ssh(9), dropping pkt
Apr 13 17:46:17 17:46:17.317237:CID-0:THREAD_ID-01:RT: packet dropped, policy

```

Referring to the exhibit, which three statements are true? (Choose three.)

- A. The packet's destination is to a server in the DMZ zone.
- B. The packet is dropped before making an SSH connection.
- C. The packet originated within the Trust zone.
- D. The packet is allowed to make an SSH connection.
- E. The packet's destination is to an interface on the SRX Series device.

Answer: B,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 2

Exhibit

```

user@host> show security mka sessions summary
Interface  Member-ID          Type Status Tx Rx CAK Name
ge-0/0/1   E752CAEAE8DDFB82D4EA4BF7  peer live 8887
           8951             8888
ge-0/0/1   0F2D5171F38EAB16C2E0CB62  fallback active 8959
           8952             FFFF
ge-0/0/1   6B49BD5CF71887305A29D30  primary in-progress 2439 0
           AAAA

```

Referring to the exhibit, which two statements are true about the CAK status for the CAK named "FFFF"? (Choose two.)

- A. SAK is successfully generated using this key.
- B. CAK is used for encryption and decryption of the MACsec session.
- C. SAK is not generated using this key.
- D. CAK is not used for encryption and decryption of the MACsec session.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 3

Your company wants to use the Juniper SecIntel feeds to block access to known command and control servers, but they do not want to use Security Director to manage the feeds.

Which two Juniper devices work in this situation? (Choose two)

- A. SRX Series devices
- B. EX Series devices
- C. MX Series devices
- D. QFX Series devices

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

Which statement is true about persistent NAT types?

- A. The target-host-port parameter cannot be used with IPv4 addresses in NAT46.
- B. The target-host-port parameter cannot be used with IPv6 addresses in NAT64.
- C. The target-host parameter cannot be used with IPv6 addressee in NAT64.
- D. The target-host parameter cannot be used with IPv4 addresses in NAT46.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 5

Exhibit

```

Aug  1 11:28:23 11:28:23.434801:CID-0:THREAD_ID-01:RT:<172.20.101.10/59009->10.0.1.129/22;6,0x0> matched filter TestFilter:

```

The exhibit shows a snippet of a security flow trace.

In this scenario, which two statements are correct? (Choose two.)

- A. An existing session is found in the table.
- B. The capture is a packet from the source address 172.20.101.10 destined to 10.0.1.129.
- C. Destination NAT occurs.
- D. This packet arrived on interface ge-0/0/4.0.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 6

Your Source NAT implementation uses an address pool that contains multiple IPv4 addresses. Your users report that when they establish more than one session with an external application, they are prompted to authenticate multiple times. External hosts must not be able to establish sessions with internal network hosts. What will solve this problem?

- A. Disable PAT.
- B. Enable destination NAT.
- C. Enable address persistence.
- D. Enable persistent NAT.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 7

Exhibit

```
user@srx> show security macsec statistics interface ge-0/0/0 detail
Interface name: ge-0/0/0
Secure Channel transmitted
  Encrypted packets: 0
  Encrypted bytes: 0
  Protected packets: 2397
  Protected bytes: 129922
Secure Association transmitted
  Encrypted packets: 0
  Protected packets: 2397
Secure Channel received
  Accepted packets: 2395
  Validated bytes: 0
  Decrypted bytes: 0
Secure Association received
  Accepted packets: 2395
  Validated bytes: 0
  Decrypted bytes: 0
```

Referring to the exhibit, which two statements are true? (Choose two.)

- A. The data that traverses the ge-070/0 interface cannot be intercepted and read by anyone.
- B. The data that traverses the ge-0/0/0 interface is secured by a connectivity association key.
- C. The data that traverses the ge-070/0 interface can be intercepted and read by anyone.
- D. The data that traverses the ge-0/070 interface is secured by a secure association key.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

Which two additional configuration actions are necessary for the third-party feed shown in the exhibit to work properly? (Choose two.)

- A. You must apply the dynamic address entry in a security policy.
- B. You must create a dynamic address entry with the IP filter category and the ipfilter_office365 value.
- C. You must create a dynamic address entry with the C&C category and the cc_offic365 value.
- D. You must apply the dynamic address entry in a security intelligence policy.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

Exhibit

```

[edit tenants TSYS1 security]
user@srx# show
log {
mode stream;
stream TN1_s format binary host 10.3.54.22
source address 10.3.45.66
transport protocol tls
...
}
[edit system security-profile p1]
user@srx# show
security-log-stream-number reserved 1
security-log-stream-number maximum 2

```

An administrator wants to configure an SRX Series device to log binary security events for tenant systems.

Referring to the exhibit, which statement would complete the configuration?

- A. Configure the tenant as TSYS1 for the pi security profile.
- B. Configure the tenant as local for the pi security profile
- C. Configure the tenant as root for the pi security profile.
- D. Configure the tenant as master for the pi security profile.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 10

You are deploying a virtualization solution with the security devices in your network. Each SRX Series device must support at least 100 virtualized instances and each virtualized instance must have its own discrete administrative domain.

In this scenario, which solution would you choose?

- A. virtual router instances
- B. logical systems
- C. tenant systems
- D. VRF instances

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 11

Exhibit

```
user@router> show security flow session
Session ID: 36, Policy name: pre-id-default-policy/n, Timeout: 2, Valid
  In: 10.10.10.2/61606 --> 203.0.113.100/179;tcp, Conn Tag: 0x0, If: ge-0/0/2.0,
Pkts: 1, Bytes: 64,
  Out: 203.0.113.100/179 --> 203.0.113.1/61606;tcp, Conn Tag: 0x0, If:
.local..0, Pkts: 1, Bytes: 40,
```

Referring to the exhibit, which type of NAT is being performed?

- A. Static NAT
- B. Persistent NAT
- C. Destination NAT
- D. Source NAT

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 12

You opened a support ticket with JTAC for your Juniper ATP appliance. JTAC asks you to set up access to the device using the reverse SSH connection. Which three settings must be configured to satisfy this request? (Choose three.)

- A. Enable JTAC remote access
- B. Create a temporary root account.
- C. Enable a JATP support account.
- D. Create a temporary admin account.
- E. Enable remote support.

Answer: C,D,E ([LEAVE A REPLY](#))

```

You are using traceoptions to verify NAT session information on your SRX Series device. Referring to the exhibit, which two statements are correct? (Choose two.)

- A. The SRX Series device is performing only source NAT on this session.
- B. The SRX Series device is performing both source and destination NAT on this session.
- C. This is the first packet in the session.
- D. This is the last packet in the session.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 15

You are asked to deploy filter-based forwarding on your SRX Series device for incoming traffic sourced from the 10.10 100 0/24 network in this scenario, which three statements are correct? (Choose three.)

- A.** You must create a forwarding-type routing instance.
- B.** You must create a RIB group that adds interface routes to your routing instance.
- C.** You must create a VRF-type routing instance.
- D.** You must create and apply a firewall filter that matches on the source address 10.10.100.0/24 and then sends this traffic to your routing
- E.** You must create and apply a firewall filter that matches on the destination address 10.10.100.0/24 and then sends this traffic to your routing instance.

Answer: C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 16

Exhibit

```

[edit]
user@srx# show interfaces ge-0/0/1
unit 0 {
    family inet {
        filter {
            input my-filter;
        }
        address 172.25.0.1/24;
        address 172.25.1.1/24;
    }
}

[edit]
user@srx# show routing-instances
ISP-1 {
    instance-type forwarding;
    routing-options {
        static {
            route 0.0.0.0/0 next-hop 172.20.0.2;
        }
    }
}

[edit]
user@srx# show routing-options
static {
    route 0.0.0.0/0 next-hop 172.21.0.2;
}
interface-routes {
    rib-group inet my-rib-group;
}
rib-groups {
    my-rib-group {
        import-rib [ inet.0 ISP-1.inet.0 ];
    }
}

```

You are implementing filter-based forwarding to send traffic from the 172.25.0.0/24 network through ISP-1 while sending all other traffic through your connection to ISP-2. Your ge-0/0/1 interface connects to two networks, including the 172.25.0.0/24 network. You have implemented the configuration shown in the exhibit. The traffic from the 172.25.0.0/24 network is being forwarded as expected to 172.20.0.2, however traffic from the other network (172.25.1.0/24) is not being forwarded to the upstream 172.21.0.2 neighbor.

In this scenario, which action will solve this problem?

- A.** You must apply the firewall filter to the lo0 interface when using filter-based forwarding.
- B.** You must specify that the 172.25.1.1/24 IP address is the primary address on the ge-0/0/1 interface.

C. You must add another term to the firewall filter to accept the traffic from the 172.25.1.0/24 network.

D. You must create the static default route to neighbor 172.21 0.2 under the ISP-1 routing instance hierarchy.

Answer: D ([LEAVE A REPLY](#))

Which two statements are correct about the output shown in the exhibit? (Choose two.)

- A. The packet is explicitly rejected.
- B. The packet is part of an existing session.
- C. The packet is part of a new session.
- D. The packet is silently discarded.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 18

Your IPsec VPN configuration uses two CoS forwarding classes to separate voice and data traffic. How many IKE security associations are required between the IPsec peers in this scenario?

- A. 1
- B. 3
- C. 4
- D. 2

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 19

You must implement an IPsec VPN on an SRX Series device using PKI certificates for authentication. As part of the implementation, you are required to ensure that the certificate submission, renewal, and retrieval processes are handled automatically from the certificate authority.

In this scenario, which statement is correct.

- A. You can use CRL to accomplish this behavior.
- B. You can use SCEP to accomplish this behavior.
- C. You can use OCSP to accomplish this behavior.
- D. You can use SPKI to accomplish this behavior.

Answer: B (LEAVE A REPLY)

Certificate Renewal The renewal of certificates is much the same as initial certificate enrollment except you are just replacing an old certificate (about to expire) on the VPN device with a new certificate. As with the initial certificate request, only manual renewal is supported. SCEP can be used to re-enroll local certificates automatically before they expire. Refer to Appendix D for more details.

```

Referring to the exhibit, which three protocols will be allowed on the ge-0/0/5.0 interface?
(Choose three.)

- A. IBGP
- B. IPsec
- C. OSPF
- D. NTP
- E. DHCP

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 22

You are required to deploy a security policy on an SRX Series device that blocks all known Tor network IP addresses. Which two steps will fulfill this requirement? (Choose two.)

- A. Create a custom feed containing all current known MAC addresses.
- B. Enroll the devices with Juniper ATP Cloud.
- C. Enable a third-party Tor feed.
- D. Enroll the devices with Juniper ATP Appliance.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 23

What is the purpose of the Switch Microservice of Policy Enforcer?

- A. to enroll SRX Series devices with Juniper ATP Cloud
- B. to isolate infected hosts
- C. to inspect traffic for malware
- D. to synchronize security policies to SRX Series devices

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 24

Exhibit.

```

(edit security nat)
user@host# show
source {
  pool servers {
    address {
      198.51.100.240/32 to 198.51.100.254/32;
    }
    address-persistent subscriber ipv6-prefix-length 64;
  }
}
rule-set RS1 {
  from zone trust;
  to zone untrust;
  rule R1 {
    match {
      source-address 2001:db8::/32;
      destination-address 198.51.100.198/32;
    }
    then {
      source-nat {
        pool {
          servers;
        }
      }
    }
  }
}

```

Referring to the exhibit, which two statements are true? (Choose two.)

- A. The configured solution allows IPv4 to IPv6 translation.
- B. The IPv6 address is invalid.
- C. The configured solution allows IPv6 to IPv4 translation.
- D. External hosts cannot initiate contact.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 25

You are asked to configure a security policy on the SRX Series device. After committing the policy, you receive the "Policy is out of sync between RE and PFE <SPU-name(s)>." error. Which command would be used to solve the problem?

- A. request security polices resync
- B. request service-deployment
- C. request security polices check
- D. restart security-intelligence

Answer: A ([LEAVE A REPLY](#))

<https://kb.juniper.net/InfoCenter/index?>

NEW QUESTION: 26

You are connecting two remote sites to your corporate headquarters site. You must ensure that all traffic is secured and sent directly between sites. In this scenario, which VPN should be used?

- A. IPsec ADVPN
- B. hub-and-spoke IPsec VPN
- C. Layer 2 VPN
- D. full mesh Layer 3 VPN with EBGp

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 27

While troubleshooting security policies, you added the count action. Where do you see the result of this action?

- A. In the show security flow statistics command output.
- B. In the show security policies hit-count command output.
- C. In the show security policies detail command output.
- D. In the show firewall log command output.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 28

SRX Series device enrollment with Policy Enforcer fails To debug further, the user issues the following command

show configuration services security-intelligence url

https : //cloudfeeds . argon . juniperasecurity . net/api/manifeat. xml

and receives the following output:

What is the problem in this scenario?

- A. The SRX Series device does not have a valid license.
- B. The device is already enrolled with Policy Enforcer.
- C. Junos Space does not have matching schema based on the
- D. The device is directly enrolled with Juniper ATP Cloud.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 29

You are requested to enroll an SRX Series device with Juniper ATP Cloud.

Which statement is correct in this scenario?

- A. If a device is already enrolled in a realm and you enroll it in a new realm, the device data or configuration information is propagated to the new realm.
- B. Juniper ATP Cloud uses a Junos OS op script to help you configure your SRX Series device to connect to the Juniper ATP Cloud service.
- C. The only way to enroll an SRX Series device is to interact with the Juniper ATP Cloud Web portal.
- D. When the license expires, the SRX Series device is disenrolled from Juniper ATP Cloud without a grace period

Answer: A ([LEAVE A REPLY](#))

You are not able to ping the default gateway of 192.168.100.1 (or your network that is located on your SRX Series firewall).

Referring to the exhibit, which two commands would correct the configuration of your SRX Series device? (Choose two.) A)

```
[edit security zones security-zone trust]
user@SRX# set interfaces ge-0/0/4.0 host-inbound-traffic system-services ping
```

B)

```
[edit interfaces ge-0/0/4]
user@SRX# replace pattern 32 with 24
```

C)

```
[edit security zones security-zone trust]
user@SRX# set host-inbound-traffic system-services ping
```

D)

```
[edit security zones security-zone trust]
user@SRX# set host-inbound-traffic system-services ping except
```

A. Option D

B. Option A

C. Option B

D. Option C

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 36

You want to enforce IDP policies on HTTP traffic.

In this scenario, which two actions must be performed on your SRX Series device? (Choose two)

- A. Choose an attacks type in the predefined-attacks-group HTTP-All.
- B. Specify an action of None.
- C. Disable screen options on the Untrust zone.
- D. Match on application junos-http.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 37

To analyze and detect malware, Juniper ATP Cloud performs which two functions? (Choose two.)

- A. dynamic analysis: to see what happens if you execute the file in a real environment
- B. antivirus scan: with a single vendor solution to see if the file contains any potential threats
- C. static analysis: to see what happens if you execute the file in a real environment
- D. cache lookup: to see if the file is seen already and known to be malicious

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 38

According to the log shown in the exhibit, you notice the IPsec session is not establishing.

What is the reason for this behavior?

- A. Mismatched proxy ID
- B. Mismatched peer ID
- C. Mismatched preshared key
- D. Incorrect peer address.

Answer: (SHOW ANSWER)
