The act of taking organizational security measures is inextricably linked with all other measures that have to be taken. What is the name of the system that guarantees the coherence of information security in the organization?

- A. Rootkit
- B. Security regulations for special information for the government
- C. Information Security Management System (ISMS)

Answer: C (LEAVE A REPLY)

NEW QUESTION: 9

Your organization has an office with space for 25 workstations. These workstations are all fully equipped and in use. Due to a reorganization 10 extra workstations are added, 5 of which are used for a call centre 24 hours per day. Five workstations must always be available. What physical security measures must be taken in order to ensure this?

- A. Obtain an extra office and set up 10 workstations. You would therefore have spare equipment that can be used to replace any non-functioning equipment.
- B. Obtain an extra office and connect all 10 new workstations to an emergency power supply and UPS (Uninterruptible Power Supply). Adjust the access control system to the working hours of the new staff. Inform the building security personnel that work will also be carried out in the evenings and at night.
- C. Obtain an extra office and set up 10 workstations. Ensure that there are security personnel both in the evenings and at night, so that staff can work there safely and securely.
- D. Obtain an extra office and provide a UPS (Uninterruptible Power Supply) for the five most important workstations.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 10

What is a human threat to the reliability of the information on your company website?

- A. The computer hosting your website is overloaded and crashes. Your website is offline.
- B. One of your employees commits an error in the price of a product on your website.
- C. Because of a lack of maintenance, a fire hydrant springs a leak and floods the premises. Your employees cannot come into the office and therefore can not keep the information on the website up to date.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 11

A couple of years ago you started your company which has now grown from 1 to 20 employees.

Your company's information is worth more and more and gone are the days when you could keep it all in hand yourself. You are aware that you have to take measures, but what should they be?

You hire a consultant who advises you to start with a qualitative risk analysis. What is a qualitative risk analysis?

A. This analysis follows a precise statistical probability calculation in order to calculate exact loss caused by damage.

B. This analysis is based on scenarios and situations and produces a subjective view of the possible threats.

Answer: B (LEAVE A REPLY)

Explanation
