NEW QUESTION: 1

What storage service on Azure should be used for the API Management capability of Cloud PaK for Integration?

- A. Azure Tables
- B. Azure Blobs
- C. Azure Disks
- D. Azure Files

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

What is the patented Data Transfer Technology that is included with the Cloud Pak for Integration?

- A. FTP
- B. FASP
- C. HTTPS
- D. SFTP

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 3

What is one feature of the IBM API Connect capability?

- A. Build integration flows with pre-built connectors for SaaS products and APIs
- B. Provides security, control, integration, and optimized access to APIs
- C. Provides a robust set of enterprise-grade API management capabilities
- D. Access, transform, and combine data assets across all of your enterprise applications, databases, and systems, with the capability to expose them as APIs

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

Which two scenarios are true for a customer who buys licenses of Cloud Pak for Integration (CP4I)?

- A. Customer will need to purchase equivalent entitlements to Red Hat OpenShift Container Platform
- B. Entitlements will be consumed when CP4I features like tracing, common services, and Platform Navigator are used
- C. These entitlements can be used for deploying any capability that comes as part of CP4I
- D. Customer can use some of these entitlements for deploying WebSphere Application Server
- E. Customer can use these entitlements to run standalone version of components bundled in CP4I

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

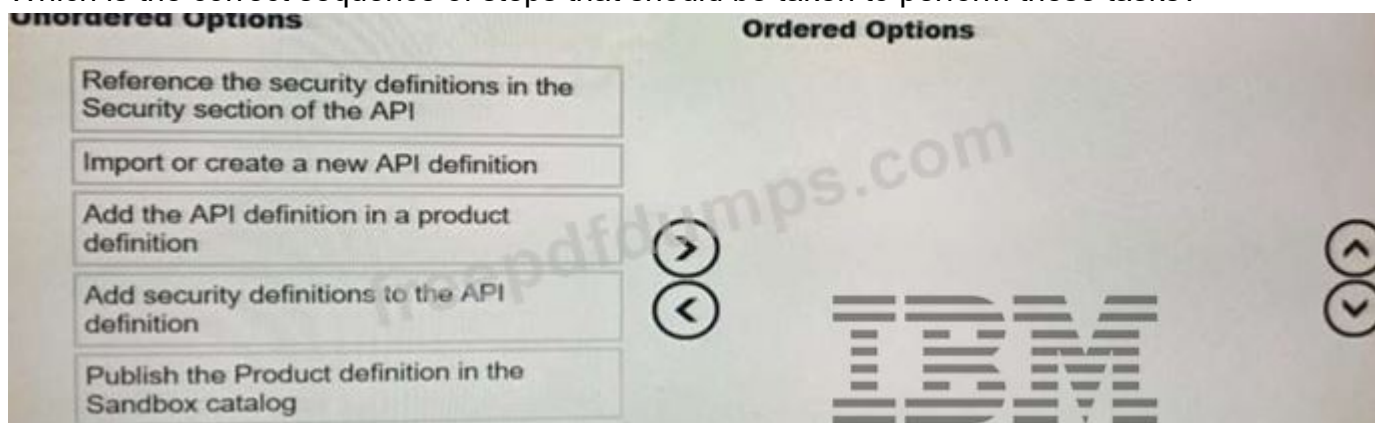

What is the purpose of the Asset Repository?

- A. To store integration artifacts and documents
- B. To store container images generated in the platform
- C. To store IBM certified container images
- D. To store data of the servers that compose the cluster

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 6

A new proxy API needs to be created, security added, and published to the Sandbox catalog. Which is the correct sequence of steps that should be taken to perform these tasks?

Answer:

Answer Area

Import or create a new Apl definition

Add the API definition in a product definition

Add security definitions to the Apl definition

Reference the security definitions in the Security section of the API

Publish the Product definition in the Sandbox catalog

- 1 - Import or create a new Apl definition
- 2 - Add the API definition in a product definition
- 3 - Add security definitions to the Apl definition
- 4 - Reference the security definitions in the Security section of the API
- 5 - Publish the Product definition in the Sandbox catalog

NEW QUESTION: 7

Which is an IBM Cloud Pak solution advantage?

- A. Full software stack support, ongoing security, compliance, and version compatibility
- B. Continuous Delivery and Continuous Integration (CD/CI) tools
- C. OpenStack integration out of the box
- D. Dedicated support team for application migration to IBM Cloud

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 8

How can DataPower Gateway workloads be restored in the DR site?

- A. DataPower Gateway container images need to be available in a container registry that the DR site has access to
- B. In Cloud Pak for Integration Platform Navigator, select the running DataPower Gateway instance and then click 'Export for DR site'
- C. Containers do not hold state, which would require workloads to be reconfigured from scratch
- D. Cloud Pak for Integration can automatically synchronize the running pods with the DR site

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 9

What is a significant challenge that is unique to hybrid messaging?

- A. Iterate quickly on the cloud and interact easily with enterprise systems of records
- B. Synchronous connection and distribution of events between cloud and on-premises systems

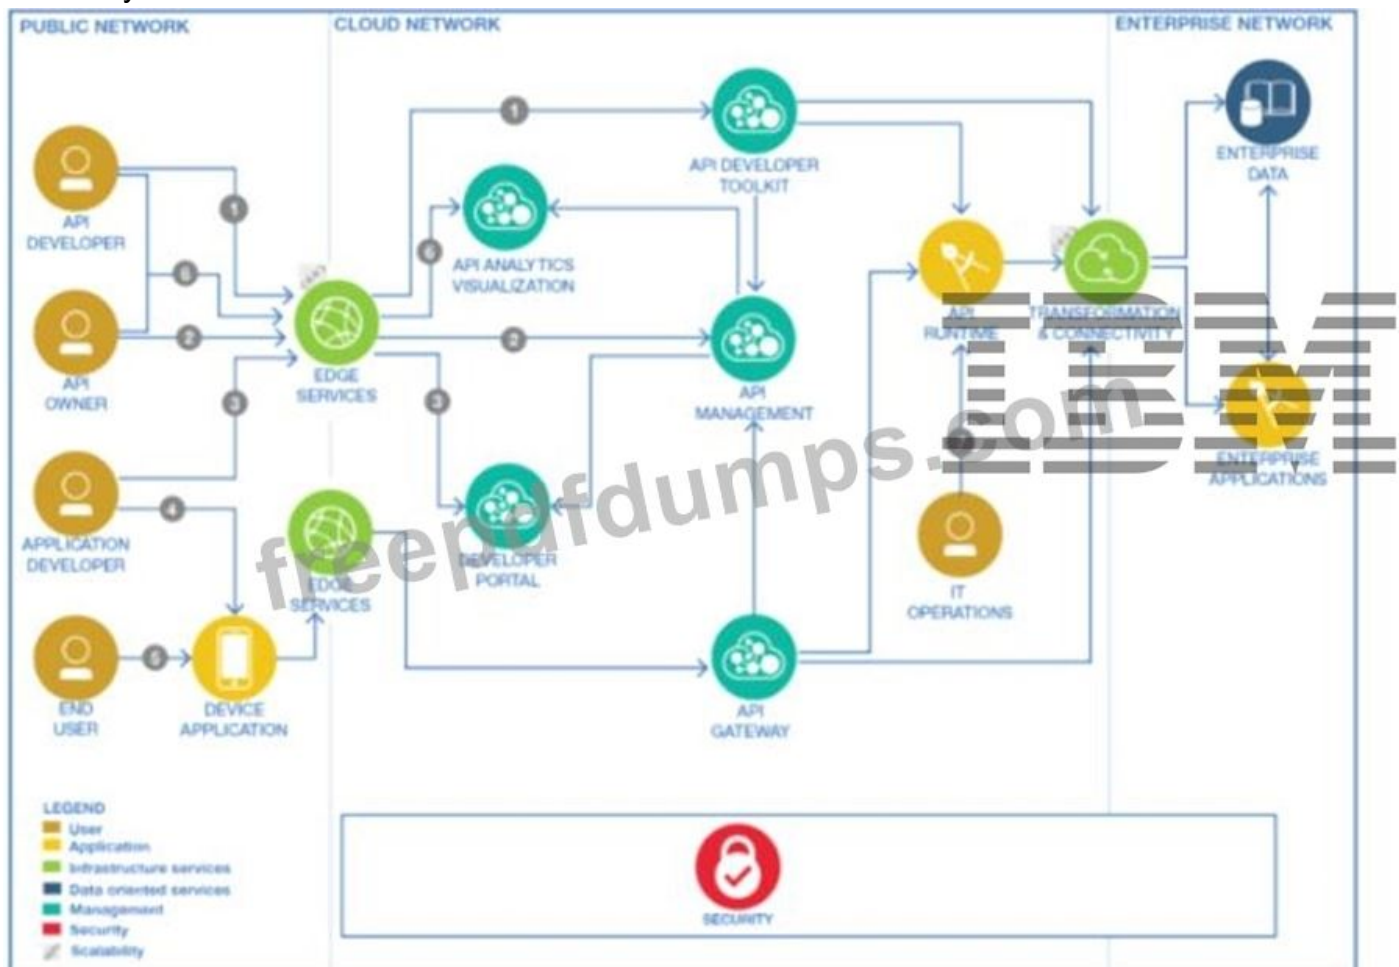

C. Monitoring of privileged access to sensitive data and integrity of sensitive data in transit and at rest can be done only within the enterprise

D. Build a scalable and high-throughput enterprise messaging backbone to support applications on the cloud

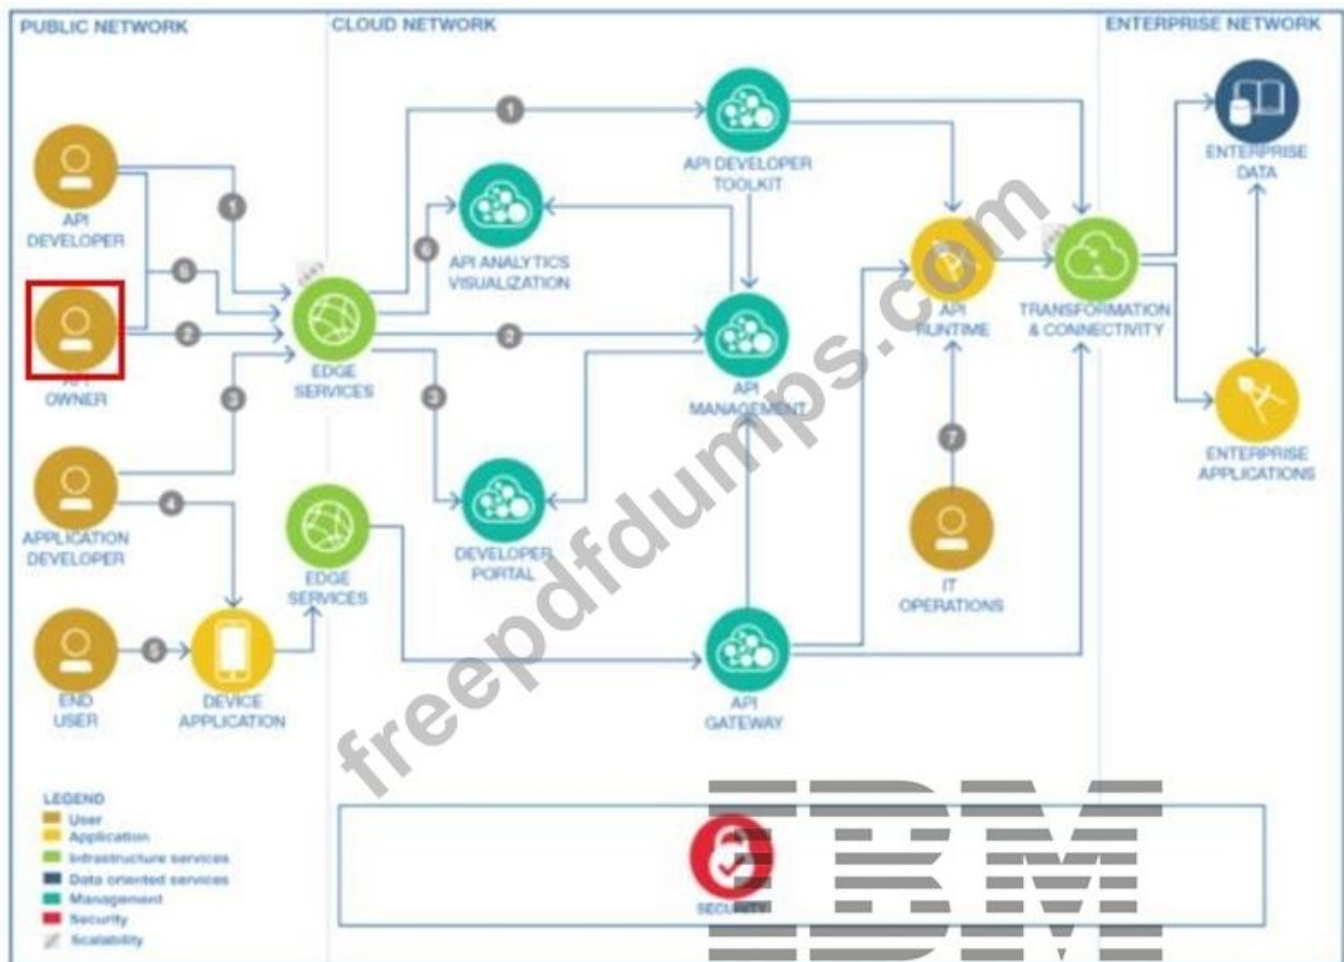

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

In the image below, select the user role that can include an API endpoint to existing API products and plans, specifies access control, and publishes the API to the developer portal for external discovery.

Answer:

NEW QUESTION: 11

Which statement describes Tekton?

- A. It is a Block Storage service for providing volumes to virtual machines, bare metal hosts, containers and more
- B. It is an integrated OpenStack program which aims to provision bare metal machines from the OpenShift Container platform
- C. It is an open source project that provides a framework to create cloud-native CI/CD pipelines quickly
- D. It is an Open Source project that allows provisioning, managing and running virtual machines from and within Kubernetes environments like OpenShift

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 12

Which Command Line interface tool provides an analyze method which validates resources configuration and print validation messages?

- A. oc
- B. cloudctl
- C. calicoctl
- D. istioctl

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 13

What is the easiest way to consume an application residing outside of the boundaries of a cloud-native application?

- A. node.js
- B. XML
- C. Java Functions
- D. APIs

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 14

Which statement describes Container orchestration?

- A. A runtime environment that automates and reports on processes that are intended to help optimize businesses
- B. The automated process of managing or scheduling workloads within clusters
- C. A small software layer that enables multiple operating systems to run alongside each other
- D. A CI/CD component that automates steps in a software delivery process

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 15

What is the function of Kibana in the Cloud Pak For Integration logging service?

- A. Index, search, and store log data
- B. Capture, collect, and forward log data
- C. Collate, correlate, and interpret log data
- D. Query, discover, and visualize log data

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 16

Which capability of the Cloud Pak for Integration secures the front door of a cloud native application?

- A. Event Streams
- B. App Connect Enterprise
- C. Messaging
- D. API Management

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 17

Which two Cloud Pak for Integration products can run in HA mode without the need for quorum?

- A. Event Streams
- B. Aspera
- C. MQ
- D. App Connect Enterprise
- E. API Connect

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 18

Which two technologies can be used to extend the DataPower Gateway processing behavior?

- A. Python
- B. Java
- C. XSLT
- D. JavaScript
- E. C#

Answer: A,E ([LEAVE A REPLY](#))

NEW QUESTION: 19

Which statement is true regarding API flows exported as BAR files from an instance of the IBM App Connect Designer?

- A. They must be packaged in an immutable Docker integration image
- B. They can be exported as a BAR file for deployment in an integration server
- C. They can include actions for a callable flow
- D. They use the Connector API to stage API assemblies to an IBM API Connect catalog

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 20

Which active-standby pair of queue managers uses a shared networked file system?

- A. Replicated data queue manager
- B. Integrated HA queue manager
- C. Multi-instance queue manager
- D. Double resilient queue manager

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 21

What is one way to perform an automated build of an App Connect Enterprise (ACE) application within a CI/CD pipeline?

- A. Run a Docker build to create a bar file within a Jenkins pipeline, and store it in Artifactory.
- B. Build a bar file from a Project Interchange within the ACE toolkit and push it to GitHub.
- C. Use Source2Image within a Tekton pipeline to create a bar file from a Project Interchange.
- D. Use Jenkins to spin up an ACE container, build a bar file, and destroy the container.

Answer: B ([LEAVE A REPLY](#))
