NEW QUESTION: 1

After the video terminals A and B join the same video conference, the user of terminal B reflects that the video image of terminal A is more continuous, but not clear enough, and the administrator of terminal A performs the video self-ring and finds that the image of the self-ring is clear. From this, we can infer that the cause of this phenomenon is caused by the high image rate set by terminal A.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 2

MSDR is the master-slave decision to reject the message, the ability to exchange results that are inconsistent with the settings of this end, then reply to MSDR. ()

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 3

In the figure, you can click the () button to set the capture filter.

Answer:

capture filter

NEW QUESTION: 4

In a networking network, the H.245 TCP connection of the private network terminal is established with TS.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 5

In an RTP packet, the initial value of the Sequence number is random, no RTP packet is sent, and the sequence number is incremented. The receiver detects packet loss and rebuilds packets based on it.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 6

Direct sound refers to the sound signal that reaches the listener directly from the sound source, and the meeting requirements are mainly direct sound.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 7

A transaction can only be identified by a unique branch.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 8

The role of the RTP protocol is ().

Answer:

Real-time
transmission

NEW QUESTION: 9

Multicast, is a network technology that allows one or more senders (multicast sources) to send a single packet to the receiver (once, simultaneously).

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 10

What are some of the following ways to create a video IVR meeting?

- A. Call the IVR access number and create a meeting according to the IVR prompts
- B. according to the IVR prompt Call the IP address of the MCU and create a conference answer based on the IVR prompt
- C. Call the IP address of the GK, create a conference
- D. call the conference access number according to the IVR prompt, and create a conference

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 11

At what level is the SIP protocol located?

- A. Application layer
- B. Data Link Layer

- C. Network layer
- D. Transport Layer

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 12

During the meeting, the output image of the venue screen changes color and the screen is flowered, which of the following measures can be taken to solve this problem?

- A. Check the network connection of the terminal in the venue
- B. Check the terminal registration parameters on the SMC
- C. Check that the MCU has sufficient media resources
- D. Check if the port mode of the display matches the output cable

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 13

1080P or 720P 50/60fps is a full-frame image of 50 frames per second or 60 frames progressively, rather than an interlaced image of 50/60 fields.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 14

Huawei's video product fault location method can be mainly summarized as, grain and grass first, follow the vine to touch the melon, step by step, bold and careful, and pass on the torch. ()

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 15

The environment of the display area requires low illumination, and the reasons for the lower illumination required at the digital projection screen are ().

- A. If the ambient light is too dim and the pupil is constricted, the black and white pixel display will show a difference
- B. Counting casts use white screens, and in order to get enough dark black pixels, a lower ambient illumination
- C. is required The number of shots uses a white screen, and in order to get enough black pixels, a lower ambient illumination answer is required
- D. If the ambient light is too bright and the pupil is constricted, there will be a difference in the display of black and white pixels

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16

The advantages of static NAT include. ()

A. Most endpoints support NAT functionality.

B. The terminals in the four private networks are no different from the public network terminals, and the public network terminals can directly call the public network address after the NAT of the private network terminals.

C. Back is very practical when there are a small number of private network terminals that need to access the public network.

D. The endpoint after port NAT is protected by a firewall.

Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 17

TCSA refers to the capability exchange success response, which is used to return to the local side after the ability exchange is successful.

A. False

B. True

Answer: (SHOW ANSWER)

NEW QUESTION: 18

The working principle of peer-to-peer calls under different GKs is that when GK resolves that the called node belongs to the neighbor GK area according to the called number, GK supports requesting the neighbor GK to resolve the called number, neighbor After GK resolution is successful, the 1P address of the called node is returned to GK, and then GK returns the IP address of the called node to the calling node. Enables a call to be established between the calling node and the called node.

A. True

B. False

Answer: A (LEAVE A REPLY)

NEW QUESTION: 19

is the unified identity used by the recording server to register with the SIP server and needs to be consistent with the configuration on SMC2.0. (Abbreviations).

Answer:

RSE

NEW QUESTION: 20

Terminals with built-in mini-McU capabilities can hold multi-point meetings with the built-in MiniMU, but processing power is limited.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 21

The SIP protocol's flexible scaling mechanism refers to the addition of header domains and message types.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

At the end of the meeting, the recording server returns the recording address to the SMC, and the SMC emails the user to watch on demand.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 23

In the camera control of the WEB interface, only the local camera can be controlled, not the remote camera. ()

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 24

In the hierarchical relationship of SIP structure, what are the following main items of the request message?

- A. Non-INVIT transaction
- B. Request line/Response line
- C. header field
- D. Message Body

Answer: B,C,D ([LEAVE A REPLY](#))

[Judgment Questions].

NEW QUESTION: 25

The role of the RTP protocol is (). (Fill in the blanks)

Answer:

Real-time
transmission

NEW QUESTION: 26

The VP9650 MCU has a height of ()U , with a total of () slots.

- A. 5.4
- B. 5.3
- C. 4.4
- D. 4.3

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

In the Early state, dialog can be terminated by ().

- A. Called to send BYE
- B. The caller sends CANCEL
- C. Called Failure Response
- D. The caller sends a BYE

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 28

What features can the gatekeeper provide?

- A. Bandwidth Control
- B. Address Translation
- C. Conference Control
- D. Access Control

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 29

Color temperature represents the most general indicator of the spectral quality of a light source in lux (Lux , lx). ()

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 30

Among the four elements of packet filtering that can generally be omitted by firewalls, the condition is. ()

- A. Destination address
- B. Destination port

- C. Source address
- D. Source port

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 31

VGA output is supported up to () resolution.

- A. 1366*768
- B. 1920*1080
- C. 1360*768
- D. 1280*1024

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 32

As can be seen from the figure, the venue can not receive remote venue video in the meeting, what measures can the user take to locate the cause of the failure?

- A. Check the remote venue camera condition
- B. Check the microphone situation in this terminal
- C. Check the video input of this terminal venue
- D. Check the remote venue video input

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 33

Background lighting can improve monotonous backgrounds; The background light should be dimmer than the main light to highlight the human image and create a sense of depth. ()

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 34

The following description of hd terminals is correct () .

- A. T. 140 subtitles include banners, middle captions, and instant messages, which can be configured to be displayed on different output ports
- B. The output interface selection shows H. 239 to display both mainstream and secondary streams
- C. The clear and smooth policy does not require special settings, and the primary and secondary stream video protocols are set to Auto in the "Meeting Parameters" of the terminal TEB page, in A clear and smooth strategy during the call will work
- D. Camera parameters such as exposure mode and white balance mode can only be set on the terminal web page

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 35

Above the UDP layer, the H.323 protocol is divided into () .

- A. Terminal Control
- B. Bandwidth Control
- C. Media Control
- D. Data Application

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 36

The large amount of data and the existence of data redundancy in the sound signal are the basis for the encoding of digital audio.

Answer:

Compression

NEW QUESTION: 37

The key point of signaling packet analysis is to be familiar with the flow of signaling, and when problems are found, focus on which signaling packages should be in the signaling process, and filter irrelevant data. The grab packet didn't catch which messages should have. ()

- A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 38

When using the MCU wall riding mode, you need to modify the firewall in the original network (such as open ports).

A. True

B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 39

The () function in Wireshark visualizes the conversational communication process graphically.

Answer:

View

NEW QUESTION: 40

INVITE transactions are retransmitted by default at () intervals.

A. 500ms?1s?2s?4s?8s?8s

B. 500ms?1s?2s?4s?8s?16s

C. 500ms?1s?2s?4s?4s?4s

D. 500ms?1s?2s?4s?16s?16s

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 41

During the meeting, in addition to recording the meeting content, the web recording service can also watch the meeting in real time through the live broadcast client.

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 42

GK's active-standby inversion is coordinated by a heartbeat connection.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 43

Packet capture of network data streams can be mainly achieved in the following ways. ()

A. Back in the capture

B. directly on the monitoring computer Back-to-peer, direct capture on the monitoring computer

C. Go back to the multipoint meeting and capture

D. by leveraging the hub hub to copy the data of the detected port multiplexing Back to the switch's port mirroring feature for capture

Answer: A,B,C,D (LEAVE A REPLY)

NEW QUESTION: 44

The arrangement of luminaires requires the use of direct illumination to avoid diffuse reflection. ()

A. True

B. False

Answer: (SHOW ANSWER)

NEW QUESTION: 45

The feature of the MCU can be used to bypass firewalls to resolve multimedia communication between end devices in two different network segments.

Answer:

Cascading

NEW QUESTION: 46

The SIP protocol is an application-layer protocol.

A. False

B. True

Answer: B (LEAVE A REPLY)

Valid H11-861_V3.0 Dumps shared by Actual4test.com for Helping Passing H11-861_V3.0 Exam! NEW QUESTION: 47

The Call-ID header field serves as a unique identifier for a collection of messages, and in a conversation, the Call-id must be the same in all the last requests sent by each UA. ()

A. True

B. False

Answer: A (LEAVE A REPLY)

NEW QUESTION: 48

The Clear Fluency Strategy works with the H.264H.265 protocol, and if there is no ability in the public capability, the Clear Fluency Strategy will not work. ()

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 49

The main advantages of AAC-LD audio encoding are: low bandwidth, low latency, and high quality. ()

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 50

H.460 The envelope in the media streaming interconnection scheme is created by which of the following protocols is established. ()

- A. H.225.0
- B. H.460.19
- C. H.460.18
- D. Q.931

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 51

The bunch parameter for a CANCEL transaction is the same as INVITE.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 52

The configuration of the 3G network of hd terminals, the following statement is correct.

- A. All 3G card HD terminals can be applied
- B. The default IP setting for 3G parameters is static
- C. The APN in the 3G configuration parameters is used for all data card
- D. Configuring 3G network parameters requires endpoint License support for 3G networks

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 53

```
Real Time Transport Protocol
Stream setup by SDP (frame 218)
10.0.0.1 ..... = Version: RFC 1889 Version (2)
HUAWEI..... = Padding: False
...0 ..... = Extension: False
... 0000 = Contributing source identifiers count: 0
0... ..... = Marker: False
Payload type: ITU-T G.711 PCMU (0)
Sequence number: 74
[Extended sequence number: 65610]
Timestamp: 191723441
Synchronization source identifier: 0x34ca36fd (885667581)
Payload: ffffffffffffffffffffffffffffffffffffffffffffffffffffffffff...
```

The frame does not have complete picture data, only data that differs from the previous frame.

Answer:

P

NEW QUESTION: 54

Which of the following describes a policy that is not part of MCU audio mixing?

- A. Mix
- B. You can control that sound is not sent to a certain terminal
- C. only for a few of the loudest channels Mix all venue sounds
- D. The sound answer received from a certain terminal can be not processed

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 55

When using the MCU wall riding mode, there is no need to add other devices traversed by public and private networks. ()

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 56

The system uses the H.245 protocol as the control protocol for controlling the communication channel. ()

- A. Bandwidth limit
- B. establish
- C. release
- D. Maintenance

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 57

When the MCU is working in wall riding mode, GE0 is registered with switch center and GE1 can only support IP address calling.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 58

The SIP protocol is a () protocol.

- A. Network layer
- B. Data Link Layer
- C. Application layer
- D. Transport Layer

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 59

The opening process of the logical channel in the H323 protocol follows the principle of "who transmits, who opens". ()

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 60

When the Huawei video terminal is successfully connected to the camera, the user can set the camera parameters through the web interface of the terminal, such as exposure mode, white balance mode, noise reduction, etc., where the larger the noise reduction value setting, the less noise in the picture and the clearer the details of the image.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 61

Video conferencing has certain requirements for lamps, and the lamps used require strong light efficiency, uniform and soft light, and make full use of diffuse reflection.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 62

Huawei NLOG software is part of the conference scheduling and management software, and is installed and used together with the SMC conference management software. ()

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 63

For the SDP protocol, line 0 contains parameters related to the session owner, where the first parameter is represented. ()

- A. Name answer of the session initiator
- B. of the calling party The address type
- C. The network type
- D. The session identifier

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 64

The Network Diagnostic Tool supports diagnostics in peer-to-peer networks where there is no networking traversed by public and private networks.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 65

H.323 During the call flow, the MCU records the registered address of the terminal.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 66

Ways to improve architectural acoustics include (). (Select 3 answers).

- A. Low reverberation time
- B. Low controllable noise
- C. Low background noise
- D. Low stairway noise

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 67

What elements are included in the SIP response message. ()

- A. Request line
- B. Header

C. Status line

D. Message body

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 68

The following description of the advantages and disadvantages of packet loss retransmission ARQ is correct.

A. Increase redundant data, occupy a certain amount of bandwidth, and reduce video efficiency;

There is no way for sudden packet loss; Introduce a certain delay

B. The latency requirements are high, and the existing network is difficult to use; Only for small packet loss scenarios; Aggravate image jitter

C. Through the group combination check, it is possible to recover the packet loss data with a certain probability, which is more effective for the general packet loss scenario

D. It basically does not occupy bandwidth resources and has little impact on image quality

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 69

The role of the LAN2 port of the HD terminal ().

A. Log in to the terminal locally and grab the package

B. Used to reverse

C. Used for the main business

D. with LAN1 port

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 70

Conversations are uniquely identified by Cal1-ID, From Tag, To Tag, and can be modified after they are created.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 71

Cascade channels are used by priority, and resources are mutually exclusive when at the same priority.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 72

The terminal recording request will be sent to the MCU, and then the MCU will uniformly record and broadcast the operation.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 73

A session-independent nature is that a SIP-URL represents a resource or user that needs to be accessed, and the message body can carry anything.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 74

The compression encoding of audio signals can be divided into ().

- A. Mixed encoding
- B. Predictive Coding
- C. Parameter encoding
- D. Waveform encoding

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 75

The terminal can send the conference content and the active image to the remote venue through the dual-stream desktop transmission function, and the desktop transmission format is directly consistent with the resolution size of the VGA input, which can support up to 1280*1024 The resolution of the desktop is sent.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 76

The processing process of audio signal from input to playback mainly includes: analog audio signal input, sampling quantization/encoding, playback, decoding, transmission/ Storage.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 77

capability negotiation is primarily used to declare the receiving and sending capabilities supported by this side. When declaring the priority capability set of this end, the other party needs to prioritize the use of the ability set.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 78

Color temperature affects the white balance of the camera, and where the color temperature is complex, the image can be cast.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 79

The GK side hangs up the call in case of ().

- A. Network reasons caused IRR to time out
- B. Verbal capacity negotiation failed
- C. Billing failed
- D. The interface hangs up

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 80

When MiniMCU is cascaded, calls that exceed three cascades will fail. ()

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 81

When querying the "System Status" on the web interface of the RSE6500, which of the following information cannot be obtained?

- A. Number of online users, number of tourists, number of terminals
- B. Local disk and network disk capacity
- C. Cpu usage and memory utilization of the system
- D. Maximum concurrent number of on-demand

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 82

During a peer-to-peer number call, H.245 performs capability set matching before opening the logical channel. ()

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 83

Banners and subtitles are multicast. ()

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 84

When forgotten HD end user and password can not log in to the web interface, can only restore factory settings.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 85

H.245 The main signaling consists of ().

- A. Capacity Negotiation
- B. Call request
- C. The Master-Slave decides
- D. Open/Close Logical Channel

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 86

H.460 Signaling interoperability scheme ().

- A. The public network terminal adopts the H.460 protocol for communication
- B. The private network terminal uses the H.460 protocol to communicate
- C. Both public and private network terminals use the standard H.323 protocol to communicate
- D. None of the above statements are true

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 87

The secondary stream can only be displayed on one display with the mainstream, not independently.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 88

Which of the following networking methods does the MCU support?

- A. Cascaded networking
- B. Public-private networking cross-networking
- C. IMS networking
- D. Built-in web networking

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 89

The SIP protocol is the session initiation protocol for establishing, controlling, and releasing sessions.

()

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 90

In the H460 network, the transmission keep-alive duration, keep-alive port, and keep-alive fields are in the signaling transmission stage. ()

- A. OLC opens logic channel during
- B. ACF message
- C. ARQ message in
- D. IIR message

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 91

In the design of the conference room, it is necessary to avoid direct illumination of the top light and metering from the top or window, which will directly cause the impact.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

Valid H11-861_V3.0 Dumps shared by Actual4test.com for Helping Passing H11-861_V3.0 Exam! NEW QUESTION: 92

The mcu wall riding mode requires modifications to the firewall in the original network (such as open ports).

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 93

The SIP () was adopted in June 2002 , which is the core specification for the SIP protocol .

- A. RFC3262
- B. RFC3263
- C. RFC3261
- D. RFC3264

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 94

GK can have only one prefix.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 95

A rackmount MCU can have two main control boards, support master-standby switching, and only need to configure one IP address.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 96

The wall riding scheme is a simple public and private network crossing method, which connects different network ports of the MCU in different networks to realize the terminals in different networks to access the same conference.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 97

The three modes of operation of the proxy are: Call Stateful, Stateless, transaction Stateful.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 98

All MCUs under the same service area must have the same prefix number.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 99

PCM coding mainly includes three processes: sampling, quantization, and coding.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 100

The INFORMATION that the IP header in the SETUP message does not contain Is there? ()

- A. Caller RAS addr
- B. GK RAS addr
- C. Callee CS addr
- D. Caller CS addr

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 101

In multimedia services, RTP is used for real-time datagram transmission and RTCP is used to detect the quality of service for an RTP session.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 102

HD terminal video output layout mode can be set to () display mode.

- A. Triple-screen
- B. Split-screen
- C. Split-screen
- D. Quad-screen

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 103

H. 323 ALG can only be used with certain firewalls. ()

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 104

MP mainly completes which of the following functions. ()

```
08:08:01 ARJ sendto [(61.131.13.141:1719)] [Caller] [59512724] [(61.1
err_call_callee_offline]]
```

- A. Code circulation
- B. Rate adaptation
- C. Conference Control
- D. Call

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 105

In multimedia services, RTP is used for real-time data packet transmission, and RTCP is used to detect the quality of service of an RTP session. ()

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 106

In video systems, anti-packet loss algorithms mainly include forward error correction FEC and packet loss retransmission AQR.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 107

Which of the following messages indicates that the request cannot be implemented on any SIP server. ()

- A. 5xx
- B. lxx
- C. 6xx
- D. 3 xx

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 108

Huawei VUE Exam Instructions: 1 The exam randomly draws 60 questions, with a score of 1000, and can be passed by 600; 2 After the question bank is all mastered, you can make an appointment for the exam, and the day before the exam, you can make an appointment at the nearest test center; 3. The test question types are single choice and multiple choice, judgment, fill in the blanks, drag charts, and the questions will not tell single choice or multiple choice You can tell by the options: the radio option is preceded by "Circle", the multi-select option is preceded by "Box"; 4 Exam questions and options are randomly out of order; 5 Documents: ID Card + (Student ID Work Card Credit Card Social Security Card Passport) One of the two documents in total

6. Arrive at the test room 10 minutes in advance (if you encounter special circumstances, you can contact the test room if you are late).

ZTE VUE Exam Instructions:

1. The exam randomly selects 60 questions, with a full score of 100 points, and can be passed by the exam 60 points; (some exams pass 80 points: for example, ZTE service specifications) 2 The question bank is all palmed After holding the exam, you can make an appointment for the nearest test center the day before the exam; 3. The test question types are single choice, judgment, and multiple choice, each with 20 questions; 4 The order of the exam questions is single choice, multiple choice, judgment; the options are randomly out of order; 5 ID: ID 6 Arrive at the test room 10 minutes early (if you are late in case of special circumstances, you can contact the test room).

Answer:

Ibid

Explanation:

[Judgment Questions].

NEW QUESTION: 109

Which of the following descriptions of the SIP protocol is correct?

- A. can be transmitted over
- B. Used to transmit voice packet
- C. TCP is a transport layer protocol
- D. Cannot transmit answers on UDP

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 110

In logical SIP entities, UAS is used to initiate SIP requests and UAC is used to return SIP responses.

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 111

When sending and receiving T.140 subtitles, both parties who need to join support T.140 subtitles.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 112

In video conferencing, the empty field noise is required not to be greater than ()dB. (Fill in the blanks)

Answer:

40

NEW QUESTION: 113

Which one is wrong with the description of the VP9660 single board LEDs below?

A. The following description of the VP9660 veneer LED, which one is wrong?

B. The ACT LED status is solid green, indicating that the veneer is the main board

C. Run indicator status is green solid on, indicating that the single board is running normally

D. GE/FE the network port indicator status is green and constantly off, indicating that the network port connection is abnormal

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 114

The switch port connected to the MCU must be: LOOM half-duplex. ()

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 115

Enabling SEC, the system can automatically adjust the network transmission and different error corrections of AV processing for the rich QOS mode of the IP network After enabling SEC, the anti- packet loss ability has been greatly improved ()

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 116

The alarm light on the MCU dashboard is red and the meeting is scheduled to prompt "License resources are insufficient", possibly because of the MCU The license does not match the actual hardware configuration of the MCU.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 117

Currently, the MCU supports the upgrade methods ().

- A. Web upgrade
- B. All of the above can be answered
- C. Minimize Upgrade
- D. FTP Upgrade

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 118

Adhoc Conferencing is a conferencing mode that allows you to create and join a meeting on the terminal side without an administrator.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 119

Request/response messages on reliable transports are not retransmitted.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 120

Which parts must be included in the transaction. ()

- A. Zero or more temporary responses to
- B. A final response
- C. ACK
- D. One request message

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 121

More than 20% of the information that humans get from the outside world comes from hearing, and the sound that the human ear can perceive is a mechanical vibration wave, and the sound wave frequency is between which of the following ranges?

- A. 50-20000
- B. 20-20000
- C. 20-40000
- D. 30-30000

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 122

Wireshark can capture packets of multiple network interface types, with the exception of wireless LAN interfaces.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 123

Cascading between MiniMCU, the default caller will be the primary MCU and the MiniMC that is already the primary MCU will be called It will not be changed again during the meeting. ()

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 124

Under the H. 323 protocol, the signaling required to complete the master-slave decision process is. ()

- A. TCSR , TCSA
- B. DRQ , DCF
- C. MS DR , MS DA
- D. GRQ , GCF

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 125

931 Loaded on the () layer.

- A. IP
- B. Data Link Layer
- C. TCP
- D. UDP

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 126

The test can display 7 color bars on the screen to detect the effect of the picture output.

Answer:

Color bars

NEW QUESTION: 127

The gatekeeper's address translation function refers to the conversion of farm names or numbers to IP addresses based on the data table at the time of node registration.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 128

The following description of HD terminals is correct ().

- A. Hd video terminals support remote control of the camera
- B. HD video terminals must be registered with GK in order to communicate
- C. HD video terminal Web page password can not be empty
- D. HD video terminals cannot communicate with SD video terminals

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 129

H.264 video divides the image into three types of frames: I, P, and B, with I frames encoded between frames and P frames encoded in-frame.

- A. False
- B. True

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 130

Message is the basic unit of the SIP protocol, the basic unit of interaction between the client and server sides

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 131

The core of the NAT mapping is to modify the packet header (source address) to translate the source address into a NAT address ().

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 132

In the H460 network, the transmission keep-alive duration, keep-alive port, and keep-alive fields are in the signaling transmission stage. ()

- A. ARQ message in
- B. ACF message
- C. IIR message
- D. OLC opens logic channel during

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 133

Only if the terminal supports T.140, you can use the T.140 method to send banners, subtitles, or short messages to a specified venue.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 134

Under static NAT networking, the signaling description of the public network terminal called the private network terminal is correctly (). (3 answers).

- A. The DST address actually processed by the firewall is a private network address
- B. The DST address is the NAT address of the private endpoint
- C. Callee CS addr is the NAT address
- D. The Caller CS Addr address is the NAT address of the private network terminal

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 135

RAS performs administrative functions, the main content of which includes ().

- A. enroll
- B. Access Control
- C. safe
- D. State

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 136

Accept the message sent by the terminal to the gatekeeper about the gateway request to deregister registration, which of the following signaling can achieve this function

- A. RRQ
- B. GRQ
- C. URQ
- D. ARQ

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 137

As can be seen from the figure, the venue can not receive remote venue video in the meeting, what measures can the user take to locate the cause of the failure?

- A. Check the microphone situation in this terminal
- B. Check the remote venue camera condition
- C. Check the video input of this terminal venue
- D. Check the remote venue video input

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 138

AN INVITE transaction consists of a three-way handshake. The client transaction sends INVITE, the server transaction sends the response, and the client transaction sends an ACK, ().

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 139

Which of the following is not a disadvantage of forward error correction?

- A. Exacerbate image jitter
- B. There is - fixed-delay
- C. Consumes more bandwidth
- D. Lower video effect

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 140

In a networking network, what is the code flow hole between the public network and the private network terminal maintained? ()

- A. No maintenance is required, and the code circulation channel is established after the hole is opened
- B. Timed Keeper Pack
- C. tunnel
- D. IRQ heartbeat message

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 141

The private network terminal calls the public network terminal, and when the logical channel is opened, the reason for the occurrence of a single pass of media streaming is ().

- A. The terminal cannot negotiate the capability
- B. The firewall does not open the corresponding port
- C. The terminal cannot perform master-slave determination
- D. The public network terminal cannot find the private network address

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 142

GK supports the resolution of the called number to the neighbor GK when the called node belongs to the neighbor GK area based on the called number.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 143

SEC2.0 is suitable for network packet loss models that are burst-type packet losses.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 144

Regarding the Client proxy in the H.460 protocol, the following description is correct ().

- A. The Client proxy follows the standard H.323 communication protocol.
- B. Client proxy features include ClientGK, H.460.18 Client, and H.460.19 Client
- C. The Client proxy follows H. 460 Communication Protocol.
- D. Terminals that do not support the H.460 protocol can use the standard

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 145

H.460 In the network, the SETUP connection of the private network terminal is

- A. Public Terminal
- B. GK
- C. TS
- D. MCU

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 146

Non-T.140 subtitles only support sending and receiving subtitles from H.323 type terminals.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 147

A short message is when a message () can be sent to a designated venue or to all venues for inter-venue communication and information prompting.

- A. Picture
- B. Text
- C. Video
- D. Table

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 148

A short message is one that can send () messages to a designated venue or to all venues for inter-venue communication and information prompting. (Fill in the blanks)

Answer:

Text

NEW QUESTION: 149

The original MCU cascade has a cascade channel, which can only transmit one video code stream, and the Zhizhen conference can only transmit the medium-screen image, supporting multi-channel cascading, each level of MCU Multiple video can be transmitted, and a complete Zhizhen 3-screen image can be transmitted to enhance the experience.

- A. Error
- B. True

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 150

Loudness indicates the strength of the sound, () determines the size of the loudness.

- A. Sound frequency
- B. Material of the vocal body

- C. Sound intensity
- D. Amplitude of sound waves

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 151

In an RTP message, Timestamp reflects the sampling moment of the first bit in the RTP packet. The instantaneous accuracy of sampling must meet the synchronization requirements for synchronization and jitter calculations. The starting value of the time flag is random and will be incremented with the size of the message data.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 152

A CANCEL transaction can only be received after receiving an ad hoc response from INVITE (including 100). The final response is sent before. ()

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 153

The Clear Fluency Strategy works with the H.264/H.265 protocol, and if there is no ability in the public capability, the Clear Fluency Strategy will not work. ()

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 154

A high-definition video terminal (referred to as a terminal) is a codec that processes audio and video code streams and data code streams.

- A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 155

Of the six basic request messages, () are used to query the server capabilities

A. OPTIONS

B. REGISTER

C. INVITE

D. ACK

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 156

For the relationship between photography and reflected light, how to use the reflected light of indoor decoration. ()

A. If the reflected light is too small, the direct light of the lamp causes a thick shadow, which will seriously affect the camera effect.

B. If too much light is reflected, it will increase the illuminance of the display.

C. If the mouth reflects too little light, it will increase the illuminance of the display.

D. Back to a large area of colored decoration will change the color temperature of the reflected light, resulting in a colored shadow

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 157

Illuminance is based on the luminous flux received by the vertical surface as the standard, and if oblique illumination is used, the illuminance decreases. ()

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 158

H.323 gateway refers to a node that provides real-time two-way traffic between the H.323 terminal on the SCN and other nodes on the PBN.

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 159

The Network Diagnostic Tool supports initiating diagnostic tests from the Public Network to the Private Network Diagnostic Tool.

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 160

What addresses are typically included in the RRQ message for the GK registration record address when the node is registered? ()

- A. Proxy Addr
- B. Caller Cs Addr
- C. Caller RAS Addr
- D. Caller Number

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 161

The main roles of RTCP include ().

- A. Send RTCP control packet
- B. Quality feedback
- C. Transport Layer Identifier (CNAME).
- D. Transmission Data to the participant

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 162

In the multi-channel cascade feature, up to 32 cascaded channels between two MCUs in the same meeting.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 163

In VR scenarios, the terminal cannot join the meeting () in one of the following ways.

- A. Call the conference access number
- B. The MAC address
- C. for the MCU Call the Unified Access Number
- D. Ip Answer for Calling MCU

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 164

As shown in the figure, the RTCP instance flow includes SR, RR, and () messages.

No.	Time	Source	Destination	Protocol
504	35.835648	10.77.194.94	10.77.232.105	RTCP

NEW QUESTION: 167

Which of the following must the SIP request message contain?

- A. Header Domain
- B. Request line
- C. Response line

D. Message body

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 168

The MCU wall riding mode does not require the use of private protocols and can be used with terminals of different manufacturers. ()

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 169

Any SIP message consists of a starting line, a header field, and a message body, and the header domain must end with CRLF (Carriage Return Line Feed).

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 170

Response messages are used to respond to request messages that indicate the status of success or failure of a call, and different types of response states are distinguished by status codes, which contain three-digit integers, the first bit of the status code Used to define the response type, the other two digits are used to further explain the response in more detail. ()

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 171

What properties does the color rendering index affect on the color of a video image?

A. Saturation

B. Clarity

C. Reductive

D. Light and dark

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 172

Intelligent control system includes video system, audio system and others, which of the following does not belong to the video system. ()

A. Pickup system

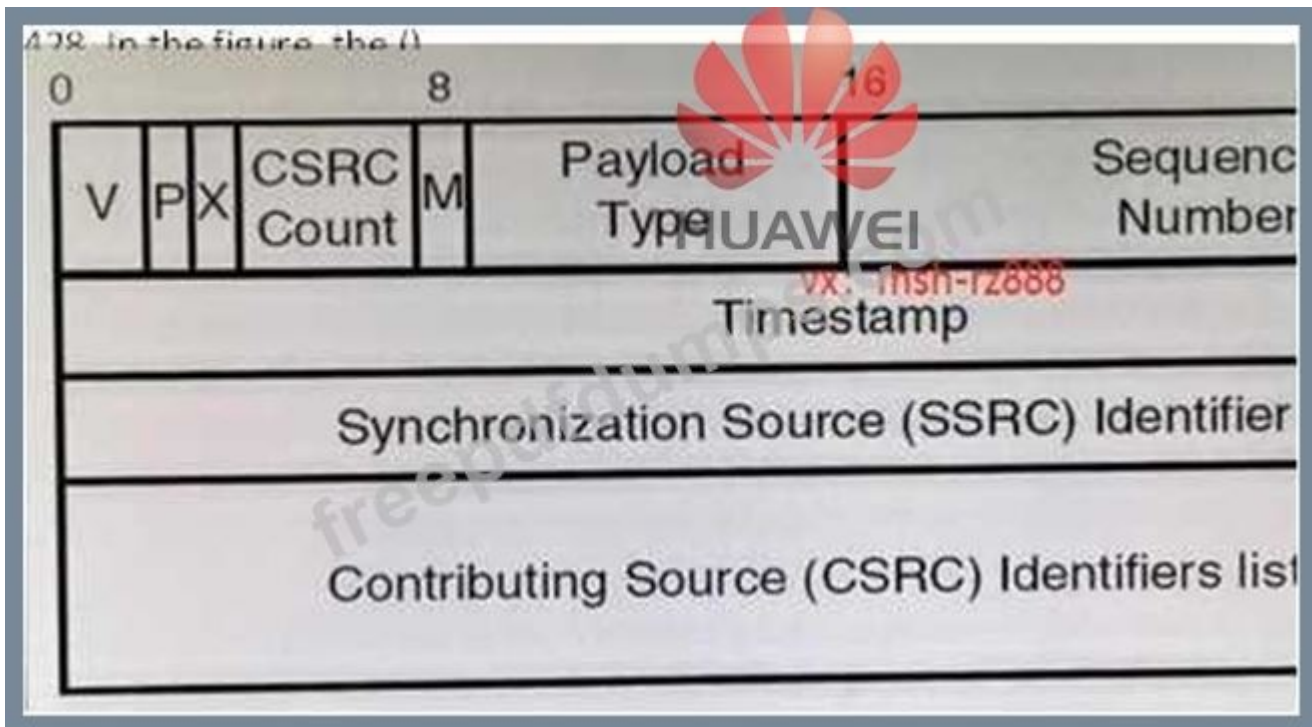

B. Lighting system

C. Video Input System

D. The video shows the system

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 173

When the speech codec capability is negotiated in the SIP protocol, the voice codec supported by the local device is provided, including PCMU and PCMA. Based on the RTP message shown in the figure, it can be seen that the () voice codec is selected.

Answer:

PCMU

NEW QUESTION: 174

The response message "lxx" indicates . ()

- A. Indicates that the request cannot be implemented on any SIP server
- B. Indicates that the request message contains a syntax error or that the SIP server cannot complete processing of the request message
- C. Indicates that the request message has been received and is being processed
- D. Further action is required to complete the request

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 175

Master-slave decisions are mainly used to prevent both parties from triggering the same unsharable event or resource at the same time during communication, so a master party needs to be identified in advance. When a conflict occurs, the slave shall act at the discretion of the master.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 176

T.140 Subtitles support sending and receiving subtitles from SIP, H.323 type terminals.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 177

HD terminals support peer-to-peer () calling. (3 answers).

- A. IP Address
- B. Venue name
- C. Number
- D. MAC address

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 178

Image format refers to the size or resolution size of the image, common image formats include, SOCIF, QCIF, CIF, ACIF, 16CIF, HD, Full HD. ()

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 179

Due to the size of the display and the resource limitations of the MCU , the number of multi-screen sprites generally does not exceed 24 , otherwise the image is too small and the picture will not be clear.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 180

For reverberation, the pickup is dominated by a direct sound, and the appropriate amount of reverberation sounds thicker, and it is recommended that the pickup direct sound be around 90%. However, the reverberation sound after 50ms will affect the language comprehensibility, and it is recommended that the sound energy reached within 50ms accounts for more than 80%.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 181

The H.323 six-step call process applies to all H.323 nodes.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

There are three types of 260.H.264 encoded video frames : ().

A. B I P

B. C Q B

C. T C B

D. A Q P

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 183

Three-color lamp refers to the use of red, yellow, blue three color spectrum of the lamp and light emitting lamps, the general luminous color and the color temperature of the lamp has a relationship, with a soft luminous light, uniform brightness, no stroboscopic, high visibility, small power consumption, high voltage resistance, no electric heat disaster characteristics.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 184

Call acceptance, which is used by the terminal to request the validity certificate of the call from GK and the address and bandwidth information of the caller. ()

A. True

B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 185

How often does the terminal default interval report packet loss to the MCU?

A. 20s

B. 1s

- C. 6s
- D. 15s

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 186

The following description of the H.323 call flow is correct

- A. Q.931, H.245 hosted in the TCP protocol layer
- B. AS Common Port : 1720
- C. Q.931 Common port: 1719
- D. RAS, RTP/RTCP are hosted in UDP protocol layer

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 187

People convert the corresponding mechanical vibrations of sound into electrical signals, which are collectively referred to as audio signals.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 188

The role of RTP in VoIP mainly includes: real-time transmission of media information, elimination of jitter, card performance, prevention of packet loss, in a certain situation can be transmitted DTMF signals, tones and signaling.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 189

In the SIP protocol, when the response message is "1xx", it means that the request message has been received and is being processed.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 190

Which of the following signaling signalings can the gatekeeper issue address resolution requests to other gatekeepers?

- A. RRQ
- B. GRQ
- C. LRQ
- D. URQ

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 191

If both the sender and receiver () are the same, the MCU forwards directly. (3 answers).

- A. Wide
- B. Video Protocol
- C. format
- D. Type

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 192

During the MCU main control board backup reversal process, the conference and venue status on the SMC will be offline for about 10 seconds.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 193

The primary purpose of 515.H.323 is to establish peer-to-peer media sessions and multipoint media conferences. ()

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 194

What are some of the following reasons for the GK side to hang up a call?

- A. Network reasons caused IRR timeout
- B. Competency negotiation failed
- C. Interface Hang Up
- D. Billing failed

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 195

Due to the size of the display and the limitation of MCU resources, the number of multi-screen sprites generally does not exceed 16 sprites, otherwise the image is too small and the picture will not be clear.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 196

Which of the following protocol messages does Wireshark support decoding?

- A. RIP
- B. H. 263
- C. TCP
- D. IP

Answer: B,C ([LEAVE A REPLY](#))

Actual4test.com now offer the **newest H11-861_V3.0 exam dumps**, the Actual4test.com H11-861_V3.0 exam **questions have been updated** and **answers have been corrected** get the **newest** Actual4test.com H11-861_V3.0 dumps with Test Engine here: https://www.actual4test.com/H11-861_V3.0_examcollection.html (**597 Q&As Dumps, 30%OFF** Special Discount: **Freepdfdumps**)

NEW QUESTION: 197

The multi-channel cascade feature requires that the video protocol of all multi-channel venues be consistent, and the bandwidth can be different. ()

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 198

Private network HD terminals use static NAT for public and private network crossing, regarding the calls between terminals, the following statement is incorrect ().

- A. Public network terminals can call private network terminal
- B. None of the above descriptions are correct
- C. Private network terminals can call public network terminals
- D. Private network terminals can call through public network terminals

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 199

Which of the following in the header domain is used to represent the SIP entity through which the request passes and the route response?

- A. From
- B. T
- C. CSeq
- D. Via

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 200

Under static NAT networking, the signaling description of the public network terminal calling the private network terminal is correctly ().

- A. The Caller CS Addr address is the NAT address of the private network terminal
- B. The DST address is the NAT address of the private endpoint
- C. Callee CS addr is the NAT address
- D. The DST address actually processed by the firewall is the private network terminal address

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 201

What are the main management functions performed by RAS?

- A. Access Control
- B. Number Registration
- C. Security Management
- D. Status Inquiry

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 202

NLOG does not support saving network data as ().

- A. JPG images
- B. TXT File
- C. CSV file
- D. PNG pictures

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 203

At DVI output, the 9039S and 9039A can support a primary and secondary input resolution of 1080P

60fps, in which case the secondary can reach (). The resolution of .

- A. 1080P
- B. 10801
- C. 720P
- D. 7201

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 204

The video signal starts from the input terminal equipment, is sent to the network after encoding and compression, and finally displays, and has gone through many image processing links in the middle, mainly including: IP camera signal acquisition, pre-processing, compression encoding, data packaging and transmission, decoding, image format changes, playback.

- A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 205

Several video compression standards that are currently widely used include: H.261, H.263 and H.264 and MPEG-1, MPEG-2 and MPEG-4. Its H.26X series of standards is primarily used for real-time video communications, and the MPEG series of standards is primarily used for video storage (DVD), video broadcasting, and video streaming.

A. Right

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 206

The H.460 protocol is a firewall/NAT traversal standard approved by the ITU of the International Telecommunication Union and consists primarily of ().

A. H.460.19

B. H.460.20

C. H.460.18

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 207

The function of the registration server is to map the addresses in the request to zero or more new addresses and then return them to the client.

A. True

B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 208

The packet loss rate recorded by NLOG does not include packet loss from data devices on the line.

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 209

When an endpoint/MCU calls with a number, the ARQ call information does not include the following () of the following

A. Callee CS addr

B. Caller CS addr

C. Caller Number

D. Callee Number

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 210

The RTP protocol provides both real-time transmission capabilities and service quality assurance mechanisms.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 211

Small A found that the image is not clear and the overall image is dark when holding a video conference, please analyze it in combination with the optical principles of video conference construction, which of the following is the most likely cause?

- A. Insufficient illuminance
- B. There is a strong signal source around the interference
- C. The light is too bright
- D. Network instability

Answer: A ([LEAVE A REPLY](#))

Valid H11-861_V3.0 Dumps shared by Actual4test.com for Helping Passing H11-861_V3.0 Exam! NEW QUESTION: 212

In video conferencing, local noise is required not to be greater than ().

- A. 36dB
- B. 40dB
- C. 38dB
- D. 34dB

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 213

H.225 contains which of the following signalings ().

- A. T.120
- B. Q.931
- C. H.281

D. RAS

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 214

What are the ways to schedule recorded meetings. ()

- A. Dispatch answers directly on the SMC
- B. Terminal web interface scheduling
- C. The Zhizhen venue is scheduled through the central control touchpad
- D. Direct scheduling on the video phone

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 215

The gateway in 502.H. 323 is between a circuit-switched network and a packet-switched network.
()

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 216

H.460 In the media streaming interconnection scheme, the preservation package is created by which of the protocols listed below ().

- A. H.255.0
- B. Q.931
- C. H.460.19
- D. H.460.18

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 217

The chromatic aberration (YPbPr) output supports both 16:9 and 4:3

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 218

The following description of the advantages and disadvantages of forward error correction FEC is correctly ()o

- A. It basically does not occupy bandwidth resources and has little impact on image quality
- B. Increase redundant data, occupy a certain amount of bandwidth, and reduce video efficiency; There is no way for sudden packet loss; Introduce a certain delay
- C. Through the group combination check, it is possible to recover packet loss data with a certain probability, which is more effective for general packet loss scenarios

D. The latency requirements are high, and the existing network is difficult to use; Only has an effect on small packet loss scenarios; Aggravate image jitter

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 219

SDP (Session Description Protocol) is a transport layer control protocol used to describe multimedia sessions . ()

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 220

A firewall is one that protects a network from attacks by "untrusted" networks, but at the same time must also allow legitimate communication between two networks

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 221

The response message is 3XX for ().

A. Further action is required to complete the request

B. The request was received, processed, and successfully accepted

C. The request message has been received and is being processed

D. Indicates that the SIP server failure could not complete the processing of the correct message

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 222

The role of MP is to complete the interaction of control information with the conference TV terminal.

A. True

B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 223

is a general multimedia communication control protocol, mainly for conference communication design, H.323 system using H.245 protocol as a control protocol, for the establishment, maintenance and release of control channels.

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 224

Video compression includes intra-frame compression (1 frame) and inter-frame compression (P frame), common H.26X, MPEG-2, MPEG-4 Both support in-frame/inter-frame compression.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 225

A firewall protects a network from attacks by "untrusted" networks, but must also allow legitimate communication between the two networks. ()

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 226

The color rendering index affects the color of the video image. ()

- A. Brightness
- B. Saturation
- C. Color temperature
- D. Reductive

Answer: B,D ([LEAVE A REPLY](#))

Valid H11-861_V3.0 Dumps shared by Actual4test.com for Helping Passing H11-861_V3.0 Exam! NEW QUESTION: 227

Voice enhancement technology, automatic noise suppression ANR can solve the problem of the overall low or high call volume in the line.

- A. True
- B. False

Answer: (SHOW ANSWER)

NEW QUESTION: 228

Which of the following types of RTCP messages is used to describe the source from which the RTCP packet was sent?

- A. APP
- B. RR
- C. SR
- D. SDES

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 229

Which of the following protocols belongs to the encapsulated transport protocol ().

- A. RTSP
- B. SIP
- C. RTP
- D. RSVP

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 230

For request messages, which of the following is not required. ()

- A. Request line
- B. Header Domain
- C. Message body
- D. Response line

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 231

In the figure, select an attribute of the packet, right-click and select the option within the () group to specify this attribute as a filter condition, which must be clicked apply before it takes effect.

Answer:

Apply as
Filter

NEW QUESTION: 232

If both the sender and receiver () are the same, mcus is forwarded.

- A. Type
- B. format
- C. Wide
- D. Video Protocol

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 233

In the process of the MCU main control board main standby reversal, the conference and venue status on the SMC will be offline for about 10 seconds.

- A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 234

For the relationship between the camera and the background, why can't there be too complex background? ()

A. The camera's AF function automatically focuses on areas with higher edge energy, and too complex backgrounds are easy to make the camera focus on the background and create a blurred foreground

B. Complex backgrounds occupy more transmission bandwidth, affecting the codec effect of the background.

C. Complex backgrounds occupy more transit A-lodge bandwidth, affecting the foreground of the decoding effect.

D. The camera's AF function automatically focuses on areas with high edge energy, and too complex backgrounds are easy to make the camera focus on the foreground and create a background blur.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 235

Which of the following messages is used for endpoint registration ().

A. RCF

B. INAK

C. LCF

D. ACF

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 236

During a point-to-point number call, the terminal ends up getting a () of the peer terminal from GK to make the call.

A. Number

B. MAC

C. IP address

D. VLAN ID

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 237

Packet loss retransmission ARQ, similar to TCP's retransmission mechanism, requires the peer to resend the UDP when the UDP packet loss of the video stream is detected in the network Stream, the receiving side stores the received stream in a certain cache, and only opens the decoding after receiving the retransmitted stream.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 238

Which of the following values does the color rendering index required for video conferencing light sources need to be greater than?

A. 100

B. 90

C. 150

D. 80

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 239

After the terminal enables the NAT setting, it can change the content of the packet message, which mode can be used for NAT networking to achieve public and private network communication

A. DNAT

B. Static NAT Networking

C. The above NAT networking supports

D. NAPT

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 240

How does the terminal read the camera's data?

A. Red Outside

B. Video Line

C. Audio cable

D. Control lines

Answer: D ([LEAVE A REPLY](#))
