### NEW QUESTION: 1

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements                                                                                                           | Yes                   | No                    |
|----------------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| The Microsoft Authenticator app allows users to sign in to any platform or browser by receiving a phone notification | <input type="radio"/> | <input type="radio"/> |
| Windows Hello provides users with biometric authentication based on facial recognition or fingerprint matching       | <input type="radio"/> | <input type="radio"/> |
| Fast Identity Online (FIDO) allows users to sign in without a username or password by using OAuth hardware tokens    | <input type="radio"/> | <input type="radio"/> |

Answer:

| Statements                                                                                                           | Yes                              | No                               |
|----------------------------------------------------------------------------------------------------------------------|----------------------------------|----------------------------------|
| The Microsoft Authenticator app allows users to sign in to any platform or browser by receiving a phone notification | <input type="radio"/>            | <input checked="" type="radio"/> |
| Windows Hello provides users with biometric authentication based on facial recognition or fingerprint matching       | <input checked="" type="radio"/> | <input type="radio"/>            |
| Fast Identity Online (FIDO) allows users to sign in without a username or password by using OAuth hardware tokens    | <input type="radio"/>            | <input checked="" type="radio"/> |

### NEW QUESTION: 2

A company plans to deploy Microsoft 365.

You need to identify the appropriate collaboration solution for each task.

Which solution should you choose for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Task                                        | Service                                                                                                                          |
|---------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| Host meetings with employees and guests.    | <div><div></div><div>Microsoft Teams</div><div>Azure DevOps</div><div>SharePoint Online</div><div>Dynamics 365</div></div>       |
| Deploy a web page for a team or project.    | <div><div></div><div>Microsoft Teams</div><div>SharePoint Online</div><div>Dynamics 365</div><div>Microsoft 365 apps</div></div> |
| Manage team and work progress on a project. | <div><div></div><div>Microsoft Teams</div><div>SharePoint Online</div><div>Microsoft Planner</div><div>Dynamics 365</div></div>  |

Answer:

| Task                                        | Service                                                                                                                                                                                                                    |
|---------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Host meetings with employees and guests.    | <div>▼</div> <div>Microsoft Teams</div> <div>Azure DevOps</div> <div>SharePoint Online</div> <div>Dynamics 365</div>                                                                                                       |
| Deploy a web page for a team or project.    | <div>  Microsoft ▼ </div> <div>Microsoft Teams</div> <div>SharePoint Online</div> <div>Dynamics 365</div> <div>Microsoft 365 apps</div> |
| Manage team and work progress on a project. | <div>▼</div> <div>Microsoft Teams</div> <div>SharePoint Online</div> <div>Microsoft Planner</div> <div>Dynamics 365</div>                                                                                                  |

### NEW QUESTION: 3

You are the Microsoft 365 administrator for a company.

Which two admin roles can purchase more licenses? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. service administrator
- B. user management administrator
- C. global administrator
- D. billing administrator

**Answer:** (SHOW ANSWER)

Reference:

<https://docs.microsoft.com/en-us/office365/admin/subscriptions-and-billing/buy-licenses?view=o365-worldwide>

### NEW QUESTION: 4

You are the Microsoft 365 administrator for a company.

You install Microsoft Office 365 ProPlus on five devices. You deactivate one device.

Which task can you perform on the deactivated device?

- A. Print a document.

- B.** Leave a comment in a document.
- C.** Start a new document from a template.
- D.** Set properties on a document.

**Answer:** ([SHOW ANSWER](#))

Reference:

[https://blogs.technet.microsoft.com/office\\_resource\\_kit/2014/01/17/office-365-proplus-multiple-devices-and-deactivation/](https://blogs.technet.microsoft.com/office_resource_kit/2014/01/17/office-365-proplus-multiple-devices-and-deactivation/) When you deactivate a Microsoft Office 365 ProPlus license, Office 365 ProPlus remains installed on the computer, but you can only view and print documents. All features for editing or creating new documents are disabled.

<https://docs.microsoft.com/en-us/deployoffice/overview-of-licensing-and-activation-in-office-365-proplus>

#### **NEW QUESTION: 5**

A company uses Microsoft 365 services. The company is evaluating multi-factor authentication (MFA) methods.

You need to determine which MFA methods are supported in Microsoft 365.

Which three methods are supported? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A.** verification code sent in a text message
- B.** verification code sent in a phone call
- C.** custom security question
- D.** Microsoft Authenticate smart phone app
- E.** biometric retinal scanner

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 6**

A company plans to use the reports that are available in Microsoft 365 usage analytics.

Match each report to its description. To answer, drag the appropriate report from the column on the left to its description on the right. Each term may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

| Reports       | Answer Area                                                                                           |        |
|---------------|-------------------------------------------------------------------------------------------------------|--------|
|               | Description                                                                                           | Report |
| Communication | Provides the number of active users and the primary activities of each product for the last 12 months |        |
| Collaboration | Identifies patterns in the use of Microsoft Teams and Yammer among users                              |        |
| Mobility      | Identifies the number of documents that are shared internally or externally                           |        |
| Storage       |                                                                                                       |        |
| Usage         |                                                                                                       |        |

Answer:

| Reports       | Answer Area                                                                                           |               |
|---------------|-------------------------------------------------------------------------------------------------------|---------------|
|               | Description                                                                                           | Report        |
| Communication | Provides the number of active users and the primary activities of each product for the last 12 months | Usage         |
| Collaboration | Identifies patterns in the use of Microsoft Teams and Yammer among users                              | Communication |
| Mobility      | Identifies the number of documents that are shared internally or externally                           | Collaboration |
| Storage       |                                                                                                       |               |
| Usage         |                                                                                                       |               |

#### NEW QUESTION: 7

A company is creating their Windows as a service (WaaS) strategy.

You need to determine which type of release should be used.  
Select the answer that correctly completes the sentence.

**Answer Area**

The company will validate quality updates in an early release prior to a combined security release through .

- B releases
- Non-security releases
- C releases
- Out-of-band (OOB) releases

Answer:

**Answer Area**

The company will validate quality updates in an early release prior to a combined security release through .

- B releases
- Non-security releases
- C releases
- Out-of-band (OOB) releases

#### NEW QUESTION: 8

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statement                                                                                                     | Yes                   | No                    |
|---------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| It is possible to connect cloud services to on-premises server resources.                                     | <input type="radio"/> | <input type="radio"/> |
| Scaling cloud-hosted infrastructure components includes expanding server resources and networking components. | <input type="radio"/> | <input type="radio"/> |

Answer:

| Statement                                                                                                     | Yes                              | No                    |
|---------------------------------------------------------------------------------------------------------------|----------------------------------|-----------------------|
| It is possible to connect cloud services to on-premises server resources.                                     | <input checked="" type="radio"/> | <input type="radio"/> |
| Scaling cloud-hosted infrastructure components includes expanding server resources and networking components. | <input checked="" type="radio"/> | <input type="radio"/> |

#### NEW QUESTION: 9

You need to determine the release date of Microsoft 365 features.

What should you use?

- A. Office Deployment Tool release history
- B. Microsoft 365 admin center
- C. Microsoft System Center
- D. Microsoft 365 Roadmap
- E. Windows Insider program

**Answer:** ([SHOW ANSWER](#))

Reference:

<https://www.microsoft.com/en-us/microsoft-365/roadmap?filters=>

#### NEW QUESTION: 10

After experiencing security breaches with on-premises servers, a company is considering migrating to Microsoft 365 for their security solutions. What are three security-related benefits of moving to Microsoft 365? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Microsoft 365 monitors all customers for threats to prevent attacks.
- B. Microsoft 365 prevents all attackers from gaining access to company data.
- C. Microsoft simplifies infrastructure management to help detect and respond to threats.
- D. Microsoft employs a full-time team of penetration testers to identify vulnerabilities.
- E. Microsoft 365 can troubleshoot security issues by accessing customer data without explicit permission from the customer.

**Answer:** ([SHOW ANSWER](#))

#### NEW QUESTION: 11

A company uses Microsoft 365.

The company wants to create a chat bot for integration with Microsoft Teams.

You need to identify a solution to create the chat bot.

Which solution should you choose?

- A. Remote Assist
- B. Dynamics 365 Customer Service
- C. Power Virtual Agent
- D. Dynamics 365 Guides

**Answer: C** ([LEAVE A REPLY](#))

NEW QUESTION: 12

A company plans to use Microsoft 365 Defender.  
Which services should you use? To answer, drag the appropriate services to the correct requirements. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Answer Area

| Services                          | Requirement                               | Service |
|-----------------------------------|-------------------------------------------|---------|
| Microsoft Cloud App Security      | Protect against malicious links in email. |         |
| Microsoft Defender for Endpoint   | Identify unprotected Windows servers.     |         |
| Microsoft Defender for Office 365 |                                           |         |

Answer:

| Services                          | Requirement                               | Service                           |
|-----------------------------------|-------------------------------------------|-----------------------------------|
| Microsoft Cloud App Security      | Protect against malicious links in email. | Microsoft Defender for Office 365 |
| Microsoft Defender for Endpoint   | Identify unprotected Windows servers.     | Microsoft Defender for Endpoint   |
| Microsoft Defender for Office 365 |                                           |                                   |

#### NEW QUESTION: 14

A company has a Microsoft 365 subscription that includes Office apps.

A user has identified a new issue while working with an app. When the user attempts to create a support request, the following message displays:

`You don't have permission to access this page or perform this action.`

You need to determine the cause of the error message.

What is the cause?

- A. The user does not have a license assigned for the app.
- B. The user account is not a member of the global admin role.
- C. The user account is disabled.
- D. The company does not have Premier support.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 15

A company plans to deploy a collaboration solution that allows users inside and outside the company access to the same documents, tasks, and conversations. You need to identify which product meets the requirement. Which product should you select?

- A. Outlook 365
- B. Exchange Online
- C. Microsoft Teams
- D. Microsoft OneDrive

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 16

Match each authentication identity to its scenario. To answer, drag the appropriate authentication identity from the column on the left to its scenario on the right Each authentication identity may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Authentication identities

Azure Active Directory identity only

Active Directory identity only

Azure Active Directory identity and Active Directory identity

Answer Area

Scenario

Used to provide authentication for Microsoft 365 services

Used to provide authentication for Exchange Server

Authentication identity

Answer:

Authentication identities

Azure Active Directory identity only

Active Directory identity only

Azure Active Directory identity and Active Directory identity

Answer Area

Scenario

Used to provide authentication for Microsoft 365 services

Used to provide authentication for Exchange Server

Authentication identity

Azure Active Directory identity and Active Directory identity

Azure Active Directory identity only

NEW QUESTION: 17

A company uses Microsoft 365. You need to identity new Microsoft 365 features that have released to General Availability in the last month Which tool should you choose?

- A. Microsoft 365 Roadmap
- B. SharePoint Online landing page
- C. Security & Compliance Center
- D. Azure portal

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 18**

You are planning a Microsoft Azure AD solution for a company.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statement                                                                                                                         | Yes                   | No                    |
|-----------------------------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| You can manage Azure AD-joined machines by using group policy.                                                                    | <input type="radio"/> | <input type="radio"/> |
| Azure AD requires integration with Active Directory Domain Services by using secure lightweight Directory Access Protocol (LDAP). | <input type="radio"/> | <input type="radio"/> |
| Azure AD supports Azure AD Authentication Library (ADAL) authentication.                                                          | <input type="radio"/> | <input type="radio"/> |

Answer:

| Statement                                                                                                                         | Yes                              | No                    |
|-----------------------------------------------------------------------------------------------------------------------------------|----------------------------------|-----------------------|
| You can manage Azure AD-joined machines by using group policy.                                                                    | <input checked="" type="radio"/> | <input type="radio"/> |
| Azure AD requires integration with Active Directory Domain Services by using secure lightweight Directory Access Protocol (LDAP). | <input checked="" type="radio"/> | <input type="radio"/> |
| Azure AD supports Azure AD Authentication Library (ADAL) authentication.                                                          | <input checked="" type="radio"/> | <input type="radio"/> |

**NEW QUESTION: 19**

A company uses Microsoft 365.

The company must identify which cloud apps and services are used in the company. You need to identify which service can be used to find this information.

Which service should you use?

- A. Azure Active Directory
- B. Azure Security Center
- C. Microsoft Defender for Office 365
- D. Microsoft Cloud App Security

Answer: D ([LEAVE A REPLY](#))

**NEW QUESTION: 20**

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statement                                                                                                                               | Yes                   | No                    |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Microsoft 365 global administrators use Microsoft Workplace Analytics to examine network traffic patterns for troubleshooting purposes. | <input type="radio"/> | <input type="radio"/> |
| Microsoft Workplace Analytics can be helpful in understanding the collaboration patterns and usage of various Microsoft 365 services.   | <input type="radio"/> | <input type="radio"/> |
| Microsoft Workplace Analytics helps employees work more efficiently so that they can become more productive.                            | <input type="radio"/> | <input type="radio"/> |

Answer:

| Statement                                                                                                                               | Yes                              | No                               |

### NEW QUESTION: 23

A company deploys Microsoft 365.

You need to identify the appropriate cloud service for each requirement.

Which cloud service should you choose for each requirement? To answer, drag the appropriate cloud services to the correct requirements. Each cloud service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Cloud services                       | Requirement                                                                 | Cloud service |
|--------------------------------------|-----------------------------------------------------------------------------|---------------|
| Microsoft Intune                     | Detect sensitive content when files are uploaded to cloud storage devices.  |               |
| Windows Information Protection       | Detect sensitive data across third-party software as a service (SaaS) apps. |               |
| Azure Information Protection Scanner |                                                                             |               |

**Answer:**

| Cloud services                       | Requirement                                                                 | Cloud service                        |
|--------------------------------------|-----------------------------------------------------------------------------|--------------------------------------|
| Microsoft Intune                     | Detect sensitive content when files are uploaded to cloud storage devices.  | Azure Information Protection Scanner |
| Windows Information Protection       | Detect sensitive data across third-party software as a service (SaaS) apps. | Windows Information Protection       |
| Azure Information Protection Scanner |                                                                             |                                      |

### NEW QUESTION: 26

You are a Microsoft 365 administrator for a company.

You need to recommend an-appropriate Microsoft Office 365 plan for a customer that minimizes costs.

Which subscription plans should you recommend? To answer, drag the appropriate plans to the correct features. Each plan may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

| Office 365 plans | Office 365 feature                                                            | Office 365 plan |
|------------------|-------------------------------------------------------------------------------|-----------------|
| ProPlus          | Local copy of Microsoft Outlook that connects to an Exchange Server instance. | Office 365 plan |
| Enterprise E1    | Search and discovery with Delve.                                              | Office 365 plan |
| Enterprise E3    | eDiscovery with in-place, hold, and export                                    | Office 365 plan |
| Enterprise E5    | Advanced eDiscovery with in-place search, hold, export, and analytics         | Office 365 plan |

Answer:

| Office 365 plans | Office 365 feature                                                            | Office 365 plan |
|------------------|-------------------------------------------------------------------------------|-----------------|
| ProPlus          | Local copy of Microsoft Outlook that connects to an Exchange Server instance. | ProPlus         |
| Enterprise E1    | Search and discovery with Delve.                                              | Enterprise E1   |
| Enterprise E3    | eDiscovery with in-place, hold, and export                                    | Enterprise E3   |
| Enterprise E5    | Advanced eDiscovery with in-place search, hold, export, and analytics.        | Enterprise E5   |

### NEW QUESTION: 31

You need to identify the software as a service (SaaS), platform as a service (PaaS), and infrastructure as a service (IaaS) services provided by Microsoft 365.

What type of cloud service model does each cloud service represent?

To answer, drag the appropriate cloud service models to the correct cloud services. Each cloud service model may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Cloud service models**

|      |
|------|
| SaaS |
| PaaS |
| IaaS |

**Answer Area**

| Cloud service          | Cloud service model |
|------------------------|---------------------|
| Power Apps             | Cloud service model |
| Microsoft 365 apps     | Cloud service model |
| Azure virtual machines | Cloud service model |

**Answer:**

| Cloud service models | Cloud service          | Cloud service model |
|----------------------|------------------------|---------------------|
| SaaS                 | Power Apps             | SaaS                |
| PaaS                 | Microsoft 365 apps     | IaaS                |
| IaaS                 | Azure virtual machines | PaaS                |

#### NEW QUESTION: 35

A company is evaluating Microsoft 365 services.

You need to determine which payment options are supported with a multiple profile. Which three options are supported" Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. cash
- B. money order
- C. credit card
- D. debit card
- E. check

**Answer: B,C,D** ([LEAVE A REPLY](#))

#### NEW QUESTION: 36

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

|  Statement | Yes                   | No                    |
|-----------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Azure virtual machine is an infrastructure as a service (IaaS) solution.                      | <input type="radio"/> | <input type="radio"/> |
| SharePoint Online is an IaaS solution.                                                        | <input type="radio"/> | <input type="radio"/> |
| Microsoft Teams is an IaaS solution.                                                          | <input type="radio"/> | <input type="radio"/> |

**Answer:**

| Statement                                                                | Yes                              | No                               |
|--------------------------------------------------------------------------|----------------------------------|----------------------------------|
| Azure virtual machine is an infrastructure as a service (IaaS) solution. | <input checked="" type="radio"/> | <input type="radio"/>            |
| SharePoint Online is an IaaS solution.                                   | <input type="radio"/>            | <input checked="" type="radio"/> |
| Microsoft Teams is an IaaS solution.                                     | <input type="radio"/>            | <input checked="" type="radio"/> |

#### NEW QUESTION: 37

A company is evaluating Microsoft 365.

You need to identify the collaboration features of OneDrive.

What are two collaboration features of OneDrive? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Inviting external users to an online meeting.
- B. Sharing files with external users.
- C. Coauthoring of supported documents.
- D. Chatting with multiple users.

Answer: B,C ([LEAVE A REPLY](#))

#### NEW QUESTION: 38

A company plans to migrate to Microsoft 365.

Employees must be able to collaborate by using Microsoft Yammer, SharePoint Online, Staff Hub, and Teams. You must minimize costs.

You need to subscribe to Microsoft Office 365.

Which subscription type should you use?

- A. E3
- B. ProPlus
- C. E1
- D. Personal
- E. F1

Answer: ([SHOW ANSWER](#))

### NEW QUESTION: 52

You are the Microsoft 365 administrator for a company.

You must provide infrastructure recommendations. All proposed solutions must minimize costs.

You need to identify the appropriate cloud model for the given scenarios.

Which cloud models should you use? To answer, drag the appropriate cloud models to the correct requirements. Each cloud model may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Cloud models | Requirement                                                                                     | Cloud model |
|--------------|-------------------------------------------------------------------------------------------------|-------------|
| Private      | Provide an on-demand sandbox environment.                                                       | Cloud model |
| Public       | Provide failover capabilities between resources that you manage and resources in other regions. | Cloud model |
| Hybrid       | Deploy virtual machines that support USB devices.                                               | Cloud model |

Answer:

| Cloud models | Requirement                                                                                     | Cloud model |
|--------------|-------------------------------------------------------------------------------------------------|-------------|
| Private      | Provide an on-demand sandbox environment.                                                       | Public      |
| Public       | Provide failover capabilities between resources that you manage and resources in other regions. | Private     |
| Hybrid       | Deploy virtual machines that support USB devices.                                               | Hybrid      |

**NEW QUESTION: 54**

An organization is considering migrating resources to the cloud. The company does not plan to deploy Microsoft Azure ExpressRoute or site-to-site VPNs.

You need to identify which workloads you can migrate to the cloud.

Which workloads you can migrate to the cloud? To answer, drag the appropriate actions to the correct workloads. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Actions                                           | Workload                                                                                 | Action                              |
|---------------------------------------------------|------------------------------------------------------------------------------------------|-------------------------------------|
| <input type="text" value="Migrate to the cloud"/> | You have a legacy application that requires connectivity with an on-premises data store. | <input type="text" value="Action"/> |
| <input type="text" value="Remain on-premises"/>   | You need to deploy an external-facing website.                                           | <input type="text" value="Action"/> |
|                                                   | You need to deploy a Microsoft SharePoint collaboration site for partners.               | <input type="text" value="Action"/> |

Answer:

| Actions                                           | Workload                                                                                 | Action                                            |
|---------------------------------------------------|------------------------------------------------------------------------------------------|---------------------------------------------------|
| <input type="text" value="Migrate to the cloud"/> | You have a legacy application that requires connectivity with an on-premises data store. | <input type="text" value="Remain on-premises"/>   |
| <input type="text" value="Remain on-premises"/>   | You need to deploy an external-facing website.                                           | <input type="text" value="Migrate to the cloud"/> |
|                                                   | You need to deploy a Microsoft SharePoint collaboration site for partners.               | <input type="text" value="Migrate to the cloud"/> |

#### NEW QUESTION: 55

A company uses Microsoft 365.

The company is considering using MyAnalytics.

You need to identify the features of MyAnalytics.

What are two features of MyAnalytics? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. suggestions in Microsoft Outlook to review outstanding tasks
- B. suggestions in Microsoft Teams to delay delivery of chat messages
- C. suggestions in Microsoft Outlook to delay delivery of emails
- D. suggestions in Teams to review outstanding tasks

Answer: A,C ([LEAVE A REPLY](#))

#### NEW QUESTION: 56

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statement                                                                                                      | Yes                   | No                    |
|----------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| The Microsoft 365 user portal allows users to install desktop apps, use web apps, and share files in OneDrive. | <input type="radio"/> | <input type="radio"/> |
| The Microsoft 365 admin center allows administrators to manage applications and services available to users.   | <input type="radio"/> | <input type="radio"/> |

Answer:

| Statement                                                                                                      | Yes                              | No                    |
|----------------------------------------------------------------------------------------------------------------|----------------------------------|-----------------------|
| The Microsoft 365 user portal allows users to install desktop apps, use web apps, and share files in OneDrive. | <input checked="" type="radio"/> | <input type="radio"/> |
| The Microsoft 365 admin center allows administrators to manage applications and services available to users.   | <input checked="" type="radio"/> | <input type="radio"/> |

#### NEW QUESTION: 57

A company has Microsoft Surface devices that run Windows 10. The company plans to deploy devices by using Windows AutoPilot.

You need to import a CSV file to ensure that the devices are ready for deployment.

In the Microsoft 365 Device Management portal, which two blades should you use? To answer, select the appropriate options in the dialog box in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Reference:

<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

#### NEW QUESTION: 58

You are the Microsoft 365 administrator for a company that uses only on-premises resources. The company does not have a private cloud.

You need to deploy cloud-based resources for the company that minimizes costs.

Which cloud models should you use? To answer, drag the appropriate cloud models to the correct requirements. Each cloud model may be used one, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Cloud models                     | Requirement                                                                                           | Cloud model          |
|----------------------------------|-------------------------------------------------------------------------------------------------------|----------------------|
| <input type="checkbox"/> Private | Provide an on-demand sandbox environment.                                                             | <input type="text"/> |
| <input type="checkbox"/> Public  | Provide failover capabilities between local resources that you manage and resources in other regions. | <input type="text"/> |
| <input type="checkbox"/> Hybrid  | Deploy virtual machines that use proprietary peripheral devices.                                      | <input type="text"/> |

Answer:

| Cloud models | Requirement                                                                                           | Cloud model |
|--------------|-------------------------------------------------------------------------------------------------------|-------------|
| Private      | Provide an on-demand sandbox environment.                                                             | Public      |
| Public       | Provide failover capabilities between local resources that you manage and resources in other regions. | Hybrid      |
| Hybrid       | Deploy virtual machines that use proprietary peripheral devices.                                      | Private     |

#### NEW QUESTION: 59

A company is evaluating Microsoft cloud service offerings.

Match each offering to the cloud service.

Instructions: To answer, drag the appropriate offering from the column on the left to the cloud service on the right. Each offering might be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

| Offerings                          | Answer Area                                                                                                                                                                                                                                                                                              |               |          |                                    |  |                              |  |                              |  |

### NEW QUESTION: 61

You are a Microsoft 365 administrator for a company. The company implements federated authentication and Azure AD Connect.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statement                                                           | Yes                   | No                    |
|---------------------------------------------------------------------|-----------------------|-----------------------|
| Users have the same passwords in the cloud and on-premises.         | <input type="radio"/> | <input type="radio"/> |
| Users sing in again to access Microsoft 365.                        | <input type="radio"/> | <input type="radio"/> |
| You can configure federated authentication to require a smart card. | <input type="radio"/> | <input type="radio"/> |

Answer:

| Statement                                                           | Yes                              | No                               |
|---------------------------------------------------------------------|----------------------------------|----------------------------------|
| Users have the same passwords in the cloud and on-premises.         | <input checked="" type="radio"/> | <input type="radio"/>            |
| Users sing in again to access Microsoft 365.                        | <input type="radio"/>            | <input checked="" type="radio"/> |
| You can configure federated authentication to require a smart card. | <input checked="" type="radio"/> | <input type="radio"/>            |

#### NEW QUESTION: 62

Your company has a Microsoft 365 subscription.

You need to implement security policies to ensure that sensitive data is protected.

Which tools should you use? To answer, drag the appropriate tools to the correct scenarios. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Tools                                | Scenario                                                                   |      |
|--------------------------------------|----------------------------------------------------------------------------|------|
| Compliance Manager                   | Use the Microsoft Authenticator app to enable multi-factor authentication. | Tool |
| Identity and access management (IAM) | Classify documents to restrict permission to content.                      | Tool |
| Information rights management (IRM)  | Use a dashboard for data-protection recommendations.                       | Tool |
|                                      | Provide auditors and regulators with reports on data-protection status.    | Tool |

Answer:

| Tools                                | Scenario                                                                   |                                     |
|--------------------------------------|----------------------------------------------------------------------------|-------------------------------------|
| Compliance Manager                   | Use the Microsoft Authenticator app to enable multi-factor authentication. | Information rights management (IRM) |
| Identity and access management (IAM) | Classify documents to restrict permission to content.                      | Information rights management (IRM) |
| Information rights management (IRM)  | Use a dashboard for data-protection recommendations.                       | Compliance Manager                  |
|                                      | Provide auditors and regulators with reports on data-protection status.    | Compliance Manager                  |

#### NEW QUESTION: 70

Your organization plans to deploy Microsoft 365 in a hybrid scenario.

You need to ensure that employees can use a smart card for authentication.

Which hybrid identity solution should you implement?

- A. password hash synchronization with single sign on
- B. Active Directory federation Services (AD FS)
- C. Ping federate and federation integration
- D. pass-through authentication and single sign-on

Answer: B ([LEAVE A REPLY](#))

Reference:

<https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn>

#### NEW QUESTION: 71

You are the network administrator of a company.

The Microsoft 365 tenant contains sensitive information. Employees must verify their identities when they sign into Microsoft 365 by providing information in addition to their Azure AD password.

You need to select the tools that employees can use to verify their identities.

Which two tools should you select? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Customer Lockbox for Office 365
- B. Microsoft Security Center
- C. Windows Hello for Business
- D. Microsoft Authenticator

Answer: ([SHOW ANSWER](#))

Two-step authentication can be implemented by using Windows Hello for Business or Microsoft Authenticator.

Reference:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-manage-in-organization>

<https://support.microsoft.com/en-us/help/4026727/microsoft-account-how-to-use-the-microsoft-authenticator-app>

#### NEW QUESTION: 72

A company has offices in multiple regions. The company has a Microsoft 365 subscription.

The company is developing a line-of-business (LOB) app. The app must meet the following requirements.

- \* Ensure availability regardless of an employee's location.
- \* Track the devices on which the app is installed by using Microsoft cloud services.
- \* Minimize costs.

What should you do?

- A. Copy the app to Microsoft OneDrive. Allow employees to download and install the app from One Drive.
- B. Deploy the app to all devices by using Microsoft Intune.
- C. Copy the app to local servers. Allow employees to download and install the app from the servers.
- D. Deploy the app to all devices by using group policy.

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 73

A company is evaluating threat protection in Microsoft 365.

instructions: For each of the following statements, select Yes if the statement is true Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Answer Area                                                                                  |                                             |
|----------------------------------------------------------------------------------------------|---------------------------------------------|
| Statements                                                                                   | Yes No                                      |
| Microsoft 365 Defender for Endpoint can block malware on Windows 10 devices.                 | <input type="radio"/> <input type="radio"/> |
| Microsoft 365 Defender for Office 365 is a solution that can detect malicious emails.        | <input type="radio"/> <input type="radio"/> |
| Microsoft 365 Defender for Endpoint requires a separate installation for Windows 10 devices. | <input type="radio"/> <input type="radio"/> |

Answer:

Answer Area

Microsoft

Statements

|                                                                                              | Yes                              | No                    |
|----------------------------------------------------------------------------------------------|----------------------------------|-----------------------|
| Microsoft 365 Defender for Endpoint can block malware on Windows 10 devices.                 | <input checked="" type="radio"/> | <input type="radio"/> |
| Microsoft 365 Defender for Office 365 is a solution that can detect malicious emails.        | <input checked="" type="radio"/> | <input type="radio"/> |
| Microsoft 365 Defender for Endpoint requires a separate installation for Windows 10 devices. | <input checked="" type="radio"/> | <input type="radio"/> |

#### NEW QUESTION: 74

You are the Microsoft 365 administrator for a company.

Your company wants to learn more about what happens if the availability of the Microsoft Office 365 services are not met.

Where can you find this information?

- A. Service Level agreement
- B. Microsoft Services agreement
- C. Microsoft Cloud agreement
- D. Microsoft Products and Services agreement
- E. Microsoft Enterprise agreement

**Answer:** (SHOW ANSWER)

Reference:

<https://docs.microsoft.com/en-us/office365/servicedescriptions/office-365-platform-service-description/service-level-agreement>

#### NEW QUESTION: 75

A company deploys Microsoft 365.

The company plans to use sensitivity labels.

You need to identify the capabilities of sensitivity labels.

What are three capabilities of sensitivity labels? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Sensitivity labels can be customized.
- B. Sensitivity labels can ensure that a document is retained indefinitely.
- C. Sensitivity labels can trigger disposition reviews.
- D. Sensitivity labels can be used to encrypt documents.
- E. Sensitivity labels can automatically be applied to documents.

**Answer:** A,D,E (LEAVE A REPLY)

With sensitivity labels you can classify and help protect your sensitive content. Protection options include labels, watermarks, and encryption.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/sensitivity-labels?view=o365-worldwide>

#### NEW QUESTION: 76

A company has Microsoft 365 and uses Microsoft Endpoint Manager.

You need to identify the endpoint management tool associated with each action.

Which tool should you identify for each action? To answer, drag the appropriate tools to the correct actions. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Tools                 | Requirement                                        | Tool |
|-----------------------|----------------------------------------------------|------|
| Software Center       | Manage employees' personal devices from the cloud. |      |
| Configuration Manager | Manage power settings for on-premises servers.     |      |
| Microsoft Intune      |                                                    |      |
| Autopilot             |                                                    |      |

Answer:

| Tools                 | Requirement                                        | Tool                  |
|-----------------------|----------------------------------------------------|-----------------------|
| Software Center       | Manage employees' personal devices from the cloud. | Microsoft Intune      |
| Configuration Manager | Manage power settings for on-premises servers.     | Configuration Manager |
| Microsoft Intune      |                                                    |                       |
| Autopilot             |                                                    |                       |

#### NEW QUESTION: 77

A company is evaluating Microsoft 365.

You need to describe Microsoft 365 security principles.

Select the answer that correctly completes the sentence.

Answer:

NEW QUESTION: 78

A company plans to deploy Microsoft 365.  
You need to identify differences between the features in Exchange Online and Exchange Server.  
Match the appropriate features to the corresponding supported environments. To answer, drag the appropriate environments to the correct features. Each environment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Answer area

Supported environments

Exchange Server only

Exchange Online only

Exchange Server and Exchange Online

Feature

Exchange Web Services (EWS) access to accounts

Custom EWS throttling settings

Information rights management, archiving, and legal holds

Supported environments

Supported environment

Supported environment

Supported environment

Answer:

| Answer area                         |                                                           |                                     |
|-------------------------------------|-----------------------------------------------------------|-------------------------------------|
| Supported environments              | Feature                                                   | Supported environments              |
| Exchange Server only                | Exchange Web Services (EWS) access to accounts            | Exchange Server and Exchange Online |
| Exchange Online only                | Custom EWS throttling settings                            | Exchange Server only                |

#### NEW QUESTION: 79

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Answer Area                                                                                                           |  |                       |                       |
|-----------------------------------------------------------------------------------------------------------------------|--|-----------------------|-----------------------|
| Statements                                                                                                            |  | Yes                   | No                    |
| Conditional access policies allow you to require multi-factor authentication for Microsoft Azure management tasks.    |  | <input type="radio"/> | <input type="radio"/> |
| Conditional access policies allow you to require multi-factor authentication for users who have administrative roles. |  | <input type="radio"/> | <input type="radio"/> |
| Configuration of app specific settings require devices to be managed by an organization.                              |  | <input type="radio"/> | <input type="radio"/> |

Answer:

| Answer Area                                                                                                           |  |                                  |                       |
|-----------------------------------------------------------------------------------------------------------------------|--|----------------------------------|-----------------------|
| Statements                                                                                                            |  | Yes                              | No                    |
| Conditional access policies allow you to require multi-factor authentication for Microsoft Azure management tasks.    |  | <input checked="" type="radio"/> | <input type="radio"/> |
| Conditional access policies allow you to require multi-factor authentication for users who have administrative roles. |  | <input checked="" type="radio"/> | <input type="radio"/> |
| Configuration of app specific settings require devices to be managed by an organization.                              |  | <input checked="" type="radio"/> | <input type="radio"/> |

#### NEW QUESTION: 80

A company is evaluating Microsoft 365 Apps.

The company needs to track all travel reservations and itineraries for its team members by project in a single file. Each project must have its own tab.

You need to recommend the correct solution for the company.

Which solution should you recommend?

- A. Microsoft Publisher
- B. Microsoft Word
- C. Microsoft Access
- D. Microsoft OneDrive
- E. Microsoft OneNote

Answer: A ([LEAVE A REPLY](#))

#### NEW QUESTION: 81

An organization plans to deploy Microsoft Intune.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statement                                                                                             | Yes                   | No                    |
|-------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Data protection can be selectively applied to applications.                                           | <input type="radio"/> | <input type="radio"/> |
| Microsoft Intune can define where corporate data is stored.                                           | <input type="radio"/> | <input type="radio"/> |
| Once a device is registered with Microsoft Intune, device wipe will include the user's personal data. | <input type="radio"/> | <input type="radio"/> |

Answer:

| Statement                                                                                             | Yes                              | No                               |
|-------------------------------------------------------------------------------------------------------|----------------------------------|----------------------------------|
| Data protection can be selectively applied to applications.                                           | <input checked="" type="radio"/> | <input type="radio"/>            |
| Microsoft Intune can define where corporate data is stored.                                           | <input checked="" type="radio"/> | <input type="radio"/>            |
| Once a device is registered with Microsoft Intune, device wipe will include the user's personal data. | <input type="radio"/>            | <input checked="" type="radio"/> |

#### NEW QUESTION: 82

A company plans to adopt Microsoft cloud solutions.

You need to identify which platform is appropriate for each solution component.

Which platform should you select? To answer, drag the appropriate platforms to the correct solution components. Each platform may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Platforms

Dynamics 365

Microsoft Azure

Answer Area

Solution component

Microsoft-developed customer relationship management (CRM) application

Windows virtual machine

Microsoft-developed enterprise resource planning (ERP) application

Platform

Platform

Platform

Answer:

Platforms

Dynamics 365

Microsoft Azure

Answer Area

Solution component

Microsoft-developed customer relationship management (CRM) application

Windows virtual machine

Microsoft-developed enterprise resource planning (ERP) application

Platform

Dynamics 365

Microsoft Azure

Dynamics 365

NEW QUESTION: 83

A company is migrating to Microsoft 365.

You need to recommend solutions for the company.

Which Microsoft 365 Apps apps should you use? To answer, drag the appropriate apps to the correct features. Each app may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Apps

Microsoft Excel

Microsoft OneNote

Microsoft PowerPoint

Microsoft Word

Answer Area

Feature

Provides a service to help you find and incorporate reliable sources and content with automatic bibliography updates.

Provides a service that uses machine learning and natural language processing for advanced proofing and editing.

Provides a service that matches content in a slide to professionally designed layout recommendations.

App

App

App

Answer:

Apps

Microsoft Excel

Microsoft OneNote

Microsoft PowerPoint

Microsoft Word

Answer Area

Feature

Provides a service to help you find and incorporate reliable sources and content with automatic bibliography updates.

Provides a service that uses machine learning and natural language processing for advanced proofing and editing.

Provides a service that matches content in a slide to professionally designed layout recommendations.

App

NEW QUESTION: 84

A company is evaluating Microsoft 365.

You need to identify the features of Microsoft Stream.

What are three features of Microsoft Stream? Each correct answer presents part of the solution.

Each correct selection is worth one point.

**A.** Video files can be accessed from Microsoft Teams.

**B.** Video files are stored in Yammer.

**C.** Video files are stored in SharePoint Online.

**D.** Video files can be accessed from Yammer.

**E.** Video files are stored in Exchange Online.

**Answer:** ([SHOW ANSWER](#))

#### NEW QUESTION: 85

A company purchases Microsoft 365 E5.

You need to determine which security features you should implement.

Which features should you implement? To answer, drag the appropriate features to the correct scenarios. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Answer Area                                     | Scenario                                                                                                                 | Feature |
|-------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|---------|
| <b>Features</b>                                 |                                                                                                                          |         |
| Microsoft Office 365 Secure Score               | Provide recommendations to reduce risk.                                                                                  |         |
| Customer Lockbox                                | Control how a Microsoft support engineer accesses data during a help session.                                            |         |
| Microsoft Office 365 Advanced Threat Protection | Protect against unknown malware viruses, and malicious URLs.                                                             |         |
| Data Loss Prevention                            | Identify sensitive data and create policies that help prevent users from accidentally or intentionally sharing the data. |         |

**Answer:**

**Answer Area**

| Features                                        | Scenario                                                                                                                 | Feature                                         |
|-------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| Microsoft Office 365 Secure Score               | Provide recommendations to reduce risk.                                                                                  | Microsoft Office 365 Secure Score               |
| Customer Lockbox                                | Control how a Microsoft support engineer accesses data during a help session.                                            | Customer Lockbox                                |
| Microsoft Office 365 Advanced Threat Protection | Protect against unknown malware viruses, and malicious URLs.                                                             | Microsoft Office 365 Advanced Threat Protection |
| Data Loss Prevention                            | Identify sensitive data and create policies that help prevent users from accidentally or intentionally sharing the data. | Data Loss Prevention                            |

#### NEW QUESTION: 86

An organization plans to deploy Microsoft Office to all employees.

You need to select the appropriate Office plans and minimize costs.

Which Office plans should you use? To answer, drag the appropriate Office plans to the correct options. Each Office plan may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Office plans       | Option                           | Office plan |
|--------------------|----------------------------------|-------------|
| Office 365 ProPlus | Install updates and new features |             |
| Office Standard    | Install on more than one device  |             |

Answer:

| Office plans       | Option                           | Office plan        |
|--------------------|----------------------------------|--------------------|
| Office 365 ProPlus | Install updates and new features | Office 365 ProPlus |
| Office Standard    | Install on more than one device. | Office 365 ProPlus |

#### NEW QUESTION: 93

You need to configure a data governance solution for your company. The solution must meet the following requirements:

Classify documents

Ensure that classifications are enforced

Delete documents that are no longer used

Which actions should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Requirement                               | Action                                                                                                                                                            |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Classify documents                        | <div>▼</div> <div>Publish labels.</div> <div>Define file and folder structures.</div> <div>Apply Microsoft SharePoint permissions.</div>                          |
| Ensure that classifications are enforced. | <div>▼</div> <div>Apply supervision policies.</div> <div>Configure document approval</div> <div>Configure Microsoft Outlook Mail Tips.</div>                      |
| Delete documents that are no longer used. | <div>▼</div> <div>Apply retention policies.</div> <div>Apply preservation policies.</div> <div>Configure the Microsoft SharePoint second-stage recycle bin.</div> |

Answer:

| Requirement                               | Action                                                                                                                                                            |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Classify documents                        | <div>▼</div> <div>Publish labels.</div> <div>Define file and folder structures.</div> <div>Apply Microsoft SharePoint permissions.</div>                          |

#### NEW QUESTION: 94

A company plans to deploy Microsoft 365.

Match each collaboration solution to its description. To answer, drag the appropriate collaboration solution from the column on the left to its description on the right. Each collaboration solution may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

**Collaboration Solutions**

- Microsoft Forms
- Microsoft Planner
- Azure AD Premium P2
- Microsoft Delve

**Answer Area**

**Description**

Create online surveys and polls and track the responses in real time.  
Create, assign, and track tasks and work items.

**Collaboration Solution**

- Microsoft Forms
- Microsoft Planner

**Answer:**

**Collaboration Solutions**

- Microsoft Forms
- Microsoft Planner
- Azure AD Premium P2
- Microsoft Delve

**Answer Area**

**Description**

Create online surveys and polls and track the responses in real time.  
Create, assign, and track tasks and work items.

**Collaboration Solution**

- Microsoft Forms
- Microsoft Planner

#### NEW QUESTION: 95

You need to ensure that all users in your tenant have access to the earliest release of updates in Microsoft 365. You set the organizational release preference to Standard release. Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. Targeted release for entire organization
- B. No change is needed
- C. Targeted release for select users
- D. First release

**Answer: A (LEAVE A REPLY)**

Standard release is the default setting. It implements updates on final release rather than early release.

First release is now called Targeted release. Targeted release is the early release of updates for early feedback. You can choose to have individuals or the entire organization receive updates early.

<https://docs.microsoft.com/en-us/office365/admin/manage/release-options-in-office-365?view=o365-worldwide>

#### NEW QUESTION: 96

A company is developing their Windows as a service (WaaS) strategy. The Company wants to roll out the most recently released Windows updates to specific devices before billing them out to other devices.

You need to recommend correct feature to meet the requirements.

Which feature should you recommend?

- A. Group Policies
- B. Servicing stack updates
- C. Insider Preview builds
- D. Deployment rings
- E. Servicing channels

**Answer: D (LEAVE A REPLY)**

#### NEW QUESTION: 97

A company plans to deploy collaboration tools for employees. The company does not plan to deploy a hybrid environment. You need to identify the features that are available in Teams and Skype for Business Server.

Match each environment to its feature. To answer, drag the appropriate environment from the column on the left to the features on the right. Each environment may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

**Environments**

- Teams only
- Skype for Business Server only
- Teams and Skype for Business Server

**Environment**

- Centralized archiving
- Broadcast meetings
- Federated meetings

Answer:

**Environments**

- Teams only
- Skype for Business Server only
- Teams and Skype for Business Server

**Environment**

- Centralized archiving
- Broadcast meetings
- Federated meetings

Answer:

<https://lucavitali.wordpress.com/2017/10/01/sfb-teams-features-comparison-table/>

#### NEW QUESTION: 98

A company plans to migrate to Microsoft 365. Corporate devices run Windows 7 or Windows 10. You must upgrade all devices to use Office 365 ProPlus and minimize costs.

You need to standardize corporate device deployments.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Upgrade all devices to Windows 10
- B. Implement Windows AutoPilot
- C. Deploy policies by using Configuration Manager
- D. Instruct users to download and install a Windows Installer package for Office 365 ProPlus
- E. Deploy policies by using Microsoft Intune

Answer: A,B,E ([LEAVE A REPLY](#))

#### NEW QUESTION: 99

A company plans to migrate on-premises infrastructure to the cloud.

What are three benefits of migrating to the cloud? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Reduce configuration requirements on desktop computers.
- B. Reduce on-site network latency.
- C. Automate data backup and disaster recovery.
- D. Scale and extend applications.
- E. Eliminate the cost of buying server hardware.

Answer: C,D,E ([LEAVE A REPLY](#))

C: Most cloud providers help to improve business continuity by offering built-in, one-click backup and recovery capabilities. Some providers also offer the ability to store backups in different geographic regions.

D: When demand spikes or the organization needs more powerful compute resources, organizations can alter their resources instantly on demand.

E: There are significant savings in resource, maintenance, and real estate costs, in addition to the ability to optimize workloads so that they cost less to run.

#### NEW QUESTION: 101

You are the Microsoft 365 administrator for a company. The company supports an aggressive rollout of features.

You need to release features as soon as they are released.

Which feature phase should you use for each development step? To answer, drag the appropriate feature phases to the correct development steps. Each feature phase may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

| Feature Phases       | Development step                                    | Feature phase |
|----------------------|-----------------------------------------------------|---------------|
| Private              | Complete compliance testing.                        | Feature phase |
| Public Preview       | Complete QA testing for recently released features. | Feature phase |
| General Availability | Prepare QA results and end-user documentation.      | Feature phase |

Answer:

| Feature Phases       | Development step                                    | Feature phase        |
|----------------------|-----------------------------------------------------|----------------------|
| Private              | Complete compliance testing.                        | Private              |
| Public Preview       | Complete QA testing for recently released features. | Public Preview       |
| General Availability | Prepare QA results and end-user documentation.      | General Availability |

#### NEW QUESTION: 102

A company deploys Microsoft 365.

You must implement conditional access to restrict access to administrative accounts when users authenticate from specific locations.

You need to select the lowest cost license that meets the requirement.

Which license should you choose?

- A. Azure Active Directory Premium P1
- B. Azure Active Directory Premium P2
- C. Azure Active Directory Free
- D. Azure Active Directory B2B

**Answer: A (LEAVE A REPLY)**

Conditional access policies require an Azure AD Premium P1 license.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/overview#license-requirements>

### NEW QUESTION: 103

You are the Microsoft 365 administrator for a company. The company plans to upgrade client operating systems to Windows 10.

You need to explain the concepts of Windows as a Service (WaaS) to the management team.

Match each term to its definition. To answer, drag the appropriate terms from the column on the left to its definitions on the right. Each term may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

| Terms                    | Definition                                                                                     | Term |
|--------------------------|------------------------------------------------------------------------------------------------|------|
| Windows Insider previews | Early build that are released to the public during the feature-development phase               |      |
| Servicing channels       | A method for controlling the frequency at which organizations deploy Windows 10 features       |      |
| Deployment rings         | A method of gradually deploying Windows 10 features by using multiple sets of targeted devices |      |

**Answer:**

| Terms                    | Definition                                                                                     | Term                     |
|--------------------------|------------------------------------------------------------------------------------------------|--------------------------|
| Windows Insider previews | Early build that are released to the public during the feature-development phase               | Windows Insider previews |
| Servicing channels       | A method for controlling the frequency at which organizations deploy Windows 10 features       | Servicing channels       |
| Deployment rings         | A method of gradually deploying Windows 10 features by using multiple sets of targeted devices | Deployment rings         |

### NEW QUESTION: 104

A company uses Microsoft 365.

The company wants to improve their compliance score based on Microsoft recommendations.

You need to identify the task that has the largest impact to the compliance score.

Which task should you choose?

- A. Detective discretionary
- B. Corrective discretionary
- C. Preventative mandatory
- D. Corrective mandatory

Answer: C ([LEAVE A REPLY](#))

#### NEW QUESTION: 105

A company is migrating to Microsoft 365.

The company is reviewing the billing account options in Microsoft 365.

You need to recommend a billing account options. Which billing account type should you recommend?

**Billing accounts**

- Microsoft Online Services program
- Microsoft Products & Services Agreement (MPSA) program
- Microsoft Customer Agreement
- Microsoft Cloud Solution Provider (CSP) program

**Answer Area**

**Scenario**

Billing account is created when an individual signs up for a Microsoft 365 subscription directly.

Billing account is created when a company signs a volume licensing agreement to purchase software and online services.

**Billing account**

Billing account

Billing account

Answer:

**Billing accounts**

- Microsoft Online Services program
- Microsoft Products & Services Agreement (MPSA) program
- Microsoft Customer Agreement
- Microsoft Cloud Solution Provider (CSP) program

**Answer Area**

**Scenario**

Billing account is created when an individual signs up for a Microsoft 365 subscription directly.

Billing account is created when a company signs a volume licensing agreement to purchase software and online services.

**Billing account**

Microsoft Customer Agreement

Microsoft Products & Services Agreement (MPSA) program

#### NEW QUESTION: 106

You are the Microsoft 365 administrator for a company.

You install Microsoft Office 365 ProPlus on five devices. You deactivate the Microsoft Office 365 ProPlus license on one device.

Which task can you perform on that device?

- A. Start a new document from a template
- B. Create a document
- C. Co-author a document
- D. View a document

Answer: D (LEAVE A REPLY)

When you deactivate a Microsoft Office 365 ProPlus license, Office 365 ProPlus remains installed on the computer, but you can only view and print documents. All features for editing or creating new documents are disabled.

Note:

There are several versions of this question in the exam. The question has two possible correct answers:

View a document

Print a document

Other incorrect answer options you may see on the exam include the following:

Leave a comment in a document.

Start a new document from a template.

Set properties on a document.

Create a document

Edit a document

Co-author a document

Edit a column

NEW QUESTION: 107

A furniture distribution company uses Microsoft 365.

The company would like to optimize employee interaction In Microsoft Teams company wide You need to determine a solution.

**Solutions**

Customer insights

Viva Insights

Engagement insights

Supply Chain insights

**Answer Area**

| Requirement                                                                                                                                                          | Solution |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Determine the number of meetings in which an individual joined on time and refrained from multitasking during the meeting.                                           |          |
| Empower business leaders to address critical questions about the supply chain operations and boost employee engagement through the Outcomes page in Microsoft Teams. |          |

Answer:

**Solutions**

- Customer insights
- Viva Insights
- Engagement insights
- Supply Chain insights

**Requirement**

Determine the number of meetings in which an individual joined on time and refrained from multitasking during the meeting.

Empower business leaders to address critical questions about the supply chain operations and boost employee engagement through the Outcomes page in Microsoft Teams.

**Solution**

- Viva Insights
- Engagement insights

#### NEW QUESTION: 108

A company is a Microsoft 365 reseller. The company does not provide managed services or direct customer support. You need to provide licenses for customers and earn commissions for each license sold. What should you do?

- A. Buy licenses for customers by using the Microsoft admin portal
- B. Sign up as a Cloud Solution Provider direct reseller.
- C. Sign up as a Cloud Solution Provider indirect reseller.
- D. Buy licenses for customers from a Microsoft authorized distributor.

**Answer: D (LEAVE A REPLY)**

<https://docs.microsoft.com/en-us/partner-center/indirect-reseller-tasks-in-partner-center>:

"As an indirect reseller in CSP, you work with indirect providers (also known as distributors) who have a direct relationship with Microsoft and can provide you with customer support and billing.

Working with indirect providers means you don't have to start your own. Instead, you can work with an experienced technology provider to help ensure your success. In the provider-reseller (two-tier) model, the provider buys cloud solutions and services from Microsoft. You then resell them to customers."

#### NEW QUESTION: 109

A company is considering migrating to cloud based infrastructure and solutions.

instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer Area**

| Statements                                                                                                                                         | Yes                   | No                    |

| Running Azure Virtual Desktop is an example of a public cloud solution.                                                                            | <input checked="" type="radio"/> | <input type="radio"/>            |

NEW QUESTION: 110

You deploy Enterprise Mobility + Security E5 and assign Microsoft 365 licenses to all employees.

Employees must not be able to share documents or forward emails that contain sensitive information outside the company.

You need to enforce the file sharing restrictions.

What should you do?

- A. Use Microsoft Azure Information Protection to define a label. Associate the label with an Azure Rights Management template that prevents the sharing of files or emails that are marked with the label.
- B. Create a Microsoft SharePoint Online content type named Sensitivity. Apply the content type to other content types in Microsoft 365. Create a Microsoft Azure Rights Management template that prevents the sharing of any content where the Sensitivity column value is set to Sensitive.
- C. Use Microsoft Azure Information Rights Protection to define a label. Associate the label with an Active Directory Rights Management template that prevents the sharing of files or emails that are marked with the label.
- D. Create a label named Sensitive. Apply a Data Layer Protection policy that notifies users when their document contains personally identifiable information (PII).

Answer: A ([LEAVE A REPLY](#))

<https://docs.microsoft.com/en-us/azure/information-protection/what-is-azure-rms>

NEW QUESTION: 111

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statement                                                                                                                                   | Yes                   | No                    |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Compliance Manager performs an assessment against your entire Microsoft 365 environment and evaluates both Microsoft and customer controls. | <input type="radio"/> | <input type="radio"/> |
| Compliance Manager allows you to assign individuals within the organization to be responsible for the control.                              | <input type="radio"/> | <input type="radio"/> |
| Compliance Manager provides the ability to take corrective actions from within the Service Trust portal.                                    | <input type="radio"/> | <input type="radio"/> |

Answer:

| Statement                                                                                                                                   | Yes                              | No                               |
|---------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|----------------------------------|

### NEW QUESTION: 112

You are a Microsoft 365 administrator for a company.

A customer submits a data subject request (DSR) to delete customer information in compliance with General Data Protection Regulation (GDPR). You must place legal holds on related data whenever possible.

You need to respond to the request by searching for the customer's data in various Microsoft 365 tools.

How should you search for the data? To answer, drag the appropriate search methods to the correct Microsoft 365 applications. Each search method may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

| Search methods            | Microsoft 365 application   | Search method |
|---------------------------|-----------------------------|---------------|
| Content Search eDiscovery | Microsoft SharePoint Online |               |
| In the app                | Microsoft Access            |               |
|                           | Microsoft Outlook           |               |
|                           | Microsoft PowerApps         |               |

Answer:

| Search methods            | Microsoft 365 application   | Search method             |
|---------------------------|-----------------------------|---------------------------|
| Content Search eDiscovery | Microsoft SharePoint Online | Content Search eDiscovery |
| In the app                | Microsoft Access            | In the app                |
|                           | Microsoft Outlook           | Content Search eDiscovery |
|                           | Microsoft PowerApps         | In the app                |

**NEW QUESTION: 113**

You are the Microsoft Office 365 administrator for a company.

The company has the following requirements:

Users must be able to use incompatible applications on a Windows 10 device.

Cloud-based applications must use the same credentials as on-premises applications.

Users must be prevented from copying company data from managed applications installed on unmanaged devices.

You need to determine which technologies should be used for each requirement.

Which technologies should be used? To answer, select the appropriate options in the answer area.

| Requirement                                                                                                 | Service                                                                                                                                       |
|-------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| Users must be able to use incompatible applications on a Windows 10 device.                                 | <div>▼</div> <div>Windows Virtual Desktop</div> <div>Azure AD Application Proxy</div> <div>Azure AD Connect</div> <div>Microsoft Intune</div> |
| Cloud-based application must use the same credentials as on-premises applications.                          | <div>▼</div> <div>Windows Virtual Desktop</div> <div>Azure AD Application Proxy</div> <div>Azure AD Connect</div> <div>Microsoft Intune</div> |
| Users must be prevented from copying company data from managed applications installed on unmanaged devices. | <div>▼</div> <div>Windows Virtual Desktop</div> <div>Azure AD Application Proxy</div> <div>Azure AD Connect</div> <div>Microsoft Intune</div> |

**Answer:**

| Requirement                                                                                                 | Service                                                                                                                                       |
|-------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| Users must be able to use incompatible applications on a Windows 10 device.                                 | <div>▼</div> <div>Windows Virtual Desktop</div> <div>Azure AD Application Proxy</div> <div>Azure AD Connect</div> <div>Microsoft Intune</div> |
| Cloud-based application must use the same credentials as on-premises applications.                          | <div>▼</div> <div>Windows Virtual Desktop</div> <div>Azure AD Application Proxy</div> <div>Azure AD Connect</div> <div>Microsoft Intune</div> |

<https://docs.microsoft.com/en-us/intune/what-is-intune>

#### NEW QUESTION: 114

A company uses Microsoft cloud services.

You need to change the update channels for the Microsoft 365 Apps for enterprise by using a Microsoft supported method.

Which two methods can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Windows 10 Update Assistant
- B. Group Policy
- C. Client app
- D. Office Deployment Tool
- E. Readiness Toolkit

**Answer: B,D (LEAVE A REPLY)**

After deploying Microsoft 365 Apps, you can change the update channel with Group Policy or the Office Deployment Tool (ODT).

Reference:

<https://docs.microsoft.com/en-us/deployoffice/change-update-channels>

#### NEW QUESTION: 115

A company uses Microsoft 365.

The company requires that you implement least privileged access.

You need to recommend solutions that meet the requirements.

Which two solutions should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Device compliance
- B. Just-in-time (JIT) access
- C. Privileged Access Workstations (PAW) devices
- D. IP address range restrictions

**Answer:** ([SHOW ANSWER](#))

#### NEW QUESTION: 116

You are a Microsoft 365 administrator for a company.

You need to identify security vulnerabilities by using the Office 365 Attack Simulator.

Which three attack simulations are available? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Brute-force password
- B. Cross-site scripting
- C. Password-spray
- D. Denial-of-service
- E. Display name spear-phishing

**Answer:** ([SHOW ANSWER](#))

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/attack-simulator>

#### NEW QUESTION: 117

You are a Microsoft 365 administrator for a company.

You need to ensure that company documents are marked as confidential. You must prevent employees from sharing documents with people outside the company.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Validate outbound emails by using DomainKeys identified Mail (DKIM)
- B. Create sensitive information types
- C. Configure Secure/Multipurpose Internet Mail Extensions (S/MIME) settings for Outlook
- D. Create a data-loss prevention policy
- E. Apply sensitivity labels to documents

**Answer:** B,E ([LEAVE A REPLY](#))

B: Sensitive information types can also be used with the Azure Information Protection scanner to classify and protect files on premises. Sensitive information types define how the automated process recognizes specific information types such as health service numbers and credit card numbers.

E: With sensitivity labels you can classify and help protect your sensitive content. Protection options include labels, watermarks, and encryption.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/protect-information>

#### NEW QUESTION: 118

A company uses Microsoft 365.

The company has the following requirements:

Team 1 users need to use web-based email and calendaring.

Team 2 users need to use email and calendaring. They also need to hold telephone calls with clients and host online meetings.

Team 3 users need access to tools that provide task and shift management Licensing costs need to be minimized.

Match each license to the appropriate users. To answer, drag the appropriate license from the column on the left to its appropriate user on the right. Each license may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

**Licenses**

Microsoft 365 E3  
Microsoft 365 E5  
Microsoft 365 F3

**Answer Area**

User

Team1  
Team2  
Team3

**License**

Answer:

**Licenses**

Microsoft 365 E3  
Microsoft 365 E5  
Microsoft 365 F3

**Answer Area**

User
