NEW QUESTION: 1

You design a Power Platform solution for a customer. The solution uses Microsoft Dataverse as the data store. You are managing the go-live process for the solution. The customer reports the following performance issues:

- * Form load time is much slower than it was during testing.
- * Overall system performance has been significantly slower that it was during testing.

You need to recommend how to troubleshoot system performance. Which actions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Performance issue	Action
Slow form load times	▼ Review workflows associated with the form events. Review QuickFind properties for the fields on the form. Review the fields that are on the form.
Overall slow system performance	▼ Change all security roles from global read permissions to business unit permissions. Review one to many relationships to verify whether cascade settings are necessary. Change security roles from global read access to business unit to provide better performance.

Answer:

Performance issue	Action
Slow form load times	- Review workflows associated with the form events. - Review QuickFind properties for the fields on the form. - Review the fields that are on the form.
Overall slow system performance	- Change all security roles from global read permissions to business unit permissions. - Review one to many relationships to verify whether cascade settings are necessary. - Change security roles from global read access to business unit to provide better performance.

Explanation:

Performance issue	Action
Slow form load times	- Review workflows associated with the form events. - Review QuickFind properties for the fields on the form. - Review the fields that are on the form.
Overall slow system performance	- Change all security roles from global read permissions to business unit permissions. - Review one to many relationships to verify whether cascade settings are necessary. - Change security roles from global read access to business unit to provide better performance.

Box 1: Review the fields that are on the form

Keep the number of table columns (fields) to a minimum.

The more table columns (formerly referred to as fields) you have in a form, the more data that needs to be downloaded to view each record.

Box 2: Review one to many relationships to verify whether cascade settings are necessary.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/optimize-form-performance>

NEW QUESTION: 2

You are designing a Microsoft Power Platform solution.

You need to identify the non- functional requirements for the organization.

Which three non-functional requirements should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. usability of business process flows
- B. customer maintenance procedures
- C. business rules to identify top customers
- D. solution regulatory compliance
- E. time-to-load forms

Answer: B,D,E (LEAVE A REPLY)

Non-functional requirements capture the elements that users might not directly care about but are important to support the proposed architecture and operational viability of the solution. Non-functional requirements often influence user adoption and perceived satisfaction with the solution.

Examples of common non-functional requirement types include:

Availability

Compliance/regulatory

Data retention/residency

Performance (response time, and so on)

Privacy

Recovery time

Security

Scalability

Reference:

<https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements>

NEW QUESTION: 3

You are designing an authentication strategy.

You must provide users multiple primary authentication options for Microsoft Power Platform app sign-in events. You need to select the primary authentication methods.

Which two authentication methods can you use? Each correct answer presents a complete solution. NOTE:

Each correct selection is worth one point.

A. Voice call

B. OATH software tokens

C. Microsoft Authenticator app

D. Windows Hello for Business

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 4

You need to recommend a solution to collect the information required to meet reporting requirements.

What should you recommend?

A. Business process flow

B. Business rule

C. Business event

D. Business process modeler

Answer: ([SHOW ANSWER](#))

Business rule can create business recommendations based on business intelligence.

Scenario: Analytics and reporting

The solution must:

* Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.

* Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).

* Provide a printed quality certificate to be included with each machine.

Reference:

<https://docs.microsoft.com/en-us/learn/modules/define-create-business-rules/>

NEW QUESTION: 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Power Platform application.

Employees report that they are unable to open the application.

You need to ensure that the employees can access the application.

Solution: Add the employees to the user table in the environment.

Does the solution meet the goal?

A. No

B. Yes

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 6

You are designing a Microsoft Power Platform solution to help a company manage sales leads.

The solution has the following requirements:

Ensure that users follow a predefined sales process regardless of the device that employees use to access the app.

Respond to sales events by using organization-defined best practices.

You need to recommend a component for the app.

What should you recommend?

A. Power Automate cloud flow

B. Business process flow

C. Power Automate desktop flow

D. Playbook

Answer: ([SHOW ANSWER](#)**)**

You can help ensure that people enter data consistently and follow the same steps every time they work with a customer by creating a business process flow. For example, you might want to create a business process flow to have everyone handle customer service requests the same way, or to require that people get approval for an invoice before submitting an order. Business process flows use the same underlying technology as other processes, but the capabilities that they provide are very different from other features that use processes.

Reference:

<https://docs.microsoft.com/en-us/power-automate/business-process-flows-overview>

NEW QUESTION: 7

You are designing a Microsoft Power Platform solution.

The solution requires Microsoft Power Platform components and custom coding.

You need to describe the benefits of using Microsoft AppSource.

Which are three benefits of AppSource? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Reduced coding efforts because anyone can publish in AppSource.

B. Free trial before committing to any additional costs.

C. Microsoft Entra ID federated single sign-on (SSO).

- D. Microsoft standardized license agreement and privacy policy.
- E. App uptime of at least 99.9 percent.

Answer: (SHOW ANSWER)

NEW QUESTION: 8

You need to identify which of the data architecture diagrams displayed in the Architecture 1, Architecture 2, and Architecture 3 exhibits is appropriate for the enterprise architecture documentation. (Select the Architecture 1, Architecture 2, and Architecture 3 tabs.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Architecture 1 displays the correct data architecture.	☐	☐
Architecture 2 displays the correct data architecture.	☐	☐
Architecture 3 displays the correct data architecture.	☐	☐

Answer:

Statements	Yes	No
Architecture 1 displays the correct data architecture.	☐	☒
Architecture 2 displays the correct data architecture.	☐	☒
Architecture 3 displays the correct data architecture.	☒	☐

Explanation:

Statements	Yes	No
Architecture 1 displays the correct data architecture.	☐	☒
Architecture 2 displays the correct data architecture.	☐	☒
Architecture 3 displays the correct data architecture.	☒	☐

NEW QUESTION: 9

A company has a Power Platform environment that connects to a third-party marketing application. The company reports that the data in the Power Platform lead table does not match data from the marketing application. Issues include:

- The owner data in the lead table and the third-party application do not match.
- The Topic column has more information than the related record from the marketing application.
- There are differences in how telephone numbers are formatted.

You need to determine which processes are causing the issues.

Which three processes may be causing the differences observed? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Dataflow
- B. Business rule
- C. Classic workflow
- D. Power Automate cloud flow
- E. Duplicate detection rule

Answer: A,B,C (LEAVE A REPLY)

A: With advanced data preparation available in Power Apps, you can create a collection of data called a dataflow, which you can then use to connect with business data from various sources, clean the data, transform it, and then load it to Microsoft Dataverse or your organization's Azure Data Lake Gen2 storage account.

B: By combining conditions and actions, you can do any of the following with business rules:

Set column values

Clear column values

Set column requirement levels

Show or hide columns

Enable or disable columns

Validate data and show error messages

Create business recommendations based on business intelligence.

C: Duplicate detection works by comparing generated match codes of existing records with each new record being created. These match codes are created as each new record is created. Therefore, there is potential for one or more duplicate records to be created if they are processed at the exact same moment. In addition to detecting duplicates as they are created, you should schedule duplicate detection jobs to check for other potential duplicate records.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-create-business-rule>

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-and-use-dataflows>

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/duplicaterule-entities>

NEW QUESTION: 10

A company sells antique books. The company stores data about book locations in an existing system by using the following database fields: Room, Shelf.

The company must import the data from the existing system into a Power Platform solution. Existing data into must be modified to match the design of the new solution.

You need to recommend a solution to combine the room and shelf fields into a single column during the import process.

Which tool should you recommend?

A. Power Platform dataflows

B. Data Import Wizard

C. import from CSV

D. Microsoft Excel Online

Answer: A (LEAVE A REPLY)

Dataverse includes a web application tool called Import Data Wizard. You use this tool to import data records from one or more comma-separated values (.csv), XML Spreadsheet 2003 (.xml), or text files.

Use transformation mapping to modify data before importing it. For example, split a full name that is contained in the source file into a first name and a last name to match the target columns for a table.

Note:

* To implement data import, you typically do the following:

* Create a comma-separated values (CSV), XML Spreadsheet 2003 (XMLSS), or text source file.

* Create a data map or use an existing data map.

* Create a comma-separated values (CSV), XML Spreadsheet 2003 (XMLSS), or text source file.

* Create a data map or use an existing data map.

* Associate an import file with a data map.

* Upload the content from a source file to the associated import file.

* Parse the import file.

* Transform the parsed data.

* Upload the transformed data into the target Dataverse server.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/import-data>

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/add-transformation-mappings-import>

NEW QUESTION: 11

A car dealership has a custom financing table.

You are working with a developer to add a button to a ribbon that displays a hidden section of a form when specific criteria are met.

You need to recommend tools and technologies for the developer

Which two tools or technologies should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point

A. Write a business rule.

B. Write JavaScript code.

C. Use the Ribbon Workbench.

D. Use the form editor.

Answer: B,C (LEAVE A REPLY)

Client-side scripting using JavaScript is one of the ways to apply custom business process logic for displaying data on a form in a model-driven app.

You can use a community tool, Ribbon Workbench, to visually edit ribbons using the UI.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/client-scripting>

<https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/customize-commands-ribbon>

NEW QUESTION: 12

A company plans to implement Microsoft Power Platform to provide data controls. The current implementation is complex and spans multiple environments.

The IT team will implement DLP policies. Members of the team have different security roles applied to their user accounts, depending on their specified level of access.

You need to identify which policies the IT team can apply for the different security roles.

Which policy type should you recommend for each security role? To answer, move the appropriate policy types to the correct security roles. You may use each policy type once, more than once, or not at all.

You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Security role	Policy type
System Administrator	
Power Platform Administrator	
Global Administrator	
Dynamics 365 Administrator	

Answer:

Policy types	Answer Area	Security role	Policy type
Tenant Environment		System Administrator Power Platform Administrator Global Administrator Dynamics 365 Administrator	Environment Tenant Tenant Environment

Explanation:

Policy types	Answer Area	Security role	Policy type
Tenant Environment		System Administrator Power Platform Administrator Global Administrator Dynamics 365 Administrator	Environment Tenant Tenant Environment

NEW QUESTION: 13

You are creating a scope of work document for a solution. You have the following requirements:

- * Track support cases, first response time, and resolution time.
- * Include a chat-like interface that allows managers to check the status of cases with minimal manual searching.
- * Allow cases to have multiple different priority levels.

You need to include the required Dynamics 365 and Microsoft Power Platform components. Which two components should you include? Each correct answer presents part of the solution.

NOT: Each correct selection is worth one point.

- A. Dynamics 365 Customer Service
- B. Power virtual Agents
- C. PowerBI
- D. Dynamics 365 Customer Voice

Answer: (SHOW ANSWER)

Power Virtual Agents lets you create powerful chatbots that can answer questions posed by your customers, other employees, or visitors to your website or service.

Use Dynamics 365 Customer Service to:

Track customer issues through cases

Record all interactions related to a case

Share information in the knowledge base

Create queues and route cases to the right channels

Create and track service levels through service-level agreements (SLAs) Define service terms through entitlements Manage performance and productivity through reports and dashboards Create and schedule services Participate in chats Manage conversations across channels Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/fundamentals-what-is-power-virtual-agents>

<https://docs.microsoft.com/en-us/dynamics365/customer-service/overview>

NEW QUESTION: 14

You are evaluating a solution design.

You need to test the following scenarios:

- # Mimic a user using an app.
- * Obtain formal approval that an app meets customer-provided criteria.
- * Confirmation that an app can manage expected peak loads.

Which test types should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Scenario	Test type
Mimic a user using an app.	Acceptance testing UI testing Acceptance testing Performance testing Load testing
Obtain formal approval that an app meets customer-provided criteria.	Acceptance testing Migration testing Acceptance testing Performance testing UI testing
Confirmation that an app can manage expected peak loads.	Performance testing Unit testing Acceptance testing Performance testing Integration testing

Answer:

Answer Area

Scenario	Test type
Mimic a user using an app.	Acceptance testing UI testing Acceptance testing Performance testing Load testing
Obtain formal approval that an app meets customer-provided criteria.	Acceptance testing Migration testing Acceptance testing Performance testing UI testing
Confirmation that an app can manage expected peak loads.	Performance testing Unit testing Acceptance testing Performance testing Integration testing

Explanation:

Answer Area

Scenario

- Mimic a user using an app.
- Obtain formal approval that an app meets customer-provided criteria.
- Confirmation that an app can manage expected peak loads.

Test type

- Acceptance testing
- Acceptance testing
- Performance testing

NEW QUESTION: 15

A company plans to integrate Microsoft Power Platform with existing systems, including Microsoft Dynamics 365 Omni channel for Customer Service.

You need to recommend a solution for each requirement.

Which components should you recommend for the requirements?

To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Solutions

- Custom API
- Custom pages
- Microsoft Power Virtual Agent

Answer Area

Requirement

- Display information about the contact in the Omnichannel app.
- Ensure only tables needed are exposed for integration purposes.
- Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.

Solution

-
-
-

Answer:

Solutions

- Custom API
- Custom pages
- Microsoft Power Virtual Agent

Answer Area

Requirement

- Display information about the contact in the Omnichannel app.
- Ensure only tables needed are exposed for integration purposes.
- Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.

Solution

- Microsoft Power Virtual Agent

NEW QUESTION: 17

A company uses Dynamics 365 Sales and Power BI.

Sales managers must be able to keep track of changes to their pipeline in the following ways:

- * Notify the sales managers when an Opportunity changes sales stage.
- * Notify the sales managers when the pipeline drops below 2.5M USD.
- * When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

You need to recommend a solution that meets the company requirements.

Which combination of solutions should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Notify the sales manager when an Opportunity changes sales stage.	▼ Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users Microsoft Power Automate, data alerts, and Microsoft Office 365 connector
Notify the sales managers when the pipeline drops below 2.5 USD.	▼ Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector
When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.	▼ Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

Answer:

Notify the sales manager when an Opportunity changes sales stage.

▼	Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
	Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users
	Microsoft Power Automate, data alerts, and Microsoft Office 365 connector

Notify the sales managers when the pipeline drops below 2.5 USD.

▼	Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
	Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector
	Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

▼	Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
	Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users
	Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector
	Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

Explanation:

Notify the sales manager when an Opportunity changes sales stage.

Notify the sales managers when the pipeline drops below 2.5 USD.

When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users
Microsoft Power Automate, data alerts, and Microsoft Office 365 connector

Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector
Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users
Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector
Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

Box 1: Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft 365 Outlook connector Use Microsoft Dataverse as the data source.

While Power Automate is a robust tool with ever-expanding capabilities, it also handles simple tasks with grace. A universal business need for many organizations is the ability to automate email notifications based on certain criteria: an opportunity is won, send an email to the sales manager; a case is closed, send an email to the customer; a work order is completed, send an email to the customer.

Power Automate can easily accommodate this using the Microsoft 365 Outlook connector.

Box 2: Microsoft Power Automate, Power Bi data alerts, and Microsoft 365 connector Data alerts in the Power BI service: Set alerts to notify you when data in your dashboards changes beyond limits you set.

Box 3: Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector Reference:

<https://www.velosio.com/blog/2021/01/27/tracking-emails-the-right-way-with-power-automate/>

<https://docs.microsoft.com/en-us/power-bi/create-reports/service-set-data-alerts>

NEW QUESTION: 18

A legal services organization uses Microsoft SharePoint for case management and documentation. The organization plans to migrate Power Platform and Microsoft Dataverse. Case data is confidential and is disclosed only to the employees assigned to a case.

The organization has the following requirements:

- * Lawyers must manage their assigned legal cases and case documentation in one app.
- * Paralegals must be able see a lawyer's case details only when invited by the case lawyer.
- * Paralegals retain access to the case documentation by using the existing SharePoint permissions.

You need to identify which components will satisfy the requirements without any custom development.

Which components should you use?

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Component
Lawyer app	Microsoft Teams channel app for lawyers only
	Canvas app
	Model-driven app
	Microsoft Teams channel app for lawyers only
	Microsoft Teams channel app shared with lawyers and paralegals
Paralegal app	Canvas app
	Canvas app
	Custom page
	SharePoint app
	Microsoft Teams channel app

Answer:

Answer Area

Lawyer app	Microsoft Teams channel app for lawyers only
Paralegal app	Canvas app

NEW QUESTION: 19

You are designing a Power Platform solution for a company.

Users must be granted access only to data that is relevant to them.
You need to recommend actions to meet the requirements.
Which two recommendations should you make? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Add column security profiles to applicable teams.
- B. Define and configure security roles.
- C. Create teams and assign security roles and users to the teams.
- D. Create business units and assign security roles to the business units.

Answer: (SHOW ANSWER)

To control data access, you must set up an organizational structure that both protects sensitive data and enables collaboration. You do this by setting up business units, security roles, and field security profiles.

Reference:
<https://docs.microsoft.com/en-us/power-platform/admin/security-roles-privileges>

NEW QUESTION: 20

You are a Microsoft Power Platform solution architect capturing requirements for a national retail chain protect. The project has the following requirements

- * Retail employees must use the application on a company- prowled tablet device.
- * The app must store data offline
- * Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity
- * Apps are shared with security group teams for users to access.

You need to identify the project s functional and non-functional requirements.
How should you categorize the requirements? To answer, drag the appropriate categories to the correct requirements. Each category may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

Categories

Functional

Non-functional

Answer Area

Requirement

Retail employees must use the application on a company-provided tablet device.

The app must store data offline.

Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity.

Apps are shared with security group teams for users to access.

NEW QUESTION: 21

A company is implementing Microsoft Power Platform The company deploys a solution by using Azure DevOps application lifecycle management (ALM). Issues are reported after data migration. You need to recommend a resolution for each issue. Which resolutions should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Issue

Account lookup column values in related records are blank.

Power BI dashboard in the model-driven app is not visible to users.

Resolution

Import data in a specific order.
Change column-level security.
Change record ownership to organization.
Modify account privileges for security roles.

Share the Power BI semantic model
Share the Power BI dashboard.
Assign Power BI licenses to users.
Modify reporting privileges for security roles.

Answer:

Answer Area

Issue	Resolution
Account lookup column values in related records are blank.	Import data in a specific order. Change column-level security. Change record ownership to organization. Modify account privileges for security roles.
Power BI dashboard in the model-driven app is not visible to users.	Share the Power BI semantic model. Share the Power BI dashboard. Assign Power BI licenses to users. Modify reporting privileges for security roles.

Explanation:

Issue	Resolution
Account lookup column values in related records are blank.	Modify account privileges for security roles.
Power BI dashboard in the model-driven app is not visible to users.	Assign Power BI licenses to users.

NEW QUESTION: 22

You need to recommend a solution for integrating luggage information.

What should you recommend? To answer, drag the appropriate types to the correct tables. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Types	Table	Type
Custom table		
Virtual table	Luggage	
Activity table	Passenger	
Custom activity table		

Answer:

Types	Table	Type
Custom table		
Virtual table	Luggage	Custom activity table
Activity table	Passenger	Custom table
Custom activity table		

Explanation:

Table	Type
Luggage	Custom activity table
Passenger	Custom table

Luggage: Custom activity table

An activity can be thought of as any action for which an entry can be made on a calendar. An activity has time dimensions (start time, stop time, due date, and duration) that help determine when the action occurred or will occur. Activities also contain data that helps determine what action the activity represents, for example, subject and description.

Passenger: Customer table

The account and contact tables in Microsoft Dataverse are essential for identifying and managing customers, selling products and services, and providing superior service to the customers. A customer address table is used to store address and shipping information for a customer.

Scenario: The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse.

Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

NEW QUESTION: 23

A company uses Microsoft Power Platform and Dynamics 365 Field Service.

External workers deliver onsite service to customer locations by using the Field Service (Dynamics 365) mobile app. You need to ensure that external users can only use the app from specific locations.

Which solution should you use?

- A. Azure Conditional Access policy
- B. Azure multi-factor authentication (MFA)
- C. Azure role-based access control (RBAC)
- D. Azure Active Directory security groups

Answer: A (LEAVE A REPLY)

NEW QUESTION: 24

You are implementing a Microsoft Power Platform solution for a customer to include data migration from multiple legacy systems. The data includes lead and contact data. The environment includes an assigned security group.

The following issues have occurred during a go-live deployment attempt:

- * Lookup values are not populated when data migration is complete.
- * Data is being added to the contacts table that is not part of the data migration.
- * Various users do not appear in the list of users available for record assignment.

You need to resolve the go-live deployment issues.

How should you resolve the issue? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Issue	Solution
Lookup values are not populated when data migration is complete.	Split the import data into smaller import batches. Import the data by using an application user. Split the import data into smaller import batches. Disable all Power Automate flows, plug-ins, and workflows. Run data migration in a specific order.
Data is being added to the contacts table that is not part of the data migration.	Disable all Power Automate flows, plug-ins, and workflows. Disable auditing. Import the data by using an application user. Disable all Power Automate flows, plug-ins, and workflows. Split the import data into smaller import batches.
Various users do not appear in the list of users available for record assignment.	Add to a security group. Add to a security group. Add a security role. Add a Microsoft 365 role. Add a field security profile.

NEW QUESTION: 25

You are a Microsoft Power Platform architect supporting the go-live phase of a canvas app. The canvas app accesses data on-premises and in the cloud.

Users are reporting the app is very slow to respond, especially upon initial launch.

You need to optimize the performance of the app.

Which three actions should you complete? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Increase data row limits.
- B. Move data calls from the OnStart event to the Onload event.
- C. Reduce data row limits.
- D. Review the settings of the data gateway for on-premises data sources.
- E. Move data calls from the Onload event to the OnStart event.

Answer: B,C,D (LEAVE A REPLY)

NEW QUESTION: 26

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

A company uses a Microsoft Excel sheet to manage its loan application process.

The company wants to optimize the process.

You need to discover inefficiencies in the process.

Solution: Record the actions required to complete the loan application process in the process advisor feature.

Use task mining to discover inefficiencies in the process.

Does the solution meet the goal?

A. Yes

B. No

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

You are assisting a retail chain with a digital transformation project. The company plans to implement Microsoft Power Platform solutions.

The retail chain observes that its checkout processes are inefficient.

The company requires a solution that implements a new checkout system that all workers can operate.

You need to define the key success criterion.

Which criterion should you define?

A. reduced employee absences

B. increased foot traffic

C. employee adoption

D. reduced operational costs

E. sales targets met

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

A company uses Microsoft Power Platform. The company has a model-driven app that has an embedded canvas app in the Contact table. The embedded canvas app displays information for contacts from an external data source.

The following issues are reported during testing:

* Users assigned to the Contact Manager security role cannot see the embedded canvas app.

* Some users assigned to the Basic User security role cannot see the embedded canvas app.

You need to recommend a resolution for each issue.

Which resolutions should you recommend? To answer, select the appropriate options in the answer area.

Answer Area

Issue	Resolution
Users assigned to the Contact Manager security role cannot view the embedded canvas app.	Add the Contact Read privilege to the Contact Manager security role. Publish the Contact form. Republish the canvas app from Power Apps studio. Add the Contact Read privilege to the Contact Manager security role. Add the Canvas App Read privilege to the Contact Manager security role.

Some users assigned to the Basic User security role cannot view the embedded canvas app.

Add the Canvas App Read privilege to the Basic User security role. Republish the Contact form. Share the canvas app with the users. Republish the canvas app from Power Apps studio. Add the Canvas App Read privilege to the Basic User security role.
--

Answer:

Answer Area

Issue	Resolution
Users assigned to the Contact Manager security role cannot view the embedded canvas app.	Add the Contact Read privilege to the Contact Manager security role. Publish the Contact form. Republish the canvas app from Power Apps studio. Add the Contact Read privilege to the Contact Manager security role. Add the Canvas App Read privilege to the Contact Manager security role.

Some users assigned to the Basic User security role cannot view the embedded canvas app.

Add the Canvas App Read privilege to the Basic User security role. Republish the Contact form. Share the canvas app with the users. Republish the canvas app from Power Apps studio. Add the Canvas App Read privilege to the Basic User security role.
--

Explanation:

A screenshot of a computer AI-generated content may be incorrect.

Answer Area

Issue	Resolution
Users assigned to the Contact Manager security role cannot view the embedded canvas app.	Add the Contact Read privilege to the Contact Manager security role.
Some users assigned to the Basic User security role cannot view the embedded canvas app.	Add the Canvas App Read privilege to the Basic User security role.

NEW QUESTION: 29

A company has a Microsoft Power Platform environment.

The company requires a solution that provides integration with Azure services and on-premises data sources.

The integration must provide secure and efficient communication among the Microsoft Power Platform components, Azure services, and data sources.

You need to design a networking solution for the company.

What are two possible ways to incorporate the design? Each correct answer presents a complete solution NOTE: Each correct selection is worth one point.

- A. Configure Azure Virtual Network service endpoints.
- B. Implement a virtual private network for Microsoft Power Apps to directly access on-premises systems,
- C. Use Azure Express Route for dedicated connections between Azure services and Microsoft Power Platform environments.
- D. Configure Azure Firewall to protect SQL Server instances.
- E. Configure Microsoft Entra ID to restrict access to Microsoft Power Platform environments.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 30

A company plans to adopt Microsoft Power Platform. You need to document the current enterprise architecture of the company.

Which two components should you incorporate? Each correct answer presents a complete solution. Choose two. NOTE: Each correct selection is worth one point.

- A. applications used
- B. data locations
- C. process diagrams
- D. organizational structure
- E. functional requirements

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 31

You are designing forms for a Microsoft Power Platform solution. Each person must see only the columns required for their department.

Department	Requirements
Inside sales	• Use only a browser-based app. • Include fields for contact name, phone number, product, order date, and total amount owed.
Fulfillment	• Use either a mobile or browser-based app. • Include fields for contact name, product, and order date.
Field sales	• Use only a mobile app. • Include fields for contact name, address, phone number, and product.

You need to ensure that the forms open correctly, display only the fields needed, and that data can be entered quickly. How should you design the form?

- A. Create one form for each department. Add all columns needed for all departments. Use business rules to hide columns.
- B. Create a shared form for all departments. Add all the columns. Add column-level security to columns not needed for each department
- C. Add new columns to an existing form. Grant all departments security roles for that form.
- D. Create one form for each department Add only columns needed on the form for each department.

Assign the appropriate security role to each form.

Answer: (SHOW ANSWER)

NEW QUESTION: 32

You need to recommend the appropriate components to meet the inspection requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Prevent editing of finalized inspection orders.	Business rule Security role User permission
Prepare documentation for failed inspection steps.	Data flow Business rule Form property

Answer:

Requirement	Solution
Prevent editing of finalized inspection orders.	Business rule Security role User permission
Prepare documentation for failed inspection steps.	Data flow Business rule Form property

Explanation:

Requirement	Solution
Prevent editing of finalized inspection orders.	Business rule Security role User permission
Prepare documentation for failed inspection steps.	Data flow Business rule Form property

Box 1: Security role

Microsoft Dataverse uses a role-based security model to help secure access to the database.

Scenario:

- * You must prevent users from changing inspection order data once an inspection is marked as final.
- * Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.

Box 2: Data flow

Dataflows are a self-service, cloud-based, data preparation technology. Dataflows enable customers to ingest, transform, and load data into Microsoft Dataverse environments, Power BI workspaces, or your organization's Azure Data Lake Storage account.

Scenario: Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance. Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.

NEW QUESTION: 33

A company plans to automate business processes by using Power Automate. You identify a subprocess that must be implemented across multiple flows. You need to implement the subprocess so that it is maintainable and easy to navigate. What should you do?

- A. Save a copy of the subprocess and then add any additional actions into the flow.
- B. Initiate the subprocess with an instant trigger.
- C. Copy the actions of the subprocess into the flow by using the clipboard.
- D. Initiate the subprocess with an automated trigger.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 34

A company uses a model-driven app to manage ticket requests.

The company has the following data requirements:

- * Update a third-party application when a new ticket request is submitted.
- * Transform and import event data nightly from a Microsoft Excel spreadsheet that is stored in a shared location.

You need to recommend a location to create the connection for each requirement.

Which locations should you recommend? To answer, drag the appropriate locations to the correct requirements. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Locations

Dataflow

Power Automate

Model-driven app

Answer Area

Answer Area

Requirement	Location
Update a third-party application.	Power Automate
Transform and import event data.	Dataflow

Explanation:

Locations	Requirement	Location
⋮ Dataflow ⋮ Power Automate ⋮ Model-driven app	Update a third-party application. Transform and import event data.	Power Automate Dataflow

Microsoft

NEW QUESTION: 35

You are designing a database table for a client.

You have the following requirements:

- * Maintain a comprehensive list of colors and their corresponding RGB values and hexadecimal values.
- * Prevent the addition of duplicate colors based on the hexadecimal value for the color.

You need to recommend a design for the table.

Which two actions should the client perform after the table is created? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Mark the hex value column as business required.
- B. Configure and schedule a recurring bulk record deletion job.
- C. Create alternate keys for the table.
- D. Mark the RGB value column as business required.

Answer: (SHOW ANSWER)

B: Setting a column to Business Required means that the default behavior of a model-driven or canvas app will enforce this requirement in the app.

C: With alternate keys you can now define a column in a Dataverse table to correspond to a unique identifier (or unique combination of columns) used by the external data store. This alternate key can be used to uniquely identify a record in Dataverse in place of the primary key. You must be able to define which columns represent a unique identity for your records. Once you identify the columns that are unique to the table, you can declare them as alternate keys through the customization user interface (UI) or in the code.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-field-portal>

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/define-alternate-keys-entity>

NEW QUESTION: 36

You need to recommend a solution to meet user interface requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Visual representation of gauge readings with minimum and maximum tolerances.	▼ - Create and embed a Power BI radial gauge. - Create and embed a custom visualization component. - Create and embed a standard Power Apps donut chart.
Add visibility to the manufacturing inspection records for onsite technicians.	▼ - Configure mobile offline synchronization. - Add an inspection order to the work order form - Modify the sitemap for Dynamics 365 Field Service.

Answer:

Requirement	Solution
Visual representation of gauge readings with minimum and maximum tolerances.	▼ - Create and embed a Power BI radial gauge. - Create and embed a custom visualization component. - Create and embed a standard Power Apps donut chart.
Add visibility to the manufacturing inspection records for onsite technicians.	▼ - Configure mobile offline synchronization. - Add an inspection order to the work order form - Modify the sitemap for Dynamics 365 Field Service.

Explanation:

Requirement	Solution
Visual representation of gauge readings with minimum and maximum tolerances.	▼ - Create and embed a Power BI radial gauge. - Create and embed a custom visualization component. - Create and embed a standard Power Apps donut chart.
Add visibility to the manufacturing inspection records for onsite technicians.	▼ - Configure mobile offline synchronization. - Add an inspection order to the work order form - Modify the sitemap for Dynamics 365 Field Service.

Box 1: Create and embed a Power Bi radial gauge

A radial gauge chart has a circular arc and shows a single value that measures progress toward a goal or a Key Performance Indicator (KPI). The line (or needle) represents the goal or target value. The shading represents the progress toward that goal. The value inside the arc represents the progress value. Power BI spreads all possible values evenly along the arc, from the minimum (left-most value) to the maximum (right-most value).

In this example, you ' re a car retailer tracking the sales team ' s average sales per month. The needle represents a 140 cars sales goal. The minimum possible average sales is 0 and the maximum is 200. The blue shading shows that the team is averaging approximately 120 sales this month.

Box 2: Add an inspection order to the work order form

You can add inspections to work orders in Dynamics 365 Field Service.

Field Service inspections are digital forms that technicians use to quickly and easily answer a list of questions as part of a work order. The list of questions can include safety protocols, pass-and-fail tests for a customer asset, an interview with a customer, or other audits and assessments performed before, during, or after a work order.

Example:

Reference:

<https://docs.microsoft.com/en-us/power-bi/visuals/power-bi-visualization-radial-gauge-charts>

<https://docs.microsoft.com/en-us/dynamics365/field-service/inspections>

NEW QUESTION: 37

A company is preparing to launch a new Microsoft Power Apps app.

The company must Import data for the launch. The company requests a review of the documented testing process that will be used to validate the data Import.

You need to provide the steps for the testing process.

Which four steps should you recommend be performed in sequence? To answer, move the appropriate steps from the list of steps to the answer area and arrange them in the correct order.

Steps

- 1. Create a test plan.
- 2. Customize the solution.
- 3. Prepare a test report.
- 4. Prepare the environment.
- 5. Run test scripts.
- 6. Complete UI validation.
- 7. Complete data mapping.

Testing process

Answer:

Steps

- 1. Create a test plan.
- 2. Customize the solution.
- 3. Prepare a test report.
- 4. Prepare the environment.
- 5. Run test scripts.
- 6. Complete UI validation.
- 7. Complete data mapping.

Testing process

- 1. Prepare the environment.
- 2. Complete data mapping.
- 3. Complete UI validation.
- 4. Create a test plan.

Explanation:

Testing process

1. Prepare the environment.
2. Complete data mapping.
3. Complete UI validation.
4. Create a test plan.

NEW QUESTION: 38

You need to provide the IT team and managers with a mobile solution.

How many apps should you recommend?

- A. one app for each job role
- B. one app for each user

- C. one app for all employees of the team
- D. one app for each team of employees

Answer: A (LEAVE A REPLY)

Scenario: IT staff needs a mobile solution to see IT cases at the top of the menu since this is their primary focus.
Managers need to see all customer dashboards at the top of their menu on their mobile device.

NEW QUESTION: 39

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database.

You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Create a custom connector. Create a cloud flow for approval and use the custom connector to add data to the SQL Server database.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A (LEAVE A REPLY)

NEW QUESTION: 40

You are reviewing a list of business requirements submitted by a plumbing company.

The company has the following requirements:

Send articles to technicians to allow technicians to help customers resolve issues.

Track work progress and inspections at customer sites.

Schedule technicians for service appointments.

You need to recommend solutions to meet the customer's requirements.

What should you recommend? To answer, drag the appropriate solutions to the correct business requirements.

Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions

Dynamics 365 Field Service

Dynamics 365 Customer Voice

Dynamics 365 Customer Insights

Answer Area

Business requirement	Solution
Send articles to technicians to allow technicians to help customers resolve issues.	Solution
Track work progress and inspections at customer sites.	Solution
Schedule technicians for service appointments.	Solution

Answer:

Solutions	Answer Area	
	Business requirement	Solution
Dynamics 365 Field Service	Send articles to technicians to allow technicians to help customers resolve issues.	Dynamics 365 Customer Insights
Dynamics 365 Customer Voice		
Dynamics 365 Customer Insights	Track work progress and inspections at customer sites.	Dynamics 365 Field Service
	Schedule technicians for service appointments.	Dynamics 365 Field Service

Explanation:

Business requirement	Solution
Send articles to technicians to allow technicians to help customers resolve issues.	Dynamics 365 Customer Insights
Track work progress and inspections at customer sites.	Dynamics 365 Field Service
Schedule technicians for service appointments.	Dynamics 365 Field Service

Box 1: Dynamics 365 Customer Insights

Dynamics 365 Customer Insights is a part of Microsoft ' s customer data platform (CDP) that helps deliver personalized customer experiences. The platform ' s capabilities provide insights into who your customers are and how they engage with your platform. Unify customer data across multiple sources to get a single view of customers.

Box 2: Dynamics 365 Field Service

Dynamics 365 Field Service helps to:

Organize and track resolution of customer issues

Keep customers updated with the status of their service call and when it ' s resolved

Note: The Dynamics 365 Field Service business application helps organizations deliver onsite service to customer locations. The application combines workflow automation, scheduling algorithms, and mobility to set up mobile workers for success when they ' re onsite with customers fixing issues.

The Field Service application enables you to:

Improve first-time fix rate

Complete more service calls per technician per week

Manage follow-up work and take advantage of upsell and cross sell opportunities Reduce travel time, mileage, and vehicle wear and tear Organize and track resolution of customer issues Communicate an accurate arrival time to customers Provide accurate account and equipment history to the field technician Keep customers updated with the status of their service call and when it ' s resolved Schedule onsite visits when it ' s convenient for the customer Avoid equipment downtime through preventative maintenance

Box 3: Dynamics 365 Field Service Dynamics 365 Field Service: Schedule onsite visits when it ' s convenient for the customer.

<https://docs.microsoft.com/en-us/dynamics365/field-service/overview>

<https://dynamics.microsoft.com/en-us/customer-voice/capabilities>

NEW QUESTION: 41

You are evaluating company data. The data must be migrated to Microsoft Dataverse.

You need to recommend the process to ensure clean data for the migration.

Solution: Configure retry logic in the migration.

Does the solution meet the goal?

A. No

B. Yes

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 42

You conduct an initial discovery meeting with a manufacturer. The manufacturer plans to modernize its current sales order system by using Microsoft Power Platform and AI-generated product suggestions.

Data architecture is a top concern for the company.

The company requires assistance to identify risk factors related to the use of data with AI-generated product suggestions.

You need to ask follow-up questions to assess the risk factors.

A. Which type of access will users require for the application?

B. Which data do you plan to use to train and use with AI?

C. Which privacy or residency concerns does the company have?

D. What is the budget for implementing and maintaining the solution?

E. How will the company capture feedback to improve accuracy of the AI model?

Answer: B,E ([LEAVE A REPLY](#))

NEW QUESTION: 43

You are designing a Power Platform solution for a company. The company issues each employee a tablet device.

The company wants to simplify the opportunity management processes and automate when possible. The company identifies the following requirements:

* Users must have a visual guide to know which data to enter in each step of the opportunity management process.

* The system must automatically assign the opportunity to a manager for approval once all data is entered.

* The system must notify an assignee each time an opportunity is assigned to them by using push notifications.

* When a user selects a push notification, the associated opportunity must display.

You need to recommend the Power Platform components that will meet their requirements.

Which three Power Platform components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Business process flows
- B. Power Apps mobile apps
- C. Power Virtual Agents chatbots
- D. Power Automate desktop flows
- E. Power Automate cloud flows

Answer: A,B,E (LEAVE A REPLY)

A: Use business process flows to define a set of steps for people to follow to take them to a desired outcome.

These steps provide a visual indicator that tells people where they are in the business process.

B: Push notifications are used in Power Apps mobile to engage app users and help them prioritize key tasks.

In Power Apps, you can create notifications for Power Apps mobile by using the Power Apps Notification connector. You can send notifications to any app that you create in Power Apps.

E: Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.

Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.

Reference:

<https://docs.microsoft.com/en-us/power-automate/business-process-flows-overview>

<https://docs.microsoft.com/en-us/powerapps/mobile/power-apps-mobile-notification>

NEW QUESTION: 44

A police department uses apps deployed in Microsoft Power Platform to capture investigation information using a custom table. The apps run in offline mode in areas with poor data signals.

The department identified a need for photos to be captured during the investigation and stored in Microsoft Dataverse for easy access.

You need to implement the photo-capturing functionality.

Which four actions should you perform in sequence?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

⋮

Publish the mobile offline profile.

⋮

Create a column of data type image in the investigation table.

⋮

Add only the Image Descriptor table to the profile.

⋮

Add only the FileAttachment table to the profile.

⋮

Create a new table to store the photos.

⋮

Set the maximum size.

⋮

Create a new mobile offline profile.

⋮

Add both the Image Descriptor and the FileAttachment tables to the profile.

Steps

Answer:

Actions

⋮

Publish the mobile offline profile.

⋮

Create a column of data type image in the investigation table.

⋮

Add only the Image Descriptor table to the profile.

⋮

Add only the FileAttachment table to the profile.

NEW QUESTION: 47

You design integration with an external data source that uses sequential integer values as primary keys for the records contained in it. Data synchronization will occur in Microsoft Dataverse so users can access data.

Data within Microsoft Dataverse must be accurate against the data in the external data source.

You need to ensure that the data from the external data source does not create duplicated rows in Microsoft Dataverse.

Which two features should you use?

Each correct answer presents part of the solution.

- A. Webhook
- B. Upsert method
- C. Change tracking
- D. Alternate key
- E. Duplicate detection rules

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 48

A company has a model-driven app. The app has forms with both Business Rules and JavaScript added to handle the business logic on the form. The form contains logic that is enforced by using business rules. The company wants to apply the business rules to all forms in the app. You need to recommend a simplified form setup so the form can be maintained moving forward. What should you recommend?

- A. Manage the business logic with a Power Apps Component Framework (PCF) control.
- B. Evaluate whether complex parts of the logic can be solved by using Power Apps Component Framework (PCF) control. Use Business Rules for the remaining functionality.
- C. Remove the Business Rules and use only JavaScript.
- D. Update logic to ensure Business Rules are optimized. Use JavaScript for the remaining functionality.

Answer: B ([LEAVE A REPLY](#))

PCF controls are reusable.

NEW QUESTION: 50

You are designing a data model for a Microsoft Power Platform solution.
The data model must meet the following requirements:

- * When an account is assigned to a new salesperson, all opportunities that are associated with the account must be assigned to the new salesperson.
- * When a salesperson assigns a lead to another salesperson, all phone call activities related to the lead must be assigned to the new salesperson.

You need to recommend cascading strategies for the data model.

Which cascading strategy should you recommend? To answer, drag the appropriate cascading strategies to the correct requirements. Each cascading strategy may be used once, more than once, or not at all.
You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Cascading strategies

Cascade All

Cascade Active

Cascade User Owned

Cascade None

Answer Area

Requirement

When an account is assigned to a new salesperson, all opportunities that are associated with the account must be assigned to the new salesperson.

When a salesperson assigns a lead to another salesperson, all phone call activities related to the lead must be assigned to the new salesperson.

Cascading strategy

Answer:

Cascading strategies

Cascade All

Cascade Active

Cascade User Owned

Cascade None

Answer Area

Requirement

When an account is assigned to a new salesperson, all opportunities that are associated with the account must be assigned to the new salesperson.

When a salesperson assigns a lead to another salesperson, all phone call activities related to the lead must be assigned to the new salesperson.

Cascading strategy

Cascade All

Cascade User Owned

Explanation:

Cascading strategies

Cascade All

Cascade Active

Cascade User Owned

Cascade None

Answer Area

Requirement

When an account is assigned to a new salesperson, all opportunities that are associated with the account must be assigned to the new salesperson.

When a salesperson assigns a lead to another salesperson, all phone call activities related to the lead must be assigned to the new salesperson.

Cascading strategy

Cascade All

Cascade User Owned

NEW QUESTION: 51

You are assessing the capabilities of a project for a customer in the education sector.

The solution must meet the following requirements:

- * include curriculum and student management capabilities.
- * Conform to on-going Microsoft platform upgrades.
- * Minimize custom coding and configuration.

You need to recommend a solution. What should you recommend?

- A.** AppSource
- B.** Microsoft Power Platform admin center
- C.** Microsoft 365 admin center
- D.** Power Apps portal

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 52

You are designing a Microsoft Power Platform solution that will include multiple applications.

You have the following requirements:

- * Support agents managing cases.
- * Project managers reviewing and updating their projects.
- * Stock managers managing warehouses.
- * New site visitors self-registering.
- * Employees tracking time entries.

Which three requirements can you meet by implementing role-based applications? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A.** New site visitors self-registering.
- B.** Stock managers managing warehouses.
- C.** Project managers reviewing and updating their projects.
- D.** Staff tracking time entries.
- E.** Support agents managing cases.

Answer: B,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 53

An animal welfare organization wants to track the movement of wolf packs in a region. Cameras at specific locations capture images when motion is detected within the camera sensor range. Staff upload the images manually to a shared drive and then analyze the images.

The organization wants to automate image capture and analysis. The organization has the following requirements:

Save captured images in an appropriate location.

Analyze saved images by using an image recognition process.

Display data in real-time dashboards.

You need to recommend the correct technology for the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Technology option

Save captured images in an appropriate location.

	▼
Business process flow	
Desktop flow	
Instant cloud flow	
Automated cloud flow	

Analyze saved images by using an image recognition process.

	 ▼
Instant cloud flow and AI Builder	
Automated cloud flow and AI Builder	
Desktop flow and AI Builder	

Display data in real-time dashboards.

	▼
Dynamics 365 interactive experience dashboard	
Model-driven app dashboard with native graphs	
Model-driven app dashboard with Power BI	

Answer:

Requirement

Technology option

Save captured images in an appropriate location.

	▼
Business process flow	
Desktop flow	
Instant cloud flow	
Automated cloud flow	

Analyze saved images by using an image recognition process.

	▼
Instant cloud flow and AI Builder	
Automated cloud flow and AI Builder	
Desktop flow and AI Builder	

Display data in real-time dashboards.

	▼
Dynamics 365 interactive experience dashboard	
Model-driven app dashboard with native graphs	
Model-driven app dashboard with Power BI	

Explanation:

Requirement	Technology option
Save captured images in an appropriate location.	▼ Business process flow Desktop flow Instant cloud flow Automated cloud flow
Analyze saved images by using an image recognition process.	▼ Instant cloud flow and AI Builder Automated cloud flow and AI Builder Desktop flow and AI Builder
Display data in real-time dashboards.	▼ Dynamics 365 interactive experience dashboard Model-driven app dashboard with native graphs Model-driven app dashboard with Power BI

Box 1: Automated cloud flow.

Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.

Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.

Box 2: Desktop flow and AI Builder

Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate Desktop you can automate tasks on the desktop as well as the Web.

Box 3: Model-driven app dashboard with Power BI

The Power BI cloud service works with Microsoft Dataverse apps to provide a self-service analytics solution.

Power BI automatically refreshes the app 's data displayed.

<https://docs.microsoft.com/en-us/power-automate/flow-types>

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/use-power-bi>

NEW QUESTION: 54

You are working on a project with a logistics company. The company plans to digitally transform its business by using Microsoft Power Platform.

You lead several requirements workshops with stakeholders.

The workshops result in the need for the following solutions:

- * Allow users to place orders, track order status, and receive notifications about order shipments.
- * Provide availability 24 hours a day, excluding scheduled maintenance windows.
- * Support real-time tracking of inventory levels.

You need to categorize each of the captured requirements.

Which category should you use for each requirement? To answer, move the appropriate categories to the correct requirements. You may use each category once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Categories

Functional

Non-functional

Categorizing requirements for organizational goals

Requirement

Ability to place orders, track order status, and receive shipment notifications

24-hour availability, excluding scheduled maintenance windows

Real-time tracking of inventory levels

Category

Answer:

Categories

Functional

Non-functional

NEW QUESTION: 55

A company plans to auto-populate the Name column on a row based on other text columns on the row. The company requires this to happen immediately and without needing to refresh the form. You need to recommend a solution. What should you recommend that the company use?

- A. Background classic workflow
- B. Business rule
- C. Power Automate flow

Answer: B (LEAVE A REPLY)

NEW QUESTION: 56

You need to recommend a reporting solution for the organization.

Which two options should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. AI Builder

B. SQL Server Reporting Services (SSRS)

C. Dynamics 365

D. Power BI

Answer: B,C ([**LEAVE A REPLY**](#)**)**

Scenario:

* The reporting and analytics team must be able to create reports that include data from all facilities and all workers.

* Management reports must present an overview of the entire organization. Other reports may be limited to specific offices.

B: Power Apps apps can include reports that provide useful business information to the user. These reports are based on SQL Server Reporting Services and provide the same set of features that are available for typical SQL Server Reporting Services reports.

C: Microsoft Dynamics 365 online and Model-Driven PowerApps offers several advanced reporting options.

Advanced reports are often necessary when business requirements demand complex calculations, returning multiple data sets, grouping large sets of data based on rules, and retrieving data from different data sources.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/add-reporting-to-app>

<https://powerusers.microsoft.com/t5/Building-Power-Apps/Creating-SSRS-Report-for-Model-Driven- PowerApps/td-p/621866>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/powerapps-custom-visual>

NEW QUESTION: 57

You are designing a Power Platform solution.

The company wants its development team to adopt the construction of repeatable components for its implementation team to reuse on different entities and forms.

You need to recommend a technology that meets these requirements.

Which technology would you recommend the developers adopt to assist the implementation team?

A. JavaScript

B. Power Apps Component Framework control

C. Web resource

D. Canvas app

Answer: ([**SHOW ANSWER**](#)**)**

Power Apps component framework empowers professional developers and app makers to create code components for model-driven and canvas apps (public preview) to provide enhanced user experience for the users to work with data on forms, views, and dashboards.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/component-framework/overview>

NEW QUESTION: 58

You are designing a Microsoft Power Platform solution that will be deployed to two separate companies in the same Microsoft Office 365 tenant: Contoso, Ltd. and Contoso Pharmaceuticals.

The solution must meet the following security requirements:

* Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.

* Restrict access to specific forms.

* Restrict access to specific tables.

What should you recommend? To answer, drag the appropriate security types to the correct restrictions. Each security type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Security objects

NEW QUESTION: 59

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database.
You need to allow users to submit expenses from mobile devices.
Solution: Create a canvas app for expense data entry. Create a desktop flow. Create a cloud flow for approval and trigger the desktop flow to add data to the SQL Server database.
Does the solution meet the goal?

- A. Yes
 - B. No
- Answer: B (LEAVE A REPLY)

NEW QUESTION: 60

A company has an on-premises data warehouse and analytics solution- The data warehouse consists of multiple multi-dimensional data cubes representing over five years of operational data. The data warehouse consolidates and normalizes data that is sourced from 20 different systems.
The company plans to replace the existing solution with a Microsoft Power Platform solution that connects to the data warehouse. The company wants to provide analytical information to executives in a Microsoft Teams channel to support business planning.
The new solution must meet these requirements:
Support the current data warehouse.
The solution must support drill-through capabilities into the data.
You need to recommend a solution.
What should you recommend? To answer, select the appropriate options m the answer area. NOTE: Each correct selection is worth one point.

Requirement

Data storage and normalization.

Solution

Data Gateway

Azure Data Lake

Dataverse for Teams

Azure Analysis Services

Requirement

Visibility to key operational metrics from various Teams

Solution

Power BI

AI Builder

Teams adaptive cards

Microsoft Teams integration object

Answer:

Answer Area

Requirement

Data storage and normalization.

Solution

Data Gateway

Azure Data Lake

Dataverse for Teams

Azure Analysis Services

Requirement

Visibility to key operational metrics from various Teams

Solution

Power BI

AI Builder

Teams adaptive cards

Microsoft Teams integration object

Explanation:

Requirement	Solution
Data storage and normalization.	▼ Data Gateway Azure Data Lake Dataverse for Teams Azure Analysis Services
Visibility to key operational metrics from various Teams channels.	▼ Power BI AI Builder Teams adaptive cards Microsoft Teams integration object

Box 1: Azure Data Lake

A data warehouse is a centralized repository of integrated data from one or more disparate sources. Data warehouses store current and historical data and are used for reporting and analysis of the data.

Reference:

<https://docs.microsoft.com/en-us/azure/architecture/data-guide/relational-data/data-warehousing>

<https://docs.microsoft.com/en-us/powerapps/teams/use-teams-integration-object>

NEW QUESTION: 61

You are meeting with a user at a financial institution to gather app requirements. The app must meet the following requirements:

- * Be enabled for mobile use.
- * Respond in less than five seconds.
- * All data transmitted over the network must be encrypted

You need to categorize the type of requirements you captured.

Which two requirement types are captured? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A.** compliance
B. exception
C. feasibility
D. functional
E. non-functional

Answer: (SHOW ANSWER)

NEW QUESTION: 62

You need to recommend a solution for creating the initial inspection checklists.

What should you recommend?

- A. Power Apps Maker portal
- B. Dataverse for Teams
- C. Power Apps Studio
- D. Data Migration utility

Answer: B (LEAVE A REPLY)

Scenario: Standardized checklists must be stored in the solution for use by inspectors. A copy must be created when a new inspection is initiated.

Dataverse for Teams - built on Microsoft Dataverse - provides relational data storage, rich data types, enterprise-grade governance, and one-click solution deployment to the Microsoft Teams app store.

Dataverse for teams table creation has all of the things that are great about Microsoft Lists, without the major downsides.

Reference:

<https://docs.microsoft.com/en-us/powerapps/teams/create-table>

NEW QUESTION: 63

You need to recommend the appropriate messaging channel solutions for the organization.

What should you recommend? To answer, drag the appropriate messaging options to the correct user types.

Each messaging option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Messaging options

Power Apps portals

Dynamics 365 Customer Service

Omnichannel for Customer Service dashboard

User type

Worker support agents

Patients

Messaging option

Answer:

Explanation:

Box 1: Omnichannel for Customer Service dashboard

Scenario: Workers must be able to communicate in near real-time with worker support agents.

The company has a team or worker support agents that respond to inquiries from current and prospective workers. Some of the worker support agents are multilingual.

If you choose to expand your customer service offering to provide chat and channels, the Customer Service workspace seamlessly adjusts to support managing conversations as well.

Note: As an agent with the Customer Service Representative security role, when you open Customer Service workspace, you start on the Customer Service Agent Dashboard unless your administrator has changed the default view. This dashboard shows you your active cases, cases you can work in queues you are assigned to, and your open activities. You can open existing cases and activities or begin working new cases from the queues you are assigned to and create activities.

Box 2: Dynamics 365 Customer Service

Scenario: First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-service/csw-overview>

NEW QUESTION: 64

You need to add a new column to the production environment.

What should you do in each environment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 65

A company is undergoing digital Transformation.

You must conduct an in-person workshop with several business stakeholders to learn more about the company and its solution requirements. You have limited time to get the information from the stakeholders.

You need to ensure that the workshop is set up for success.

Which two actions should you perform? Each correct answer presents a complete solution. Choose two.

NOTE: Each correct selection is worth one point.

- A. Keep to the agenda by minimizing side conversations.
- B. Present the proposed solution as part of the workshop.
- C. Publish the agenda in advance of the workshop.
- D. Explain the technical aspects of the solution to the stakeholders.

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 66

A company is creating a Power Platform solution to manage employees.

The company has the following requirements:

Allow only the human resource manager to change an employee's employment status when an employee is dismissed.

Allow only approved device types to access the solution and company data.

You need to recommend a solution that meets the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Allow only the human resource manager to change an employee's employment status when an employee is dismissed.

Allow only approved device types to access the solution and company data.

Configuration

Team access
Privacy preference
Field security profile
Hierarchy security profile

Endpoint security
Compliance policy
Conditional access
Mobile threat integration

Answer:

Requirement

Allow only the human resource manager to change an employee's employment status when an employee is dismissed.

Allow only approved device types to access the solution and company data.

Configuration

Team access
Privacy preference
Field security profile
Hierarchy security profile

Endpoint security
Compliance policy
Conditional access
Mobile threat integration

Explanation:

Box 1: Field security profile

Record-level permissions are granted at the entity level, but you may have certain fields associated with an entity that contain data that is more sensitive than the other fields. For these situations, you use field-level security to control access to specific fields.

Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles.

Box 2: Compliance policy

Compliance policy settings - Tenant-wide settings that are like a built-in compliance policy that every device receives. Compliance policy settings set a baseline for how compliance policy works in your Intune environment, including whether devices that haven't received any device compliance policies are compliant or noncompliant.

Note: Mobile device management (MDM) solutions like Intune can help protect organizational data by requiring users and devices to meet some requirements. In Intune, this feature is called compliance policies.

Compliance policies in Intune:

Define the rules and settings that users and devices must meet to be compliant.

Include actions that apply to devices that are noncompliant. Actions for noncompliance can alert users to the conditions of noncompliance and safeguard data on noncompliant devices.

Can be combined with Conditional Access, which can then block users and devices that don't meet the rules.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION: 67

You are performing a fit gap analysis for a bank based in the United States. The bank requires a solution to monitor and disclose all financial transactions where money laundering is suspected. You know that this requirement may not be feasible because banks and other financial institutions must adhere to established laws, rules, and guidelines. You need to verify the feasibility of the requirement.

- A. Requirement is conflict-free from regulated industry
- B. Requirement is lower priority than other business priorities
- C. Requirement will be adopted in the solution
- D. Identified business process is feasible

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 68

You are designing a Microsoft Dataverse data model for a mortgage brokerage.

The brokerage provides the following table and field information:

The brokerage has the following data relationship requirements:

- * A client can have multiple loan applications, but each loan application must be associated with only one client
- * Each loan application must be associated with one property, but a property can be linked to multiple loan applications.
- * The employer the client works for must be added for employment verification. Employers are maintained in the Account table.

You need to model the tables for Dataverse and set up relationships.

Which data model solution should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Solution
Relationship between client and loan application	One-to-many relationship One-to-many relationship Many-to-many relationship Many-to-one relationship
Relationship between loan application and property	Many-to-one relationship One-to-many relationship Many-to-many relationship Many-to-one relationship
Column type for client's employer	Lookup to Contact Choice Customer Lookup to Contact

Answer:

Requirement	Solution
Relationship between client and loan application	One-to-many relationship One-to-many relationship Many-to-many relationship Many-to-one relationship
Relationship between loan application and property	Many-to-one relationship One-to-many relationship Many-to-many relationship Many-to-one relationship
Column type for client's employer	Lookup to Contact Choice Customer Lookup to Contact

Explanation:

Answer Area

Requirement

- Relationship between client and loan application
- Relationship between loan application and property
- Column type for client's employer

Solution

- One-to-many relationship
- Many-to-one relationship
- Lookup to Contact

NEW QUESTION: 69

You are designing a model-driven app that provides marketing, sales, and service operations to a company.

The app must integrate with the following systems and data sources:

- * A third-party marketing system for lead generation and website submissions.
- * A Microsoft Excel Online file that contains manufacturing data on relevant products.
- * A separate Microsoft Dataverse environment.

You need to recommend Power Automate connectors for the app.

Which connections should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Data source

Third-party marketing system

Microsoft Dataverse environment

Connector type

Power BI connector

SharePoint connector

Custom connector

Microsoft Forms connector

SharePoint

Azure Data Factory

Microsoft Dataverse

Answer:

Answer Area

Data source

Third-party marketing system

Microsoft Dataverse environment

Connector type

Microsoft Dataverse environment

▼

SharePoint

Azure Data Factory

Microsoft Dataverse

Box 1: Custom connector

While Azure Logic Apps, Microsoft Power Automate, and Microsoft Power Apps offer over 325+ connectors to connect to Microsoft and non-Microsoft services, you may want to communicate with services that aren't available as prebuilt connectors.

Box 2: Microsoft Dataverse

The Microsoft Dataverse connector provides several triggers to start your flows and many actions that you can use to create or update data in Dataverse while your flows run. You can use Dataverse actions even if your flows don't use a trigger from the Dataverse connector.

Use the Microsoft Dataverse connector to create cloud flows that start when data changes in Dataverse tables and custom messages.

Reference:

<https://docs.microsoft.com/en-us/connectors/custom-connectors/>

<https://docs.microsoft.com/en-us/power-automate/dataverse/overview>

NEW QUESTION: 70

A company uses Microsoft Power Platform with assets that include solution files, flat files, custom code, HTML files, and data.

You need to use application lifecycle management (ALM) to deploy the assets to Microsoft Dataverse.

Which tool should you use?

- A. Configuration Migration tool
- B. Package deployer
- C. Microsoft Power Platform Build Tools
- D. Solution packager

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 71

All salespeople at a company manually send meeting summaries to the meeting attendees after a customer meeting. Meeting summaries are sent in a variety of ways. The company requires standardized processes. You need to learn the existing processes to determine whether opportunities for automation exist.

- A. Review the request for proposal.
- B. Interview the director of each department.

C. Job shadow salespeople from each department.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 72

You are performing a fit gap analysis for a bank based in the United States.

The bank requires a solution to monitor and disclose all financial transactions where money laundering is suspected.

You know that this requirement may not be feasible because banks and other financial institutions must adhere to established laws, rules, and guidelines. You need to verify the feasibility of the requirement.

Which feasibility analysis should you check for the requirement?

A. Level of effort is unfeasible

B. Requirement is conflict-free from regulated industry

C. Requires a prebuilt connector to be feasible

D. Requirement is technically feasible

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 73

A company wants to create a Power Automate flow that posts marketing events to social media.

The company must ensure that the postings adhere to regulatory requirements for handling of personally identifiable information (PII) data. The company will not post events to unauthorized social media platforms.

You need to ensure that the requirement is met.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Configure the relevant connector so that it is part of the Non-Business data group category.

B. Create a security role to prevent data export.

C. Configure an Azure Active Directory (AAD) security role for the maker to the environment.

D. Create a Data Loss Protection (DLP) policy.

E. Configure the relevant connector so that it is part of the Blocked data group category.

Answer: ([SHOW ANSWER](#))

DLP policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business. If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow. Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.

NEW QUESTION: 75

You are leading the discovery process with a new client who is implementing a customer support solution by using Microsoft Power Platform.

The company has the following requests for the discovery process:

- * You must use sticky notes to collect information from stakeholders.
- * You must ensure that support reps who cannot attend the in-person meeting are able to provide feedback.
- * You must get detailed information on the call escalation process from a support rep who noted several pain points.

You need to select which types of discovery to use to meet the requests.

Which discovery types should you use? To answer, move the appropriate discovery types to the correct requests. You may use each discovery type once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 76

You need to recommend a solution for handling data entry requirements for the mobile audit teams.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Canvas app within Power Apps Player
- B. Canvas app within a browser
- C. Dynamics 365 Field Service
- D. Dynamics 365 App for Outlook

Answer: ([SHOW ANSWER](#))

Scenario:

Audit teams must have the ability to view worker information on their mobile devices.

Audit teams must be able to record data during visits to locations where workers are placed.

When you create an app, or someone shares an app with you, you can run that app on the Power Apps mobile app or in a web browser.

NEW QUESTION: 78

You are designing a Power Platform solution for a company that provides in-home appliance maintenance.

When a customer schedules a service appointment, a dispatcher assigns one technician for a specific time and location.

The solution must capture information about the technician assigned to each appointment and the list of tools that the technician must bring to the appointment. You need to recommend the data type for the captured information. Which data type should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Data type
Capture information about the technician assigned to each service appointment.	▼ Choice Choices Customer Lookup
Select the tools that the technician must bring to an appointment.	▼ Choices Customer Lookup Text

Answer:

Requirement	Data type
Capture information about the technician assigned to each service appointment.	▼ Choice Choices Customer Lookup
Select the tools that the technician must bring to an appointment.	▼ Choices Customer Lookup Text

Explanation:

Requirement

Capture information about the technician assigned to each service appointment.

	▼
Choice	
Choices	
Customer	
Lookup	

Select the tools that the technician must bring to an appointment.

	▼
Choices	
Customer	
Lookup	
Text	

Box 1: Choice

Like Choices below, but can only select one of the option.

Box 2: Choices

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION: 79

You are implementing a model-driven app for a national chain of retail stores. You have the following requirements:

- * Store employees must be able to view data for their store only.
- * Regional managers must be able to view data for all stores in a region.
- * The reporting team must be able to view all data across all stores.

You need to configure system security.

Which three security methods should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Owner teams
- B. Microsoft Entra ID security group
- C. Account hierarchy
- D. Security roles
- E. Manager hierarchy

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 80

A company uses Power Pages for article submissions. The article properties are stored in a table in Microsoft Dataverse and the content of the article is stored in a related Microsoft SharePoint library. The company invites different experts outside its organization to review an article before publishing it. The reviewers are granted access to the articles in Microsoft Dataverse. The company has the following requirements:

- * Provide a app to canvas the reviewers that exposes both the article properties and content in read-only mode.

* Once the review is completed, the reviewer saves the review data, and the article and the review no longer appear in the app.
You need to recommend the components to be used for each requirement.
Which options should you use?
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Option
Security configuration for reviewers	Create a dedicated access team and add the reviewers to the team. Create a dedicated access team and add the reviewers to the team. Create a dedicated access team template and add it to the article record. Create a dedicated owner team in the Microsoft Dataverse environment and add the reviewers to the team. Create a dedicated Microsoft Teams channel with a security role for the article and add the reviewers as members.
Access to the app	Embed app in Power Pages portal. Embed app in Power Pages portal. Share app through the Power Apps maker portal. Register app in Azure AD and email the registration link. Publish the app in Power Apps Studio and email the link to the app.

Answer:

Answer Area

Requirement

Security configuration for reviewers

Access to the app

Option

Create a dedicated access team and add the reviewers to the team.

Create a dedicated access team and add the reviewers to the team.

Create a dedicated access team template and add it to the article record.

Create a dedicated owner team in the Microsoft Dataverse environment and add the reviewers to the team.

Create a dedicated Microsoft Teams channel with a security role for the article and add the reviewers as members.

Embed app in Power Pages portal.

Embed app in Power Pages portal.

Share app through the Power Apps maker portal.

Register app in Azure AD and email the registration link.

Publish the app in Power Apps Studio and email the link to the app.

Explanation:

Answer Area

Requirement	Option
Security configuration for reviewers	Create a dedicated access team and add the reviewers to the team.
Access to the app	Embed app in Power Pages portal.

 Microsoft

NEW QUESTION: 81

A company plans to use Microsoft Power Platform.

The company requires information from an Oracle database to be displayed in a Dynamics 365 model-driven app without transferring data.

You need to make the information visible by using built-in features.

Which Microsoft Power Platform component should you use?

- A. Power Automate
- B. AI Builder
- C. Canvas app
- D. Dataflows

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 82

You are designing a Microsoft Power Platform solution for a company.

Users must be granted access only to data that is relevant to them.

You need to recommend actions to meet the requirements.

Which two recommendations should you make? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add column security profiles to applicable teams.
- B. Create teams and assign security roles and users to the teams.
- C. Create business units and assign security roles to the business units.
- D. Define and configure security roles.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 83

You are designing a new Microsoft Power Platform solution for a wedding organizer company.

The company uses a third-party application and plans to migrate the data into Microsoft Dataverse for the new solution. The third-party application has an API that can be connected to programmatically for data migration purposes.

You need to migrate the unique IDs belonging to the records from the third-party application.

Which two Microsoft Dataverse column types should you use to store this information?

Each correct answer presents a complete solution.

- A. Float

- B. Unique Identifier
- C. Text Area
- D. Rich Text
- E. Plain Text

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 84

A sales team uses a dedicated mailbox and the assistant for Microsoft Dynamics 365 Sales in their sales process. Technical staff collaborate in a research and development Microsoft Teams channel. Sales reps have a custom insight card that pops up each time certain keywords appear in emails from prospective customers.

The sales reps must engage with the technical team before answering the emails.

The technical team plans to streamline the email answering process. The technical team needs a similar card to be exposed in the technical channel immediately after an email arrives.

You need to provide a solution for the technical team.

Which three actions should you perform in sequence?

To answer, move The appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

⋮

Edit the existing sales flow.

⋮

Parse the keywords from the sales emails.

⋮

Install Microsoft Power Automate in the environment.

⋮

Create the JSON message for the adaptive card.

⋮

Create a new flow in Microsoft Power Automate.

⋮

Add a trigger to the flow when email arrives in the sales mailbox.

⋮

Add a flow step to post adaptive card in the Teams technical channel.

Steps

Answer:
Actions

Actions

⋮

NEW QUESTION: 85

You are going to have a discovery meeting with a new client who is undergoing digital transformation. You need to prepare for the meeting. Which three sources of discovery information should you reference before meeting with the client?

- A. Social media
- B. Blog posts
- C. Microsoft 365 Copilot
- D. News outlets
- E. Company website

Answer: B,D,E (LEAVE A REPLY)

NEW QUESTION: 86

A company plans to create a Power Apps portal to manage support cases for customers. The company has an account hierarchy for customers. The hierarchy supports accounts, cases, and contacts where both contacts and cases belong to their relevant account.

The company has the following requirements:

Portal users must only see the notes for the cases that they manage.

Portal users must only see cases that are submitted by their colleagues.

You need to design the security model for the portal.

Which entity permission scope should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Scope

Portal users must only see the notes for the cases that they manage.

	▼
Self	
Parent	
Contact	
Account	

Portal users must only see cases that are submitted by their colleagues.

	▼
Self	
Global	
Contact	
Account	

Answer:

Requirement	Scope										
Portal users must only see the notes for the cases that they manage.	<table border="1"><tr><td></td><td>▼</td></tr><tr><td colspan="2">Self</td></tr><tr><td colspan="2">Parent</td></tr><tr><td colspan="2">Contact</td></tr><tr><td colspan="2">Account</td></tr></table>		▼	Self		Parent		Contact		Account	
	▼										
Self											
Parent											
Contact											
Account											
Portal users must only see cases that are submitted by their colleagues.	<table border="1"><tr><td></td><td>▼</td></tr><tr><td colspan="2">Self</td></tr><tr><td colspan="2">Global</td></tr><tr><td colspan="2">Contact</td></tr><tr><td colspan="2">Account</td></tr></table>		▼	Self		Global		Contact		Account	
	▼										
Self

Contact											
Account											

Explanation:

Requirement

Scope

Portal users must only see the notes for the cases that they manage.

Self
Parent
Contact
Account

Portal users must only see cases that are submitted by their colleagues.

Self
Global
Contact
Account

Box 1: Contact

With Contact scope, a signed-in user in the role for which the permission record is defined will have the rights granted by that permission only for records that are related to that user ' s contact record via a defined relationship.

Box 2: Account

With Account Scope, a signed-in user in the role for which the permission record is defined will have the rights granted by that permission only for records that are related to that user ' s parent account record via a defined relationship.

This scope means that the entity list will only show the records of the selected entity that are associated to the user ' s parent account. For example, if an entity permission allows Read access to Lead entity with the Account scope, the user having this permission can view all the leads of only the parent account of the user.

<https://docs.microsoft.com/en-us/powerapps/maker/portals/configure/assign-entity-permissions>

NEW QUESTION: 87

A company plans to implement robotic process automation (RPA).

The company wants to reuse existing online support content.

You need to recommend a component that uses the company s existing online support content.

Which component should you recommend?

- A. Conditions
- B. Questions
- C. Variables
- D. Topics

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 88

A customer plans to use Microsoft Power Platform integration capabilities to migrate its on-premises sales database to Microsoft Dataverse. The database has more than 10 years of sales data with complex table relationships. The data is used to generate real-time sales reports and predictive analytics.

The customer requires a data migration strategy that implements the following:

- * ensures minimal downtime
 - * maintains data integrity
 - * allows for validation of migrated data before switching to the new system
 - * ensures that the historical data is preserved accurately in the Dataverse environment
- Which two strategies should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Map the data schema to Dataverse and validate integrity through trial loads.
- B. Migrate historical data to Azure Data Lake to reduce migration complexity.
- C. Develop a phased migration plan in which data is moved in chunks based on years.
- D. Perform a full migration and start using Dataverse after migration.
- E. Perform a full migration and perform a test run on Dataverse to simulate real-time activity.

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 89

A company plans to transition from an existing proprietary solution to a Power Platform solution. The company is consolidating data from several sources.

The company reports the following data quality issues with the existing solution:

- * Users often encounter a character limit when entering data.
- * The database includes multiple instances of duplicate records.

You need to recommend solutions to ensure that the data quality issues are not present in the Power Platform solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Solution
Users often encounter a character limit when entering data.	Microsoft Define a data mask. Define and implement duplicate detection rules. Define the data type and format for each column.
The database includes multiple instances of some records.	Define requirements for data entry. Define and implement duplicate detection rules. Define the data type and format for each column.

Answer:

Issue	Solution
Users often encounter a character limit when entering data.	Define a data mask. Define and implement duplicate detection rules. Define the data type and format for each column.
The database includes multiple instances of some records.	Define requirements for data entry. Define and implement duplicate detection rules. Define the data type and format for each column.

Explanation:

Issue	Solution
Users often encounter a character limit when entering data.	Define a data mask. Define and implement duplicate detection rules. Define the data type and format for each column.
The database includes multiple instances of some records.	Define requirements for data entry. Define and implement duplicate detection rules. Define the data type and format for each column.

Box 1: Define the data type and format for each column

Increase the data type size of the column.

Box 2: Define and implement duplicate detection rules

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/set-up-duplicate-detection-rules-keep-data-clean>

NEW QUESTION: 90

You need to create an Agent security role.

Which three actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add security to the seat entity and assign users to the Agents role.
- B. Add security to the Core Records and assign users to the Customer Service Representative role.
- C. Copy the Microsoft Dataverse Basic User role.
- D. Rename the Customer Service Representative role to Agents.
- E. Copy the Customer Service Representative role.
- F. Name the new role Agents.

Answer: (SHOW ANSWER)

Scenario: The security rule for agents must contain the privileges in the default Customer Service Representative security role.

Create a security role by Copy Role:

Step 1 (E): Copy the Customer Service Representative role.

Step 2 (F): Select the New Role Name.

Step 3: (B): When Copying Role is complete, navigate to each tab, ie Core Records, Business Management, Customization, etc.

Set the privileges on each tab.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/create-edit-security-role>

NEW QUESTION: 91

A company has a Power Apps app and uses Microsoft Dataverse for data storage. The company plans to provide employees the ability to create the following:

- * Data loss prevention (DLP) policies that are at the environment level.
- * Applications that allow employees to access only the activity records that they create.

You need to identify the security roles that the employees require.

Which security roles should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Microsoft Power Platform security roles

Requirement

Create environment-level DLP policies.

Create applications that allow employees to access only the activity records that they create.

Security role

Power Platform administrator

Dynamics 365 administrator

Global admin

Power Platform administrator

System Administrator

System Customizer

Environment Maker

Service Writer

System Administrator

System Customizer

Answer:

Microsoft Power Platform security roles

Requirement

Create environment-level DLP policies.

Create applications that allow employees to access only the activity records that they create.

Security role

Power Platform administrator

Dynamics 365 administrator

Global admin

Power Platform administrator

System Administrator

System Customizer

Environment Maker

Service Writer

System Administrator

System Customizer

Explanation:

Microsoft Power Platform security roles	
Requirement	Security role
Create environment-level DLP policies.	Power Platform administrator
Create applications that allow employees to access only the activity records that they create.	System Customizer

NEW QUESTION: 92

You need to design tables for the solution.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Data type	Technical solution
 Microsoft Job placement record	Custom table Activity table Virtual table
Security clearance record	Lookup (N:1) Choice Lookup (N:N)

Answer:

Data type	Technical solution
Job placement record	Custom table Activity table Virtual table
Security clearance record	Lookup (N:1) Choice Lookup (N:N)

Explanation:

Data type	Technical solution
Job placement record	Custom table Activity table Virtual table
Security clearance record	Lookup (N:1) Choice Lookup (N:N)

Box 1: Virtual Table

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external data source. Virtual tables appear in your app to users as regular table rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

Scenario:

- * First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.
- * The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.
- * The solution must provide a worker appointment booking system that can access worker historical job placement data.
- * First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Box 2: Lookup (N:1)

Each worker can have many security clearances, so need a 1:N relationship.

Scenario: The solution must support tracking of security clearance information for a worker including the date, status, and certifying agency.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-virtual-entities>

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships>

NEW QUESTION: 93

You are assisting an engineering company with a project that will digitally transform the business with a new inspection app. You complete several requirements workshops with technicians and are in the process of confirming the requirements.

You need to classify the functional and non-functional requirements for the client.

How should you classify each requirement? To answer, move the appropriate classifications to the correct requirements. You may use each classification once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Classifications

Functional

Non-functional

Requirement classifications

Requirement

Automatically back up data for disaster recovery.

Attach photos and videos to the current job.

Clear job tasks in an inspection record as they are completed.

Maintain a response time of less than two seconds.

Classification

Answer:

Classifications

Functional

Non-functional

Requirement classifications

Requirement

Automatically back up data for disaster recovery.

Attach photos and videos to the current job.

Clear job tasks in an inspection record as they are completed.

Maintain a response time of less than two seconds.

NEW QUESTION: 94

An organization plans to implement a solution to deliver the complete sales process for its sales teams. The organization does NOT have any physical barcode scanners.

To meet the organization business requirements, the proposed solution must include the following capabilities:

Create and qualify leads to contacts

Generate quotes and convert quotes to orders

Scan product barcodes as part of the order generation process

You need to recommend a solution to help the organization achieve its business requirements.

What should you recommend?

- A. Dynamics 365 mobile app and a Power Apps canvas app
- B. Dynamics 365 for Phones only
- C. Dynamics 365 Customer Service and Dynamics 365 Sales
- D. Unified Service Desk

Answer: A (LEAVE A REPLY)

There is barcode scanner control in Power Apps. The control opens a native scanner on an Android or iOS device. The scanner automatically detects a barcode, a QR code, or a data-matrix code when in view.

Use the Dynamics 365 for phones or Dynamics 365 for tablets app to run customer engagement apps (such as Dynamics 365 Sales, Dynamics 365 Customer Service, and Dynamics 365 Marketing), built on Microsoft Dataverse on your mobile device.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/field-service/mobile-power-app-system-barcode-scanning>
<https://docs.microsoft.com/en-us/dynamics365/mobile-app/overview>

NEW QUESTION: 95

You are performing a requirements analysis for a customer.

The customer provides the following requirements:

- * Power Platform storage capacity must remain under 100 percent.
- * Customer service representatives must be sent an email when they are assigned a case.
- * Help desk technicians must be shown an error message when they try to delete a task row.
- * The plug-in pass rate must remain over 99 percent for the production environment.

You need determine if the requirements are functional or non-functional.

Which requirement type should you use? To answer, drag the appropriate requirement types to the correct requirements. Each requirement type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Requirement types	Requirement	Requirement type
	Power Platform storage capacity must remain under 100 percent.	
Functional	Customer Service representatives must be sent an email when they are assigned a case.	
Non-functional	Help desk technicians must be shown an error message when they try to delete a task row.	
	The plug-in pass rate must remain over 99 percent for the production environment.	

Answer:

Requirement types	Requirement	Requirement type
	Power Platform storage capacity must remain under 100 percent.	Non-functional
Functional	Customer Service representatives must be sent an email when they are assigned a case.	Functional
Non-functional	Help desk technicians must be shown an error message when they try to delete a task row.	Functional
	The plug-in pass rate must remain over 99 percent for the production environment.	Non-functional

Explanation:

Requirement	Requirement type
Power Platform storage capacity must remain under 100 percent.	Non-functional
Customer Service representatives must be sent an email when they are assigned a case.	Functional
Help desk technicians must be shown an error message when they try to delete a task row.	Functional
The plug-in pass rate must remain over 99 percent for the production environment.	Non-functional

Box 1: Non-functional

Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

Box 2: Functional

Functional requirements describe what the solution needs to do or its behaviors.

Box 3: Functional

Box 4: Non-functional

Examples of common non-functional requirement types include:

- * Availability
- * Compliance/regulatory
- * Data retention/residency
- * Performance (response time, and so on)
- * Privacy
- * Recovery time
- * Security
- * Scalability

Reference:

<https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/3-functional-requirements>

<https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements>

NEW QUESTION: 96

You are designing a Microsoft Power Platform solution for an automobile parts manufacturer. You create the following tables:

Table	Comments
Assemblies	For each assembly record, there will be one or more rows in the Parts table. When the ownership for an assembly record changes, the related parts records must be updated.
Parts	Rows in the Parts table must not be deleted when an assembly is deleted.

You need to recommend a relationship behavior.

Which relationship behavior should you recommend?

- A. Referential, Restrict Delete
- B. Custom
- C. Parental
- D. Referential, Remove Link

Answer: B ([LEAVE A REPLY](#))

Restrict Delete: Prevent the Referenced table record from being deleted when referencing tables exist.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/configure-entity-relationship-cascading-behavior>

NEW QUESTION: 97

A company uses a third-party cloud-based app to make real-time business decisions. The app has a RESTful API.

You must design a Microsoft Power Platform solution that interacts with the third-party app. Changes made in the Microsoft Power Platform solution must be reflected in the cloud app.

You need to recommend technologies to integrate the Microsoft Power Platform solution with the cloud app.

Which two technologies should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Scheduled Power Automate cloud flow with a custom connector to the cloud app
- B. Power Virtual Agents
- C. Custom plug-on registered with Microsoft Dataverse
- D. Model-driven app

Answer: ([SHOW ANSWER](#)**)**

A: To enable Logic Apps, Power Automate, or Power Apps to communicate with the REST or SOAP API, use a custom connector, which is a wrapper around a REST API (Logic Apps also supports SOAP APIs).

C: Custom APIs are a powerful way to connect to any existing API, hosted anywhere, from PowerApps. You do not need a PowerApps Enterprise subscription to register or use a Custom API.

Custom APIs are RESTful endpoints that you can connect to and use from PowerApps. All you'll need is a Swagger definition file for your endpoint.

Reference:

<https://docs.microsoft.com/en-us/power-platform/guidance/architecture/real-world-examples/custom-connector-canvas>

<https://powerapps.microsoft.com/hr-hr/blog/register-and-use-custom-apis-in-powerapps/>

NEW QUESTION: 98

A client plans to implement Microsoft Power Platform solutions.

The client identifies the following requirements for handling opportunities:

- * Users must follow the same set of steps each time they process opportunities
- * For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.
- * An error message must display if a follow-up date is not within seven days of the opportunity creation date.

You need to recommend tools to meet the client requirements.

What should you recommend? To answer, drag the appropriate tools to the correct requirement. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION: 99

You are a Power Apps architect for a company. The IT administrator designs a Power Apps app that is ready to be tested. The company uses application lifecycle management (ALM).

Each version and solution component must be tracked as it is tested.

You need to recommend a strategy to deploy solutions for the user acceptance testing environment.

What should you recommend?

- A. Use Package Deployer and deploy a managed solution.
- B. Use Package Deployer and deploy an unmanaged solution.
- C. Use Solution Packager and deploy a managed solution.
- D. Use Solution Packager and deploy an unmanaged solution.

Answer: A ([LEAVE A REPLY](#))

Solution Packager is a tool that can unpack a compressed solution file into multiple XML files and other files, so they can be easily managed by a source control system.

Unmanaged solution: An open solution with no restrictions on what can be added, removed, or modified. This is recommended during development of a solution.

C: Managed solution

A completed solution ready to be imported into an organization. Once imported, components can't be added or removed, although they can optionally allow further customization. This is recommended when development of the solution is complete.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/solution-packager-tool>

NEW QUESTION: 100

You are a Microsoft Power Platform architect.

You need to design a process to transport configuration and test data from one environment to a separate environment Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Import the ZIP file data.

Import the CSV file data.

Define the schema of the source data to be exported.

Use the schema to export data.

Download the Configuration Migration tool from NuGet.

Create personal views to define the source data to be exported.

Download the schema of the source data to be exported.

Download the Configuration Migration tool from AppSource.

Answer area

Import the ZIP file data.

Import the CSV file data.

Define the schema of the source data to be exported.

Use the schema to export data.

Download the Configuration Migration tool from NuGet.

Create personal views to define the source data to be exported.

Download the schema of the source data to be exported.

Download the Configuration Migration tool from AppSource.

Answer area

1

2

3

4

Download the Configuration Migration tool from AppSource.

Define the schema of the source data to be exported.

Use the schema to export data.

Import the ZIP file data.

Explanation:

Actions

Download the schema of the source data to be exported.
Create personal views to define the source data to be exported.
Import the CSV file data.
Download the Configuration Migration tool from AppSource.

Answer area

1 Download the Configuration Migration tool from NuGet.
2 Define the schema of the source data to be exported.
3 Use the schema to export data.
4 Import the ZIP file data.

NEW QUESTION: 101

You need to recommend a feature that erases agent workloads and resolves reported issues.

What should you recommend?

- A. Dynamics 365 Customer Service default functionality
- B. Microsoft AppSource
- C. Microsoft Store

Answer: (SHOW ANSWER)

Scenario: Agents need a way to track reservation issues.

Use Dynamics 365 Customer Service to:

Track customer issues through cases

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-service/overview>

NEW QUESTION: 102

A company plans to use a combination of model-driven and canvas apps for data interaction and Power BI for data reporting. The company has the following requirements:

- * Share a canvas app with the auditor team.
- * Ensure account balance values in Power BI are only viewable by the investment team.
- * Streamline user administration and role assignment.

You need to recommend a security component to use for each requirement.

Which security components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Share a canvas app.

Control account balance visibility.

Streamline user administration and role assignment.

Security component

Microsoft Entra ID security group

Security roles

Column-level security

Manager hierarchy model

Microsoft Entra ID security group

Report access

Report access

Column-level security

Microsoft Entra ID security group

Manager hierarchy model

Security roles

Column-level security

Manager hierarchy model

Microsoft Entra ID security group

Answer:

Answer Area

Requirement

Share a canvas app.

Control account balance visibility.

Streamline user administration and role assignment.

Microsoft

Security component

Microsoft Entra ID security group

Security roles

Column-level security

Manager hierarchy model

Microsoft Entra ID security group

Report access

Report access

Column-level security

Microsoft Entra ID security group

Manager hierarchy model

Security roles

Column-level security

Manager hierarchy model

Microsoft Entra ID security group

Explanation:

Answer Area	
Requirement	Security component
Share a canvas app.	Microsoft Entra ID security group
Control account balance visibility.	Report access
Streamline user administration and role assignment.	Manager hierarchy model

NEW QUESTION: 103

You are designing a Microsoft Power Platform solution that uses Microsoft Dataverse.
You need to recommend a way to update currency exchange rates within Microsoft Dataverse.
What are two possible ways to achieve this goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Review AppSource for prebuilt solutions.
- B. Create a Power Automate flow that uses a custom connection or HTTP request to an outside source for exchange rates.
- C. Embed an iframe that points to a currency exchange service into a model-driven app.
- D. Use the Power BI connector to establish a link that updates Microsoft Dataverse with the current exchange rate.

Answer: (SHOW ANSWER)

B: We need is a source for exchange rates. There are some published connectors, but you also use a free service called Exchange Rates API, which are based on the European Central Bank, and create a custom connection.
Now that we have our custom connector defined and have a way to request the latest exchange rates, the next step is to create a Power Automate flow that will update all of currencies setup in our Dataverse environment.
Dataverse is a multicurrency system, in which each record can be associated with its own currency. This currency is called the transaction currency. The multicurrency features enable users to perform financial transactions like opportunities, quotes, orders, and invoices in multiple currencies. This feature also provides a currency choice to the end user when a financial transaction occurs.
Reference:
<https://readyxrm.blog/2021/03/10/updating-currency-exchange-rates-in-dataverse/>

NEW QUESTION: 104

A company uses Microsoft Power Platform. The company plans to expand to other countries/regions. The chief operating officer (COO) must assess compliance risks related to the planned expansion. You need to direct the COO to the compliance information. Where should you direct the COO?
A. Microsoft 365 admin center
B. Microsoft Trust Center
C. Microsoft Defender
D. Microsoft Power Platform admin center
Answer: B (LEAVE A REPLY)

NEW QUESTION: 105

A customer requires information about how to ensure key success criteria will be met at the end of a project.
You need to describe how the key success criteria will be managed.
Which actions should you describe? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Actions to manage key success criteria

Requirement

Define how the key success criteria will be met.

Manage adjustments to scope to meet key success criteria.

 Microsoft

Action

Manage activity in the presales and initiation phase.

Manage activity in the presales and initiation phase.

Manage activity in the implementation phase.

Manage activity in the operation phase.

Perform change management.

Update the project charter.

Perform change management.

Communicate variance to stakeholders.

Answer:

Actions to manage key success criteria

Requirement

Define how the key success criteria will be met.

Manage adjustments to scope to meet key success criteria.

 Microsoft

Action

Manage activity in the presales and initiation phase.

Manage activity in the presales and initiation phase.

Manage activity in the implementation phase.

Manage activity in the operation phase.

Perform change management.

Update the project charter.

Perform change management.

Communicate variance to stakeholders.

Explanation:

Actions to manage key success criteria

Requirement

Define how the key success criteria will be met.

Manage adjustments to scope to meet key success criteria.

 Microsoft

Action

Manage activity in the presales and initiation phase.

Perform change management.

NEW QUESTION: 106

You are a Microsoft Power Platform architect.
You have identified several project risks.
You need to categorize potential risks that are specific to your customer.
How should you categorize the risks? To answer, drag the appropriate categories to the correct risks. Each category may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Categories	Answer Area	Risk	Category
Resource risk		The project requires integration to custom-built on-premises systems that store business-sensitive data.	
Business risk		The organization is currently making significant go-to-market strategy adjustments.	
External risk		The customer has a limited budget in relation to the project requirements.	
Security risk			

Answer:

Categories	Answer Area	Risk	Category
Resource risk		The project requires integration to custom-built on-premises systems that store business-sensitive data.	Security risk
Business risk		The organization is currently making significant go-to-market strategy adjustments.	Business risk
External risk		The customer has a limited budget in relation to the project requirements.	Resource risk
Security risk			

Explanation:

Categories	Answer Area	Risk	Category
Resource risk		The project requires integration to custom-built on-premises systems that store business-sensitive data.	Security risk
Business risk		The organization is currently making significant go-to-market strategy adjustments.	Business risk
External risk		The customer has a limited budget in relation to the project requirements.	Resource risk

NEW QUESTION: 107

You need to design the security strategy for employees.

What should you use?

- A. a You need to identify a product that can perform the functions of the current tools with model
- B. one business unit with one security role and a hierarchy security model

- C. a business unit for each department with one security role
- D. one business unit with a security role for each department

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 108

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database.

You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Install the Power Automate app in Microsoft Teams.

Create a cloud flow for approval to add data to the SQL Server database.

Does the solution meet the goal?

A. No

B. Yes

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 109

A client uses Dynamics 365 Sales, Power BI datasets, and Power BI dataflows.

The Dynamics 365 Sales implementation has security roles that restrict data export. You need to ensure that data has the same restrictions in Power BI as it does in Dynamics 365 Sales.

You need to design the security to avoid sensitive data from being seen.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Use Microsoft Dataverse restrictions before setting up the Power BI reports.

B. Limit the role in Dynamics 365 Sales to only data allowed so it cannot be exported to Microsoft Excel.

C. Limit the role and ensure that exporting to Microsoft Excel is not allowed in both Dynamics 365 Sales and Power BI.

D. Share Power BI dashboards only with users who are supported to see this data.

Answer: C,D ([LEAVE A REPLY](#))

A: When you share a dashboard or report, the people you share it with can view it and interact with it, but can

' t edit it. They see the same data that you see in the dashboard and reports and get access to the entire underlying dataset unless row-level security (RLS) is applied to the underlying dataset.

B: Depending on the sensitivity of an organization ' s data, it is often necessary to disable the ability to export or print reports.

Reference:

<https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards>

NEW QUESTION: 110

You are designing a Microsoft Power Platform solution for a company.

Which components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Component

Allow users to change the status of a record only if a custom column named Reason is populated.

	▼
Business rule	
Power Automate flow	
Asynchronous plug-in	
Background workflow	

Prompt users to update each opportunity product record when an opportunity is won or lost.

	▼
JavaScript code	
Real-time workflow	
Power Automate flow	
Asynchronous plug-in	

Answer:

**Requirement**

Component

Allow users to change the status of a record only if a custom column named Reason is populated.

	▼
Business rule	
Power Automate flow	
Asynchronous plug-in	
Background workflow	

Prompt users to update each opportunity product record when an opportunity is won or lost.

	▼
JavaScript code	
Real-time workflow	
Power Automate flow	
Asynchronous plug-in	

Explanation:

Requirement	Component
Allow users to change the status of a record only if a custom column named Reason is populated.	▼ Business rule Power Automate flow Asynchronous plug-in Background workflow
Prompt users to update each opportunity product record when an opportunity is won or lost.	▼ JavaScript code Real-time workflow Power Automate flow Asynchronous plug-in

Box 1: Business rule

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Box 2: Power Automate flow

Trigger the Power Automate flow with "When a record is updated", then add a Condition in the flow and configure it with Status Label equals to Won.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-create-business-rule>

<https://www.inogic.com/blog/2021/12/how-to-win-lose-dynamics-365-crm-opportunity-through-power-automate-flow/>

NEW QUESTION: 111

You are a Microsoft Power Platform architect designing a solution.

You must use a custom connector to integrate Power Automate with a data source.

You need to authenticate the connector with the data source.

Which three authentication methods can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Generic OAuth 2.0

B. API Key

C. Basic authentication

D. Pass-through

E. OpenID Connect (OIDC)

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 112

You are documenting a company's current enterprise architecture. You need to evaluate the architecture of the data to identify its influences. Which three data influences should you ask the company about?

Each correct answer presents a complete solution. Choose three. NOTE: Each correct selection is worth one point.

- A. pain points
- B. history
- C. user access
- D. location
- E. quality

Answer: B,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 113

You are a Power Platform consultant for an internet support company.

The company lacks a budget to buy third-party ISVs or add-ons.

The company requires a new system that achieves the following:

- * All support issues must come in by email, need to be logged, and assigned to the support group.
- * Accounts must synchronize with the parent company Oracle database.
- * Reports must be sent to the executives on a weekly basis.
- * No custom code will be used in the system.

You need to recommend the components that should be configured.

Which two components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Power Virtual Agents
- B. Microsoft Dataverse
- C. server-side synchronization
- D. Microsoft Customer Voice

Answer: B,C ([LEAVE A REPLY](#))

The Dynamics 365 Customer Voice data is stored in Microsoft Dataverse.

Dynamics 365 Customer Voice is an enterprise feedback management application you can use to easily keep track of the customer metrics that matter the most to your business. ... It provides a personalized experience, enabling you to collect customer feedback and get relevant insights quickly and easily, all in a few clicks.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-voice/about>

<https://docs.microsoft.com/en-us/dynamics365/customer-voice/data-flow>

NEW QUESTION: 114

A company uses manual processes to track interactions with customers. The company wants to use Power Platform to improve productivity.

The company has the following requirements:

Provide customers with an online portal where they can submit and review cases.

Ensure that customers can chat online with a customer service representative at any time.

Route chats to customer service representatives based on skill and availability.

You need to recommend a solution to the company.

Which three components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Dynamics 365 Virtual Agents chatbots
- B. Customer self-service portal

- C. Dynamics 365 Field Service
- D. Business process flows
- E. Omnichannel for Customer Service

Answer: B,D,E (LEAVE A REPLY)

B: Customer self-service portal: A customer self-service portal enables customers to access self-service knowledge, support resources, view the progress of their cases, and provide feedback.

Note: Based on the selected environment in Power Apps, you can create a Dataverse starter portal or a portal in an environment containing customer engagement apps (Dynamics 365 Sales, Dynamics 365 Customer Service, Dynamics 365 Field Service, Dynamics 365 Marketing, and Dynamics 365 Project Service Automation).

E: Omnichannel for Customer Service offers a suite of capabilities that extend the power of Dynamics 365 Customer Service Enterprise to enable organizations to instantly connect and engage with their customers across digital messaging channels.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/portal-templates>

<https://docs.microsoft.com/en-us/dynamics365/customer-service/embed-chat-widget-portal>

NEW QUESTION: 115

A company plans to create a Power Platform solution that integrates with Dynamics 365 Sales.

The solution must meet the following requirements:

- * Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.
- * An external system needs to send data to the company's Dynamics 365 Sales solution.

You need to recommend the most suitable solution to integrate Dynamics 365 Sales with both systems.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Integration requirement	Solutions
Have read-only visibility of data from an external Azure SQL database.	Use virtual tables. Use a custom plug-in. Use Dynamics 365 Web API. Use a web resource to display data.
External system sends data to Dynamics 365 Sales.	Use a custom plug-in. Use Dynamics 365 Web API. Use a web resource to display data.

Answer:

Integration requirement

Solutions

Have read-only visibility of data from an external Azure SQL database.

Use virtual tables. 

Use a custom plug-in.

Use Dynamics 365 Web API.

Use a web resource to display data.

External system sends data to Dynamics 365 Sales.

Use a custom plug-in.

Use Dynamics 365 Web API. 

Use a web resource to display data.

Explanation:

Integration requirement

Solutions

Have read-only visibility of data from an external Azure SQL database.

Use virtual tables. 

Use a custom plug-in.

Use Dynamics 365 Web API.

Use a web resource to display data.

External system sends data to Dynamics 365 Sales.

Use a custom plug-in.

Use Dynamics 365 Web API. 

Use a web resource to display data.

Box 1: Use Virtual tables

A virtual entity is a custom entity in Dynamics 365 Customer Engagement (on-premises) that has fields containing data from an external data source. Virtual entities appear in your app to users as regular entity records, but contain data that is sourced from an external database, such as an Azure SQL Database. Records based on virtual entities are available in all clients including custom clients developed using the Dynamics 365 Customer Engagement Web Services.

Box 2: Use Dynamics 365 Web API.

Dynamics 365 Web Services API: Many times, straight database-to-database integrations aren't a possibility.

In these cases, the development of a solution may depend on utilization of the Dynamics 365 Customer Engagement web services API (Application Programming Interface).

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/create-edit-virtual-entities>

NEW QUESTION: 116

You need to resolve the deployment plan issue.

What should you request?

- A.** the project manager adds a risk assessment
- B.** the project manager adds a testing plan
- C.** the IT manager adds a responsibility matrix
- D.** the IT manager adds a data migration strategy

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 117

You are designing a Microsoft Power Platform solution for a customer.

The customer is developing an application that needs to use an existing Microsoft SharePoint list The application must be able to:

* allow view access for external customers.

* use out-of-the-box processes for access for employees.

You need to recommend components for the application.

Which two components should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A.** Canvas app
- B.** Custom pages
- C.** Model-driven app
- D.** Power Pages

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 118

You need to recommend solutions for the organization's technical challenges.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Provide workers a self-service option for viewing personal and skills information.	▼ Power Automate QnA Maker Azure Cognitive Services
Authenticate workers who use the self-service option for updating skills information.	▼ Azure Active Directory B2B Azure Active Directory B2C Dynamics 365 owner team
Plan routes for audit teams.	▼ Azure traffic routing Address input component Dynamics 365 Field Service

Answer:

Requirement	Solution
Provide workers a self-service option for viewing personal and skills information.	▼ Power Automate QnA Maker Azure Cognitive Services
Authenticate workers who use the self-service option for updating skills information.	▼ Azure Active Directory B2B Azure Active Directory B2C Dynamics 365 owner team
Plan routes for audit teams.	▼ Azure traffic routing Address input component Dynamics 365 Field Service

Explanation:

Requirement	Solution
Provide workers a self-service option for viewing personal and skills information.	▼ Power Automate QnA Maker Azure Cognitive Services
Authenticate workers who use the self-service option for updating skills information.	▼ Azure Active Directory B2B Azure Active Directory B2C Dynamics 365 owner team
Plan routes for audit teams.	▼ Azure traffic routing Address input component Dynamics 365 Field Service

Box 1: Power Automate

Self-service purchase is available for Power Platform (Power BI, Power Apps, and Power Automate), Project, and Visio.

Box 2: Azure Active Directory B2B

Scenario: First Up Consulting recruits information technology (IT) workers for temporary or permanent positions at client companies.

Azure Active Directory (Azure AD) business-to-business (B2B) collaboration is a feature within External Identities that lets you invite guest users to collaborate with your organization. With B2B collaboration, you can securely share your company ' s applications and services with guest users from any other organization, while maintaining control over your own corporate data. Work safely and securely with external partners, large or small, even if they don ' t have Azure AD or an IT department. A simple invitation and redemption process lets partners use their own credentials to access your company ' s resources.

Note, Scenario:

Workers must be able to sign into a portal by using their own email address. Workers must be required to use a secure method of authentication to be able to view their data.

User security roles must be customized to ensure that users are able to interact only with the specific data in which they need access.

Box 3: Dynamics 365 Field Service

Dynamics 365 Field Service functionality include:

An interactive schedule board helps dispatchers assign work orders to the best resources based on location, availability, skill set, priority, and more. This is done via a manual drag-and-drop method, a semi-automated scheduling assistant, or fully automated with Resource Scheduling Optimization.

The schedule board displays each resource--whether an employee, contractor, or equipment--and their scheduled work orders. Resources and their assigned jobs are also displayed on a map along with routes and traffic patterns in real time.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/commerce/subscriptions/self-service-purchase-faq>

<https://docs.microsoft.com/en-us/azure/active-directory/external-identities/what-is-b2b>

<https://docs.microsoft.com/en-us/dynamics365/field-service/overview>

NEW QUESTION: 119

A retail company runs a Microsoft Power Automate flow that notifies customers when their orders are shipped.

The flow runs under a service account that experienced much higher API transaction volumes over the last 12 hours due to a sales promotion. An administrator reports that the flow is often delayed and sometimes fails to send the customer notification. You need to validate the platform limit the flow is encountering. Which platform limit is disrupting the flow?

- A. Microsoft Power Automate API Request limit
- B. Service protection API limit
- C. User entitlement limit
- D. Microsoft Dataverse storage capacity limit
- E. Microsoft Power Apps API Request limit

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 120

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Power Platform application.

Employees report that they are unable to open the application.

You need to ensure that the employees can access the application.

Solution: Add the employees to a security group and assign the security group to a Microsoft Teams team.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B ([LEAVE A REPLY](#))
