changed as it's an implied rule
- B. Someone else has changed this rule
- C. I have changed this rule
- D. This rule is managed by check point's SOC

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 148

Both major kinds of NAT support Hide and Static NAT. However, one offers more flexibility. Which statement is true?

- A. Manual NAT can offer more flexibility than Automatic NAT.
- B. Dynamic Network Address Translation (NAT) Overloading can offer more flexibility than Port Address Translation.
- C. Dynamic NAT with Port Address Translation can offer more flexibility than Network Address Translation (NAT) Overloading.
- D. Automatic NAT can offer more flexibility than Manual NAT.

Answer: A ([LEAVE A REPLY](#))

"An Auto-NAT rule only uses the source address and port when matching and translating. Manual NAT can match and translate source and destination addresses and ports."

<https://networkdirection.net/articles/firewalls/firepowermanagementcentre/fmcpnatpolicies/>

NEW QUESTION: 149

Which repositories are installed on the Security Management Server by SmartUpdate?

- A. License & Contract and Package Repository
- B. Update and License & Contract
- C. License and Update
- D. Package Repository and Licenses

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 150

Gaia has two default user accounts that cannot be deleted. What are those user accounts?

- A. Admin and Default
- B. Expert and Clish
- C. Control and Monitor
- D. Admin and Monitor

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 152

What are the three components for Check Point Capsule?

- A. Capsule Workspace, Capsule Docs, Capsule Cloud
- B. Capsule Docs, Capsule Cloud, Capsule Connect
- C. Capsule Workspace, Capsule Cloud, Capsule Connect
- D. Capsule Workspace, Capsule Docs, Capsule Connect

Answer: A (LEAVE A REPLY)

NEW QUESTION: 153

Which is NOT an encryption algorithm that can be used in an IPSEC Security Association (Phase 2)?

- A. AES-GCM-256
- B. AES-GCM-128
- C. AES-CBC-256

Answer: C (LEAVE A REPLY)

NEW QUESTION: 154

Which Identity Source(s) should be selected in Identity Awareness for when there is a requirement for a higher level of security for sensitive servers?

- A. AD Query
- B. Terminal Servers Endpoint Identity Agent
- C. Endpoint Identity Agent and Browser-Based Authentication
- D. RADIUS and Account Logon

Answer: (SHOW ANSWER)

Endpoint Identity Agents and Browser-Based Authentication - When a high level of security is necessary. The Captive Portal is used for distributing the Endpoint Identity Agent. IP Spoofing protection can be set to prevent packets from being IP spoofed.

NEW QUESTION: 155

When should you generate new licenses?

- A. Only when the license is upgraded.
- B. When the existing license expires, license is upgraded or the IP-address associated with the license changes.
- C. After a device upgrade.
- D. Before installing contract files.

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 156

Log query results can be exported to what file format?

- A. Comma Separated Value (csv)
- B. Portable Document Format (pdf)
- C. Word Document (docx)
- D. Text (txt)

Answer: [A \(LEAVE A REPLY\)](#)

NEW QUESTION: 157

Your internal networks 10.1.1.0/24, 10.2.2.0/24 and 192.168.0.0/16 are behind the Internet Security Gateway. Considering that Layer 2 and Layer 3 setup is correct, what are the steps you will need to do in SmartConsole in order to get the connection working?

- A. 1. Define an accept rule in Security Policy.2. Define automatic NAT for each network to NAT the networks behind a public IP.3. Publish and install the policy.
- B. 1. Define an accept rule in Security Policy.2. Define automatic NAT for each network to NAT the networks behind a public IP.3. Publish the policy.
- C. 1. Define an accept rule in Security Policy.2. Define Security Gateway to hide all internal networks behind the gateway's external IP.3. Publish and install the policy.
- D. 1. Define an accept rule in Security Policy.2. Define Security Gateway to hide all internal networks behind the gateway's external IP.3. Publish the policy.

Answer: [A \(LEAVE A REPLY\)](#)

NEW QUESTION: 158

When configuring Spoof Tracking, which tracking actions can an administrator select to be done when spoofed packets are detected?

- A. Log, allow packets, email
- B. Log, alert, none
- C. Log, send snmp trap, email
- D. Drop packet, alert, none

Answer: B (LEAVE A REPLY)

Configure Spoof Tracking - select the tracking action that is done when spoofed packets are detected:

NEW QUESTION: 159

After a new Log Server is added to the environment and the SIC trust has been established with the SMS what will the gateways do?

- A.** The gateways can only send logs to an SMS and cannot send logs to a Log Server. Log Servers are proprietary log archive servers.
- B.** Gateways will send new firewall logs to the new Log Server as soon as the SIC trust is set up between the SMS and the new Log Server.
- C.** The firewalls will detect the new Log Server after the next policy install and redirect the new logs to the new Log Server.
- D.** Logs are not automatically forwarded to a new Log Server. SmartConsole must be used to manually configure each gateway to send its logs to the server.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 160

Which single Security Blade can be turned on to block both malicious files from being downloaded as well as block websites known to host malware?

- A.** Anti-Bot
- B.** None - both Anti-Virus and Anti-Bot are required for this
- C.** Anti-Virus
- D.** None - both URL Filtering and Anti-Virus are required for this.

Answer: C (LEAVE A REPLY)

Prevent Access to Malicious Websites -

The Antivirus Software Blade scans outbound URL requests and ensures users do not visit websites that are known to distribute malware.

Stop Incoming Malicious Files

Check Point Antivirus Software Blade prevents and stops threats such as malware, viruses, and Trojans from entering and infecting a network.

<https://www.checkpoint.com/downloads/products/antivirus-datasheet.pdf>

NEW QUESTION: 161

What is the purpose of the Stealth Rule?

- A.** To prevent users from directly connecting to a Security Gateway.
- B.** To reduce the number of rules in the database.

- C. To hide the gateway from the Internet.
- D. To reduce the amount of logs for performance issues.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 162

Which of the following is NOT a tracking log option in R80.x?

- A. Full Log
- B. Log
- C. Extended Log
- D. Detailed Log

Answer: (SHOW ANSWER)

NEW QUESTION: 163

Which Check Point software blade monitors Check Point devices and provides a picture of network and security performance?

- A. Application Control
- B. Threat Emulation
- C. Logging and Status
- D. Monitoring

Answer: D (LEAVE A REPLY)

https://sc1.checkpoint.com/documents/R81/WebAdminGuides/EN/CP_R81_NextGenSecurityGateway_Guide/Topics-FWG/Monitoring-Blade.htm

NEW QUESTION: 164

One of major features in R80.x SmartConsole is concurrent administration. Which of the following is NOT possible considering that AdminA, AdminB, and AdminC are editing the same Security Policy?

- A. AdminC sees a lock icon which indicates that the rule is locked for editing by another administrator.
- B. AdminA and AdminB are editing the same rule at the same time.
- C. AdminA, AdminB and AdminC are editing three different rules at the same time.
- D. AdminB sees a pencil icon next the rule that AdminB is currently editing.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 165

Which command shows the installed licenses?

- A. cplic print
- B. show licenses
- C. print cplic
- D. fwlic print

Answer: A (LEAVE A REPLY)

NEW QUESTION: 166

An administrator is creating an IPsec site-to-site VPN between his corporate office and branch office. Both offices are protected by Check Point Security Gateway managed by the same Security Management Server (SMS). While configuring the VPN community to specify the pre-shared secret, the administrator did not find a box to input the pre-shared secret. Why does it not allow him to specify the pre-shared secret?

- A. The Gateway is an SMB device
- B. Pre-shared secret is already configured in Global Properties
- C. Certificate based Authentication is the only authentication method available between two Security Gateway managed by the same SMS
- D. The checkbox "Use only Shared Secret for all external members" is not checked

NEW QUESTION: 167

Which of the following is a new R80.10 Gateway feature that had not been available in R77.X and older?

- A. Sub Policies are sets of rules that can be created and attached to specific rules. If the rule is matched, inspection will continue in the sub policy attached to it rather than in the next rule.
- B. The rule base can be built of layers, each containing a set of the security rules. Layers are inspected in the order in which they are defined, allowing control over the rule base flow and which security functionalities take precedence.
- C. Limits the upload and download throughput for streaming media in the company to 1 Gbps.
- D. Time object to a rule to make the rule active only during specified times.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 168

Which firewall daemon is responsible for the FW CLI commands?

- A. fwd
- B. fwm
- C. cpd
- D. cpm

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 169

Which icon in the WebUI indicates that read/write access is enabled?

- A. Padlock
- B. Pencil

- C. Book
- D. Eyeglasses

Answer: B (LEAVE A REPLY)

NEW QUESTION: 170

Which Threat Prevention profile uses sanitization technology?

- A. Cloud/data Center
- B. perimeter
- C. Sandbox
- D. Guest Network

Answer: B (LEAVE A REPLY)

Strict Security for Perimeter Profile & Perimeter Profile use sanitization as a technology in Threat prevention profile

NEW QUESTION: 171

Which Check Point software blade prevents malicious files from entering a network using virus signatures and anomaly-based protections from ThreatCloud?

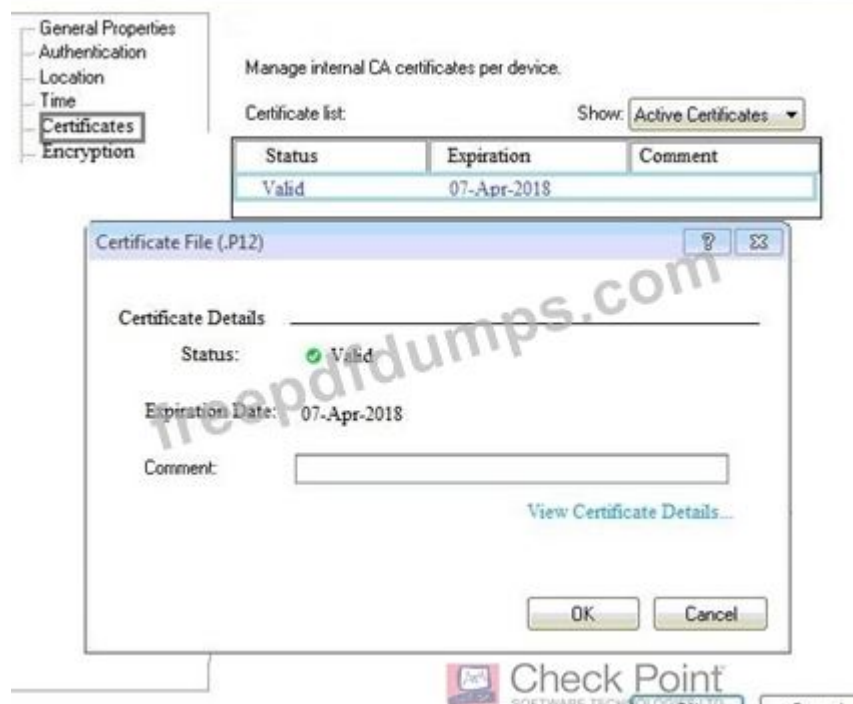

- A. Firewall
- B. Application Control
- C. Anti-spam and Email Security
- D. Anti-Virus

Answer: D (LEAVE A REPLY)

NEW QUESTION: 172

You can see the following graphic:

What is presented on it?

- A. Expired .p12 certificate properties for user John.
- B. Properties of personal .p12 certificate file issued for user John.
- C. Shared secret properties of John's password.
- D. VPN certificate properties of the John's gateway.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 173

In Logging and Monitoring, the tracking options are Log, Detailed Log and Extended Log. Which of the following options can you add to each Log, Detailed Log and Extended Log?

- A. Accounting/Extended
- B. Accounting/Suppression
- C. Accounting
- D. Suppression

Answer: B (LEAVE A REPLY)

NEW QUESTION: 174

Which option will match a connection regardless of its association with a VPN community?

- A. Accept all encrypted traffic
- B. All Site-to-Site VPN Communities
- C. All Connections (Clear or Encrypted)
- D. Specific VPN Communities

Answer: A (LEAVE A REPLY)

NEW QUESTION: 175

Which statement is TRUE of anti-spoofing?

- A. It is more secure to create anti-spoofing groups manually
- B. Anti-spoofing is not needed when IPS software blade is enabled
- C. It is BEST Practice to have anti-spoofing groups in sync with the routing table
- D. With dynamic routing enabled, anti-spoofing groups are updated automatically whenever there is a routing change

Answer: C (LEAVE A REPLY)

NEW QUESTION: 176

Sticky Decision Function (SDF) is required to prevent which of the following? Assume you set up an Active-Active cluster.

- A. Failovers
- B. Asymmetric routing
- C. Anti-Spoofing
- D. Symmetric routing

Answer: A (LEAVE A REPLY)

NEW QUESTION: 177

Which policy type is used to enforce bandwidth and traffic control rules?

- A. Access Control
- B. Threat Emulation
- C. Threat Prevention
- D. QoS

Answer: (SHOW ANSWER)

https://sc1.checkpoint.com/documents/R80.30/WebAdminGuides/EN/CP_R80.30_QoS_AdminGuide/html_frameset.htm?topic=documents/R80.30/WebAdminGuides/EN/CP_R80.30_QoS_AdminGuide/127573

NEW QUESTION: 178

A Check Point Software license consists of two components, the Software Blade and the Software Container. There are _____ types of Software Containers: _____.

- A. Two; Security Management and Endpoint Security
- B. Two; Endpoint Security and Security Gateway
- C. Three; Security Management, Security Gateway, and Endpoint Security
- D. Three; Security Gateway, Endpoint Security, and Gateway Management

Answer: C (LEAVE A REPLY)

There are three types of Software Containers: Security Management, Security Gateway, and Endpoint Security. Ref:
