### NEW QUESTION: 1

You have a string field in your dataset where you need to extract characters 1-5 only.  
Which two steps will accomplish this task? (Choose two.)

Choose 2 answers

- A. the Strings Cut step
- B. the Split Fields step
- C. the Siring Operations step
- D. The Modified Java Script Value step

**Answer: A,C (LEAVE A REPLY)**

### NEW QUESTION: 2

You have a PDI input step that generates data within a transformation.

Which two statements are true about downstream steps in this scenario? (Choose two.) Choose 2 answers

- A. Multiple steps can receive data from the input step.
- B. The steps will receive a stream of data from the input as soon as it is a available.
- C. Only one step can receive data from the input step.
- D. The steps will receive the data once the input step fully fetches it.

**Answer: A,D (LEAVE A REPLY)**

### NEW QUESTION: 3

Which script will execute jobs stored in a Pentaho server from a command line?

- A. pan
- B. carle
- C. kitchen
- D. spoon

**Answer: A (LEAVE A REPLY)**

Explanation

[https://help.hitachivantara.com/Documentation/Pentaho/8.2/Products/Data\\_Integration/Command\\_Line\\_Tools](https://help.hitachivantara.com/Documentation/Pentaho/8.2/Products/Data_Integration/Command_Line_Tools)

**NEW QUESTION: 4**

You are migrating to a new version of the Pentaho server and you want to import your old repository.

What are two methods to accomplish this task? (Choose two.) Choose 2 answers

- A. Use the pan script
- B. Use the import-export script.
- C. Using Spoon Tools > Repository > import Repository
- D. Use the encr script.

**Answer: B,C (LEAVE A REPLY)**

Explanation

<https://help.hitachivantara.com/Documentation/Pentaho/6.0/0P0/0U0/040>

**NEW QUESTION: 5**

The log files on a Pentaho server rotate daily and are getting too large. You want to change want logs to rotate hourly.

how do you adjust the log settings?

- A. Modify the start-pentaho bat or start-pentaho.sh script
- B. Modify the transformation's properties.
- C. Modify the Tomcat startup bat or startup.sh script
- D. Modify the Pentaho server's tog4j.xml.

**Answer: B (LEAVE A REPLY)**

**NEW QUESTION: 6**

Which two statements are correct about the Repository Explorer? (Choose two.) Choose 2 answers

- A. You can create new jobs and transformations.
- B. You can move, rename, and delete jobs and transformations.
- C. You can upload JDBC drivers when defining JOBC connections.
- D. You can lock and unlock jobs and transformations.

**Answer: B,D (LEAVE A REPLY)**

Explanation

<https://help.hitachivantara.com/Documentation/Pentaho/7.0/0L0/0Y0/040/010>

**NEW QUESTION: 7**

Which statement is true for a transformation?

- A. Transformation steps are executed in parallel.
- B. A transformation step processes one row at a time.
- C. A transformation must have a start step.
- D. A transformation step can have only one incoming hop and one outgoing hop.

**Answer: C (LEAVE A REPLY)**

**NEW QUESTION: 8**

Which two steps in a transformation allow variable values to be used throughout the rest of a PDI job? (Choose two.) Choose 2 answers

- A. the 'Select values' step
- B. the Modified Java Script Value' step
- C. the 'Set Variables' step
- D. the 'Table input step

**Answer: B,C (LEAVE A REPLY)**

**NEW QUESTION: 9**

You are developing the PDI solution for a customer. The customer requires that a set of SQL statements are executed on each connection to the database.

Which method will satisfy this requirement?

- A. Use the Database Connection wizard and specify SQL statements.
- B. Use the Options section in the Database Connection windows and pass the SQL statements to the database as a parameter.
- C. Use JNDI to specify the SQL statements.
- D. Use the Advanced section in the Database Connection window to enter the SQL statements.

**Answer: B (LEAVE A REPLY)**

**NEW QUESTION: 10**

You are connecting to a secure Hadoop cluster from Pentaho and want to use impersonation.

Which Pentaho tool should you use?

- A. Pentaho Security Manager
- B. Pentaho Report Designer
- C. Pentaho Spoon
- D. Pentaho Server

**Answer: B (LEAVE A REPLY)**

**NEW QUESTION: 11**

You are preparing a server environment for an archive installation of a Pentaho server. According to Hitachi Vantara best practices, which environment variable should be set?

- A. KETTLEHOME
- B. JAVA\_HOME
- C. PENTAHO\_JAVA\_HOME
- D. SPOON HOME

**Answer: C (LEAVE A REPLY)**

Explanation

Set environment variables. If you do not set the HOME environment variables, Pentaho will not start correctly. Complete the steps in this topic to ensure that you have set the HOME environment variables properly.

\* Set the path of the PENTAHO\_JAVA\_HOME variable to the path of your Java installation, as shown:

SET PENTAHO\_JAVA\_HOME=C:\Program Files\Java\jdk8.x.x.x

\* (Optional) If you are using a JRE, then also set the JRE\_HOME home environment variable.

\* Log off and log on again, then verify the variables have been properly set by using a command similar to the following example:

ECHO %PENTAHO\_JAVA\_HOME%

### NEW QUESTION: 12

You have used for copies of the Sort rows step in parallel on the local JVM using the 'Change number of copies to start option.

Each of the sorted stream need to be merged together to ensure the proper sort sequence.

Which step should be used in this scenario?

- A. the Append Streams step
- B. the Sorted Merge step
- C. the Dummy step
- D. the Merge Join step

**Answer: D (LEAVE A REPLY)**

### NEW QUESTION: 13

A customer needs to extract data from many afferent text He layouts with new file layouts being identified in the future andthey want to insert the data into corresponding database tables.They are concerned about maintainingmultiple PDI jobs and transformations given the large number of unique files.

What should you do to meet the requirements when creating transformations?

- A. Use the Job Executor step for each file.
- B. Use the ETL Metadata injection step
- C. Use the Metadata structure of stream step for each file.
- D. Use the Transformation Executor step for each file.

**Answer: B (LEAVE A REPLY)**

### NEW QUESTION: 14

You need to design a PDI job that will execute a transformation and then send an e-mail with an attached log of the transformation's execution.

Which two sets of actions will accomplish this task? (Choose two.)

Choose 2 answers

- A. In the Mail entry's options, select the 'Attach files to message' option and select the file type General'
- B. In the log tab of job properties, configure the Log Connection and the Log table options for the Job entry log table section.
- C. In the Transformation entry option, select the 'Specify logfile' option and enter a name and extension for the file.
- D. In the mail entry's options, select the 'Attach files to message' option and select the file type 'Log'

**Answer: (SHOW ANSWER)**

**NEW QUESTION: 15**

A customer has an existing PDI job that calls a transformation. They want to execute the transformation through Spark on their Hadoop cluster.

Which change must be made to satisfy this requirement?

- A. Change the Arguments of the transformation
- B. Change the Run Configuration of the transformation
- C. Change the Parameters of the transformation
- D. Change the Logging options of the transformation

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 16**

you want to enable PDI step monitoring Since memory resources are limited. you decide to set a limit to view number of snapshots.

Which option should be used to accomplish this task?

- A. The 'Limit' option in the Snapshot tab
- B. the Logging interval(seconds)' option in the Performance section
- C. The 'Maximum number of snapshots in memory option in the Monitoring tab
- D. the 'KETTLE\_MAX\_JOB\_TRACKER\_SIZE' option in kettle properties.

Answer: C ([LEAVE A REPLY](#))

**NEW QUESTION: 17**

You need to load data from many CSV files into a database and you want to minimize the number of PDI jobs and transformations that need to be maintained.

In which two scenarios is Metadata injection the recommend option? (Choose two.) Choose 2 answers

- A. When the files have the same structure and have different target tables.
- B. When the files have the same structure and have the same target table.
- C. When the files have a different structure and have different target tables.
- D. When the files have a different structure and have the same target table.

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 18**

A customer has an archive-based installation. They have not configured logging tables or changed the default configuration settings. They need to research an issue that has been affecting one of their scheduled PDI jobs for the past week.

In this situation, where do they go to view more details about the execution of these jobs?

- A. solutions/system/karaf/system/org/apache/karaf/log  
pentaho/server/pentaho-solution/system/karaf/System/commons logging
- B. pentaho-server/tomcat/logs
- C. pentaho-service/data
- D. pentaho-server/pentaho

**Answer: C ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 19**

You have a PDI job where you want to dynamically pass a table name to the Table input step of a transformation. You have replaced the table name reference in the transformation's Table input step with '\$(table\_name)' but when the transformation runs the table name is shown as '\$(table\_name)' Which action will correct this issue?

- A. Change the reference in the Table input step to '?'
- B. Add a transformation entry in the job that sets the table\_name variable.
- C. Add a transformation entry in the job that uses the Get Variables step.
- D. Add a Set Variable step before the Table input step in the transformation.

**Answer: D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 20**

Which three file formats are splittable on HDFS? (Choose three).

Choose 3 answers

Choose 3 answers

- A. xisx
- B. xml
- C. Avro
- D. txt
- E. Parquet

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 21**

Which content is found in the kettle, properties files?

- A. default language translations
- B. global variables
- C. stored database objects
- D. repository connection properties

**Answer: C ([LEAVE A REPLY](#))**

**NEW QUESTION: 22**

You need to download files from a web site as part of a PDI job.

Which job entry will accomplish this task?

- A. Sqoop import
- B. HTTP
- C. Copy Files
- D. Get a files with FTP

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 23**

A client is developing a Web application to implement a wizard-like application used by many users. At several points in the workflow, the application needs to execute jobs and transformations that are stored in the Pentaho server. Execution will include user-specific parameters. Upon completion of the job or transformation, the Web application will continue to the next UI page.

What is the recommended approach to accomplish this task?

- A. Use the Web service API to execute the jobs and transformations on the Pentaho server.
- B. Use the scheduling tool of the OS to execute the job and transformation on the pentaho server.
- C. Use the Kitchen and pan scripts to execute the jobs and transformations on the Pentaho server.
- D. Use the Job and Transformation steps to execute the jobs and transformations on the Pentaho server.

**Answer:** ([SHOW ANSWER](#))

Explanation

[https://help.hitachivantara.com/Documentation/Pentaho/8.2/Products/Data\\_Integration/Command\\_Line\\_Tools](https://help.hitachivantara.com/Documentation/Pentaho/8.2/Products/Data_Integration/Command_Line_Tools)

**NEW QUESTION: 24**

Which statement is true for a transformation?

- A. A transformation step processes one row at a time.
- B. Transformation steps are executed in parallel.
- C. A transformation step can have only one incoming hop and one outgoing hop.
- D. A transformation must have a start step.

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 25**

You are installing a Pentaho server and you decide to use a responsibility database other than Postgres.

Which two database are supported in this configuration? (Choose two.) Choose 2 answers

- A. Microsoft SQL Server
- B. Oracle
- C. DB2
- D. Sybase

**Answer:** A,B ([LEAVE A REPLY](#))
