NEW QUESTION: 1
Your network contains an on-premises Active Directory domain named contoso.com.
You have a hybrid Microsoft 365 tenant that uses Microsoft Teams.
You need to ensure that audio, video, and screen sharing is prioritized over other data types across the network.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. From the Microsoft Teams admin center, configure the Media bit rate (Kbs) setting.
B. From Group Policy Management configure Policy-based QoS
C. From Group Policy Management, configures Background Intelligent Transfer Service (BITS).
D. From the Microsoft Teams admin center, configure network sites.
E. From the Microsoft Teams admin center, set Insert Quality of Service (QoS) markers for real-time media traffic to on
Answer: B,E (LEAVE A REPLY)

NEW QUESTION: 2
You are securing a wet API by using the Microsoft identity Platform. The web API must meet the following requirements:
* Authenticated Azure Active Directory (Azure AD) users must be able to retrieve user information from Azure AD.
* Authenticated Azure AD users must be able to manage Microsoft 365 groups.
You need to grant permissions for the web API. The solution must use the principle of least privilege. What should you grant? To answer, select the appropriate options in the answer are a.
NOTE: Each correct selection is worth one point.
Answer:

NEW QUESTION: 3

Your network contains an on-premises Active Directory domain. The domain contains a server named Server1. Server1 has a share named Share1 that contains the files shown in the following table.
You have a hybrid deployment of Microsoft 365.
You create a Microsoft SharePoint site collection named Col lection1.
You plan to migrate Share1 to a document library in Collection1
You configure the SharePoint Migration Tool as shown in the exhibit. (Click the Exhibit tab.) For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Reference:
https://docs.microsoft.com/en-us/sharepointmigration/spmt-settings

NEW QUESTION: 4

Your network contains an Active Directory forest. The forest contains two domains named contoso.com and adatum.com.
Your company recently purchased a Microsoft 365 subscription.
You deploy a federated identity solution to the environment.
You use the following command to configure contoso.com for federation.
Convert-MsolDomaintoFederated -DomainName contoso.com
In the Microsoft 365 tenant, an administrator adds and verifies the adatum.com domain name.
You need to configure the adatum.com Active Directory domain for federated authentication.
Which two actions should you perform before you run the Azure AD Connect wizard? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. From Windows PowerShell, run the Convert-MsolDomaintoFederated -DomainName contoso.com -SupportMultipleDomain command.
B. From Windows PowerShell, run the New-MsolFederatedDomain -SupportMultipleDomain -DomainName contoso.com command.
C. From Windows PowerShell, run the New-MsolFederatedDomain -DomainName adatum.com command.
D. From Windows PowerShell, run the Update-MSOLFederatedDomain -DomainName contoso.com -SupportMultipleDomain command.
E. From the federation server, remove the Microsoft Office 365 relying party trust.

Answer: (SHOW ANSWER)

When the Convert-MsolDomaintoFederated -DomainName contoso.com command was run, a relying party trust was created.
Adding a second domain (adatum.com in this case) will only work if the SupportMultipleDomain switch was used when the initial federation was configured by running the Convert-MsolDomaintoFederated -DomainName contoso.com command.

Therefore, we need to start again by removing the relying party trust then running the Convert-MsolDomaintoFederated command again with the SupportMultipleDomain switch.

NEW QUESTION: 5
You have a hybrid deployment of Microsoft 365 and an Azure Active Directory (Azure AD) tenant.
The tenant contains the users shown in the following table.
Password protection in Azure AD is configured as shown in the following exhibit.
Which users will be prevented from using the word "Contoso" as part of their password?
A. User1 only
B. User1 and User2 only
C. User1 and User3 only
D. User1, User2, and User3
Answer: D (LEAVE A REPLY)
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-password-ban-bad

NEW QUESTION: 6
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has 3,000 users. All the users are assigned Microsoft 365 E3 licenses.
Some users are assigned licenses for all Microsoft 365 services. Other users are assigned licenses for only certain Microsoft 365 services.
You need to determine whether a user named User1 is licensed for Exchange Online only.
Solution: You launch the Azure portal, and then review the Licenses blade.
Does this meet the goal?
A. Yes
B. No
Answer: A (LEAVE A REPLY)
In the Licenses blade, click All Products then select the E3 License. This will display a list of all users assigned an E3 license. Select User1. You'll see how many services are assigned in the Enabled Services column. Click on the number in the Enabled Services column for User1 and you'll be taken to the licenses page for that user. Click on the number in the Enabled Services column for User1 again and a page will open which shows you exactly which services are enabled or disabled.
Alternatively, you can go into the user account properties directly then select Licenses. This will display the licenses blade for that user. You can then click on the number in the Enabled Services column for the user and a page will open which shows you exactly which services are enabled or disabled.

NEW QUESTION: 7
You have a Microsoft 365 Enterprise E5 subscription.
You add a cloud-based app named App1 to the Microsoft Azure Active Directory (Azure AD) enterprise applications list.
You need to ensure that two-step verification is enforced for all user accounts the next time they connect to App1.
Which three settings should you configure from the policy? To answer, select the appropriate settings in the answer area.
Answer:
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/best-practices
https://techcommunity.microsoft.com/t5/Enterprise-Mobility-Security/Conditional-Access-now-in-the-new-Azure-portal/ba-p/250060

NEW QUESTION: 8
Which migration solution should you recommend for Project1?
A. From the Exchange admin center, start a migration and select Staged migration.
B. From the Microsoft 365 admin center, start a data migration and click Exchange as the data service.
C. From the Microsoft 365 admin center, start a data migration and click Outlook as the data service.
D. From the Exchange admin center, start a migration and select Cutover migration.
Answer: B (LEAVE A REPLY)
Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.
Fabrikam does NOT plan to implement identity federation.
All users must be able to exchange email messages successfully during Project1 by using their current email address.
During Project1, some users will have mailboxes in Microsoft 365 and some users will have mailboxes in Exchange on-premises. To enable users to be able to exchange email messages successfully during Project1 by using their current email address, we'll need to configure hybrid Exchange.
A new way to migrate mailboxes in a hybrid Exchange configuration is to use the Microsoft 365 data migration service. The data migration service can migrate Exchange, SharePoint and OneDrive. Therefore, we need to start a data migration and click Exchange as the service to be migrated.
Reference:
https://docs.microsoft.com/en-us/fasttrack/O365-data-migration
https://docs.microsoft.com/en-us/exchange/hybrid-deployment/move-mailboxes This is a case study. Case studies are not timed separately. You can use as much exam time as you would like

to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
To start the case study
To display the first question in this case study, click the Next button.
Use the buttons in the left pane to explore the content of the case study before you answer the questions.
Clicking these buttons displays information such as business requirements, existing environment, and problem statements.
When you are ready to answer a question, click the Question button to return to the question.

NEW QUESTION: 9
You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes a user named User1.
You enable multi-factor authentication for contoso.com and configure the following two fraud alert settings:
Set Allow users to submit fraud alerts: On
Automatically block users who report fraud: On
You need to instruct the users in your organization to use the fraud reporting features correctly.
What should you tell the users to do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
Answer:
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-mfa-mfasettings#fraud-alert

NEW QUESTION: 10
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
You may now click next to proceed to the lab.
Lab information
Use the following login credentials as needed:
To enter your username, place your cursor in the Sign in box and click on the username below.
To enter your password, place your cursor in the Enter password box and click on the password below.
Microsoft 365 Username:
admin@M365x981607.onmicrosoft.com
Microsoft 365 Password: *yfLo7Ir2&y-
If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.
The following information is for technical support purposes only:
Lab Instance: 10811525
Your organization recently implemented a new data retention policy. The policy requires that all files stored in an employee's Microsoft OneDrive folders be retained for 60 days after the employee is terminated from the organization.
The human resources (HR) department of the organization deletes the user accounts of all terminated employees.
You need to ensure that the organization meets the requirements of the data retention policy.
Answer:
You need to configure the OneDrive retention period for deleted users.
1. Go to the OneDrive admin center.
2. Select Storage.
3. Set the "Days to retain files in OneDrive after a user account is marked for deletion" option to 60.
4. Click Save to save the changes.
Reference:
https://docs.microsoft.com/bs-latn-ba/onedrive/set-retention

NEW QUESTION: 11

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.
The domain syncs to an Azure Active Directory (Azure AD) tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)
User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com.
You need to ensure that User2 can access the resources in Azure AD.
Solution: From the on-premises Active Directory domain, you assign User2 the Allow logon locally user right. You instruct User2 to sign in as user2@fabrikam.com.
Does this meet the goal?
A. Yes
B. No
Answer: B (LEAVE A REPLY)
This is not a permissions issue.
The on-premises Active Directory domain is named contoso.com. To enable users to sign on using a different UPN (different domain), you need to add the domain to Microsoft 365 as a custom domain.

NEW QUESTION: 12
Which migration solution should you recommend for Project1?
A. From Exchange Online PowerShell, run the New-MaiboxImportRequest cmdlet.
B. From Exchange Online PowerShell, run the New-MaiboxExportRequest cmdlet.
C. From the Microsoft 365 admin center, start a data migration and click Upload PSST as the data service.
D. From the Exchange admin center, start a migration and select Remote move migration
Answer: (SHOW ANSWER)
During Project1, some users will have mailboxes in Microsoft 365 and some users will have mailboxes in Exchange on-premises. To enable users be able to exchange email messages successfully during Project1 by using their current email address, we'll need to configure hybrid Exchange.
To migrate mailboxes in a hybrid Exchange configuration, you use Exchange admin center perform Remote move migrations.
Reference:
https://docs.microsoft.com/en-us/exchange/hybrid-deployment/move-mailboxes

NEW QUESTION: 13

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an on-premises Active Directory forest named contoso.com. The forest contains the following domains:
* Contoso.com
* East.contoso.com
An Azure AD Connect server is deployed to contoso.com. Azure AD Connect syncs to an Azure Active Directory (Azure AD) tenant.
You deploy a new domain named west.contoso.com to the forest.
You need to ensure that west.contoso.com syncs to the Azure AD tenant.
Solution: You install a new Azure AD Connect server in west.contoso.com and set AD Connect to active mode.
Does this meet the goal?
A. No
B. Yes
Answer: (SHOW ANSWER)

NEW QUESTION: 14
You have an on-premises Microsoft SharePoint Server 2016 environment.
You create a Microsoft 365 tenant.
You need to migrate some of the SharePoint sites to SharePoint Online. The solution must meet the following requirements:
Microsoft OneDrive sites must redirect users to online content.
Users must be able to follow both on-premises and cloud-based sites.
Users must have a single SharePoint profile for both on-premises and on the cloud.
When users search for a document by using keywords, the results must include online and on-premises results.
From the SharePoint Hybrid Configuration Wizard, you select the following features:
Hybrid business to business (B2B) sites
Hybrid OneDrive
Hybrid Search
Which two requirements are met by using the SharePoint Hybrid Configuration Wizard features?
Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Users must have a single SharePoint profile for both on-premises and on the cloud.
B. OneDrive sites must redirect users to online content.
C. Users must be able to follow both on-premises and cloud-based sites.

D. When users search for a document by using keywords, the results must include online and on-premises results.

Answer: (SHOW ANSWER)

Hybrid OneDrive - Choosing this option will redirect on-premises My Sites/OneDrive for Business sites to SharePoint Online OneDrive for Business in Office 365. Once the wizard completes, any click of the OneDrive link from on-premises will redirect to OneDrive for Business in the cloud. This meets the following requirement: OneDrive sites must redirect users to online content.

Cloud hybrid search - Choosing this option creates a cloud Search service application in SharePoint Server and connects the cloud Search service application to your Office 365 tenant. This meets the following requirement: When users search for a document by using keywords, the results must include online and on-premises results.

Reference:

https://docs.microsoft.com/en-us/sharepoint/hybrid/hybrid-picker-in-the-sharepoint-online-admin-center

NEW QUESTION: 15

You have a Microsoft 365 tenant that contains a Microsoft Power Platform development environment named Dev1, a Power Platform production environment named Prod1, and two users named User1 and User2.

You need to assign roles to the users to meet the following requirements:

* User1 must have full access permissions to Dev1 and Prod1.
* User2 must be able to acquire and assign Microsoft Power BI licenses.

The solution must use the principle of least privilege

Answer:

NEW QUESTION: 16

Your on-premises network contains a Microsoft Exchange Server 2019 organization.

You purchase a Microsoft 365 E5 subscription.

You need to integrate the on-premises network and Exchange Online.

What should you do first?

A. install an Azure Active Directory (Azure AD) Application Proxy connector.

B. implement Azure AD Connect.

C. Run the Hybrid Configuration wizard

D. Add a connector in Exchange Online.

Answer: (SHOW ANSWER)

NEW QUESTION: 17
You have a hybrid deployment of Microsoft 365 that contains the users shown in the following table.
You plan to provide access to an on-premises app named App1 by using Azure AD Application Proxy. App1 will be managed by User4.
You need to identify which user can install the Application Proxy connector.
Which user should you identify?
A. User1
B. User2
C. User3
D. User4
Answer: (SHOW ANSWER)
https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/application-proxy-add-on-premisesapplication

NEW QUESTION: 18
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a Microsoft 365 subscription.
You need to prevent users from accessing your Microsoft SharePoint Online sites unless the users are connected to your on-premises network.
Solution: From the Azure Active Directory admin center, you create a trusted location and a conditional access policy.
Does this meet the goal?
A. Yes
B. No
Answer: A (LEAVE A REPLY)
Conditional Access in SharePoint Online can be configured to use an IP Address white list to allow access.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition
https://techcommunity.microsoft.com/t5/Microsoft-SharePoint-Blog/Conditional-Access-in-SharePoint-Onlineand-OneDrive-for/ba-p/46678

NEW QUESTION: 19
You have a Microsoft 365 subscription. You have a user named User1.
You need to ensure that User1 can place a hold on all mailbox content.
What permission should you assign to User1?
A. the User management administrator role from the Microsoft 365 admin center
B. the eDiscovery Manager role from the Security & Compliance admin center
C. the Information Protection administrator role from the Azure Active Directory admin center
D. the Compliance Management role from the Exchange admin center
Answer: B (LEAVE A REPLY)
To create a query-based In-Place Hold, a user requires both the Mailbox Search and Legal Hold roles to be assigned directly or via membership in a role group that has both roles assigned. To create an In-Place Hold without using a query, which places all mailbox items on hold, you must have the Legal Hold role assigned. The Discovery Management role group is assigned both roles.
Reference:
https://docs.microsoft.com/en-us/Exchange/permissions/feature-permissions/policy-and-compliance-permissions?view=exchserver-2019

NEW QUESTION: 20
Your company has a Microsoft 365 E3 subscription.
All devices run Windows 10 Pro and are joined to Microsoft Azure Active Directory (Azure AD).
You need to change the edition of Windows 10 to Enterprise the next time users sign in to their computer. The solution must minimize downtime for the users.
What should you use?
A. Subscription Activation
B. Windows Update
C. Windows Autopilot
D. an in-place upgrade
Answer: C (LEAVE A REPLY)
When initially deploying new Windows devices, Windows Autopilot leverages the OEM-optimized version of Windows 10 that is preinstalled on the device, saving organizations the effort of having to maintain custom images and drivers for every model of device being used. Instead of re-imaging the device, your existing Windows 10 installation can be transformed into a "business-ready" state, applying settings and policies, installing apps, and even changing the edition of Windows 10 being used (e.g. from Windows 10 Pro to Windows 10 Enterprise) to support advanced features.
Reference:
https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot

NEW QUESTION: 21
You have Microsoft 365 tenant that contains a Microsoft Power Platform environment named Environment1 (default). Environment1 contains a Microsoft Dataverse database.

In the tenant, you create a user named User1. You assign a Microsoft Power Apps license to User1.
Which security role for Environment1 is assigned automatically to User1?
A. Environment maker
B. System customizer
C. Delegate
D. System customizer
Answer: B (LEAVE A REPLY)
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/database-security#predefined-security-roles

NEW QUESTION: 22
You have a Microsoft 365 subscription
You have an Azure AD tenant that contains the users shown in the following table.
You configure Tenant properties as shown in the following exhibit
Which users will be contacted by Microsoft if the tenant experiences a data breach?
A. User1 only
B. User1 and User2 only
C. User2 and User3 only
D. User3 only
E. User2 only
Answer: A (LEAVE A REPLY)

NEW QUESTION: 23
You need to ensure that all the sales department users can authenticate successfully during Project1and Project2.
Which authentication strategy should you implement for the pilot projects?
A. password hash synchronization and seamless SSO
B. pass-through authentication
C. password hash synchronization
D. pass-through authentication and seamless SSO
Answer: A (LEAVE A REPLY)
Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.
Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users.
After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically.
Fabrikam does NOT plan to implement identity federation.

After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN.
You need to enable password hash synchronization to enable the users to continue to authenticate to their mailbox and to SharePoint sites by using their UPN.
You need to enable SSO to enable all users to be signed in to on-premises and cloud-based applications automatically.
Reference:
https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn

NEW QUESTION: 24
You have a document in Microsoft OneDrive that is encrypted by using Microsoft Azure Information Protection as shown in the following exhibit.
Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.
Answer:
Reference:
https://docs.microsoft.com/en-us/azure/information-protection/configure-policy-protection

NEW QUESTION: 25
You have a Microsoft 365 tenant that contains 300 users.
The users have Domestic and International Calling Plan licenses.
What is the maximum user phone numbers and toll-free service phone numbers can you acquire?
To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
Answer:
Reference:
https://docs.microsoft.com/en-us/microsoftteams/how-many-phone-numbers-can-you-get

NEW QUESTION: 26
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company plans to deploy several Microsoft Office 365 services.
You need to design an authentication strategy for the planned deployment. The solution must meet the following requirements:
* Users must be able to authenticate during business hours only.
* Authentication requests must be processed successfully if a single server fails.

* When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
* Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.
Solution: You design an authentication strategy that contains a pass-through authentication model. The solution contains two servers that have an Authentication Agent installed and password hash synchronization configured.
Does this meet the goal?
A. Yes
B. No
Answer: (SHOW ANSWER)
This solution meets the following goals:
Users must be able to authenticate during business hours only.
Authentication requests must be processed successfully if a single server fails.
When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
However, the following goal is not met:
Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.
You would need to configure Single-sign on (SSO) to meet the last requirement.
Reference:
https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn

NEW QUESTION: 27
Your network contains an Active Directory forest named local.
You have a Microsoft 365 subscription. You plan to implement a directory synchronization solution that will use password hash synchronization.
From the Microsoft 365 admin center, you verify the contoso.com domain name. You need to prepare the environment foe the planned directory synchronization solution.
What should you do first?
A. From the public DNS zone of contoso.com, add a new mail exchanger (MX) record.
B. From Active Directory Domains and Trusts, add contoso.com as a UPN suffix
C. From the Microsoft 365 admin center, verify the contoso.com domain name.
D. From Active Directory Users and Computers, modify the UPN suffix for all users.
Answer: (SHOW ANSWER)
The on-premise Active Directory domain is named contoso.local. Therefore, all the domain users accounts will have a UPN suffix of contoso.local by default.
To enable directory synchronization that will use password hash synchronization, you need to configure the domain user accounts to have the same UPN suffix as the verified domain (contoso.com in this case). Before you can change the UPN suffix of the domain user accounts to contoso.com, you need to add contoso.com as a UPN suffix in the domain.

https://docs.microsoft.com/en-us/azure/active-directory/hybrid/plan-connect-userprincipalname

NEW QUESTION: 28
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
You may now click next to proceed to the lab.
Lab information
Use the following login credentials as needed:
To enter your username, place your cursor in the Sign in box and click on the username below.
To enter your password, place your cursor in the Enter password box and click on the password below.
Microsoft 365 Username:
admin@M365x981607.onmicrosoft.com
Microsoft 365 Password: *yfLo7Ir2&y-
If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.
The following information is for technical support purposes only:
Lab Instance: 10811525
Your organization recently partnered with another organization named Fabrikam, Inc.
You plan to provide a Microsoft 365 license to an external user named user1@fabrikam.com, and then to share documents with the user.
You need to invite user1@fabrikam.com to access your organization.
Answer:
You need to create a guest account for user1.
1. Go to the Azure Active Directory admin center.
2. Select Users.
3. Click the 'New guest user' link.

4. Select the 'Invite user' option.
5. Give the account a name (User1) and enter user1@fabrikam.com in the email address field.
6. Click the 'Invite' button.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/b2b/b2b-quickstart-add-guest-users-portal

NEW QUESTION: 29
You have a Microsoft 365 Enterprise subscription.
You create a password policy as shown in the following exhibit.
Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.
Answer:
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-password-ban-bad
https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-password-smart-lockout

NEW QUESTION: 30
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company plans to deploy several Microsoft Office 365 services.
You need to design an authentication strategy for the planned deployment. The solution must meet the following requirements:
* Users must be able to authenticate during business hours only.
* Authentication requests must be processed successfully if a single server fails.
* When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
* Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.
Solution: You design an authentication strategy that contains a pass-through authentication model. You install an Authentication Agent on three servers and configure seamless SSO.
Does this meet the goal?
A. Yes
B. No
Answer: A (LEAVE A REPLY)
This solution meets all the requirements:

Users must be able to authenticate during business hours only. (This can be configured by using Logon Hours in Active Directory. Pass-through authentication passes authentication to the on-premise Active Directory) Authentication requests must be processed successfully if a single server fails. (We have Authentication Agents running on three servers) When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in. (This can be configured in Active Directory. Pass-through authentication passes authentication to the on-premise Active Directory) Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically. (This goal is met by seamless SSO) Reference:
https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn

NEW QUESTION: 31
Your company has a hybrid deployment of Microsoft 365.
An on-premises user named User1 is synced to Microsoft Azure Active Directory (Azure AD).
Azure AD Connect is configured as shown in the following exhibit.
Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.
Answer:
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-install-custom

NEW QUESTION: 32
Your company has a Microsoft 365 subscription that contains the following domains:
Contoso.onmicrosoft.com
Contoso.com
You plan to add the following domains to Microsoft 365 and to use them with Exchange Online:
Sub1.contoso.onmicrosoft.com
Sub2.contoso.com
Fabrikam.com
You need to identify the minimum number of DNS records that must be added for Exchange Online to receive inbound email messages for the three domains.

How many DNS records should you add? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
Answer:

NEW QUESTION: 33
Your company has an on premises Microsoft Exchange Server 2016 organization and a Microsoft 365 Enterprise subscription. You plan to migrate mailboxes and groups to Exchange Online.
You start a new migration batch.
Users report *low performance when they use the on premises Exchange Server organization.
You discover that the migration is causing the slow performance.
You need to reduce the impact of the mailbox migration on the end-users.
What should you do?
A. Create a mail flow rule.
B. Configure back pressure
C. Modify the migration endpoint setting
D. Create a throttling policy.
Answer: C (LEAVE A REPLY)
The migration is causing the slow performance. This suggests that the on-premise Exchange server is struggling under the load of copying the mailboxes to Exchange Online. You can reduce the load on the on-premise server by reducing the maximum number of concurrent mailbox migrations. Migrating just a few mailboxes at a time will have less of a performance impact than migrating many mailboxes concurrently.
Reference:
https://support.microsoft.com/en-gb/help/2797784/how-to-manage-the-maximum-concurrent-migration-batches-in-exchange-onl

NEW QUESTION: 34
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
You may now click next to proceed to the lab.
Lab information
Use the following login credentials as needed:
To enter your username, place your cursor in the Sign in box and click on the username below.
To enter your password, place your cursor in the Enter password box and click on the password below.
Microsoft 365 Username:
admin@LODSe426243.onmicrosoft.com
Microsoft 365 Password: 3&YWyjse-6-d
If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

A user named Johanna Lorenz recently left the company. A new employee named Ben Smith will handle the tasks of Johanna Lorenz.
You need to create a user named Ben Smith. Ben Smith must be able to sign in to http://myapps.microsoft.com and open Microsoft Word Online.
Answer:
You need to create a user account and assign a license to the account. You then To create the user account and mailbox:
In the Microsoft 365 admin center, go to User management, and select Add user.
Enter the name Ben Smith in the First Name and Last Name fields.
Enter Ben.Smith in the username field and click Next.
Assign a Microsoft 365 license to the account.
Click Next.
Click Next again.
Click 'Finish adding'.

NEW QUESTION: 35
Your company has a Microsoft 365 tenant.
You plan to allow users from the engineering department to enroll their mobile device in mobile device management (MDM).
The device type restrictions are configured as shown in the following table.
The device limit restrictions are configured as shown in the following table.
What is the effective configuration for the members of the Engineering group? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
Answer:
Reference:

https://docs.microsoft.com/en-us/intune/enrollment/enrollment-restrictions-set

NEW QUESTION: 36
Your company has three main offices and one branch office. The branch office is used for research.
The company plans to implement a Microsoft 365 tenant and to deploy multi-factor authentication.
You need to recommend a Microsoft 365 solution to ensure that multi-factor authentication is enforced only for users in the branch office What should you include in the recommendation?
A. a Microsoft Endpoint Manager Device compliance policy
B. Azure AD conditional access
C. Azure AD password protection
D. a Microsoft Endpoint Manager Device configuration profile
Answer: A (LEAVE A REPLY)

NEW QUESTION: 37
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. You recently discovered that several users in your organization have permissions on the mailbox of another user in the organization.
You need to ensure that Lee Gu receives a notification when a user is granted permissions on another user's mailbox.
To answer the question, sign in to the Microsoft 365 portal.
Answer:
Create an activity alert
1. Go to https://protection.office.com/managealerts.
2. Sign in to Office 365 using your work or school account.
3. On the Activity alerts page, click + New.
The flyout page to create an activity alert is displayed.
4. Complete the following fields to create an activity alert:
Name - Type a name for the alert. Alert names must be unique within your organization.
Description (Optional) - Describe the alert, such as the activities and users being tracked, and the users that email notifications are sent to. Descriptions provide a quick and easy way to describe the purpose of the alert to other admins.
Alert type - Make sure the Custom option is selected.
Send this alert when - Click Send this alert when and then configure these two fields:
- Activities - Click the drop-down list to display the activities that you can create an alert for. This is the same activities list that's displayed when you search the Office 365 audit log. You can select one or more specific activities or you can click the activity group name to select all activities in the group. For a description of these activities, see the "Audited activities" section in Search the audit log. When a user performs any of the activities that you've added to the alert, an email notification is sent.
- Users - Click this box and then select one or more users. If the users in this box perform the activities that you added to the Activities box, an alert will be sent. Leave the Users box blank to send an alert when any user in your organization performs the activities specified by the alert.
Send this alert to - Click Send this alert, and then click in the Recipients box and type a name to add a users who will receive an email notification when a user (specified in the Users box) performs an activity (specified in the Activities box). Note that you are added to the list of recipients by default. You can remove your name from this list.
5. Click Save to create the alert.
The new alert is displayed in the list on the Activity alerts page.
The status of the alert is set to On. Note that the recipients who will received an email notification when an alert is sent are also listed.

NEW QUESTION: 38
You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.
An external user has a Microsoft account that uses an email address of user1@outlook.com.
An administrator named Admin1 attempts to create a user account for the external user and receives the error message shown in the following exhibit.
You need to ensure that Admin1 can add the user.
What should you do from the Azure Active Directory admin center?
A. Add a custom domain name named outlook.com.
B. Modify the Authentication methods.
C. Modify the External collaboration settings.
D. Assign Admin1 the Security administrator role.
Answer: C (LEAVE A REPLY)

NEW QUESTION: 39
You are creating a report that will query Azure Active Directory (Azure AD) for group information by using the Microsoft Graph API. You need to retrieve an ordered list of groups by title. The solution must minimize the amount of data returned m the response.
How should you complete the Graph API call? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
Answer:

NEW QUESTION: 40
You need to create the UserLicenses group. The solution must meet the security requirements.
Which group type and control method should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
Answer:
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/governance/access-reviews-overview

NEW QUESTION: 41
You have Windows 10 devices that are managed by using Microsoft Endpoint Manager. All the devices have Microsoft Office 365 apps installed.
You need to configure the proofing tool settings for the Office 365 apps.
From the Microsoft Endpoint Manager admin center, what should you create?
A. a device configuration profile
B. a device compliance policy
C. an app configuration policy

D. an app
Answer: C (LEAVE A REPLY)

NEW QUESTION: 42
Your network contains an Active Directory domain named contoso.com. The domain contains the file servers shown in the following table.
A file named File1.abc is stored on Server1. A file named File2.abc is stored on Server2. Three apps named App1, App2, and App3 all open files that have the .abc file extension.
You implement Windows Information Protection (WIP) by using the following configurations:
Exempt apps: App2
Protected apps: App1
Windows Information Protection mode: Block
Network boundary: IPv4 range of 192.168.1.1-192.168.1.255
You need to identify the apps from which you can open File1.abc
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Answer:

https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-wip-policy-using-intune-azure

NEW QUESTION: 43
Your network contains an on-premises Active Directory forest named contoso.com. The forest contains the following domains:
Contoso.com
East.contoso.com
The forest contains the users shown in the following table.
The forest syncs to an Azure Active Directory (Azure AD) tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Answer:

NEW QUESTION: 44
You are configuring an enterprise application named TestApp in Microsoft Azure as shown in the following exhibit.
Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.
Answer:

Reference:
https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/application-proxy-configure-hard-coded-link-translation

NEW QUESTION: 45
You have a Microsoft 365 subscription that contains the domains shown in the following exhibit.
Which domain name suffixes can you use when you create users?
A. only Contoso1919.onmicrosoft.com and Sub2.Contoso1919.onmicrosoft.com
B. only Sub1.Contoso1919.onmicrosoft.com
C. only Contoso1919.onmicrosoft.com, Sub1.Contoso1919.onmicrosoft.com, and Sub2.Contoso1919.onmicrosoft.com
D. all the domains in the subscription
Answer: C (LEAVE A REPLY)

NEW QUESTION: 46
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. You need to prevent non-administrators in your organization from registering applications.
Answer:
You need to configure the App Registrations setting in Azure Active Directory.
1. Go to the Azure Active Directory admin center.
2. Select Azure Active Directory.
3. Select 'User settings'
4. In the 'App registrations' section, toggle the 'Users can register applications' setting to No.
5. Click Save to save the changes.

NEW QUESTION: 47
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).
You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).
You configure a pilot for co-management.
You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.
You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.
Solution: You add Device1 to an Active Directory group.
Does this meet the goal?
A. Yes
B. No
Answer: B (LEAVE A REPLY)

Device1 has the Configuration Manager client installed so you can manage Device1 by using Configuration Manager.
To manage Device1 by using Microsoft Intune, the device has to be enrolled in Microsoft Intune.
In the Co-management Pilot configuration, you configure a Configuration Manager Device Collection that determines which devices are auto-enrolled in Microsoft Intune. You need to add Device1 to the Device Collection, not an Active Directory Group. Therefore, this solution does not meet the requirements.

https://docs.microsoft.com/en-us/configmgr/comanage/how-to-enable

NEW QUESTION: 48
You need to recommend the development environment and tools for the redesign of the research department's SharePoint Online sites.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
Answer:

NEW QUESTION: 49
You have a Microsoft 365 subscription and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. Contoso.com contains the users shown in the following table.
Contoso.com is configured as shown in the following exhibit.
You need to ensure that guest users can be created in the tenant.
Which setting should you modify?
A. Guests can invite.
B. Guest users permissions are limited.
C. Members can invite.
D. Admins and users in the guest inviter role can invite.
E. Deny invitations to the specified domains
Answer: D (LEAVE A REPLY)
The setting "Admins and users in the guest inviter role can invite" is set to No. This means that no one can create guest accounts because they cannot 'invite' guests. This setting needs to be changed to Yes to ensure that guest users can be created in the tenant.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/b2b/delegate-invitations
https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/users-default-permissions

NEW QUESTION: 50
Your network contains an Active Directory forest named adatum.local. The forest contains 500 users and uses adatum.com as a UPN suffix.
You deploy a Microsoft 365 tenant.
You implement directory synchronization and sync only 50 support users.

You discover that five of the synchronized users have usernames that use a UPN suffix of onmicrosoft.com.
You need to ensure that all synchronized identities retain the UPN set in their on-premises user account.
What should you do?
A. From the Microsoft 365 admin center, add adatum.com as a custom domain name.
B. From Windows PowerShell, run the Set-ADDomain -AllowedDNSSuffixes adatum.com command.
C. From Active Directory Users and Computers, modify the UPN suffix of the five user accounts.
D. From the Microsoft 365 admin center, add adatum.local as a custom domain name.
Answer: C (LEAVE A REPLY)
The question states that only five of the synchronized users have usernames that use a UPN suffix of onmicrosoft.com. Therefore the other 45 users have the correct UPN suffix. This tells us that the adatum.com domain has already been added to Office 365 as a custom domain.
The forest is named adatum.local and uses adatum.com as a UPN suffix. User accounts in the domain will have adatum.local as their default UPN suffix. To use adatum.com as the UPN suffix, each user account will need to be configured to use adatum.com as the UPN suffix.
Any synchronized user account that has adatum.local as a UPN suffix will be configured to use a UPN suffix of onmicrosoft.com because adatum.local cannot be added to Office 365 as a custom domain.
Therefore, the reason that the five synchronized users have usernames with a UPN suffix of onmicrosoft.com is because their accounts were not configured to use the UPN suffix of contoso.com.

https://docs.microsoft.com/en-us/office365/enterprise/prepare-a-non-routable-domain-for-directory-synchronization

NEW QUESTION: 51
You have a Microsoft 365 subscription that uses an Azure Active Directory (Azure AD) tenant named contoso.com.
A temporary employee at your company uses an email address of user1@outlook.com.
You need to ensure that the temporary employee can sign in to contoso.com by using the user1@outlook.com account.
What should you do?
A. From the Azure Active Directory admin center, create a new user.
B. From the Microsoft 365 admin center, create a new contact.
C. From the Azure Active Directory admin center, create a new guest user.
D. From the Microsoft 365 admin center, create a new user.
Answer: (SHOW ANSWER)
You can invite guest users to the directory, to a group, or to an application. After you invite a user through any of these methods, the invited user's account is added to Azure Active Directory

(Azure AD), with a user type of Guest. The guest user must then redeem their invitation to access resources. An invitation of a user does not expire.
The invitation will include a link to create a Microsoft account. The user can then authenticate using their Microsoft account. In this question, the external vendor already has a Microsoft account (user1@outlook.com) so he can authenticate using that.

https://docs.microsoft.com/en-us/azure/active-directory/b2b/add-users-administrator

NEW QUESTION: 52
You have a Microsoft 365 E5 subscription that uses Microsoft Intune.
You need to access service health alerts from a mobile phone. What should you use?
A. the Microsoft Authenticator app
B. the Intune app
C. the Microsoft 365 Admin mobile app
D. Intune Company Portal
Answer: (SHOW ANSWER)

NEW QUESTION: 53
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connections.
Users use Microsoft Outlook 2016 to connect to a Microsoft Exchange Server mailbox hosted in the main office.
The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox.
You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365.
You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails.
Solution: You enable Cached Exchange Mode for all the Outlook profiles.
Does this meet the goal?
A. Yes
B. No
Answer: B (LEAVE A REPLY)

NEW QUESTION: 54

Your network contains an Active Directory domain named fabrikam.com. The domain contains the objects shown in the following table.
The group have the members shown in the following table.
You are configure synchronization between fabrikam.com and a Microsoft Azure Active Director (Azure AD) tenant.
You configure the domain/OU Filtering settings in Azure AD Connect as shown in the Domain>OU Filtering exhibit. (Click the Domain/OU Filtering tab.) You configure the Filtering in Azure Connect as shown in the Filtering exhibit. (Click the Filtering tab.) NOTE: Each correct selection is worth one point.

Answer:

Reference:
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering#group-based-filtering

NEW QUESTION: 55

You are developing a daemon application mat reads all the emails in the Inbox of a specific Microsoft 365 mailbox. Some emails contain meeting dates and room mailbox names. The application has the following requirements:

* Move each processed email to a subfolder in the mailbox
* If an email contains meeting data, create an event in the corresponding room mailbox calendar.

Which Microsoft Graph permissions should you grant for the application?

A. Calendars.Readwrite and Mail.Read application permissions
B. Calendars.Readwrite and Mail. ReadWrite delegated permissions
C. Calendars .ReadWrite and Mail.Readwrite application permissions
D. Calendars.Readwrite.Shared and Mail. Readwrite delegated permissions

Answer: (SHOW ANSWER)

NEW QUESTION: 56

You have a Microsoft 365 E5 subscription that is linked to an Azure Active Directory (Azure AD) tenant named contoso.com.
You purchase 100 Microsoft 365 Business Voice add-on licenses.
You need to ensure that the members of a group named Voice are assigned a Microsoft 365 Business Voice add-on license automatically.
What should you do?

A. From the Azure Active Directory admin center, modify the settings of the Voice group.
B. From the Microsoft 365 admin center, modify the settings of the Voice group.
C. From the Licenses page of the Microsoft 365 admin center, assign the licenses.

Answer: C (LEAVE A REPLY)

You can assign licenses to a user or a group from the Licenses page of the Microsoft 365 admin center.

https://docs.microsoft.com/en-us/azure/active-directory/enterprise-users/licensing-groups-assign

NEW QUESTION: 57
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).
You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).
You configure a pilot for co-management.
You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.
You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.
Solution: Define a Configuration Manager device collection as the pilot collection. Add Device1 to the collection.
Does this meet the goal?
A. Yes
B. No
Answer: A (LEAVE A REPLY)
Device1 has the Configuration Manager client installed so you can manage Device1 by using Configuration Manager.
To manage Device1 by using Microsoft Intune, the device has to be enrolled in Microsoft Intune.
In the Co-management Pilot configuration, you configure a Configuration Manager Device Collection that determines which devices are auto-enrolled in Microsoft Intune. You need to add Device1 to the Device Collection so that it auto-enrols in Microsoft Intune. You will then be able to manage Device1 using Microsoft Intune.

https://docs.microsoft.com/en-us/configmgr/comanage/how-to-enable

NEW QUESTION: 58
What should you add to a SharePoint Framework 5PFx) solution to ensure that the solution can be used as a Microsoft Teams tab?
A. a webpart manifest file to the config folder in the solution
B. the TeamsTab value to the supportedHosts property in the manifest file
C. a Teams manifest file to the config folder in the solution
D. the TeamsTab value to the componentType property in the manifest file
Answer: (SHOW ANSWER)

NEW QUESTION: 59
You are Developing a human resources application that will show users where they are in their company's organization chart. You are adding a new feature that will display the name of a user's manager inside the application. You need to create a REST query to retrieve the information. The solution must minimize me amount of data retrieved. Which Query should you use?
A. https://graph.microsoft.com/v1.0/users/{UserPrincipalName}/contact?$filter= jobTitle eq 'manager'
B. https://graph.microsoft.com/v1.0/users/{UserPrincipalName}/Mnager>$select-displayname
C. https://graph.microsoft.com/v1.0/users/{UserPrincipalName}/people?$fliter=jobTitle eq 'manager'$select=displayName
D. https://graph.microsoft.comv1.0/users/{UserPrincipalName}/manager
Answer: (SHOW ANSWER)

NEW QUESTION: 60
Your network contains an Active Directory domain.
You deploy a Microsoft Azure Active Directory (Azure AD) tenant.
Another administrator configures the domain the synchronization to Azure AD.
You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized to successfully.
You review Azure AD Connect Health and discover that all the user account synchronization completed.
You discover AD Connect Health and discover that at the user account synchronization to Azure AD.
Solution: You run idfix.exe and export the 10 user accounts.
A. Yes
B. No
Answer: B (LEAVE A REPLY)

NEW QUESTION: 61
You have a Microsoft 365 subscription.
You view the service advisories shown in the following exhibit.
You need to ensure that users who administer Microsoft SharePoint Online can view the advisories to investigate health issues.
Which role should you assign to the users?
A. SharePoint administrator
B. Message Center reader
C. Reports reader
D. Service administrator
Answer: (SHOW ANSWER)

People who are assigned the global admin or service administrator role can view service health. To allow Exchange, SharePoint, and Skype for Business admins to view service health, they must also be assigned the Service admin role. For more information about roles that can view service health.

https://docs.microsoft.com/en-us/office365/enterprise/view-service-health

NEW QUESTION: 62
You need to Add the custom domain name* to Office 36S K> support the planned changes as quickly as possible.
What should you create to verify the domain names successfully?
A. three alias (CNAME) record
B. one text (TXT) record
C. one alias (CNAME) record
D. three text (TXT) record
Answer: (SHOW ANSWER)
Contoso plans to provide email addresses for all the users in the following domains:
East.adatum.com
Contoso.adatum.com
Humongousinsurance.com
To verify three domain names, you need to add three TXT records.
Reference:
https://docs.microsoft.com/en-us/office365/admin/setup/add-domain?view=o365-worldwide

NEW QUESTION: 63
You have a Microsoft 365 Enterprise subscription.
You have a conditional access policy to force multi factor .mthentication when accessing Microsoft SharePoint from a mobile device You need to view which users authenticated by using multi factor authentication.
What should you do?
A. From the Microsoft 36S admin center, view the Security Compliance reports.
B. From the Azure Active Directory admin center, view the user sign-ins.

C. From the Microsoft 365 admin center, view the Usage reports.
D. From the Azure Active Directory admin center, view the audit logs.
Answer: B (LEAVE A REPLY)
With the sign-ins activity report in the Azure portal, you can get the information you need to determine how your environment is doing.
The sign-ins report can provide you with information about the usage of managed applications and user sign-in activities, which includes information about multi-factor authentication (MFA) usage. The MFA data gives you insights into how MFA is working in your organization Reference: https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-mfa-reporting

NEW QUESTION: 64
Your company has a Microsoft 365 subscription. All identities are managed in the cloud.
The company purchases a new domain name.
You need to ensure that all new mailboxes use the new domain as their primary email address.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. From Microsoft Exchange Online PowerShell, run the Update-EmailAddressPolicy policy command.
B. From the Exchange admin center, click mail flow, and then configure the email address policies.
C. From the Microsoft 365 admin center, click Setup, and then configure the domains.
D. From Microsoft Exchange Online PowerShell, run the Set-EmailAddressPolicy policy command.
E. From the Azure Active Directory admin center, configure the custom domain names.
Answer: (SHOW ANSWER)
Email address policies define the rules that create email addresses for recipients in your Exchange organization whether this is Exchange on-premise or Exchange online.
You can configure email address policies using the graphical interface of the Exchange Admin Center or by using PowerShell with the Set-EmailAddressPolicy cmdlet.
The Set-EmailAddressPolicy cmdlet is used to modify an email address policy. The Update-EmailAddressPolicy cmdlet is used to apply an email address policy to users.

https://docs.microsoft.com/en-us/exchange/email-addresses-and-address-books/email-address-policies/email-address-policies?view=exchserver-2019

NEW QUESTION: 65
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it

would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
You may now click next to proceed to the lab.
Lab information
Use the following login credentials as needed:
To enter your username, place your cursor in the Sign in box and click on the username below.
To enter your password, place your cursor in the Enter password box and click on the password below.
Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com
Microsoft 365 Password: m3t^We$Z7&xy

You need to create a policy that allows a user named Lee Gu to use Outlook Web App to review 50 percent of the outbound email messages sent by a user named Joni Sherman.
To answer, sign in to the Microsoft 365 portal.

Answer:

You need to configure a Supervision Policy.
1. Go to https://protection.office.com or navigate to the Security & Compliance admin center.
2. In the left navigation pane, select Supervision.
3. Click the '+Create' button to create a new supervision policy.
4. Give the policy a name such as 'Joni Sherman' and click Next.
5. In the 'Supervised users' section, click '+Add users or groups'.
6. Select Joni Sherman from the users list and click the Add button.
7. Deselect the 'Teams chats' and 'Skype for Business Conversations' checkboxes leaving only the 'Exchange Email' checkbox ticked and click Next.
8. Under 'Direction is', deselect Inbound leaving only Outbound selected and click Next.
9. In the 'Percentage to review' section, enter 50 and click Next.
10. In the 'Reviewers' section, start typing Lee Gu then select his account when it appears.
11. Click Next.

12. On the 'Review your settings' page, check the settings are correct the click the Finish button to create the policy.

NEW QUESTION: 66
You have several Microsoft SharePoint document libraries in your on-premises environment.
You have a Microsoft 365 tenant that has directory synchronization implemented.
You plan to move all the document libraries to SharePoint Online.
You need to recommend a migration strategy for the document libraries.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
Answer:

Lab Instance: 10811525
Alex Wilber must be able to reset the password of each user in your organization. The solution must prevent Alex Wilber from modifying the password of global administrators.

Answer:

You need to assign the 'Password Administrator' role to Alex Wilber. A user assigned the Password Administrator role can reset passwords for non-administrators and Password administrators.

1. Go to the Azure Active Directory admin center.
2. Select Users.
3. Select the Alex Wilber account to open the account properties page.
4. Select 'Assigned roles'.
5. Click the 'Add Assignments' button.
6. Select Password Administrator then click the Add button.

Reference:
https://docs.microsoft.com/en-us/office365/admin/add-users/about-admin-roles?view=o365-worldwide

NEW QUESTION: 68

You recently migrated your on-premises email solution to Microsoft Exchange Online and are evaluating which licenses to purchase.
You want the members of two groups named IT and Managers to be able to use the features shown in the following table.
The IT group contains 50 users. The Managers group contains 200 users.
You need to recommend which licenses must be purchased for the planned solution. The solution must minimize licensing costs.
Which licenses should you recommend?

A. 250 Microsoft 365 E3 only
B. 50 Microsoft 365 E 3 and 200 Microsoft 365 E5
C. 250 Microsoft 365 E5 only
D. 200 Microsoft 365 E3 and 50 Microsoft 365 E5

Answer: D (LEAVE A REPLY)

Microsoft Azure Active Directory Privileged Identity Management requires an Azure AD Premium P2 license. This license comes as part of the Microsoft 365 E5 license. Therefore, we need 50 Microsoft 365 E5 licenses for the IT group.
Conditional Access requires the Azure AD Premium P1 license. This comes as part of the Microsoft E3 license. Therefore, we need 200 Microsoft 365 E3 licenses for the Managers group.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/subscription-requirements

NEW QUESTION: 69
You need to configure just in time access to meet the technical requirements.
What should you use?
A. access reviews
B. entitlement management
C. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
D. Azure Active Directory (Azure AD) Identity Protection
Answer: (SHOW ANSWER)
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure

NEW QUESTION: 70
You publish an enterprise application named App1 that process financial data.
You need to ensure that access to App1 is revoked for users who no longer require view the processed financial data.
What should you configure?
A. An access review
B. An app protection policy
C. A conditional access policy
D. An owner
Answer: A (LEAVE A REPLY)
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/governance/create-access-review

NEW QUESTION: 71
You have a Microsoft 365 subscription.
You recently configured a Microsoft SharePoint Online tenant in the subscription.
You plan to create an alert policy.
You need to ensure that an alert is generated only when malware is detected in more than five documents stored in SharePoint Online during a period of 10 minutes.
What should you do first?
A. Enable Microsoft Office 365 Cloud App Security.
B. Deploy Windows Defender Advanced Threat Protection (Windows Defender ATP).
C. Enable Microsoft Office 365 Analytics.
Answer: (SHOW ANSWER)
An alert policy consists of a set of rules and conditions that define the user or admin activity that generates an alert, a list of users who trigger the alert if they perform the activity, and a threshold that defines how many times the activity has to occur before an alert is triggered.
In this question, we would use the "Malware detected in file" activity in the alert settings then configure the threshold (5 detections) and the time window (10 minutes).

The ability to configure alert policies based on a threshold or based on unusual activity requires Advanced Threat Protection (ATP).
Reference:
https://docs.microsoft.com/en-us/microsoft-365/compliance/alert-policies

NEW QUESTION: 72
Your company recently purchased a Microsoft 365 subscription.
You enable Microsft Azure Multi-Factor Authentication (MFA) for all 500 users in the Azure Active Directory (Azure tenant) You need to generate a report that lists all the users who Azure registeration process.
What is the best approach to achieve the goal? More than one answer choice achieve the goal. Select the Best answer.
A. From Azure Cloud Shell, run the Get-Msoluser cndlet.
B. From Azure Cloud Shell, run the Get-AzureADUser cndlet.
C. From the Azure Active Directory admin center, use the Risky sign-ins blade.
D. From the Azure Active Directory admin center, use the Multi-factor Authentication - Server Status blade.
Answer: A (LEAVE A REPLY)

NEW QUESTION: 73
Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).
You have users in contoso.com as shown in the following table.
The users have the passwords shown in the following table.
You implement password protection as shown in the following exhibit.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Answer:
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-password-ban-bad

NEW QUESTION: 74
You create a SharePoint Framewort (SPFx) web pact and include MSGraphClient by using the following manifest.
Which two actions can the web part perform? Each correct answer presents part of the solution.
NOTE Each correct selection is worth one point
A. Create a file in the current user's Microsoft OneDrive
B. Send an email on behalf of the current user.
C. Access the user information of all users.
D. Send an email on behalf of another user.

E. Access the user information of the current user only.
Answer: B,E (LEAVE A REPLY)

NEW QUESTION: 75
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.
Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection.
Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailbox hosted in the main office.
The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox.
You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365.
You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails.
Solution: You deploy a site-to-site VPN from each branch office to Microsoft Azure.
Does this meet the goal?
A. Yes
B. NO
Answer: B (LEAVE A REPLY)

NEW QUESTION: 76
You have a Microsoft Teams app that contains a conversational bot. The bot uses task modules to reply to users. When the hot receives a new message, the following code is executed before a response is sent back to the user to decide whether the bot should continue the conversation.
Answer:
Reference:
https://github.com/OfficeDev/microsoft-teams-sample-task-module-nodejs

NEW QUESTION: 77
Your on-premises network contains five file servers. The file servers host shares that contain user data.
You plan to migrate the user data to a Microsoft 36S subscription.
You need to recommend a solution to import the user data into Microsoft OneDrive.
What should you include in the recommendation?
A. Configure the Migrate of the OneDrive client on your Windows 10 device
B. Configure the Sync settings in the OneDrive admin center.
C. Run the SharePoint Hybrid Configuration Wizard.
D. Run the SharePoint Migration Tool.
Answer: D (LEAVE A REPLY)
The SharePoint Migration Tool lets you migrate content to SharePoint Online and OneDrive from the following locations:
SharePoint Server 2013
SharePoint Server 2010
Network and local file shares
Reference:
https://docs.microsoft.com/en-us/sharepointmigration/introducing-the-sharepoint-migration-tool

NEW QUESTION: 78
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain.
You deploy a Microsoft Azure Active Directory (Azure AD) tenant.
Another administrator configures the domain to synchronize to Azure AD.
You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully.
You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully.
You need to ensure that the 10 user accounts are synchronized to Azure AD.
Solution: From Azure AD Connect, you modify the filtering settings.
Does this meet the goal?
A. Yes
B. No
Answer: (SHOW ANSWER)

Reference:
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering

NEW QUESTION: 79
You need to ensure that a user named User1 can create documents by using Office Online.
Which two Microsoft Office 365 license options should you turn on for User1? To answer, select the appropriate options in the answer area.
NOTE: Each correct section is worth one point.
Answer:

NEW QUESTION: 80
You are developing a new application named App1 that uses the Microsoft identity platform to authenticate to Azure Active Directory (Azure AD).
Currently, App1 can read user profile information.
You need to allow App1 to read the user's calendar.
Solution: Perform a POST request against https://graph.microsoft.com/v1.0/me/events.
Does this meet the goal?
A. Yes
B. No
Answer: B (LEAVE A REPLY)

NEW QUESTION: 81
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

NEW QUESTION: 82
Your company has a Microsoft 365 subscription.
You upload several archive PST files to Microsoft 365 by using the Security & Compliance admin center.
A month later, you attempt to run an import job for the PST files.
You discover that the PST files were deleted from Microsoft 365.
What is the most likely cause of the files being deleted? More than one answer choice may achieve the goal.
Select the BEST answer.
A. The PST files were corrupted and deleted by Microsoft 365 security features.
B. PST files are deleted automatically from Microsoft 365 after 30 days.
C. The size of the PST files exceeded a storage quota and caused the files to be deleted.
D. Another administrator deleted the PST files.
Answer: (SHOW ANSWER)
Reference:

https://docs.microsoft.com/en-us/office365/securitycompliance/faqimporting-pst-files-to-office-365
You can use the Office 365 Import Service to bulk-import PST files to Office 365 mailboxes.
When you use the network upload method to import PST files, you upload them to an Azure blob container named ingestiondata. If there are no import jobs in progress on the Import page in the Security & Compliance Center), then all PST files in the ingestiondata container in Azure are deleted 30 days after the most recent import job was created in the Security & Compliance Center.
https://docs.microsoft.com/en-us/office365/securitycompliance/faqimporting-pst-files-to-office-365

NEW QUESTION: 83
You have a Microsoft 365 subscription that uses a default domain named litwareinc.com. The subscription has a Microsoft SharePoint site collection named Collection1.
From the Azure Active Directory admin center, you configure the External collaboration settings as shown in the External Collaboration Settings exhibit. (Click the External Collaboration Settings tab.)
From the SharePoint admin center, you configure the sharing settings as shown in the SharePoint Sharing exhibit. (Click the SharePoint Sharing tab.)
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Answer:
Reference:
https://docs.microsoft.com/en-us/sharepoint/turn-external-sharing-on-or-off

NEW QUESTION: 84
Your network contains an on-premises Active Directory forest named contoso.com. The forest contains the users shown in the following table.
You create an Azure Active Directory (Azure AD) tenant named fabrikam.onmicrosoft.com.
You plan to sync the users in the forest to fabrikam.onmicrosoft.com by using Azure AD Connect.
Which username will be assigned to User1 and User2 in Azure AD after the synchronization? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
Answer:

NEW QUESTION: 85
Your company has a hybrid deployment of Microsoft 36S.
Users authenticate by using pass-through authentication. Several Microsoft Azure AD Connect Authentication Agents are deployed.
You need to verify whether all the Authentication Agents are used for authentication.
What should you do?
A. From the Azure portal, use the Troubleshoot option on the Pass-through authentication page.

B. From Performance Monitor, use the #PTA authentications counter.
C. From the Azure portal use the Diagnostics settings on the Monitor blade.
D. From Performance Monitor, use the Kerberos authentications counter.
Answer: A (LEAVE A REPLY)
On the Troubleshoot page, you can view how many agents are configured. If you click on the agents link, you can view the status of each agent. Each agent will have a status of Active or Inactive.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/tshoot-connect-pass-through-authentication

NEW QUESTION: 86
Your network contain*, an on-premises Active Directory forest.
You are evaluating the implementation of Microsoft 365 and the deployment of authentication strategy.
You need to recommend an authentication strategy that meets the following requirements:
* Allows users to sign in by using smart card-based certificates
* Allows users to connect to on premises and Microsoft 365 services by using SSO Which authentication strategy should you recommend?
A. password hash synchronization and seamless SSO
B. federation with Active Directory Federation Services (AD FS)
C. pass-through authentication and seamless SSO
Answer: B (LEAVE A REPLY)
Reference:
Federation with Active Directory Federation Services (AD FS) is required to allow users to sign in by using smart card-based certificates.
Federated authentication
When you choose this authentication method, Azure AD hands off the authentication process to a separate trusted authentication system, such as on-premises Active Directory Federation Services (AD FS), to validate the user's password.
The authentication system can provide additional advanced authentication requirements. Examples are smartcard-based authentication or third-party multifactor authentication.
https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn

NEW QUESTION: 89
Your company is based in the United Kingdom (UK).
Users frequently handle data that contains Personally Identifiable Information (PII).
You create a data loss prevention (DLP) policy that applies to users inside and outside the company. The policy is configured as shown in the following exhibit.
Use the drop-down menus to select the answer choice that completes each statement based in the information presented in the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer:
Reference:
https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies

NEW QUESTION: 90
You have a single-page application (SPA) named TodoListSPA and a server-based web app named TodoUstServKe.
The permissions for the TodoListSPA API are configured as shown in the TodoUstSPA exhibit (Click the TodoUstSPA tab) The permissions for the TodoUstService API are configured as shown m the TodoListService exhibit (Click the TodoUstService tab.) You need to ensure that TodoUstService can access a Microsoft OneDnve file of the signed-in user. The solution must use the principle of least privilege.
Which permission request should you configure?
A. thesites.Read.All delegated permission for TodoListSPA
B. the sites.Read.All delegated permission for TodoUstService
C. the sites.Read.All application permission for TodoUstService
D. the sites.Read.All application permission for TodoUstSPA
Answer: B (LEAVE A REPLY)

NEW QUESTION: 91
You have a Microsoft 365 subscription.
You use the Microsoft Office Deployment tool to install Office 365 ProPlus.
You create a configuration file that contains the following settings.
Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.
Answer:
Reference:
https://docs.microsoft.com/en-us/deployoffice/configuration-options-for-the-office-2016-deployment-tool

NEW QUESTION: 92

You have a Microsoft 365 subscription and a DNS domain. The domain is hosted by a third-party DNS service.
You plan to add the domain to the subscription.
You need to use Microsoft Exchange Online to send and receive emails for the domain.
Which type of DNS record should you add to the DNS zone of the domain for each task? To answer, drag the appropriate records to the correct tasks. Each record may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.
Answer:
Reference:
https://docs.microsoft.com/en-us/microsoft-365/admin/get-help-with-domains/create-dns-records-at-any-dns-hosting-provider?view=o365-worldwide

NEW QUESTION: 93
You are developing a Microsoft Teams app that will use an Azure function to send scheduled messages from a bot to users. What is required for the Teams app to send a proactive message to the users?
A. The bot must be approved in Azure Active Directory (Azure AD).
B. The Teams app must be added for each user.
C. The bot must be granted admin access to the users.
D. The users must send at least one message to the bot.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 94
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
You may now click next to proceed to the lab.

Lab information
Use the following login credentials as needed:
To enter your username, place your cursor in the Sign in box and click on the username below.
To enter your password, place your cursor in the Enter password box and click on the password below.
Microsoft 365 Username:
admin@LODSe426243.onmicrosoft.com
Microsoft 365 Password: 3&YWyjse-6-d
If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

Lab Instance: 10887751
You need to create a group named Group2. Users who are added to Group2 must be licensed automatically for Microsoft Offline 365.

Answer:

You need to create the group and assign a license to the group. Anyone who is added to the group will automatically be assigned the license that is assigned to the group.
1. Go to the Azure Active Directory admin center.
2. Select the Azure Active Directory link then select Groups.
3. Click the New Group link.
4. Select 'Security' as the group type and enter 'Group2' for the group name.
5. Click the Create button to create the group.
6. Back in the Groups list, select Group2 to open the properties page for the group.
7. Select 'Licenses'.
8. Select the '+ Assignments' link.
9. Tick the box to select the license.
10. Click the Save button to save the changes.

https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-groups-assign

NEW QUESTION: 95

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company plans to deploy several Microsoft Office 365 services.
You need to design an authentication strategy for the planned deployment. The solution must meet the following requirements:
* Users must be able to authenticate during business hours only.

* Authentication requests must be processed successfully if a single server fails.
* When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
* Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.
Solution: You design an authentication strategy that contains a pass-through authentication model. You install an Authentication Agent on three servers and configure seamless SSO.
Does this meet the goal?
A. Yes
B. No
Answer: A (LEAVE A REPLY)
This solution meets all the requirements:
Users must be able to authenticate during business hours only. (This can be configured by using Logon Hours in Active Directory. Pass-through authentication passes authentication to the on-premise Active Directory) Authentication requests must be processed successfully if a single server fails. (We have Authentication Agents running on three servers) When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in. (This can be configured in Active Directory. Pass-through authentication passes authentication to the on-premise Active Directory) Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically. (This goal is met by seamless SSO) Reference:
https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn

NEW QUESTION: 96
Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes the users shown in the following table.
Group2 is a member of Group1.
You assign a Microsoft Office 365 Enterprise E3 license to Group1.
You need to identity how many Office 365 E3 licenses are assigned.
What should you identify?
A. 1
B. 2
C. 3
D. 4
Answer: C (LEAVE A REPLY)
Group-based licensing currently does not support groups that contain other groups (nested groups). If you apply a license to a nested group, only the immediate first-level user members of the group have the licenses applied. Therefore, User2 will not be assigned a license.
When Azure AD assigns group licenses, any users without a specified usage location inherit the location of the directory. Therefore, User3 will be assigned a license and his usage location will be set to the location of the directory.

Reference:
https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-groups-assign
https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-group-advanced

NEW QUESTION: 97
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.
The domain syncs to an Azure Active Directory (Azure AD) tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)
User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com.
You need to ensure that User2 can access the resources in Azure AD.
Solution: From the on-premises Active Directory domain, you set the UPN suffix for User2 to @contoso.com. You instruct User2 to sign in as user2@contoso.com.
Does this meet the goal?
A. Yes
B. No
Answer: (SHOW ANSWER)
The on-premises Active Directory domain is named contoso.com. You can enable users to sign on using a different UPN (different domain), by adding the domain to Microsoft 365 as a custom domain. Alternatively, you can configure the user account to use the existing domain (contoso.com).

NEW QUESTION: 98
You have a Microsoft 365 subscription.
You add a domain named contoso.com.
When you attempt to verify the domain, you are prompted to send a verification email to admin@contoso.com.
D18912E1457D5D1DDCBD40AB3BF70D5D
You need to change the email address used to verify the domain.
What should you do?
A. From the domain registrar, modify the contact information of the domain
B. Add a TXT record to the DNS zone of the domain
C. Modify the NS records for the domain

D. From the Microsoft 365 admin center, change the global administrator of the Microsoft 365 subscription

Answer: (SHOW ANSWER)

The email address that is used to verify that you own the domain is the email address listed with the domain registrar for the registered contact for the domain.

Reference:

https://docs.microsoft.com/en-us/microsoft-365/admin/setup/add-domain?view=o365-worldwide

NEW QUESTION: 99

You need to meet the security requirement for Group1.

What should you do?

A. Configure all users to sign in by using multi-factor authentication.

B. Modify the properties of Group1.

C. Assign Group1 a management role.

D. Modify the Password reset properties of the Azure AD tenant.

Answer: D (LEAVE A REPLY)

Reference:

If SSPR (Self Service Password Reset) is enabled, you must select at least one of the following options for the authentication methods. Sometimes you hear these options referred to as "gates." Mobile app notification Mobile app code Email Mobile phone Office phone Security questions You can specify the required authentication methods in the Password reset properties of the Azure AD tenant. In this case, you should set the required authentication method to be 'Security questions'.

https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-sspr-howitworks

NEW QUESTION: 100

Your company has a Microsoft 365 subscription.

You need to identify which users performed the following privileged administration tasks:

Deleted a folder from the second-stage Recycle Bin if Microsoft SharePoint Opened a mailbox of which the user was not the owner Reset a user password What should you use?

A. Microsoft Azure Active Directory (Azure AD) audit logs

B. Microsoft Azure Active Directory (Azure AD) sign-ins

C. Security & Compliance content search

D. Security & Compliance audit log search

Answer: (SHOW ANSWER)

Reference:

https://docs.microsoft.com/en-us/azure/azure-monitor/platform/activity-logs-overview

NEW QUESTION: 101

You have a Microsoft 365 subscription that uses an Azure Active Directory (Azure AD) tenant named contoso.com. The tenant contains the users shown in the following table.

You configure the Office software download settings as shown in the exhibit. (Click the Exhibit tab.)
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Answer:

NEW QUESTION: 102
Your company has an on-premises Microsoft SharePoint Server environment and a Microsoft 365 subscription.
When users search for content from Microsoft 365, you plan to include content from the on-premises SharePoint Server environment in the results.
You need to add crawled metadata from the on-premises SharePoint Server content to the Microsoft Office 365 search index.
What should you do first?
A. Create a site collection that uses the Basic Search Center template.
B. Run the SharePoint Migration Tool.
C. Run the SharePoint Hybrid Configuration Wizard.
D. Create a site collection that uses the Enterprise Search Center template.
Answer: (SHOW ANSWER)

NEW QUESTION: 103
Your company has a Microsoft 365 subscription.
Your plan to add 100 newly hired temporary users to the subscription next week.
You create the user accounts for the new users.
You need to assign licenses to the new users.
Which command should you run?
A. Option A
B. Option B
C. Option C
D. Option D
Answer: (SHOW ANSWER)
The first line gets all users from the Temp department that have a UsageLocation assigned and stores them in the $NewStaff variable. You cannot use PowerShell to assign a license to a user that does not have a UsageLocation configured.
The second line adds the licenses to each user in the $NewStaff variable.

https://docs.microsoft.com/en-us/office365/enterprise/powershell/assign-licenses-to-user-accounts-with-office-365-powershell

NEW QUESTION: 104
Which role should you assign to User1?

A. Security Administrator
B. Records Management
C. Security Reader
D. Hygiene Management
Answer: C (LEAVE A REPLY)
A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center. Users with the Security Reader role have global read-only access on security-related features, including all information in Microsoft 365 security center, Azure Active Directory, Identity Protection, Privileged Identity Management, as well as the ability to read Azure Active Directory sign-in reports and audit logs, and in Office 365 Security & Compliance Center.

Your organization has an office in Seattle.
You plan to create 100 users who will work in the Seattle office. The city attribute for all the users will be Seattle.
You need to create a group named Group1 that will automatically contain all the Seattle office users.
Answer:
You need to create a Dynamic group. User accounts with the city attribute set to 'Seattle' will automatically be added to the group.
1. Go to the Azure Active Directory admin center.
2. Select Azure Active Directory then select Groups.
3. Click on the New Group link.
4. Give the group a name such as Seattle Users.
5. Select Users as the membership type.
6. Select 'Add dynamic query'.
7. Select 'City' in the Property drop-down box.
8. Select 'Equals' in the Operator drop-down box.
9. Enter Seattle as the Value. You should see the following text in the Expression box: user.city -eq "Seattle"
10. Click Save to create the group.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/groups-dynamic-membership

NEW QUESTION: 106
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has a Microsoft Office 365 tenant.
You suspect that several Office 365 features were recently updated.
You need to view a list of the features that were recently updated in the tenant.
Solution: You review the Windows release health in the Microsoft 365 admin center.
Does this meet the goal?
A. Yes
B. No
Answer: A (LEAVE A REPLY)

https://docs.microsoft.com/en-us/exchange/clients-and-mobile-in-exchange-online/exchange-activesync/mobile-device-mailbox-policies

NEW QUESTION: 109

You have a Microsoft Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.
Your company uses Windows Defender Advanced Threat Protection (ATP). Windows Defender ATP contains the roles shown in the following table.
Windows Defender ATP contains the device groups shown in the following table.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Reference:
https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/user-roles

https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/rbac

NEW QUESTION: 110
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has 3,000 users. All the users are assigned Microsoft 365 E3 licenses.
Some users are assigned licenses for all Microsoft 365 services. Other users are assigned licenses for only certain Microsoft 365 services.
You need to determine whether a user named User1 is licensed for Exchange Online only.
Solution: You run the Get-MsolUser cmdlet.
Does this meet the goal?
A. Yes
B. No
Answer: B (LEAVE A REPLY)
The Get-MsolUser cmdlet will tell you if a user is licensed for Microsoft 365 but it does not tell you which licenses are assigned.
Reference:
https://docs.microsoft.com/en-us/powershell/module/msonline/get-msoluser?view=azureadps-1.0

NEW QUESTION: 111
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has a Microsoft Office 365 tenant.
You suspect that several Office 365 features were recently updated.
You need to view a list of the features that were recently updated in the tenant.
Solution: You use Monitoring and reports from the Compliance admin center.
Does this meet the goal?
A. Yes
B. No
Answer: B (LEAVE A REPLY)
Depending on what your organization's Office 365 subscription includes, the Dashboard in Security & Compliance includes several widgets, such as Threat Management Summary, Threat Protection Status, Global Weekly Threat Detections, Malware, etc. The Compliance admin center in Microsoft 365 contains much of the same information but also includes additional entries focusing on alerts, data insights.

The Monitoring and reports section from the Compliance admin center does not display a list of the features that were recently updated in the tenant so this solution does not meet the goal.
To meet the goal, you need to use Message center in the Microsoft 365 admin center.
Reference:
https://docs.microsoft.com/en-us/office365/admin/manage/message-center?view=o365-worldwide

NEW QUESTION: 112
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a Microsoft 365 subscription.
You discover that some external users accessed content on a Microsoft SharePoint site. You modify the SharePoint sharing policy to prevent sharing outside your organization.
You need to be notified if the SharePoint policy is modified in the future.
Solution: From the SharePoint site, you create an alert.
Does this meet the goal?
A. Yes
B. No
Answer: (SHOW ANSWER)
You need to create a threat management policy in the Security & Compliance admin center.

NEW QUESTION: 113
You have a Microsoft 365 tenant that contains the users shown in the following table.
Microsoft Exchange Online has the mail flow rules shown in the following table
Rule1 has the following settings:
Answer:

NEW QUESTION: 114
Your network contains an Active Directory domain and a Microsoft Azure Active Directory (Azure AD) tenant.
You implement directory synchronization for all 10.000 users in the organization.
You automate the creation of 100 new user accounts.
You need to ensure that the new user accounts synchronize to Azure AD as quickly as possible
Which command should you run? To answer, select the appropriate options in the answer area.
NOTE: Each correct select ion is worth one point.
Answer:

NEW QUESTION: 115
Your on-premises network contains an Active Directory domain that syncs with an Azure Active Directory (Azure AD) tenant named contoso.com by using Azure AD Connect. Your company purchases another company that has an on-premises Active Directory domain named lrtwareinc.com. You need to sync litwarein.com with contoso.com. What should you install in the litwarein.com domain?
A. an active instance of Azure AD Connect
B. an Azure AD application proxy connector
C. an Azure AD Connect instance in staging mode
D. an Azure AD Connect provisioning agent
Answer: A (LEAVE A REPLY)

NEW QUESTION: 116
You have Windows 10 devices that are managed by using Microsoft Endpoint Manager as shown in the following table.
You create a Microsoft 365 Suite app as shown in the exhibit (Click the Exhibit Tab.) and assign The app to Group1. On which devices will Microsoft 365 Apps be installed?
A. Device1, Device2. and Device4 only
B. Device 1 and Device2 only
C. Device1, Device2, Device3, and Device4
D. Device2 and Device4 only
E. Device2 only
Answer: (SHOW ANSWER)

NEW QUESTION: 117
You have a Microsoft 365 E5 subscription that contains the users shown in the following table.
You configure a multi-factor authentication (MFA) registration policy that has the following settings:
Assignments:
- Include: Group1
- Exclude: Group2
Access controls: Require Azure MFA registration
Enforce Policy: On
You create a conditional access policy that has the following settings:
Name: Policy1
Assignments:
- Include: Group2
- Exclude: Group1

Access controls:
- Grant, Require multi-factor authentication
Enable policy: On
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Answer:
