NEW QUESTION: 1
A company uses Microsoft 365, SharePoint Online, and Microsoft Teams.
You need to recommend tools to build a solution that meets the following requirements:
- Synchronize data daily from an external Microsoft SQL Server
instance.
- Send a report automatically to specific company executives.
- Ensure that approvals are routed to the correct company executive.
Which two tools or components should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Microsoft Excel
B. Power Automate
C. Microsoft Word
D. Power BI
E. Microsoft Dataverse
Answer: (SHOW ANSWER)
The two best tools for this scenario are Power Automate and Power BI.
Power Automate: This tool is designed to handle daily data synchronization via scheduled cloud flows and data gateways, as well as routing approvals to executives using its built-in Approvals connector, which integrates seamlessly with Microsoft Teams and SharePoint Online.
Power BI: This tool is built specifically for data visualization and reporting. It perfectly addresses sending reports automatically by allowing you to schedule automated data refreshes from SQL Server and set up email report subscriptions or alerts for specific company executives.

NEW QUESTION: 2
Drag and Drop Question
You need to deploy a Power Pages site by using a template.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

NEW QUESTION: 3
A company uses Power Platform.
You must ensure that users cannot share customer data with other users.
You must also ensure that uses cannot connect to data sources unless you grant the user explicit permissions to access a data source.
You need to recommend solutions to meet the company's security requirements.
Which two types of policies should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Office cloud policies
B. Group Policy Objects
C. environment-level policies
D. tenant-level policies
E. preset security policies
Answer: (SHOW ANSWER)
You can create data loss prevention (DLP) policies that can act as guardrails to help prevent users from unintentionally exposing organizational data. DLP policies can be scoped at the environment level or tenant level, offering flexibility to craft sensible policies that strike the right balance between protection and productivity. For tenant-level policies you can define the scope to be all environments, selected environments, or all environments except ones you specifically exclude. Environment-level policies can be defined for one environment at a time.
https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention

https://docs.microsoft.com/en-us/power-platform/admin/create-dlp-policy

NEW QUESTION: 4
Which of the following solution will quickly enable TPT Limited a Logistics company with multiple warehouses, to calculate tax rates on sales orders based on locality and region?
A. Implement the Common Data Model.
B. Check AppSource for a tax add-on.
C. Run a Power BI report.
D. Create alerts in Dynamics 365 Finance for tax table changes.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 5
A company plans to implement a ticketing application using Microsoft Dataverse.
The company plans to deploy a portal that connects to the ticketing application. Customers must be able to log in and access details about open cases.
You need to identify the Microsoft Power Platform capability that provides the required functionality.
Which solution should you use?
A. Power Pages site
B. Model-driven app
C. Canvas app
Answer: A (LEAVE A REPLY)
The ability to show and interact with Dataverse data on a website is a central benefit of implementing a Microsoft Power Pages website.
Reference:
https://learn.microsoft.com/en-us/training/modules/power-pages-dataverse/

NEW QUESTION: 6
Hotspot Question
An organization is considering using Power Platform to improve business processes.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

	Yes	No
You can add a custom Microsoft Dataverse entity to the Dynamics 365 Sales Hub navigation.	○	○
You can embed a Power Platform canvas app in your organization's Microsoft Teams channel.	○	○

freepdfdumps.com
Microsoft

Answer:

	Yes	No
You can add a custom Microsoft Dataverse entity to the Dynamics 365 Sales Hub navigation.	○	○
You can embed a Power Platform canvas app in your organization's Microsoft Teams channel.	○	○

NEW QUESTION: 7
Hotspot Question
A company plans to use Power BI to visualize data.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

	Yes	No
Power BI allows users to create and consume visualizations in one view by using data from several different sources.	○	○
Power Platform uses Microsoft SharePoint Online lists to securely store and manage data used by business applications.	○	○

Answer:

Answer Area

	Yes	No
Power BI allows users to create and consume visualizations in one view by using data from several different sources.	○	○
Power Platform uses Microsoft SharePoint Online lists to securely store and manage data used by business applications.	○	○

NEW QUESTION: 8
Hotspot Question
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

	Yes	No
You can customize buttons and menu items in canvas apps but cannot reorder the screens.	○	○
You can add sections to your canvas app forms at any time. Screens can only be added when the canvas app is created.	○	○
You can edit buttons in a Power Apps app only by using a third-party application.	○	○

freepdfdumps.com

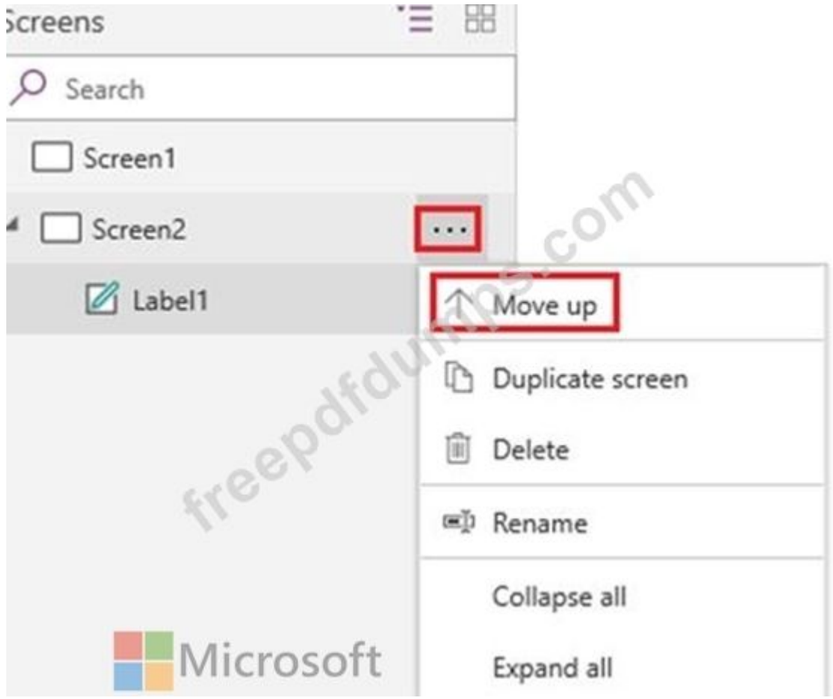

Answer:

Answer Area

	Yes	No
You can customize buttons and menu items in canvas apps but cannot reorder the screens.	○	○
You can add sections to your canvas app forms at any time. Screens can only be added when the canvas app is created.	○	○
You can edit buttons in a Power Apps app only by using a third-party application.	○	○

freepdfdumps.com
Microsoft

Explanation:
Box 1: No
You can reorder screens.
In the left navigation bar, hover over a screen that you want to move up or down, select the ellipsis button that appears, and then select Move up or Move down.

freepdfdumps.com

Box 2: No
You can add screens to the app after it has been created.
Box 3: No
For example, you can change a button's shape. By default, Power Apps creates a rectangular Button control with rounded corners. You can make basic modifications to the shape of a Button control by setting its Height, Width, and Radius properties.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-screen-context-variables
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-button

NEW QUESTION: 9
Drag and Drop Question
A project deadline is approaching. The project manager reports that there are still a number of critical tasks that are not complete.
You need to implement Power Automate to help streamline processes.
Which types of flows should you use? To answer, drag the appropriate flow types to the correct requirement. Each flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Flow types

- automated
- instant
- scheduled
- business process

Answer Area

Requirement	Flow type
Ensure that all of the steps for completing tasks are consistently followed by all team members.	
Allow users to send an email to the project lead whenever a task is completed.	
Automatically send a list of completed tasks at the end of each week.	

Microsoft
freepdfdumps.com

Answer:

Flow types

- automated

Answer Area

Requirement	Flow type
Ensure that all of the steps for completing tasks are consistently followed by all team members.	business process
Allow users to send an email to the project lead whenever a task is completed.	instant
Automatically send a list of completed tasks at the end of each week.	scheduled

Explanation:

Automated flows Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.

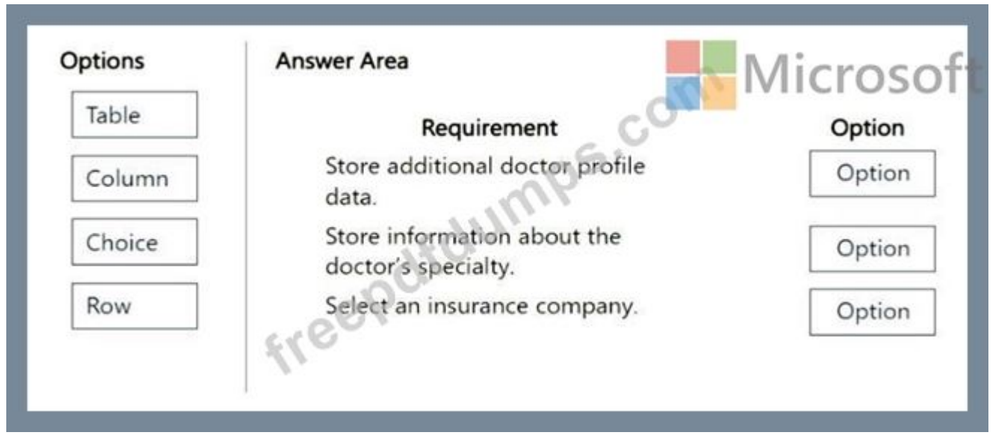

Instant flows Start an automation with a click of a button. You can automate for repetitive tasks from your Desktop or Mobile devices. For example, instantly send a reminder to the team with a push of a button from your mobile device.

Scheduled flows Schedule an automation such as daily data upload to SharePoint or a database.
Business process flows provide a guide for people to get work done. They provide a streamlined user experience that leads people through the processes their organization has defined for interactions that need to be advanced to a conclusion of some kind.

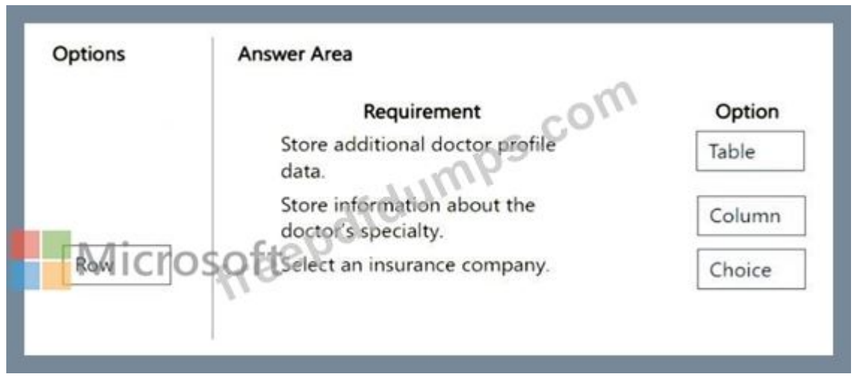

NEW QUESTION: 10
A company uses a model-driven app. You add several columns to a form. Users state the new columns do not appear on the form. You need to fix the issue. What should you do?
A. Ensure columns are in one section of the form only.
B. Copy the form and rename it.
C. Publish the form.
D. Create a Power Automate flow.
E. Create a business rule.
Answer: (SHOW ANSWER)
If users are stating that new columns are not appearing on a form, the most likely cause is that the form has not been published with the latest changes. Publishing the form will make the new columns visible to users.

NEW QUESTION: 11
A hotel develops a housekeeping checklist for its housekeeping staff to use when they finish cleaning a room.
The housekeeping staff must be able to use their mobile device to add a check mark for each completed task and take a picture of the prepared bed.
The results of the checklist for each room must be stored in a SharePoint list.
You need to select the Microsoft Power Platform component that fulfills the requirement.
Which component should you select?
A. Model-driven app
B. Power BI report
C. Canvas app
D. Power Pages site
E. Power Virtual Agents chatbot
Answer: (SHOW ANSWER)

NEW QUESTION: 12
Drag and Drop Question
A medical office has a model-driven app that uses Microsoft Dataverse.
You plan to create a screen that allows users to capture information about doctors. The screen must provide users the ability to enter or select the following information:
- a place to enter doctor profile data that is not part of the account
table or the contact table
- a place to enter the doctor's specialty in the profile form
- a column for insurance with the ability to pick one of 10 different
insurance companies
You need to store the captured data in Microsoft Dataverse.
What should you use to store the data? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 13

A company is undergoing a digital transformation by using Microsoft Power Platform.

Departments in the company have the following requirements:

Department	Requirement
Customer service	Allow customers without Microsoft Power Platform licenses to create their own account and log customer service tickets themselves.
Facilities	Allow technicians to take photos of warehouse equipment with their mobile devices and record details about equipment condition.
Finance	Automatically copy details from invoices received in a shared mailbox into the finance system.
Marketing	Create a list of key words and phrases used by customers who provided feedback.

You need to determine which department can use a canvas app to meet its requirement.

For which department should you develop a canvas app?

A. Customer service

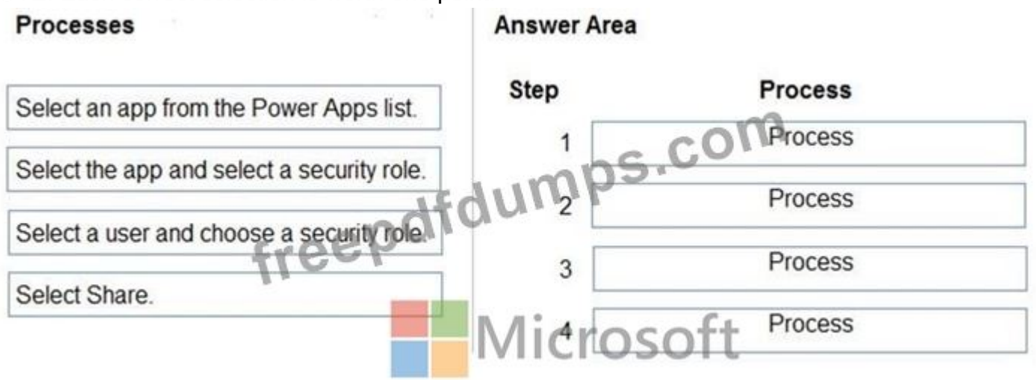

B. Marketing

C. Facilities

D. Finance

Answer: C (LEAVE A REPLY)

NEW QUESTION: 14
Drag and Drop Question
You create a model-driven app.
The app is ready to be shared.
You need to complete the process required to set the app up to be shared.
How should you complete the process for setting up the app to be shared? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
https://docs.microsoft.com/en us/powerapps/maker/model-driven-apps/share-model-driven-app

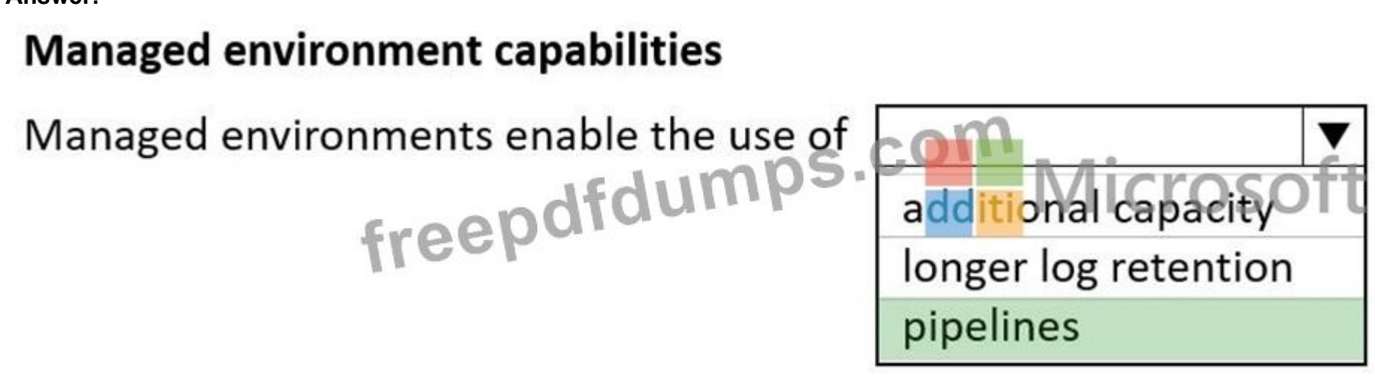

NEW QUESTION: 15
A company wants users to start using Power Automate to improve personal productivity.
You need to create a flow.

Which two elements must you include? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. expression
B. condition
C. action
D. trigger
Answer: C,D (LEAVE A REPLY)
Every flow has two main parts: a trigger, and one or more actions.
Reference:
https://docs.microsoft.com/en-us/learn/modules/get-started-flows/2-create-first-flow

NEW QUESTION: 16
Hotspot Question
A company is implementing Microsoft Power Platform.
Select the answer that correctly completes the sentence.

NEW QUESTION: 17
An enterprise company is evaluating the Microsoft Power Platform security model.
You need to identify the lowest possible level that the authorization can be applied against.
Which level should you identify?
A. environment
B. row
C. column
D. tenant
Answer: A (LEAVE A REPLY)

NEW QUESTION: 18
A shipping company is evaluating Microsoft Power Platform services and capabilities.
The company requires an app that can track and manage stock items. The company has no existing data or images to assist with app creation.
You need to demonstrate the ease of the process to create an app and a data model by using natural language.
Which platform feature or option should you use for the demonstration?
A. Copilot
B. Start with data
C. Start from an image
D. Power Automate
E. AI Builder
Answer: A (LEAVE A REPLY)
Use Copilot to create and understand Power Fx as well as rich data models Some developers want to use low-code to automate the mundane aspects of building an app.
Others inherit low-code apps from colleagues and need to quickly get up to speed. Regardless of the circumstance, Copilot in Microsoft Power Apps is now your intelligent companion that explains any formula you select, right in the formula bar.
Coders can copy and insert the explanation as a code comment or share it with others who are working on the same app.
Developers can also write comments in natural language and have Copilot suggest a formula in Power Fx directly in the typing loop, in a similar fashion to GitHub Copilot.
Reference:
https://learn.microsoft.com/en-us/ai-builder/use-in-powerapps-overview
https://www.microsoft.com/en-us/power-platform/blog/power-apps/power-apps-is-making-it-easier-for-developers-to-build-with-microsoft-copilot-and-each-other/#Copilot-PowerFx

NEW QUESTION: 19
A company uses Dynamics 365 Supply Chain Management.
You need to use Power Automate to automate the process of receiving and tracking raw materials.
Which type of connector should you use?
A. Common Data Service
B. Dynamics 365

C. Dynamics 365 for Fin & Ops
D. Dynamic Signal
Answer: A (LEAVE A REPLY)
Dynamics 365 for Finance and Operations is now being licensed as Dynamics 365 Finance and Dynamics 365 Supply Chain Management.
You can use Common Data Service to enable the flow of data between Finance and Operations apps and Dynamics 365 Sales.
Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/data-integration-cds

NEW QUESTION: 20
Hotspot Question
You are creating a model-driven Power Apps app. You want to ensure that the app can be used by individuals who have vision impairments.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statement	Yes	No
Power Apps apps can be built with hot key support and designed so they do not require a touch screen or mouse.	○	○
Only model-driven Power Apps have support for using a screen reader without the need for a connector.	○	○
The accessibility checker can be run for your Power Apps app to provide notifications of accessibility violations as well as tips for making it even more user friendly.	○	○

Only model-driven Power Apps have support for using a screen reader without the need for a connector.	○	○
The accessibility checker can be run for your Power Apps app to provide notifications of accessibility violations as well as tips for making it even more user friendly.	○	○

freepdfdumps.com

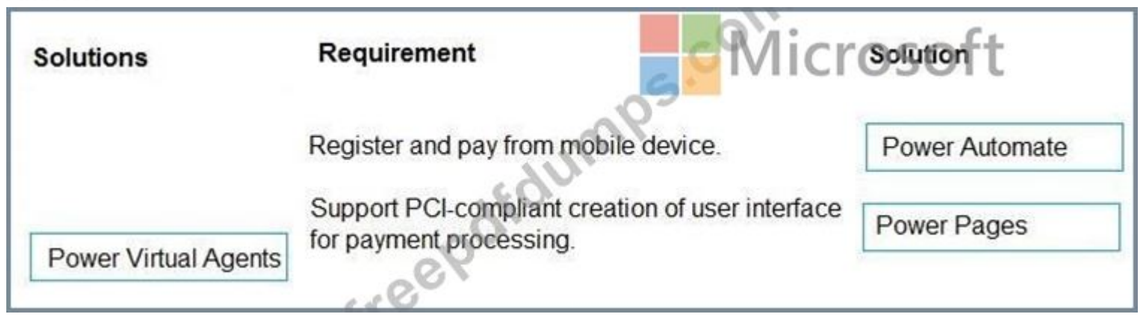

Microsoft

Explanation:
Box 1: Yes
You can use keyboard shortcuts in PowerApps. Keyboard shortcuts give you an alternate way to do common tasks instead of using your mouse or tapping with your finger. They help in seamless navigation of the interface.
Box 2: No
The following software combinations are the supported recommendations for consuming PowerApps with a screen reader:
Windows: Microsoft Edge / Narrator
macOS: Safari / VoiceOver
Android: PowerApps app / Talkback
iOS: PowerApps app / VoiceOver
Box 3: Yes
Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the Accessibility checker in PowerApps Studio. This tool not only finds potential accessibility issues but also explains why each might be a potential problem for users who have a specific disability and offers suggestions on how to resolve each issue. The Accessibility checker detects screen-reader and keyboard issues for you, and you can find information about how to fix color-contrast issues by using accessible colors.
Reference:
https://docs.microsoft.com/en-us/powerapps/user/keyboard-shortcuts
https://docs.microsoft.com/en-us/powerapps/user/screen-reader
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker

NEW QUESTION: 21
Drag and Drop Question
A company has an upcoming seminar. The invitation will be sent to an existing customer base.
The event manager wants the customers to register and prepay from their mobile devices. The chief security officer requires any technology with payment data to be PCI compliant.
You need to identify the components of the solution.
What should you identify to meet the requirements? To answer, move the appropriate solutions to the correct requirements. You may use each solution once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

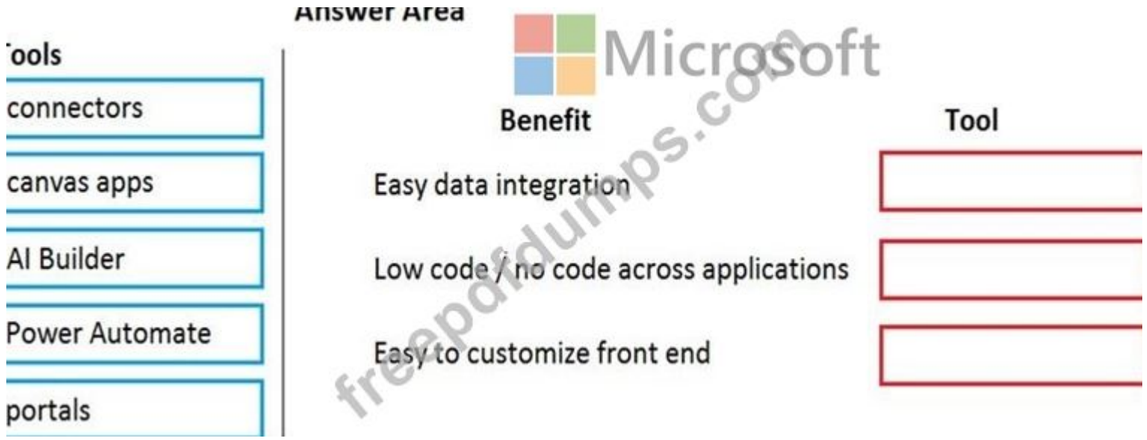

NEW QUESTION: 22
User1 creates several Power BI dashboards for a company. User1 shares a dashboard with User2 who works for another company. User2 reports that she is able to view the dashboard.
User2 forwards the email containing the dashboard sharing link that she received to User3.
User3 reports that he receives an error message when he selects the link to view the dashboard.
User3 can view a dashboard that he has created.
You need to determine why User3 receives an error.
What is the issue?
A. Forwarding the email does not share the dashboard with User3.
B. User3 is running an out-of-date version of Power BI and must upgrade to a newer version.
C. User1 is signed in using the wrong organizational account for Power BI.
D. User2 is signed in to the dashboard and must sign out before User3 can sign in.
Answer: A (LEAVE A REPLY)
When you share a report or dashboard, the people you share it with can view it and interact with it, but can't edit it. The recipients see the same data that you see in the reports and dashboards.
They also get access to the entire underlying dataset, unless row-level security (RLS) is applied to it. The coworkers you share with can reshare with their coworkers if you allow them to.
Reference:

https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards

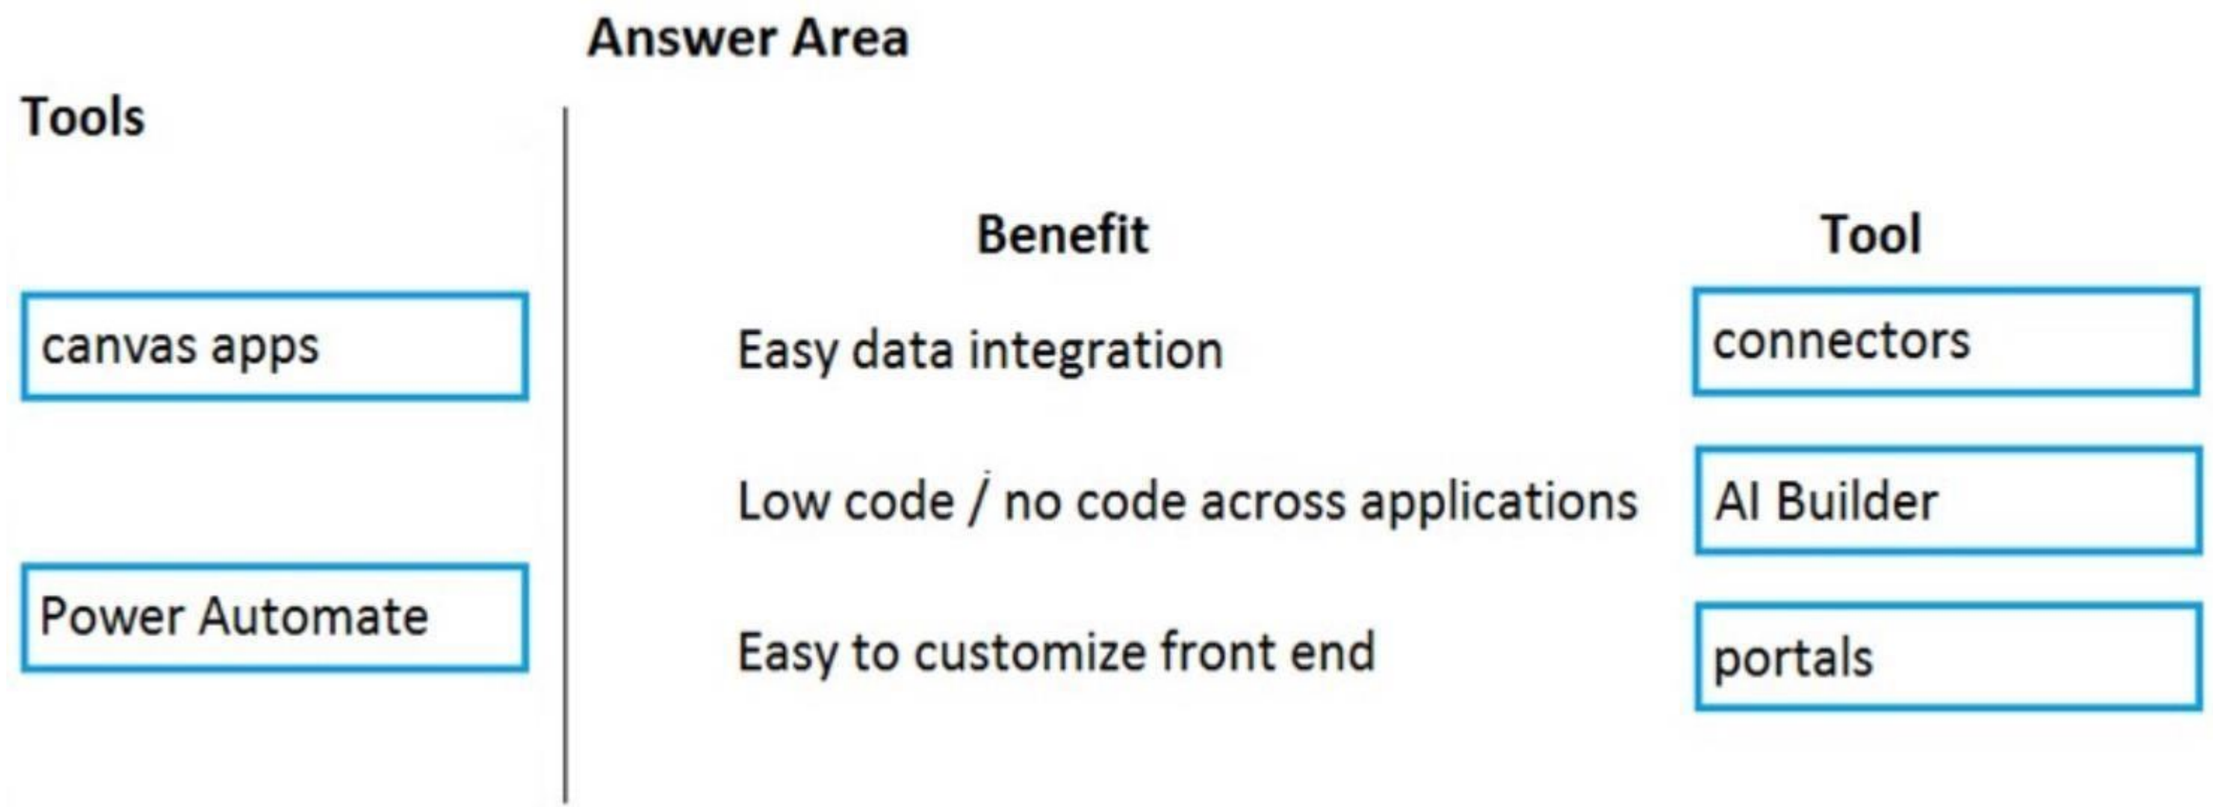

NEW QUESTION: 23
You are creating a Power Automate flow.
The flow must read each item in a Microsoft SharePoint list that details sales opportunities and set the value for a field named Status to Overdue if the value of a field named Follow up is less than or equal to the current date.
You need to select the appropriate component to cycle through the entire list.
Which component should you use?
A. Connector
B. Action
C. Trigger
D. Condition
Answer: B (LEAVE A REPLY)
Using an Action such as "Apply to each", which is specifically designed to loop through lists.
https://docs.microsoft.com/en-us/power-automate/apply-to-each

NEW QUESTION: 24
A large manufacturing company operates a single enterprise resource planning (ERP) application. The company uses SQL Server with an outdated web interface that does not work with modern browsers.
The company requires a new application interface that uses the capabilities of Microsoft Power Platform. The key requirements for the solution are:
- Users must be able to read/write data.
- Due to data privacy concerns, all data must remain within the ERP application.
- Where possible, costs must be minimized.
You need to recommend platform features to implement the requirements.
Which two features should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Connector
B. Dataverse
C. Power BI report
D. Dataflow
E. Power Apps
Answer: (SHOW ANSWER)

NEW QUESTION: 25
Drag and Drop Question
A company is considering implementing PowerApps to help manage business processes. Users are trying to understand the purposes and benefits of PowerApps components.
Match each benefit to its tool. To answer, drag the appropriate benefit from the column on the left to its tool on the right. Each benefit may be used once, more than once, or not at all.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

"Match each benefit to its tool."

1. Connectors -> Make integration easier
2. Canvas Power Apps - > Make developments easier than full development process
3. Portals -> Allow easier front end customization

NEW QUESTION: 26
You need to use Microsoft Flow to perform data-management tasks when users interact with the sales opportunities in Dynamics 365.
Which three types of triggers can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. record requested
B. record deletion
C. record creation
D. record updated
E. record selected
Answer: B,C,D (LEAVE A REPLY)
Triggers like When a record is created, When a record is updated, and When a record is deleted initiate your flow within a few minutes of the event occurring. In rare cases, your flow can take up to 2 hours to trigger.
Reference:
https://docs.microsoft.com/en-us/power-automate/connection-dynamics365

NEW QUESTION: 27
Hotspot Question
You are creating a Power Pages site for a company. The site will allow customers to track the progress of existing support requests and create new requests.
You need to select the relevant data source for the Power Pages site.
Select the answer that correctly completes the sentence.

Support request data source

New support requests will be added to [ ]
- SharePoint.
- Dataverse.
- SQL Server.

freepdfdumps.com

Answer:

Explanation:
Box: Dataverse
Power Pages runs on Dataverse.
While Power Pages is an official standalone member of the Power Platform, it cannot be decoupled from Dataverse.
Reference:
https://community.dynamics.com/blogs/post/?postid=1e934f94-726b-43aa-badf-0601eba4d8a7

NEW QUESTION: 28
A company manages a chain of retail stores. The company stores a list of retail store names and numbers in one Power BI table. The company stores sales transaction data including a transaction ID in another table. The transaction ID includes the store number.
You need to show the store name for all retail transactions in all Power BI reports.
Which tool should you use?
A. Query Editor
B. Power BI Service
C. Microsoft Excel
D. Data Connector
Answer: (SHOW ANSWER)
Power BI Desktop comes with Query Editor, where you can connect to one or many data sources, shape and transform the data to meet your needs, then load that model into Power BI Desktop.
Reference:
https://docs.microsoft.com/en-us/power-bi/desktop-query-overview

NEW QUESTION: 29
A company uses Microsoft 365. The company does not have any developers on its staff.
You need to explain to the executives the benefits of using Power Platform apps.
What are two benefits? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Users can use Power Apps to create apps for different departments.
B. Users can send emails from Microsoft 365 to their personal email addresses.
C. The company can unify all the mobile devices to one vendor.
D. Users can use Power Automate to extract information from Microsoft 365 services.
Answer: A,D (LEAVE A REPLY)

[A]
Power Platform apps with Microsoft 365 can be used to create custom apps for different departments to streamline and automate their specific processes. These apps can connect to various data sources like SharePoint, Microsoft 365, and Dynamics 365, allowing departments to build solutions for tasks such as customer service, sales, or supply chain management.
[D]
With Power Platform apps and Microsoft 365, you can use Power Automate to extract information from services like Outlook, SharePoint, and Teams. Power Automate connects to these services, allowing you to create automated flows that pull and process data from them, such as retrieving data from a SharePoint list to send an email or archiving emails based on certain criteria.

https://learn.microsoft.com/en-us/power-apps/maker/
https://www.microsoft.com/en/power-platform/products/power-automate

NEW QUESTION: 30
Hotspot Question
A company plans to create Power Platform apps that consume industry-standard and proprietary data sources.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statement	Yes	No
Custom connector cannot be used if a standard connector for the service is available.	○	○
Custom connectors are supported in instant flows only.	○	○
Standard and custom connectors cannot be mixed within the same flow or app.	○	○

freepdfdumps.com
Microsoft

Answer:

Answer Area

Statement	Yes	No
Custom connector cannot be used if a standard connector for the service is available.	○	○
Custom connectors are supported in instant flows only.	○	○
Standard and custom connectors cannot be mixed within the same flow or app.	○	○

Explanation:
Box 1: No
It is recommended to use standard connector if it is available, but we can use custom connector even standard connector available.
Box 2: No
We can use custom connectors in power apps as well as flow.
Box 3: No
It is possible to use both standard and custom connectors in the same app or flow.

NEW QUESTION: 31
Drag and Drop Question
A company is evaluating the use of Microsoft Power Automate to eliminate manual, repetitive tasks.
You need to recommend the appropriate type of Power Automate flow for each scenario.
Which type of Power Automate flow should you recommend? To answer, move the appropriate Power Automate flow types to the correct scenarios. You may use each scenario once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

NEW QUESTION: 32

You are developing reports for a company.

You must create visualizations that include the following data:
- Invoices due from a third-party enterprise resource planning (ERP)
system
- Number of calls made to the client from Microsoft Dataverse
- Microsoft Excel file data
The reports must be displayed in a single page.
You need to create the visualizations.
What should you use?
A. deployment pipelines
B. tables
C. columns
D. dashboards
Answer: D (LEAVE A REPLY)
A Power BI dashboard is a single page, often called a canvas, that tells a story through visualizations.
Reference:
https://docs.microsoft.com/en-us/power-bi/create-reports/service-dashboards

NEW QUESTION: 33
A company uses Microsoft Power Platform to monitor social media.
You create a Power Automate cloud flow to process social media messages that positively mention the company and its products.
You need to choose a connector to perform sentiment analysis on the social media messages.
Which two connectors can you use in the flow? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Language - Question Answering
B. Azure Cognitive Service for Language
C. Azure Application Insights
D. Azure Communication Services Chat
E. AI Builder
Answer: B,E (LEAVE A REPLY)

NEW QUESTION: 34
Drag and Drop Question
You create a Power Pages site to share Microsoft Dataverse data with external customers.
Customers must be authenticated to view data.
You need to configure Power Pages.
Which component should you use for each requirement? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 35

Hotspot Question

A company plans to use Power Platform to build apps which address specific business challenges.

You need to recommend the appropriate types of Power Apps to use.

What should you recommend? To answer, select the appropriate option in the answer area.

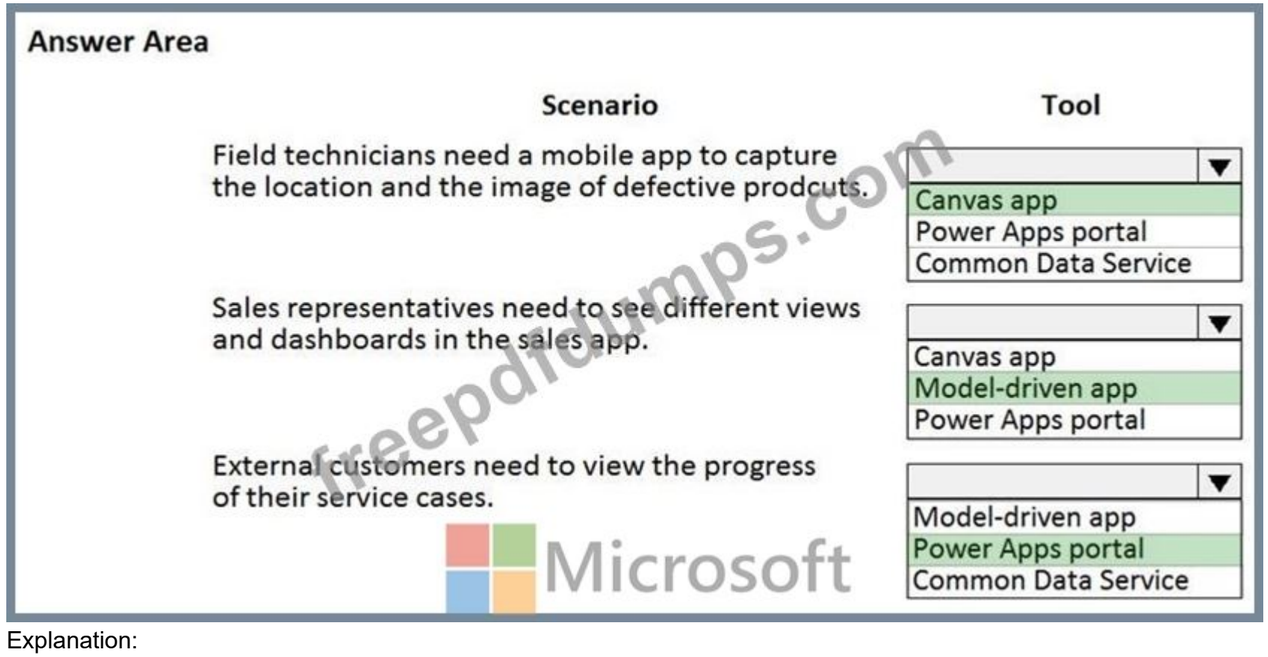

NOTE: Each correct selection is worth one point.

Answer Area

Scenario	Tool
Field technicians need a mobile app to capture the location and the image of defective prodcuts.	Canvas app / Power Apps portal / Common Data Service
Sales representatives need to see different views and dashboards in the sales app.	Canvas app / Model-driven app / Power Apps portal
External customers need to view the progress of their service cases.	Model-driven app / Power Apps portal / Common Data Service

NEW QUESTION: 36
You need to generate a Power Pages site for your company.
You decide to use Copilot for site creation to generate your site.
You need to select the site components that Copilot for site creation will create or set for you based on your prompt.
Which three site components should you select? Each correct answer presents a complete solution. Choose three.
NOTE: Each correct selection is worth one point.
A. Forms
B. Site name
C. Lists
D. Site URL
E. Home page
Answer: B,D,E (LEAVE A REPLY)
Create an AI-generated site using Copilot
With the Copilot for site creation, you can create Power Pages sites with the help of AI. Describe the site that you want to create, and AI designs it for you. Use natural language processing to help you build your site by describing the type of site, intended users of the site, and type of information you want the site to process.
Copilot generates the contextual site name[B], site address[D], home page layout[E], and more pages with HTML for each page with relevant text copy and images from the description. The site is created with the home page and more pages as selected, with the pages added to the sitemap.
Once the site is created, these pages can be refined and edited using Copilot and the WYSIWYG editor.
Reference:
https://learn.microsoft.com/en-us/power-pages/getting-started/create-site-copilot

NEW QUESTION: 37
Drag and Drop Question
A company uses Dynamics 365 Sales.
You have the following requirements:
- View analytics on accounts.
- The model-driven app must automatically send an approval form to a
manager when the purchase price is greater than $10,000.
- Create a chatbot for the webpage to interact with customer questions.
You must use Microsoft Power Platform to extend the capabilities of Dynamics 365 Sales.
You need to select an application for each requirement.
Which application should you use? To answer, drag the appropriate application to the correct requirement. Each application may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Power BI

You can configure Customer Service Analytics dashboards in Power BI.

Box 2: Power Automate

Power Automate, Trigger a cloud flow based on email properties.

Use the When a new email arrives (V3) trigger to create a cloud flow that runs when one or more of the following email properties match criteria that you provide.

Box 3: Power Virtual Agents

Power Virtual Agents lets you create powerful AI-powered chatbots for a range of requests from providing simple answers to common questions to resolving issues requiring complex conversations.

Reference:

https://docs.microsoft.com/en-us/dynamics365/customer-service/configure-customer-service-analytics-dashboard

https://docs.microsoft.com/en-us/power-virtual-agents/fundamentals-what-is-power-virtual-agents

https://docs.microsoft.com/en-us/power-automate/email-triggers

NEW QUESTION: 38

Drag and Drop Question

Match each Microsoft Power Automate app to its capability. To answer, move the appropriate Power Automate app from the column on the left to its capabilities on the right. You may use each Power Automate app once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Power Automate apps

- Power Automate for Desktop
- Power Automate Mobile
- Power Automate Portal

Power Automate app capabilities

Capability	Power Automate app
Create and monitor all types of Power Automate cloud flows and initiate process mining.	
Start Power Automate instant flows in the field and manage notifications.	
Create robotic process automation.	

Answer:

Power Automate apps

Power Automate app capabilities

Capability	Power Automate app
Create and monitor all types of Power Automate cloud flows and initiate process mining.	Power Automate Portal
Start Power Automate instant flows in the field and manage notifications.	Power Automate Mobile
Create robotic process automation.	Power Automate for Desktop

Explanation:

Box 1: Power Automate Portal

Create and monitor all types of Power Automate cloud flows and initiate process mining.

From the Power Automate portal, you can associate automated and scheduled flows with apps in Power Apps and with Dynamics 365 apps. You can then manage flows and apps together and more easily keep track of dependencies. If the associated app is missing in any environment, the flow alerts you about the missing dependency. This feature also ensures that apps are always up to date.

Box 2: Power Automate Mobile

With the Power Automate mobile app you can:

Create flows

Manage cloud flows

Create widgets

Manage approvals

Receive notifications

-all from your mobile device.

Box 3: Power Automate for Desktop

Create robotic process automation.

Automate routine tasks, eliminate the chance for errors, and free up time for more important work with robotic process automation (RPA) and Power Automate for desktop.

Reference:

NEW QUESTION: 39

Hotspot Question

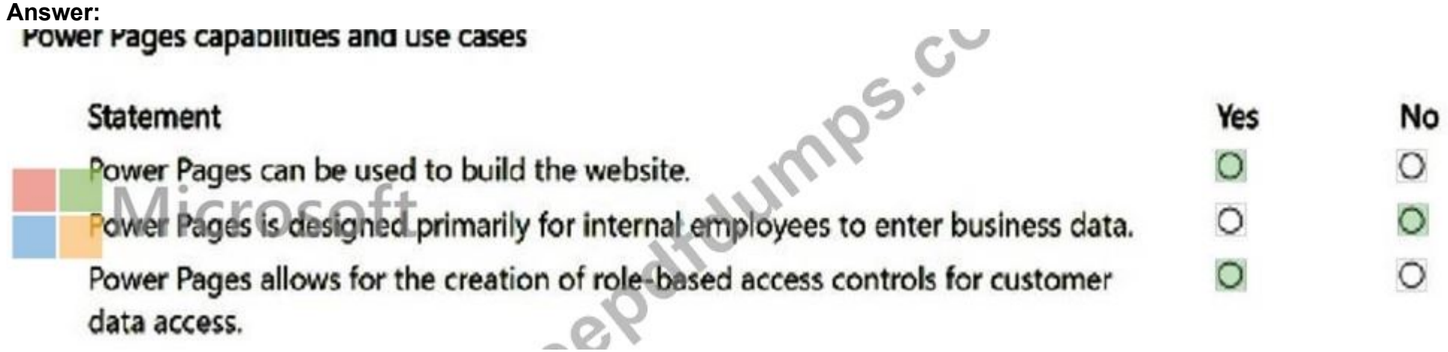

A company wants to provide customers with access to order status information and support articles held in Microsoft Dataverse.

The solution must allow users outside the organization to sign in and view content through a website. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Yes

Yes - Power Pages can be used to build the website.

Power Pages can absolutely be used to build this website.

It is specifically designed to expose Microsoft Dataverse data to external users securely.

External Authentication: Supports external sign-ins via Google, Facebook, Microsoft Entra ID B2C, or SAML 2.0.Dataverse Integration: Reads and updates Dataverse data, like order statuses, natively in real-time.

Secure Access: Restricts data viewing using table permissions so customers only see their own orders.

Content Management: Features built-in tools to publish and manage knowledge base or support articles.

Box 2: No

No - Power Pages is designed primarily for internal employees to enter business data.

The premise that Power Pages is only for internal use is a misconception; it is purpose-built to allow users outside your organization to securely access and interact with Microsoft Dataverse data.

Box 3: Yes

Yes - Power Pages allows for the creation of role-bases access controls for customer data access.

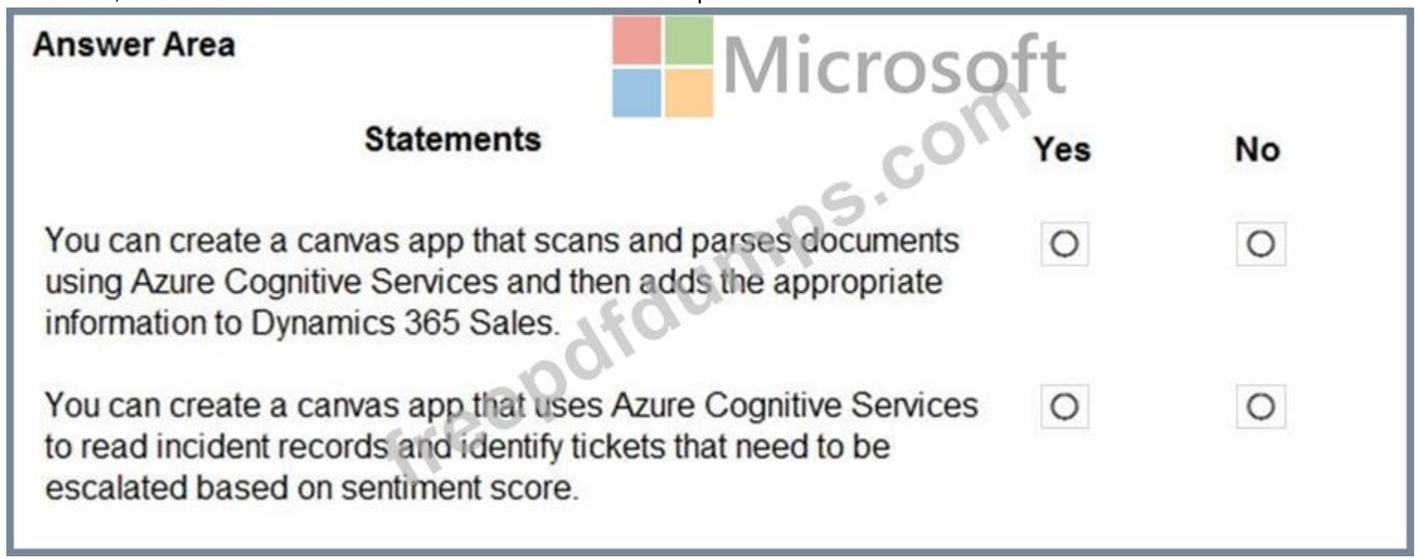

Power Pages allows you to create role-based access controls (RBAC) to securely expose Microsoft Dataverse data to external users.

Power Pages uses a specific security model to protect your data:

Web Roles: You create custom roles (e.g., "Customer") and assign them to external users.

Table Permissions: You attach these permissions to Dataverse tables (like Orders or Knowledge Articles).
Access Types: You define relationship scopes, such as Account or Contact scope, ensuring customers only see records linked to their own profile.
Privileges: You grant specific rights like Read, Write, Create, or Delete per role.
Reference:
https://convverge.com/blog/insights/manage-external-user-access-power-pages/
https://www.microsoft.com/en-us/power-platform/blog/power-pages/microsoft-power-pages-is-bringing-the-new-standard-in-secure-ai-powered-capabilities/

NEW QUESTION: 40
Hotspot Question
A company is evaluating ways to connect Power Platform apps to external services to perform complex activities. For each of the following statements, select Yes if the statement is true.
Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

https://docs.microsoft.com/en-us/azure/cognitive-services/cognitive-services-and-machine-learning

NEW QUESTION: 41
Hotspot Question
A company plans to implement Power BI.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Answer Area

Answer:

NEW QUESTION: 42
You create a canvas app by using the option labeled Start from data. You connect a spreadsheet that contains customer records. The customer records are displayed in a list on a screen labeled Browse.
You need to modify a property of the control on the screen.
Which control should you modify?
A. Display form
B. Icon
C. Search
D. Gallery
Answer: D (LEAVE A REPLY)
A Gallery control allows you to show multiple records from a data source (in this case, customer records from the connected spreadsheet).

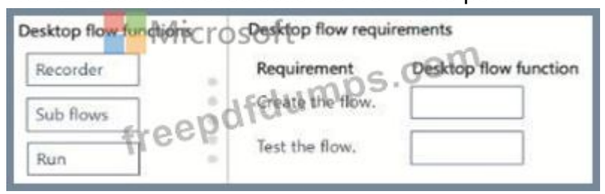

NEW QUESTION: 43
Drag and Drop Question
You are planning to build a Power Automate desktop flow.
The flow must meet the following requirements:

- Open an application and allow a user to enter data into fields.
- Be tested and validated before deployment into a production environment.

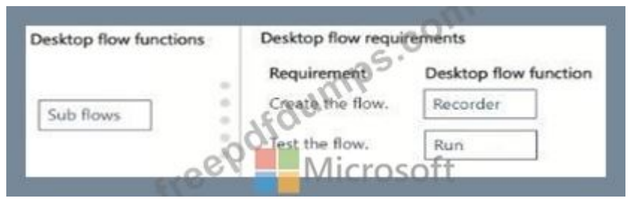

You need to create and test the flow.

Which desktop flow functions should you use? To answer, move the appropriate desktop flow functions to the correct requirements. You may use each desktop flow function once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 44

A carpet cleaning company uses Dynamics 365 Sales.

The process for entering customer information during onsite sales calls is very complicated. The company wants a simplified screen that allows salespeople to capture the customer name, phone number, and other information while speaking to the customer.

You need to recommend a solution that works on various types of mobile devices.

What should you recommend?

A. Common Data Service
B. Microsoft Flow
C. AI Builder
D. Canvas app
E. Power BI

Answer: D (LEAVE A REPLY)

https://powerapps.microsoft.com/en-us/build-powerapps/

NEW QUESTION: 45

A company has an online store to sell toys. The volume of order tracking requests has increased.

You need to allow customers to use an interactive interface on the website to request order tracking Information.

Which technology should you use?

A. Customer Service Insights
B. Power BI
C. Power Virtual Agents chatbots

D. Power Automate flows
Answer: C (LEAVE A REPLY)
Power Virtual Agents lets you create powerful AI-powered chatbots for a range of requests - from providing simple answers to common questions to resolving issues requiring complex conversations. Engage with customers and employees in multiple languages across websites, mobile apps, Facebook, Microsoft Teams, or any channel supported by the Azure Bot Framework.
https://learn.microsoft.com/en-us/power-virtual-agents/fundamentals-what-is-power-virtual-agents

NEW QUESTION: 46
Hotspot Question
You are creating a Power Virtual Agents chatbot to help users search for available meeting rooms within a building.
The chatbot must meet the following requirements:
- Allow users to initiate the chatbot by typing the phrase Help me
Meeting Guru.
- Provide meeting room capacity options of 1-4 people and 5-10 people.
- End the chatbot session if the user attempts to schedule a meeting
room for more than 10 people.
You need to identify the actions to use.
Which actions should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Action
Allow users to initiate the chatbot by typing the phrase **Help me Meeting Guru**.	Call a fallback topic. Call an action. Create a question node. Create a trigger phrase.
Provide meeting room capacity options of 1-4 people and 5-10 people.	Call an action. Call a fallback topic. Create a condition. Create a question node.
End the chatbot session when the user attempts to schedule meeting room for more than 10 people.	Add a condition. Call an action. Configure a fallback topic. Create a trigger phrase.

Microsoft
freepdfdumps.com

NEW QUESTION: 47
Drag and Drop Question
You need to build a Power Virtual Agents chatbot for a company.
Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

freepdfdumps.com
Microsoft

Answer:

Answer Area

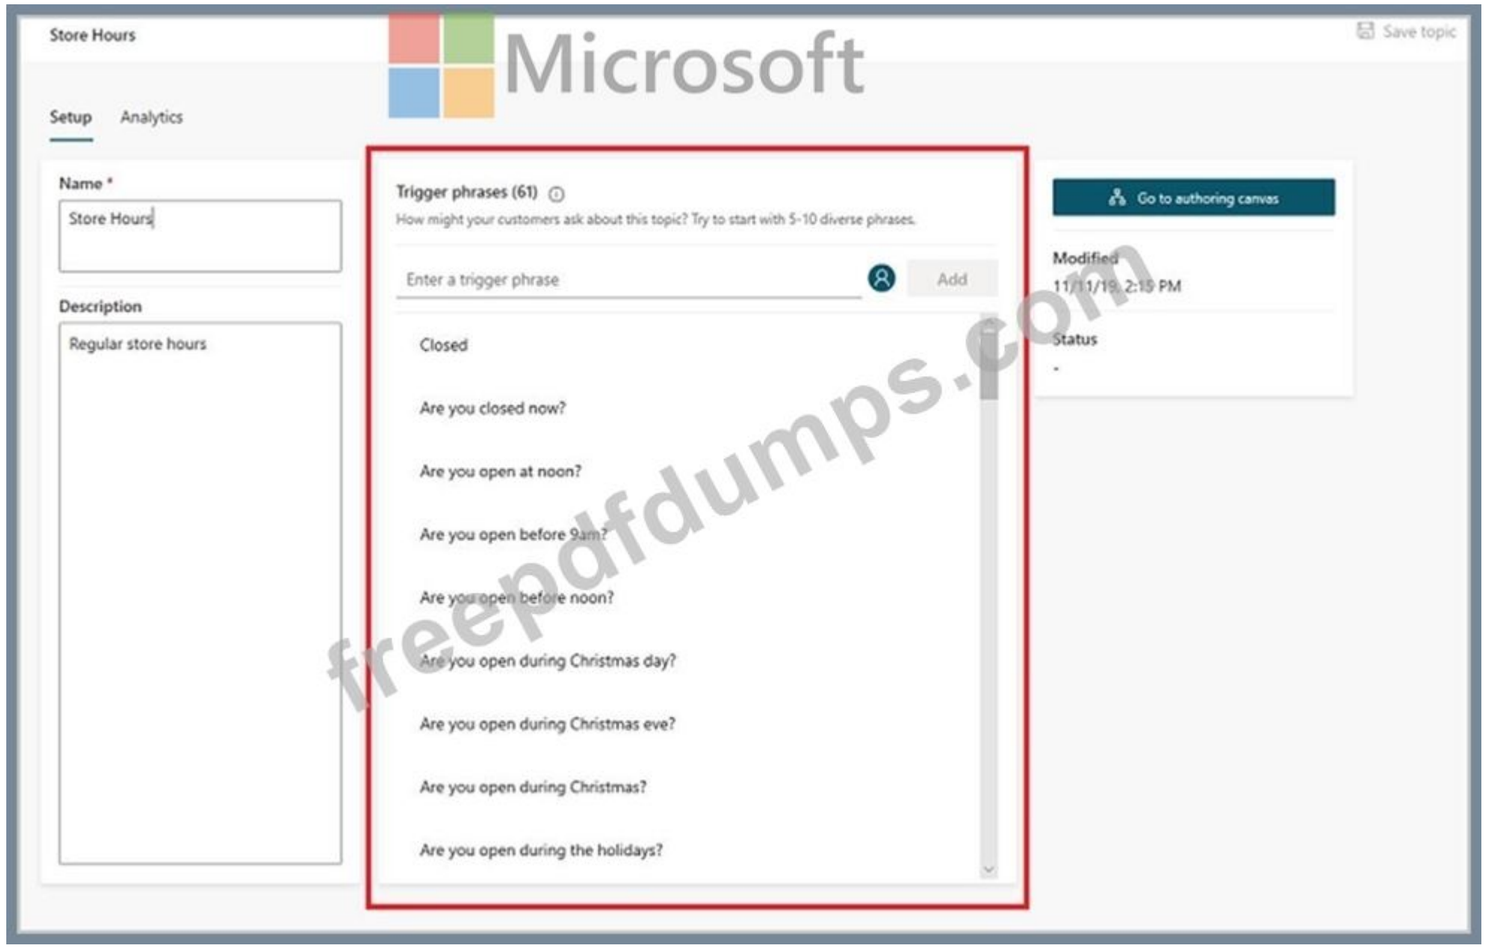

Components	Requirement	Component
	Identify keywords or questions and relate them to issues.	Trigger Phrase
	Store a response that a user enters for later use.	Variable
	Identify a specific type of information from a user response.	Entity

freepdfdumps.com

Explanation:

Box 1: Trigger Phrase

A trigger phrase is a phrase that a customer enters in the chat window to start a conversation with the bot. Once the conversation is started, the conversation follows the path you define. You can specify more than one trigger phrase for a topic.

Microsoft
freepdfdumps.com

Box 2: Variable

Variables let you save responses from your customers in a conversation with your bot so that you can reuse them later in the conversation.

Box 3: Entity

An entity can be viewed as an information unit that represents a certain type of a real-world subject, like a phone number, zip code, city, or even a person's name.

Reference:

https://docs.microsoft.com/en-us/power-virtual-agents/authoring-create-edit-topics

https://docs.microsoft.com/en-us/power-virtual-agents/authoring-variables

NEW QUESTION: 50
Hotspot Question
A company plans to implement Power Virtual Agents chatbots.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
A topic in a chatbot can have several trigger phrases.	○	○
A chatbot can call a Power Automate flow in a different Microsoft Power Platform environment.	○	○
You must publish a chatbot after making modifications for the changes to be visible by users.	○	○

Microsoft
freepdfdumps.com

Answer:

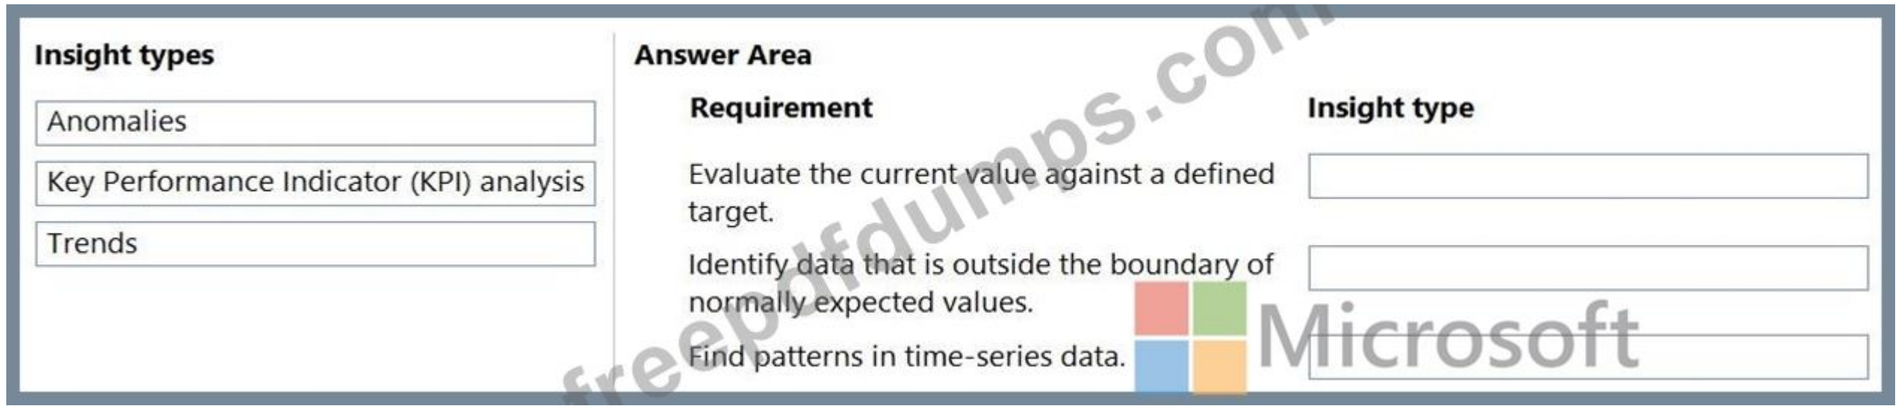

Answer Area

Statements	Yes	No
A topic in a chatbot can have several trigger phrases.	○	○
A chatbot can call a Power Automate flow in a different Microsoft Power Platform environment.	○	○
You must publish a chatbot after making modifications for the changes to be visible by users.	○	○

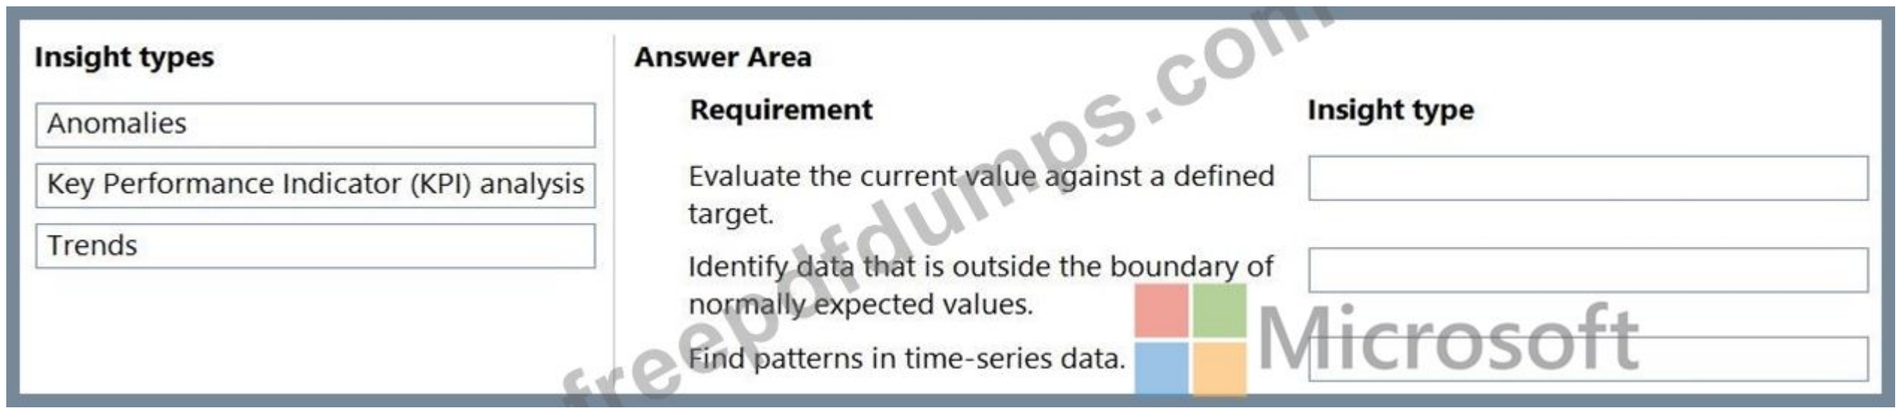

Microsoft
freepdfdumps.com

Explanation:
Box 1: Yes
A topic has trigger phrases and conversation nodes. Trigger phrases are phrases, keywords, and questions that a user is likely to type that are related to a specific issue. Conversation nodes define how a bot should respond to a trigger phrase and what it should do.
Box 2: No
A flow can only be called from a topic located in the same Microsoft Dataverse environment as your bot.
Box 3: Yes
Once you're satisfied with your bot's content and quality, you can publish your bot to allow users to engage with your bot. You must publish your bot at least once for the user to chat with the bot in Microsoft Teams. Each time you want to update your bot's content, you publish it again from within the Power Virtual Agents app in Microsoft Teams. This will update the bot's content with the latest changes you have made.

NEW QUESTION: 51
Drag and Drop Question
A company uses Power BI.
The company wants to use AI Insights in Power BI to make data-driven decisions.
You need to select the appropriate insight type for each requirement.
Which insight types should you select? To answer, drag the appropriate insight types to the correct requirements. Each insight type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

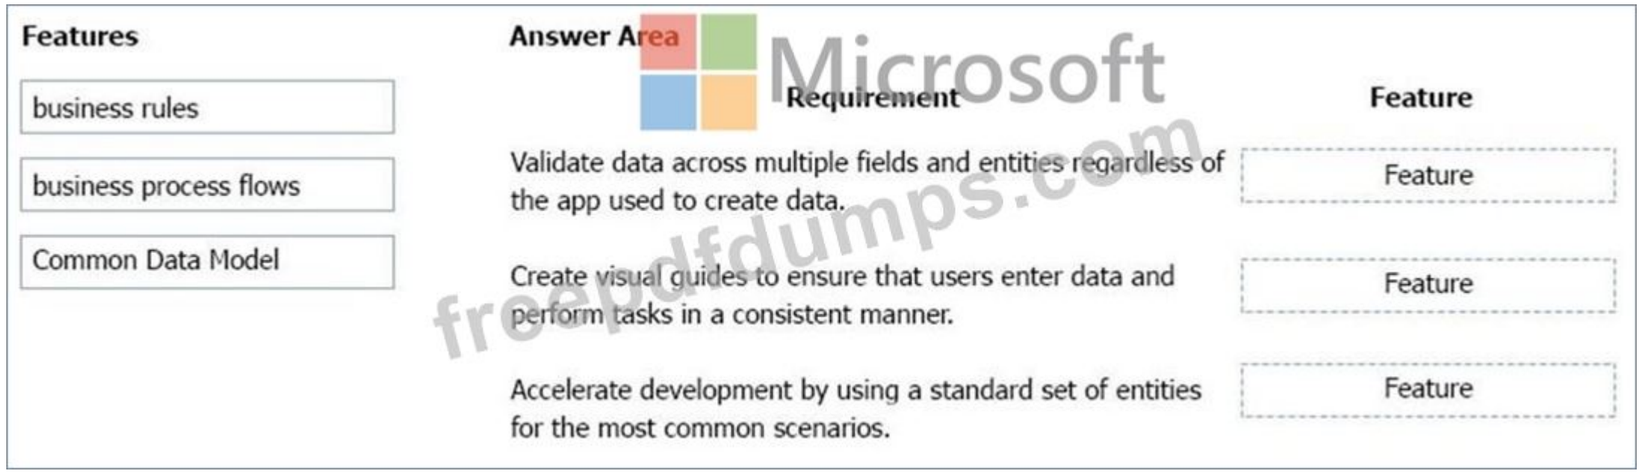

NEW QUESTION: 52

Drag and Drop Question

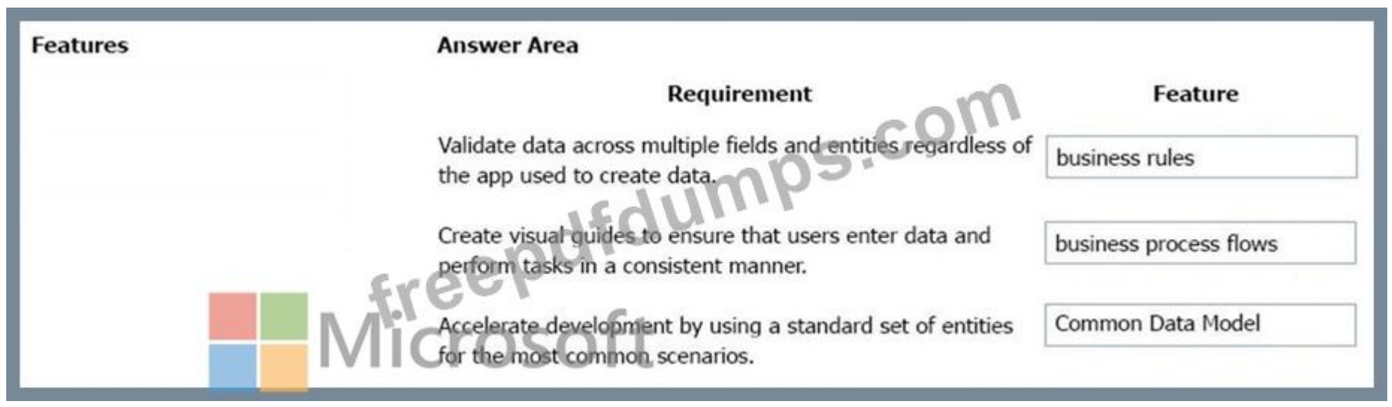

A company plans to implement solutions that use Common Data Service as a data storage. You need to recommend features to meet the company's needs.

Which features should you recommend? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: business rules

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Box 2: business process flows

Flows Power Automate includes several types of processes, each designed for a different purpose:

Automated flows. Create a flow that performs one or more tasks automatically after it's triggered by an event.

Button flows. Perform repetitive tasks simply by tapping a button on your mobile device.

Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.

Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow. Workflows and actions.

Dynamics 365 customizers may be familiar with the classic Common Data Service processes, which are workflows and actions.

Box 3: Common Data Model

Model-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model- driven apps much of the layout is determined for you and largely designated by the components you add to the app.

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/guide-staff-through- common-tasks-processes

NEW QUESTION: 54
A company uses a custom-built system to record financial data that runs on a manager's machine.
The system does not have an API. New customer details must be manually entered into the system by the manager from a central spreadsheet. The user interface of the system contains the complex business logic that is needed for the manual customer data entry process.
You need to ensure that new customer details can be entered into the system automatically by using Power Automate.
Which type of flow should you create?
A. automated cloud
B. business process
C. desktop
D. instant cloud
Answer: C (LEAVE A REPLY)

Desktop flows is the Robotic Process Automation (RPA) solution within Power Automate.
Desktop flows provides automation for Windows desktop applications, services, and experiences for orchestration and deployment within Power Platform.
Reference:
https://learn.microsoft.com/en-us/power-platform-release-plan/2022wave2/power- automate/desktop-flows

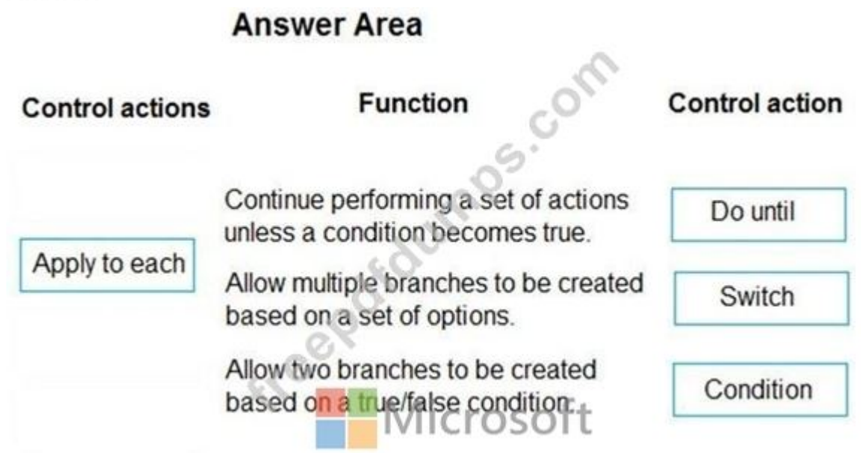

NEW QUESTION: 55
A company uses Dynamics 365 Sales. Every time an opportunity is created, a Power Automate flow runs to email the opportunity to the sales manager.
The sales manager leaves the company. You disable all accounts for the sales manager.
You need to ensure that the new sales manager automatically receives email about opportunities when they are created.
What should you do?
A. Modify the flow and ensure that the correct manager's email is listed in the From field.
B. Modify the flow and ensure that the correct manager's email is listed in the To field.
C. Grant the new sales manager access to the departed sales manager's inbox.
D. Modify the flow and ensure that the flow prompts the user to type the correct email for the To field.
E. Create a flow that automatically forwards opportunity emails to the new sales manager.
Answer: B (LEAVE A REPLY)
It's useless to create a new flow, change the last flow with new parameters/variables.

NEW QUESTION: 56
A company plans to move an on-premises customer service data management system to a cloud-managed solution.
The customer service application must be replaced by a model-driven application. The company uses Microsoft SQL Server Integration Services (SSIS) packages to move data from the on- premises database system to a third-party enterprise resource planning (ERP) system.
You need to replace the SSIS packages for data transfer.
What should the company use in place of the packages to move the data?
A. Power Platform connector
B. Microsoft Azure Data Lake
C. Power Virtual Agents
D. Data Migration Framework
Answer: D (LEAVE A REPLY)
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/data-entities-data-packages

NEW QUESTION: 57
Drag and Drop Question
You are creating a Power Automate solution.
You need to select a Power Automate control action for each function in the flow.
Which control action should you use? To answer, drag the appropriate control actions to the correct functions. Each control action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Do until

The Do Until control in Power Automate is a loop that repeatedly forces an action until a certain condition becomes true.

Box 2: Switch

Switch control in Power Automate can deal with multiple cases of possible alternatives which have different actions or blocks of statements.

Box 3: Condition

Power Automate provides the If action to check whether a given condition is valid. If the condition is true, the logic between the If and End is executed. An If action consists of two operands and an operator. The platform supports the most significant logical operations, such as equal, not equal, and greater than.

NEW QUESTION: 58

TPT Limited, a large retail company is implementing Power Apps, Microsoft Flow, and the Common Data Service. Which tool will verify to the board of directors, the usage of the software and whether users are finding value in the technology?

A. Microsoft Intune

B. Power Platform Analytics
C. Dynamics 365 Product Insights
D. Azure Stream Analytics
Answer: (SHOW ANSWER)

NEW QUESTION: 59
A company is building apps to support their business operations. The apps will use connectors to access data from several data sources and respond to a number of events generated by components.
Which two operations can you use for connectors? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Triggers
B. Plug-ins
C. Actions
D. Gateways
Answer: A,C (LEAVE A REPLY)
Connector components Each connector offers a set of operations classified as actions and triggers. Once you connect to the underlying service, these operations can be easily leveraged within your apps and workflows.
https://learn.microsoft.com/en-us/connectors/connectors#connector-components

NEW QUESTION: 60
A company is using Microsoft Power Platform services to enhance business productivity.
You need to identify the business productivity scenarios that Copilot can solve.
Which three benefits can Copilot provide? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Allow model-driven app users to ask questions about their data.
B. Create canvas apps by describing what makers want to build.
C. Trigger an automated Power Automate flow.
D. Explain the functionality of an existing Power Automate flow.
E. Read an image of a business card and extract text values.
Answer: A,B,E (LEAVE A REPLY)
A: Enhancing Chat Experiences with Power Virtual Agents and AI
The integration of Power Virtual Agents and Copilot empowers websites with intelligent chatbot capabilities. Power Virtual Agents can address user inquiries and provide generative answers powered by OpenAI's GPT. The bot is automatically configured to search across the website and summarize relevant knowledge-based articles. Additionally, the chatbot supports multi-turn conversations and context-based responses. Future enhancements will include document uploads, tone selection for responses, and content moderation controls.
B: Accelerating App Development with Copilot
Copilot's integration with Power Apps expedites app development processes. Users can import Excel files directly into Power Apps Studio, where Copilot processes the data and transfers it to a Dataverse environment. This enables scalable and centralized management of invoice data.
Copilot automatically determines column headings and data types, simplifying the app creation process. The resulting app is fully functional, allowing users to browse, search, create new records, and customize the app effortlessly.
E: Harnessing AI Builder for Document Analysis
AI Builder, a powerful tool within the Power Platform, offers forms processing capabilities for extracting data from documents like invoices. By integrating AI Builder with Copilot, users can extract approval justifications and automatically generate comprehensive emails. The extracted invoice details can be presented within the email, enabling seamless approval within Outlook.
Additionally, the AI-generated flow can enter the approved invoice data into Excel, further streamlining the process.

NEW QUESTION: 62
A company is building an interactive chatbot to answer questions about product and product warranties.
You need to create conversation paths for questions about product warranties.
Which tool should you use?
A. Authoring canvas
B. Azure Bot Framework
C. Power Platform admin center
D. Power Virtual Agents portal
E. Conversation node
Answer: A (LEAVE A REPLY)
Power Virtual Agents opens the topic in the authoring canvas and displays the topic's trigger phrases. The authoring canvas is where you define the conversation path between a customer and the bot.

https://docs.microsoft.com/en-us/power-virtual-agents/authoring-create-edit-topics

NEW QUESTION: 63
Hotspot Question
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
https://learn.microsoft.com/en-us/power-virtual-agents/teams/fundamentals-what-is-power-virtual- agents-teams
https://learn.microsoft.com/en-us/power-virtual-agents/teams/authoring-test-bot-teams

NEW QUESTION: 64
Drag and Drop Question
A company has a sales team and a support team.
The company has the following requirements:
- The sales team must be able to access on-hand inventory from vendors.
The back-office support team does not store or maintain the data.
- The back-office support team must maintain a list of items that the company sells. The list must include a business process flow for any sales price discounts.
You need to create a Power Apps app that supports the teams by using native Power Apps functionality.
Which type of Power Apps app should you create? To answer, move the appropriate Power Apps types to the correct teams. You may use each Power Apps type once, more than once, or not at all. You may need to move

the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

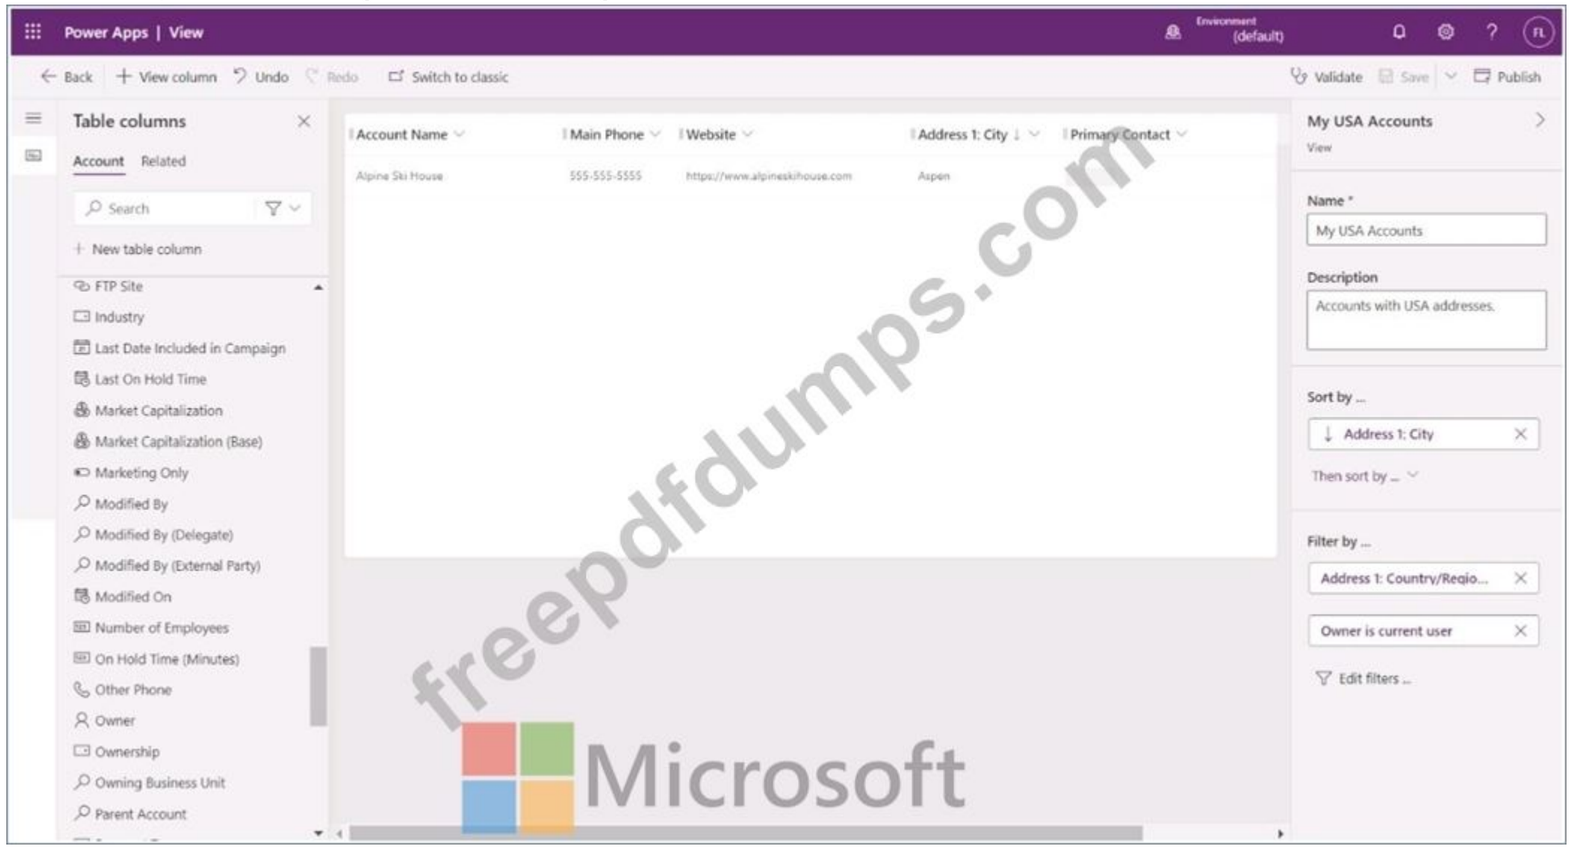

NEW QUESTION: 65
You are designing Power BI dashboards and reports to analyze the financial data for a company.
You must analyze the past three years of data from the company's accounting system.
You need to ensure that dashboards only display required data.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Import data into Microsoft Dataverse.
B. Create aggregations.
C. Share dashboards.
D. Create calculated columns.
Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 66
Your company has an on premises Microsoft SQL Server database that contains legacy sales data. You must display information from the database in a new Power Apps app.
You need to establish a secure connection between the database and the app.
What should you use?
A. Data source
B. App
C. Data gateway
D. Flow
Answer: C (LEAVE A REPLY)
For an on-premises database, identify a data gateway that was shared with you (or create one).

Specify Connect using on-premises data gateway, type or paste the server name, the database name, the user name, and the password for the database that you want to use, and specify the authentication type and the gateway.

NEW QUESTION: 68

Drag and Drop Question

A team of five people plans to create Power Platform solutions for a company. Team members plan to initially use Power Platform trial instances to create solutions.

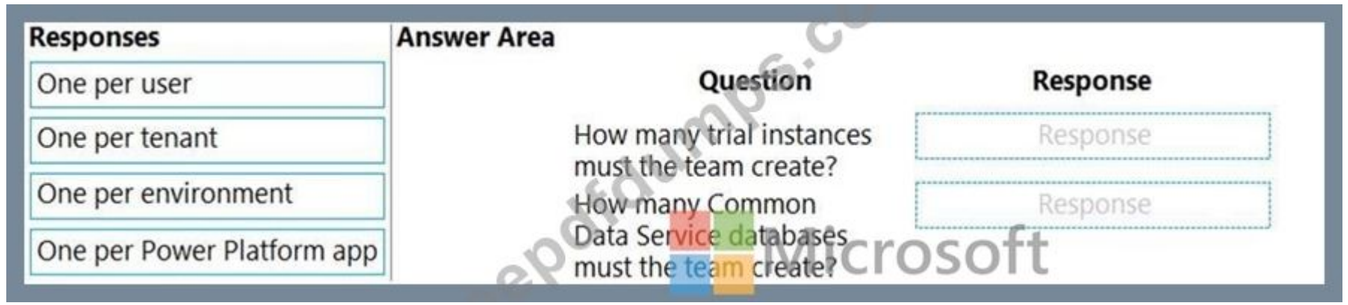

Team members have questions about how many Power Platform instances and Common Data Service databases they need.

You need to respond to the team.

How should you respond? To answer, drag the appropriate responses to the correct questions.

Each response may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: One per enviroment

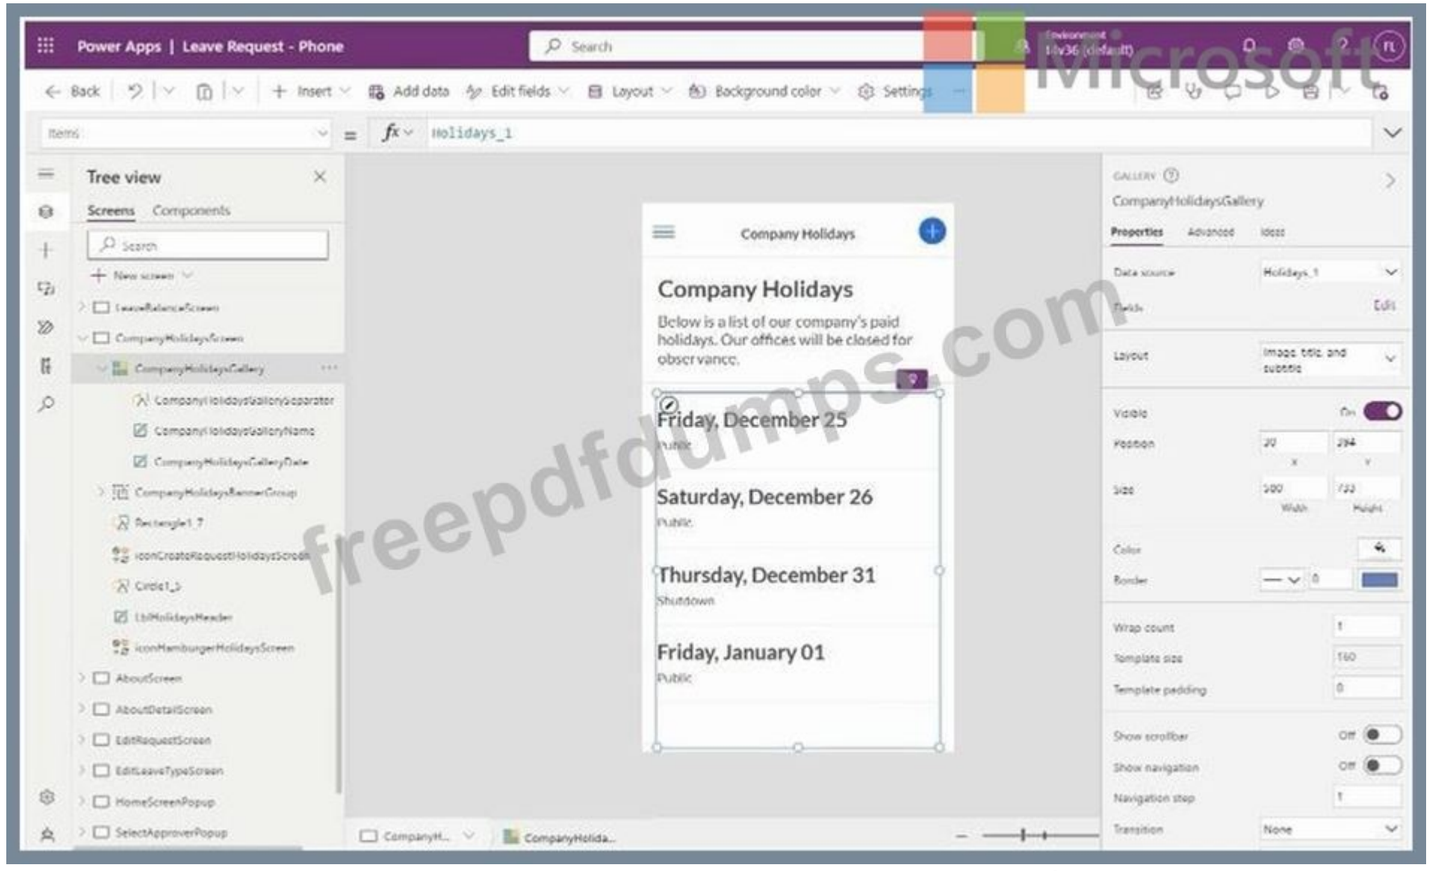

https://learn.microsoft.com/en-us/power-platform/admin/trial-environments Box 2: One per enviroment

https://learn.microsoft.com/en-us/training/modules/create-manage-environments/1-intro

NEW QUESTION: 69

Hotspot Question

A company creates a canvas app that allows employees to manage their vacation requests. The app also contains the company's holiday closures, as shown in the following graphic.

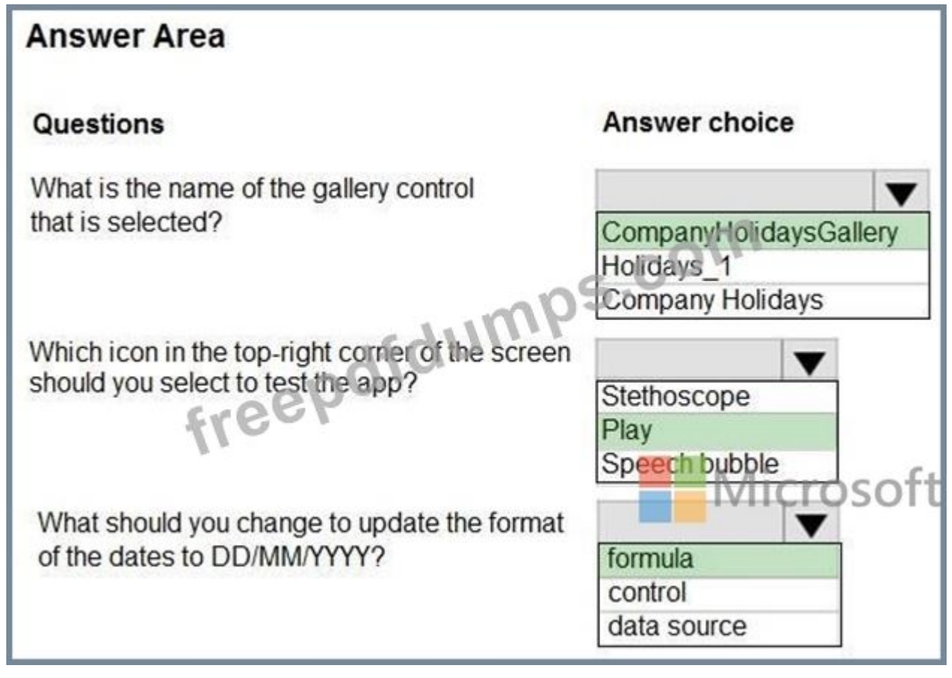

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

Questions	Answer choice
What is the name of the gallery control that is selected?	CompanyHolidaysGallery Holidays_1 Company Holidays
Which icon in the top-right corner of the screen should you select to test the app?	Stethoscope Play Speech bubble
What should you change to update the format of the dates to DD/MM/YYYY?	formula control data source

Answer:

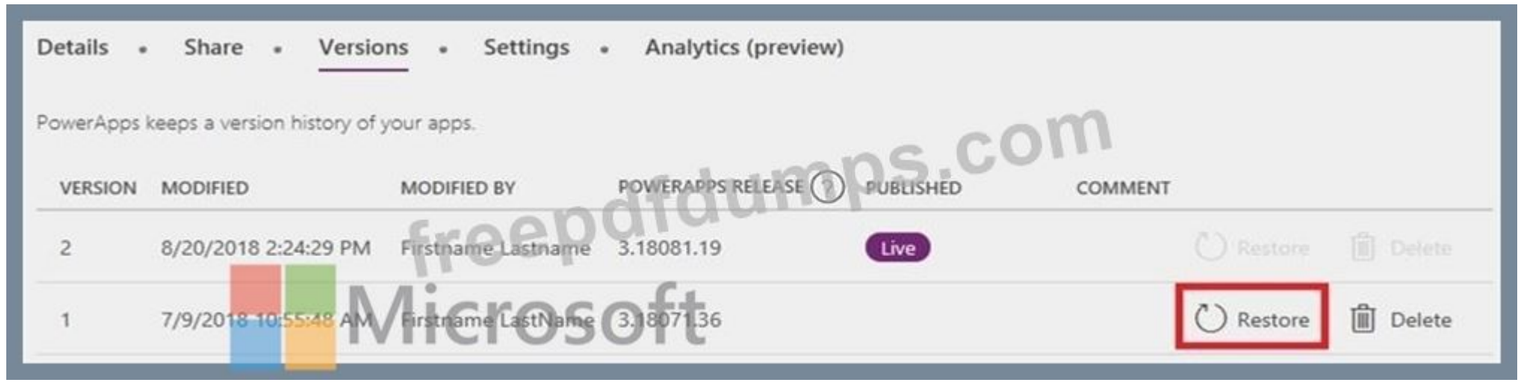

NEW QUESTION: 70
You need to implement Microsoft Business Applications along with the Microsoft Power platform.
Which three Microsoft products are part of the Power platform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Azure Active Directory
B. Microsoft Power BI
C. Microsoft Power Apps
D. Azure Machine Learning
E. Microsoft Flow
Answer: (SHOW ANSWER)

NEW QUESTION: 71
You test a business process flow in a sandbox environment. When you complete testing, you must copy the business process flow to a production environment without bringing any data or other modifications with it. You must meet the requirements.
What should you do?
A. Export the form that contains the business process flow to a separate solution.
B. Export the default solution.
C. Create a view and export the view.
D. Add the business process flow to a separate solution. Export the solution.
Answer: D (LEAVE A REPLY)
NEW QUESTION: 72
A company is considering using Power Pages for its website.

You need to identify the capabilities of Power Pages.
What are two capabilities of Power Pages? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Supporting multiple languages
B. Providing low-code websites hosted as a service
C. Supplying OData feeds
D. Creating customized styling for each user
Answer: A,B (LEAVE A REPLY)
https://learn.microsoft.com/en-us/power-pages/configure/enable-multiple-language-support

NEW QUESTION: 73
A company is building a model-driven app for employees to record customer orders.
The company requires that an alphanumeric customer identification number be manually recorded with each new customer record in Dataverse The customer table is already configured.
You need to configure the customer identification number on the customer table in Dataverse.
What should you use?
A. column
B. table
C. relationship
D. dataflow
Answer: A (LEAVE A REPLY)

NEW QUESTION: 74
This question requires that you evaluate the underlined text to determine if it is correct.
You have a Power Apps app. You create a new version of the app and then publish the new version. A customer goes through the process of restoring the previous version of the app. In the Version tab for the app, you will see two versions of the app.
Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.
A. No change is needed.
B. one
C. three
D. four
Answer: C (LEAVE A REPLY)
Restore a canvas app to a previous version in PowerApps.
1. Open powerapps.com, and then click or tap Apps in the left navigation bar.
2. Near the right edge, click or tap the info icon for the app that you want to restore.
3. Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

4. In the confirmation dialog box, click or tap Restore.

A new version is added to your list.

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/restore-an-app

NEW QUESTION: 75

Drag and Drop Question

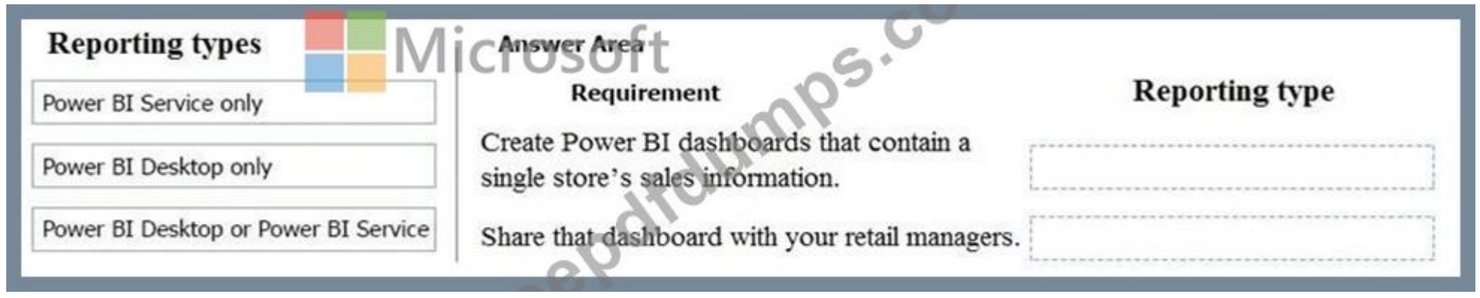

You are a district manager for a large retail company.

You want to provide sales managers with deeper sales insights to ensure that they can make more informed decisions for their stores. Store managers must be able to view data in near real- time.

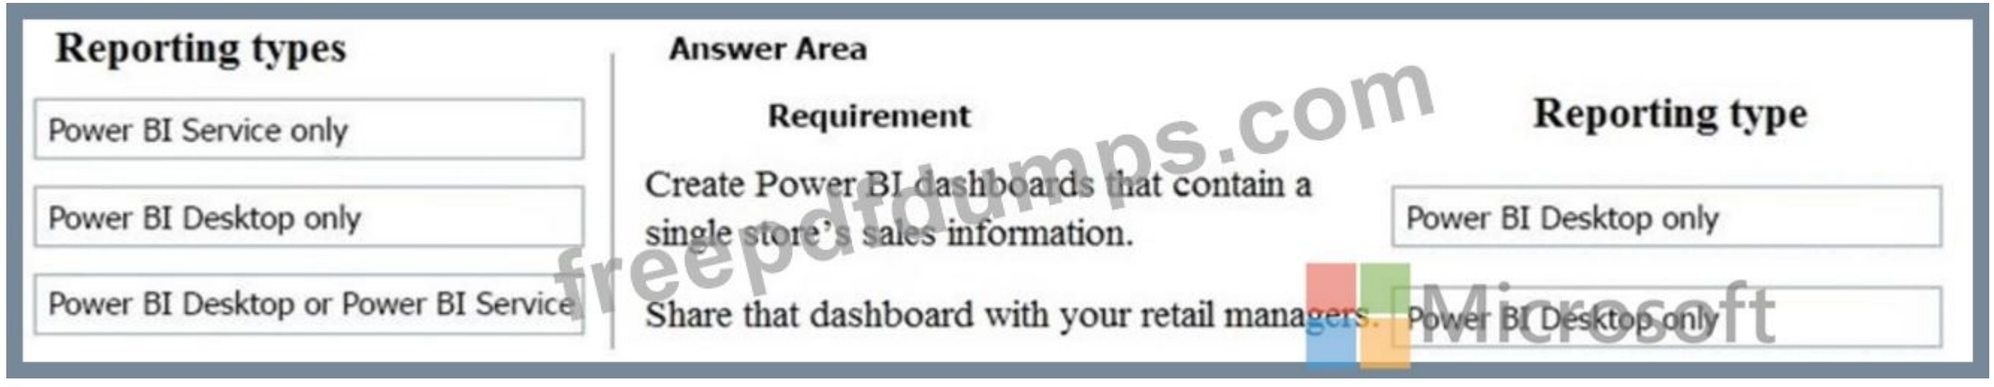

You need to create and share a Power BI dashboard that can be used by the store managers.

Which tools can you use? To answer, drag the appropriate reporting types to the correct requirements. Each reporting type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Dashboards are a feature of the Power BI service only. They're not available in Power BI Desktop. Although you can't create dashboards on mobile devices, you can view and share them there.
https://learn.microsoft.com/en-us/power-bi/create-reports/service-dashboards

NEW QUESTION: 76
You create a Power Apps canvas app.
You need to ensure that your coworkers can run the app.
What should you do?
A. Share the app.
B. Send the URL for the app to coworkers.
C. Add a license for the app.
D. Create a Flow for the app.
Answer: A (LEAVE A REPLY)
After you build a canvas app that addresses a business need, specify which users in your organization can run the app and who can modify and even re-share it.
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/share-app

NEW QUESTION: 77
You are creating a canvas app that uses one connector.

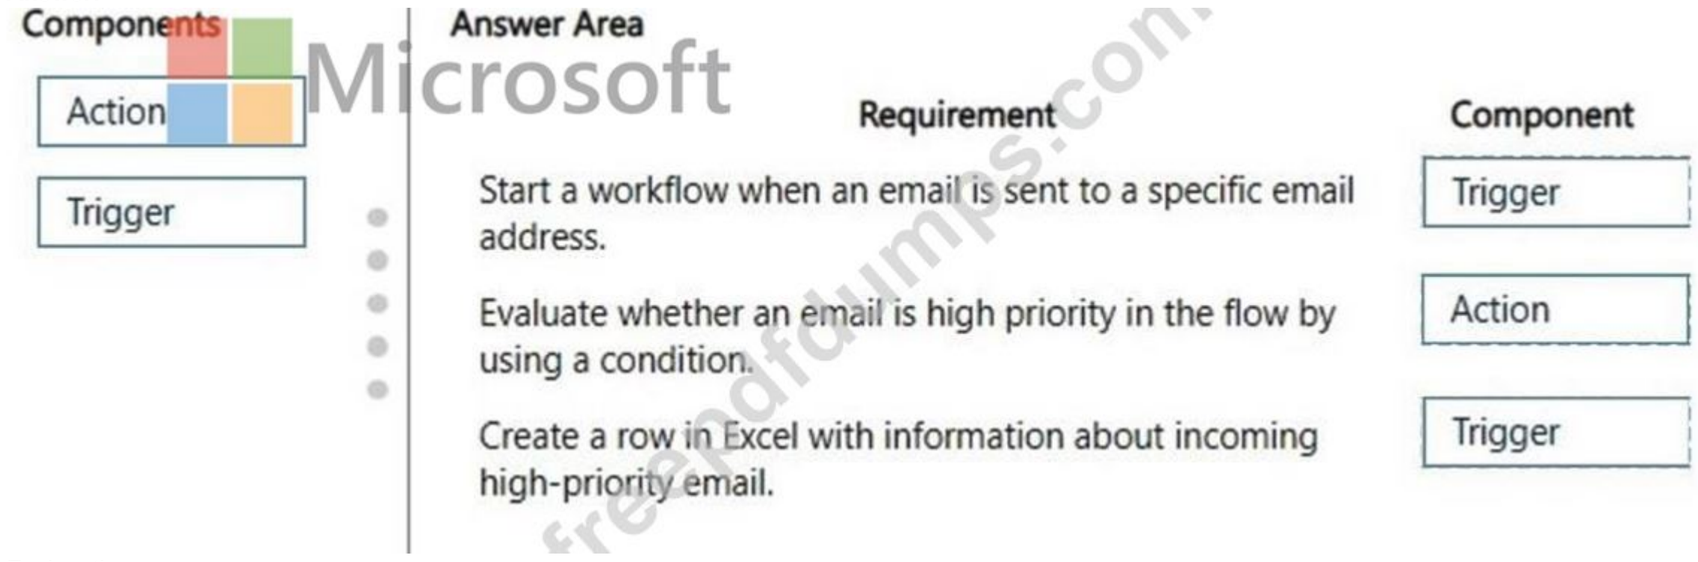

Which two objects are provided by the connector? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. customizations
B. data sources
C. actions
D. tables
E. triggers
Answer: (SHOW ANSWER)
A connector may provide tables of data or actions. Some connectors provide only tables, some provide only actions, and some provide both. Also your connector may be either a standard or custom connector.
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/connections-list

NEW QUESTION: 78
A company using Power Platform is implementing Power BI. The company plans to connect to several data sources and create reports and dashboards.
You need to identify the data sources they can connect to.
Which two data sources should you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Microsoft Word
B. Microsoft Excel
C. Microsoft OneNote
D. Microsoft Dataverse
Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 79
Drag and Drop Question
A company uses Microsoft Power Platform to manage support tickets.
Customers submit support requests by sending an email to a support email address.
All high-priority emails must be logged into a Microsoft Excel sheet for historical purposes.
You need to identify the components that are required for logging the emails in Excel.
Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Trigger

Start a workflow when an email is sent to a specific email address.

You should use an Automated Cloud Flow in Microsoft Power Automate.

The exact trigger to use is When a new email arrives (V3) (from the Office 365 Outlook connector).

You can specify the exact target email address and use advanced options to filter for messages sent to that specific address.

How to set it up:

Go to Microsoft Power Automate and create an Automated cloud flow.

Search for and select the trigger: When a new email arrives (V3).In the trigger settings, click Show advanced options.

Set the To field to your specific email address.

Add your workflow steps/actions.
Box 2: Action
Evaluate whether an email is high priority in the flow by using a condition.
You should use the Condition action.
In Power Automate, the Condition action acts as a control statement that evaluates dynamic data (such as an email's importance) to determine the next steps in your flow.
To evaluate an email's priority:
Add a Condition action immediately after your email trigger.
Set the left operand to the dynamic content of the email (e.g., Importance or Subject).
Set the middle operator to is equal to
Set the right operand to High.
This directs your flow down two distinct paths: If yes (for high-priority items) and If no.
Box 3: Trigger
Create a row in Excel with information about incoming high-priority email.
You should use Microsoft Power Automate to trigger an action when a high-priority email arrives and automatically create a row in Excel.
Recommended Workflow
SetupTrigger: Use the Outlook "When a new email arrives (V3)" trigger.
Filter: Set the Importance parameter to High within the trigger settings.
Action: Connect to Excel Online using the "Add a row into a table" action.
Reference:
https://learn.microsoft.com/en-us/power-automate/email-triggers
https://learn.microsoft.com/en-us/power-automate/use-expressions-in-conditions
https://www.advantage.co.uk/microsoft-dynamics/microsoft-power-platform-partner/power-automate

NEW QUESTION: 80
Hotspot Question
You create a model-driven app. You need to determine which customizations can be made to table forms.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
A form can be made visible only to users who have been assigned a specific security role.	O	O
The label of a column on a form can be different than the column display name.	O	O
You can edit the system view named Quick Find to change the title and subtitle displayed for records in a look-up column.	O	O

Microsoft

Microsoft

NEW QUESTION: 81

Drag and Drop Question

A company is using the Power Platform.

The company would like to create a project health check solution. For each active project, team members will use the tool to select one of the following options:

- Things are going well.
- I need help.

If things are going will, an email is sent to the manager letting them know that no intervention is needed.

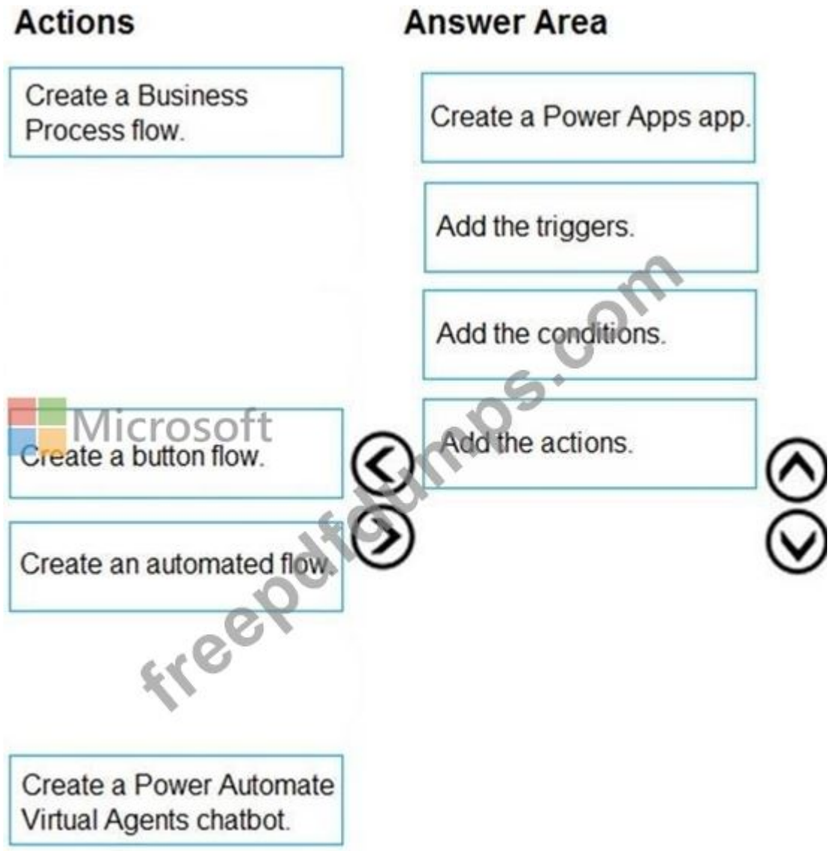

If the team member needs help, a mobile notification is sent to the manager letting them know the team needs assistance.

You need to create the solution.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions
Answer Area
Create a Business Process flow.
Add the actions.
Create a Power Apps app.
Create a button flow.
Create an automated flow.
Add the triggers.
Create a Power Automate Virtual Agents chatbot.
Add the conditions.

Answer:

freepdfdumps.com

NEW QUESTION: 82
A large retail company implements Power Apps, Microsoft Flow, and the Common Data Service.
The board of directors is asking whether users are finding value in the technology. The company would like to measure and report usage of the software.
You need to recommend a tool to determine software usage.
What should you recommend?
A. Microsoft Intune
B. Azure Stream Analytics
C. Power Platform Analytics
D. Dynamics 365 Product Insights
Answer: (SHOW ANSWER)
The Power Platform Analytics Usage report is the default reports seen by the logged in environment admin. It provides total app launches and daily active users across all apps in the environment. Admins can filter the view with attributes like device platform, player version, country, state, and city.
Reference:

https://docs.microsoft.com/en-us/power-platform/admin/analytics-powerapps

NEW QUESTION: 83
You plan to use Power Automate to perform data-management tasks when users interact with sales opportunities in Dynamics 365.
You need to identify the three types of events that can generate a trigger for the tasks.
Which three types of events should you identify? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. when a record is displayed in a view
B. when a record is deleted
C. when a record is created
D. when a record is updated
E. when a record is read
Answer: B,C,D (LEAVE A REPLY)
Triggers like When a record is created, When a record is updated, and When a record is deleted initiate your flow within a few minutes of the event occurring. In rare cases, your flow can take up to 2 hours to trigger.
Reference:
https://docs.microsoft.com/en-us/power-automate/connection-dynamics365

NEW QUESTION: 84
A company uses Dynamics 365 Sales. The company uses a browser-based app named Sales Hub.
You need to ensure that users can access data from Sales Hub by using mobile devices.
Which app should users install?
A. Dynamics 365 Finance
B. Dynamics 365 Business Central
C. Dynamics 365 Remote Assist
D. Dynamics 365 for Phones
Answer: D (LEAVE A REPLY)

NEW QUESTION: 85
Hotspot Question
You are creating a Power Virtual Agents chatbot for a company.
Which component types should you use for each scenario? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Scenario	Component type
The chatbot needs to capture of the user id for authentication.	Topic / Entity / Action
A customer asks a question that needs to be handed off to a live Customer Support representative.	Topic / Entity / Action

Answer:

Answer Area

Scenario	Component type
The chatbot needs to capture of the user id for authentication.	Topic / **Entity** / Action
A customer asks a question that needs to be handed off to a live Customer Support representative.	**Topic** / Entity / Action

Explanation:

1. Entity

2. Topic

https://docs.microsoft.com/en-us/power-virtual-agents/advanced-hand-off#explicit-triggers

NEW QUESTION: 86

A company is considering using AI Builder to gain insights into its data.

You need to determine whether the use cases for AI Builder meet the company's requirements.

What are three use cases for AI Builder? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Conversational language understanding

B. Anomaly detection

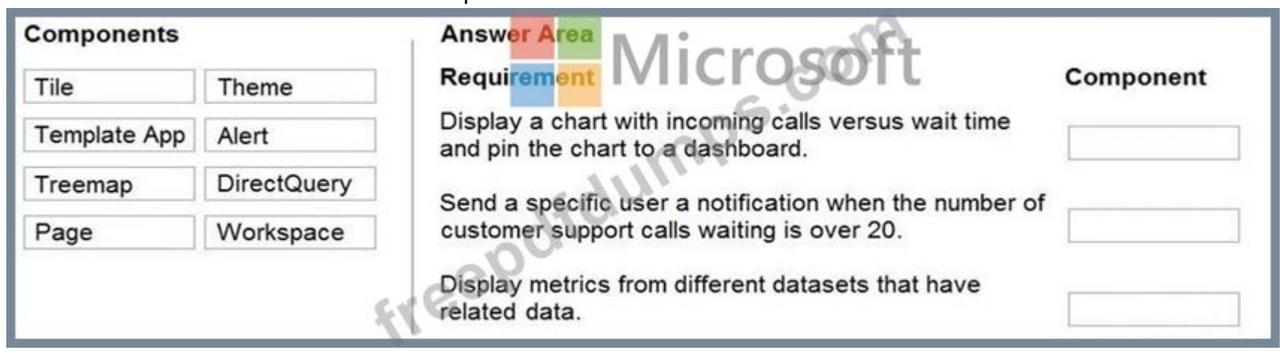

C. Category classification

D. Object detection

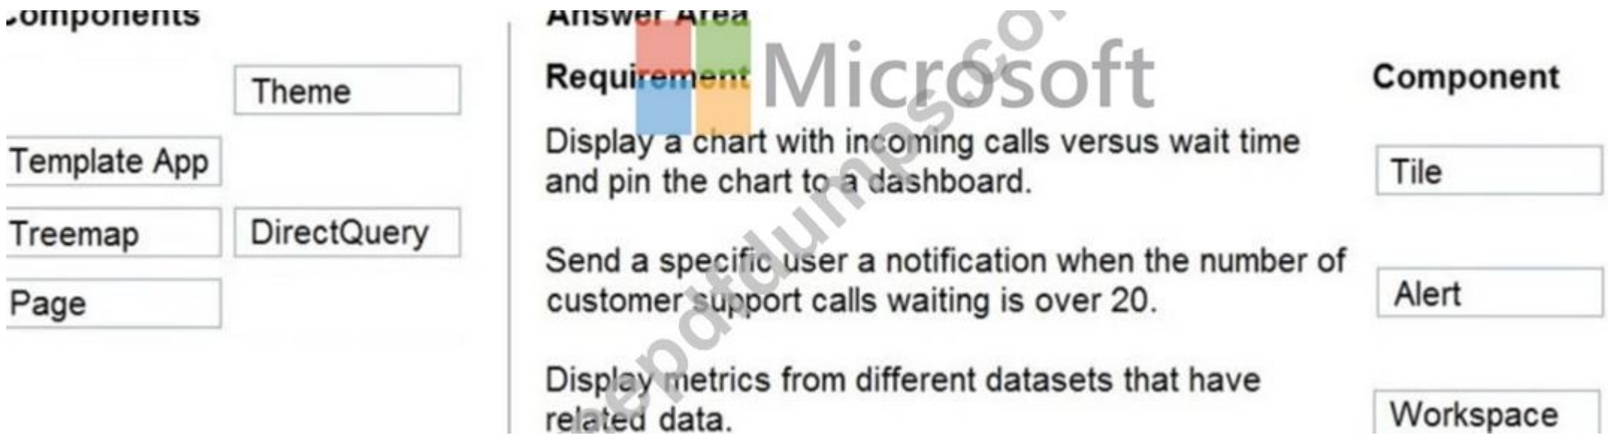

E. Prediction
Answer: C,D,E (LEAVE A REPLY)

NEW QUESTION: 87
You are creating a Power Pages website for a company.
You create the pages and provide branding for the site. You now must make the site visible across the internet.
You need to select the tool to use to make the site available.
Which tool should you use?
A. Design studio
B. Visual Studio Code
C. Portal management app
D. Power Automate maker portal
Answer: D (LEAVE A REPLY)
You can use the Portal Management app, a model-driven Power App, for advanced configuration of your Power Pages sites.
Reference:
https://learn.microsoft.com/en-us/power-pages/configure/portal-management-app

NEW QUESTION: 88
Drag and Drop Question
A company plans to display support call metrics on a screen that is visible to all call center staff.
You need to recommend solutions to meet the company's requirements.
What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

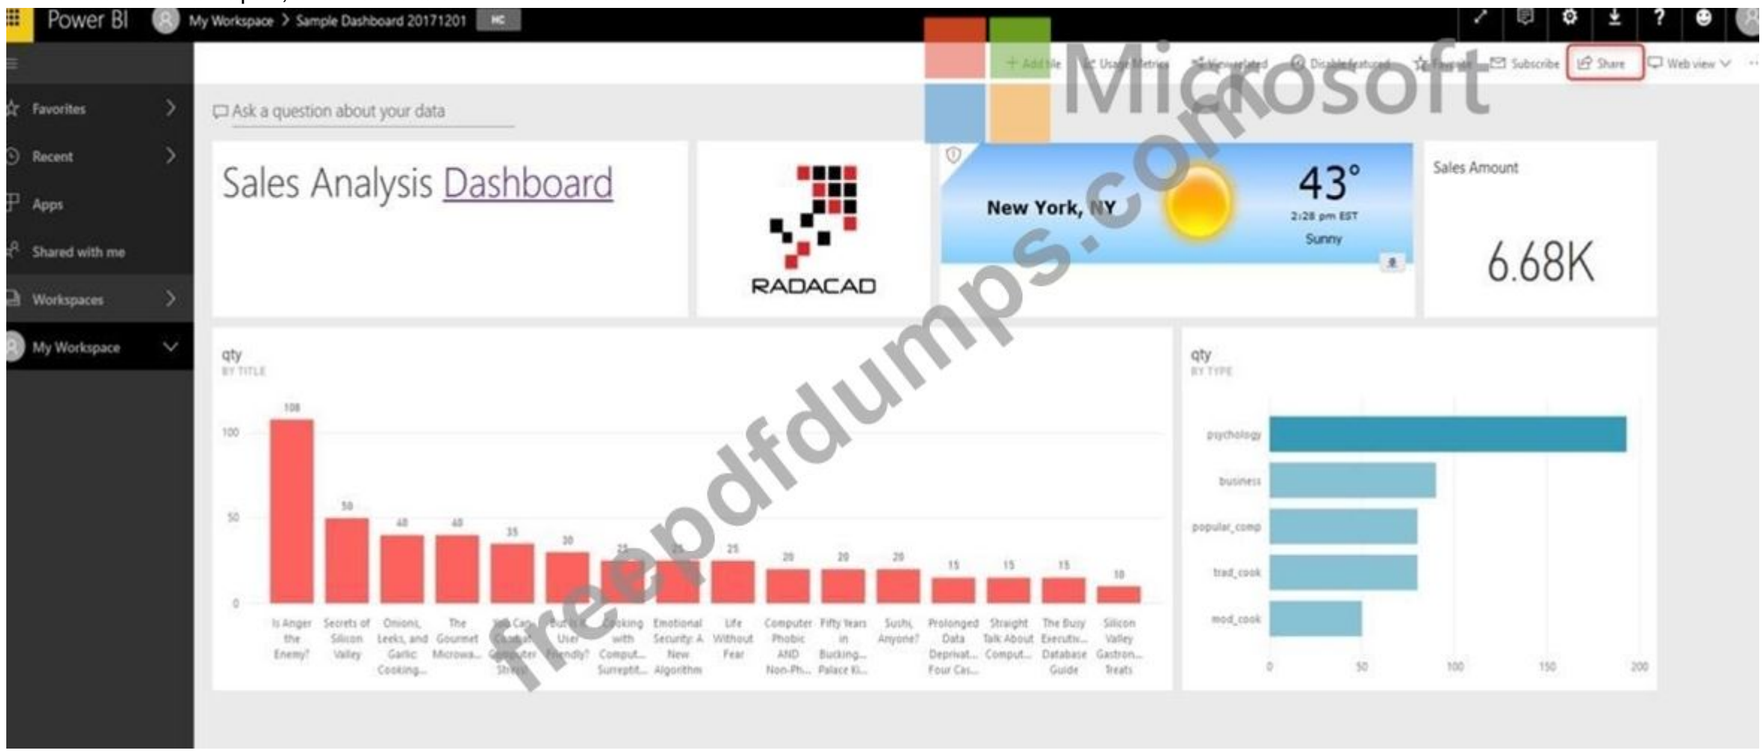

Explanation:
https://docs.microsoft.com/en-us/power-bi/create-reports/service-dashboard-tiles
https://docs.microsoft.com/en-us/power-bi/create-reports/service-set-data-alerts
https://community.powerbi.com/t5/Community-Blog/Power-BI-How-to-view-Usage-metrics-in-Power-BI-workspace/ba-p/762580

NEW QUESTION: 89
You create a set of dashboards and reports for a project team that combines data from different sources in Power BI. Some of the data is considered sensitive.
You need to distribute the dashboards and reports securely to the team.
What should you create?
A. a custom data connector
B. a published app
C. a Microsoft flow
D. a Power BI workspace
Answer: B (LEAVE A REPLY)
https://docs.microsoft.com/en-us/power-bi/service-how-to-collaborate-distribute-dashboards- reports

NEW QUESTION: 90
A company uses Power Apps canvas apps.
When a user opens Power Apps Studio in a browser and selects Apps I can edit, they do not see an app that they need to modify.
You need to determine why the user cannot see the app.
What are three possible reasons? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. The user selected an incorrect Power Apps environment.
B. The user has not been granted the System Customizer role.
C. The user has not been set as the app co owner.
D. The app has not been shared with t e user.
E. The environment does not have a Common Data Service database.
Answer: A,C,D (LEAVE A REPLY)
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/edit-app

NEW QUESTION: 91
You create a Power BI dashboard that displays data from Dynamics 365 Customer Engagement.
You need to share the Power BI dashboard with coworkers.
What are three possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Create a Power BI workspace and grant coworkers permissions.
B. Publish the dashboard as an app to your coworkers.
C. Export the data into Common Data Service for others to manipulate in Power BI.
D. Export the data to Microsoft Excel for coworkers to import and view in Power BI.
E. Embed reports in your company's internal web portal.
Answer: A,B,E (LEAVE A REPLY)
A: Basic Sharing for Dashboards and Reports through a workspace is the most common way of sharing the Power BI content. Basic Sharing is very simple and easy to use method. You can simply click on the Share button in the dashboard or report, and then share it with other users.

B: Apps are great sharing method for multiple environment, and best way of sharing for users in production environment.
Power BI App is the solution for multiple environment approach. With Power BI App, your development environment (workspace), and user environment (App) are isolated from each other.
Note: If you are using SharePoint online as a portal for document management and some other reasons already, then consider using Embed in SharePoint Online feature of Power BI reports.
This method is secure and you can share the report only with Power BI users you want.
E: Sometimes, you don't need a secure way of sharing, you may search for an easy and free way of sharing, and your content is not confidential or sensitive. Publish to web is your friend in such situation.
Publish to web method, gives you an embed code, which you can use in any web pages to embed the Power BI report in it Reference:
This is the only free way of sharing in Power BI, but be aware that this method is not secure.
https://radacad.com/power-bi-sharing-methods-comparison-all-in-one-review

NEW QUESTION: 92
A company plans to create a canvas app that connects to three databases with different proprietary database formats.
What is the minimum number of connectors required?
A. 0
B. 1
C. 2
D. 3
Answer: B (LEAVE A REPLY)
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-data-sources

NEW QUESTION: 93
A company uses a manual process to manage escalations for customer support calls.
You must use Power Automate to automate the process for routing escalated calls.
You need to create the flow.
Which type of connector should you use?
A. Microsoft Excel
B. Office 365 Users
C. Microsoft Dataverse
Answer: C (LEAVE A REPLY)

NEW QUESTION: 94
Drag and Drop Question
You need to create a mobile application which will allow sales associates to enter customer sales leads.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/build-firs-model-driven-app

NEW QUESTION: 95
You are using the Power BI service to view a visual on a report that has been shared with you.
You need to add the visual to a dashboard as a tile.
Which action should you perform?
A. Export data
B. Pin
C. Copy
D. Spotlight
Answer: (SHOW ANSWER)
An entire report page can be pinned to a dashboard, which is called pinning a live tile. It's called a live tile because you can interact with the tile on the dashboard.
Unlike with individual visualization tiles, changes made in the report are automatically synced with the dashboard.
Reference:
https://docs.microsoft.com/en-us/power-bi/create-reports/service-dashboard-pin-tile-from-report

NEW QUESTION: 96
You review a Power BI report about a company's sales data in Power BI.
You open an insight notification and observe that one of the company stores has a higher sales value than the target sales value in the previous quarter.
You need to identify the insight that is shown in the notification.
Which insight is used?
A. recent trend
B. significant anomaly
C. key performance indicator (KPI) analysis
D. trend reversal
Answer: (SHOW ANSWER)

NEW QUESTION: 97
Hotspot Question
A company uses Microsoft Power Platform to connect to multiple data sources and manage business data.
The low-code components in Microsoft Power Platform must be able to create and update data in these data sources.
You need to access the required data by using Microsoft Power Platform components.
Which component should you use for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Component
Update data in an API hosted in Azure.	Custom connector Microsoft Dataverse Power Query
Update files in SharePoint document library folders.	Microsoft Teams connector Microsoft Dataverse Power Query Standard connector
Ingest and transform data into Microsoft Dataverse by using dataflows.	Microsoft Dataverse Power Query Standard connector

freepdfdumps.com Microsoft

Answer:

Answer Area

Requirement	Component
Update data in an API hosted in Azure.	Custom connector / Microsoft Dataverse / Power Query
Update files in SharePoint document library folders.	Microsoft Teams connector / Microsoft Dataverse / Power Query / Standard connector
Ingest and transform data into Microsoft Dataverse by using dataflows.	Microsoft Dataverse / Power Query / Standard connector

NEW QUESTION: 98
You create a Power Virtual Agents chatbot for a company. The chatbot will use common channels and services by which the company communicates with customers.
You need to determine which services the chatbot can be used with or added to.
Which two services can the chatbot be used with? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Facebook
B. Power BI
C. Microsoft Azure Event Grid
D. Microsoft Azure Service Bus
E. Microsoft Azure Bot Framework
Answer: (SHOW ANSWER)
Bot can be added to Facebook.
https://docs.microsoft.com/en-us/power-virtual-agents/publication-add-bot-to-facebook Bot can use the skills topics provided by Bot Framework.
https://docs.microsoft.com/en-us/power-virtual-agents/configuration-add-skills
NEW QUESTION: 99

A company is considering implementing Power Platform.
For which three scenarios should you consider implementing Power Apps portals? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. a customer support website that includes knowledge search and support for document uploads
B. a public website that supports multi-lingual communities with forums and blogs support
C. an online store with e-commerce requirements including payment processing
D. a secure website for vendors accessing data stored in Common Data Service
E. an internal website for employees to access selected data from Dynamics 365 Finance
Answer: (SHOW ANSWER)
A) Customer self-service portal: A customer self-service portal enables customers to access self- service knowledge, support resources, view the progress of their cases, and provide feedback.
B) Community portal: A community portal leverages peer-to-peer interactions between customers and experts to organically grow the catalog of available knowledge from knowledge base articles, forums, and blogs as well as providing feedback through comments and ratings.
C) Partner portal: A partner portal allows every organization with resellers, distributors, suppliers, or partners to have real-time access to every stage of shared activities.
Ref: https://learn.microsoft.com/en-us/power-apps/maker/portals/portal-templates

NEW QUESTION: 100
You are using Power Virtual Agents to create a chatbot for your Power Apps portal.
You need the chatbot to start from the beginning of the conversation if user input is unrecognized.
What should you configure?
A. Trigger
B. Error message
C. Fallback topic
D. At features
Answer: C (LEAVE A REPLY)
In Power Virtual Agents, the fallback topic is used to handle situations where the user input is not recognized by the chatbot. If the user input is not matched to any of the topics or questions in the chatbot, the fallback topic will be triggered, allowing you to configure a response or redirect the conversation to a different topic. This is why you should configure the fallback topic if you want the chatbot to start from the beginning of the conversation if the user input is unrecognized.
https://learn.microsoft.com/en-us/power-virtual-agents/authoring-system-fallback-topic

NEW QUESTION: 101
You are creating Power BI reports.
You need to choose which filters you can use for reports.
Which three types of filters can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. drill-down
B. automatic
C. database
D. manual
E. external
Answer: A,B,D (LEAVE A REPLY)
https://docs.microsoft.com/en-us/power-bi/power-bi-report-filter-types

NEW QUESTION: 102
Which of the following statement will be applicable for TPT Limited which plans to use Power BI for visualizing data from business systems?
A. You cannot display related data from Dynamic 365 Customer Engagement and Excel in the same Power BI report.
B. You can display related data from Dynamic 365 Customer Engagement and Excel in the same Power BI report.
Answer: A (LEAVE A REPLY)

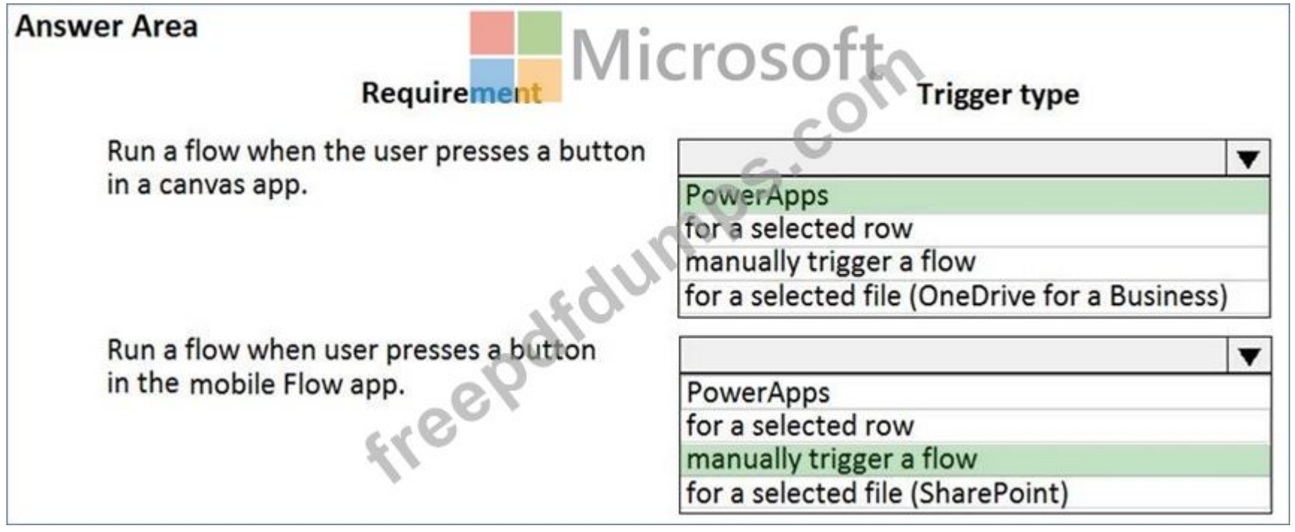

NEW QUESTION: 103
Hotspot Question
A company is using Power Automate to automate business processes.
You need to recommend triggers for Instant flows.
What trigger types should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Trigger type
Run a flow when the user presses a button in a canvas app.	PowerApps for a selected row manually trigger a flow for a selected file (OneDrive for a Business)
Run a flow when user presses a button in the mobile Flow app.	PowerApps for a selected row manually trigger a flow for a selected file (SharePoint)

Microsoft
freepdfdumps.com

Answer:

Explanation:

PowerApps - Use a button or links in powerapp to trigger an action in this flow (this can be a web app also, canvas app run in web also) Manually trigger a flow - Flow button for a mobile

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/using-logic-flows

https://www.o365dude.com/2017/07/15/flow-buttons-the-hidden-gem-of-microsoft-flow/

NEW QUESTION: 104

Hotspot Question

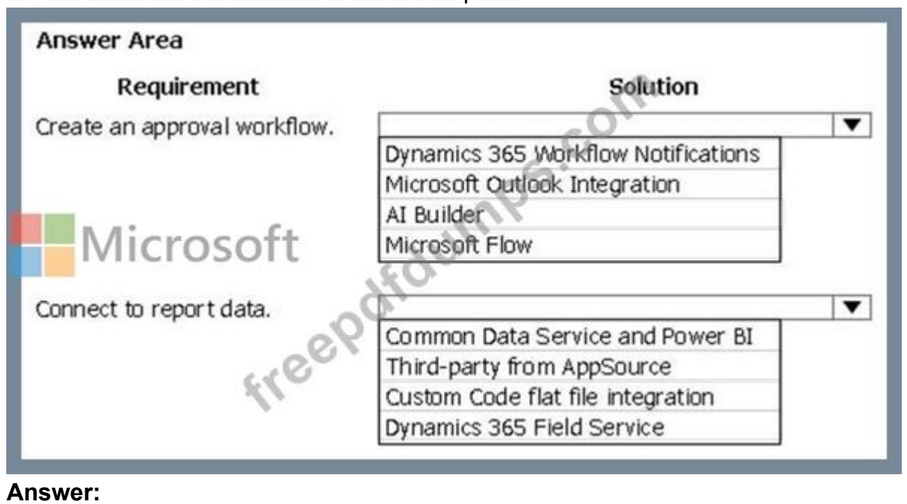

A company uses a third party application and an approval process via email. At the end of the month, the IT department enters the data into Microsoft Excel to create pivot charts.

The Excel pivot charts must use the same data source as Dynamics 365 Field Service to generate charts and reports.

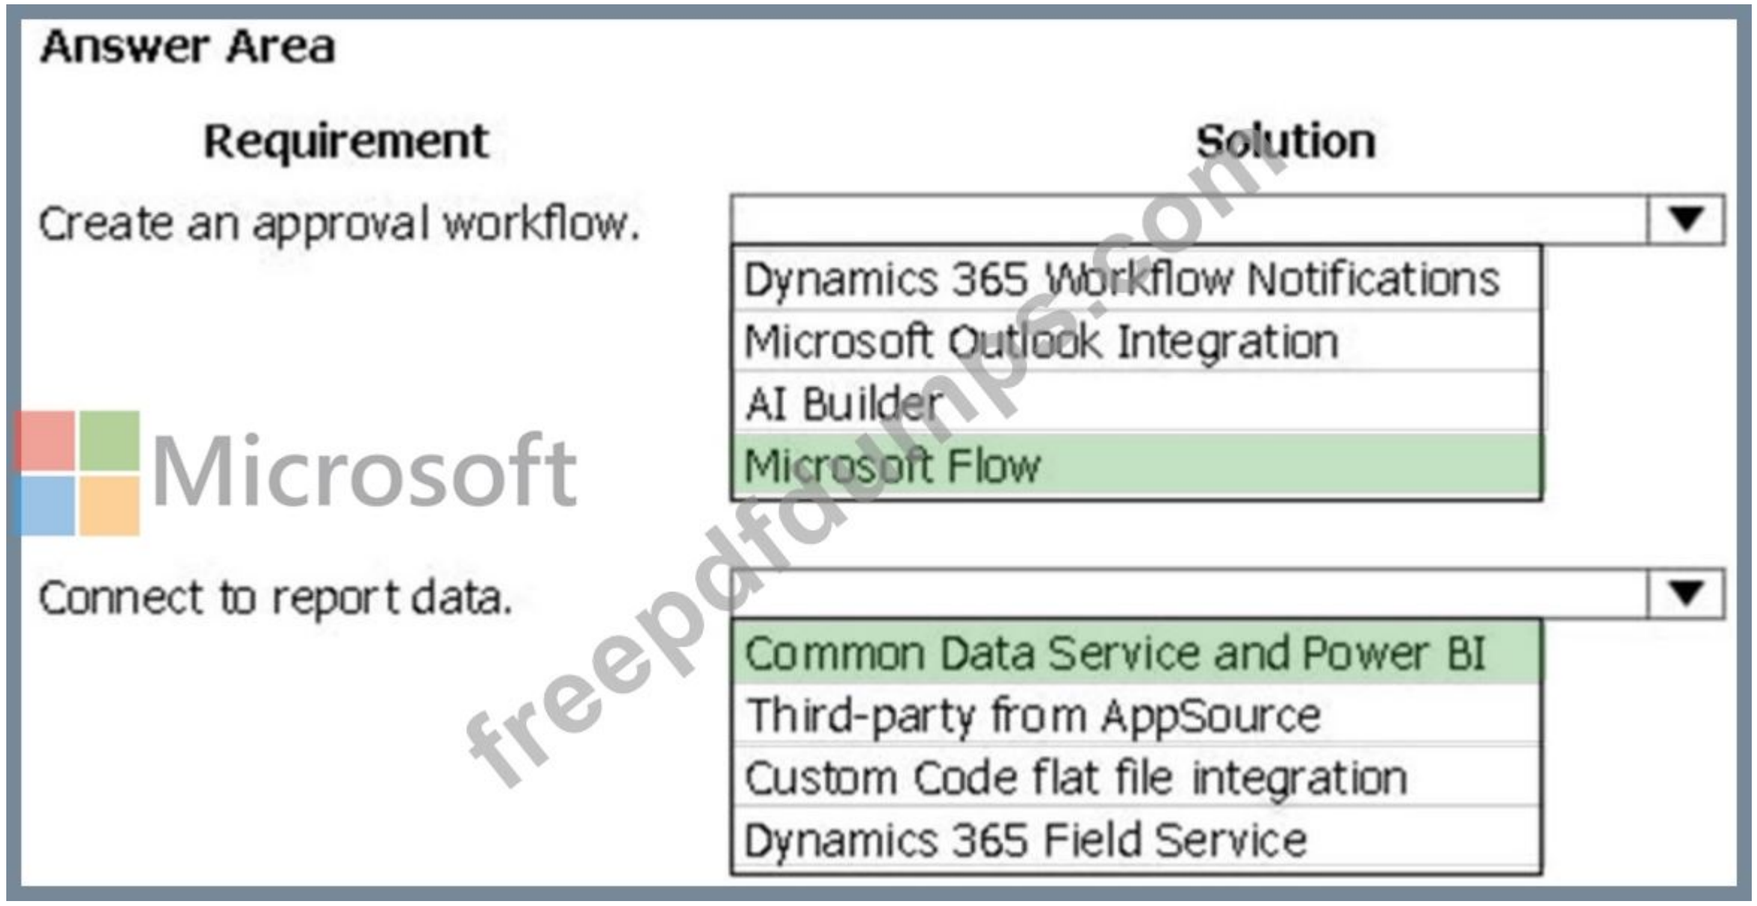

You need to recommend a solution.

What should you recommend? To answer, select the appropriate configuration in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

freepdfdumps.com

Explanation:

1 - Flow (PowerAutomate) approval template

https://docs.microsoft.com/en-us/power-automate/modern-approvals

2 - PowerBI connects to CDS and through Analyze in Excel option, you can use Excel to PivotTable from the BI DataSet (which source is CDS)

https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-analyze-in-excel

NEW QUESTION: 105

Hotspot Question

You need to use Power Apps to meet your company's requirements.

What PowerApps feature should use for each task? To answer, select the appropriate options from the drop-down menus.

Task	Feature
Create customized apps with full control over the user interface.	Canvas apps Model-driven apps Power Apps portals
Create apps for complex business logic involving Common Data Service.	Canvas apps Model-driven apps Power Apps portals
Create customer-facing apps that can interact with users.	Canvas apps Model-driven apps Power Apps portals

freepdfdumps.com
Microsoft

Answer:

Task	Feature
Create customized apps with full control over the user interface.	Canvas apps Model-driven apps Power Apps portals
Create apps for complex business logic involving Common Data Service.	Canvas apps Model-driven apps Power Apps portals
Create customer-facing apps that can interact with users.	Canvas apps Model-driven apps Power Apps portals

freepdfdumps.com
Microsoft

Explanation:

You should use canvas apps for highly customizable layouts. Canvas apps provide full control over user interface and how screens can interact with each other.

You should use model-driven apps for implementing complex business logic. Model-driven apps take care of the user interface part, so you only need to focus on business rules, forms, and views.

You should use Power Apps portals for a customer facing website. Power Apps portals allow you to create a customer engagement website using pre-built templates.

NEW QUESTION: 106

You are building a Power Automate flow to manage sales.

The sales team saves quotes as PDF files to a Microsoft OneDrive folder. You create a Microsoft SharePoint list to help the sales team manage follow ups to quotes.

You need to copy the customer name, phone number, and the amount of the potential sale from the sales quote and insert the data into the SharePoint list.
Which AI Builder model should you use?
A. key phrase extraction
B. sentiment analysis
C. text recognition
D. language detection
Answer: C (LEAVE A REPLY)
Text Recognition - The text recognition prebuilt model extracts words from documents and images into machine-readable character streams. It uses state-of-the-art optical character recognition (OCR) to detect printed and handwritten text in images.
This model processes images and document files to extract lines of printed or handwritten text.
https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognition

NEW QUESTION: 108

A manufacturing company receives daily shipments that arrive at any time during the day.

A mailroom manager signs for the shipment, and then sends an email from Microsoft Outlook to the receptionist when the shipment is available. The receptionist sends a text message to each driver to let them know that items within the shipment are ready for delivery.

The company builds a Microsoft Power Automate flow that sends the text messages automatically to all drivers as soon as the receptionist receives the email.

You need to identify the component that allows the Power Automate flow to start without the intervention of the receptionist.

Which component should you select?

A. Copilot

B. Connector

C. AI Builder

D. Power BI

Answer: (SHOW ANSWER)

Power Automate, Create flows to manage email

Here are some of the most frequently used ways to create flows to manage your email.

Power Automate offers many templates for you to create flows. You can use these templates "as is" or you can make any adjustments that your scenario needs. If you don't find a template that matches your scenario, you can create a cloud flow without a template. You can also create a flow from connectors.

*-> Create a cloud flow from a connector: In Power Automate, select Connectors from the left side of the screen, search for the connector you want, and then select it to create your flow. For example, search for outlook to find connectors for Outlook for Microsoft 365.

Two of the most popular connectors used in flows to send or receive email are the Outlook.com connector and the Office 365 Outlook connector. Both connectors offer similar operations that you can use to manage your mail, calendars, and contacts. You can perform actions such as send mail, schedule meetings, add contacts, and more with either of these connectors.

Triggers

A trigger is an event that starts a cloud flow. For example, When a new email arrives (V3) is a trigger that starts a cloud flow when an email arrives into an inbox.

NEW QUESTION: 110
Hotspot Question
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

	Yes	No
Managed solutions can be used to group multiple Power Platform components together during solution development.	○	○
Managed solutions must be used to distribute a Power Platform application on AppSource.	○	○
Managed solutions always protect Power Platform components from editing when components are exported to another environment.	○	○

Answer:

Answer Area

	Yes	No
Managed solutions can be used to group multiple Power Platform components together during solution development.	○	●
Managed solutions must be used to distribute a Power Platform application on AppSource.	●	○
Managed solutions always protect Power Platform components from editing when components are exported to another environment.	●	○

Explanation:

Box 1: No

Components can be grouped only in unmanaged solution.

Box 2: Yes

Managed solution should be used to distribute in App source.
Box 3: Yes
You can't edit components directly within a managed solution. To edit managed components, first add them to an unmanaged solution.

https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm

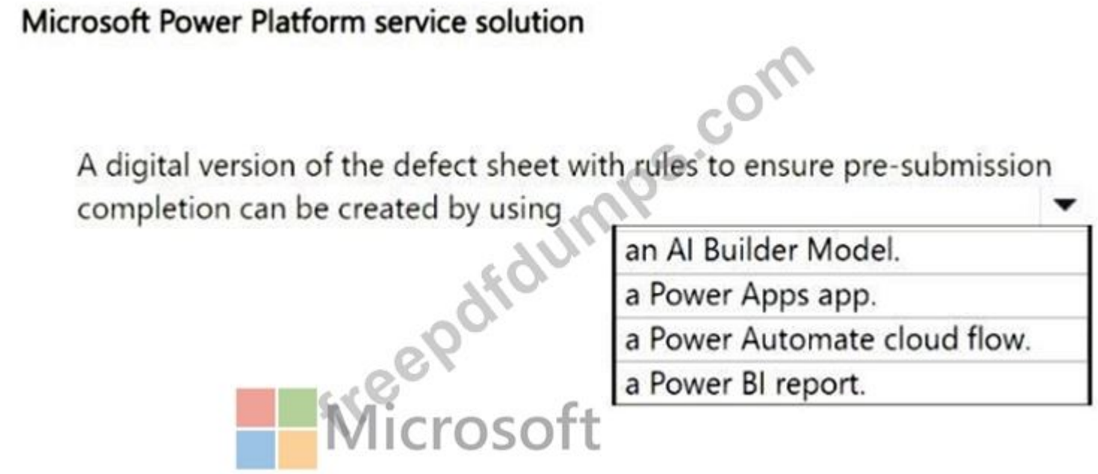

NEW QUESTION: 111
A company creates canvas apps that use a data source from its sales team.
To meet company device policies, you must determine the available app formats the sales team can select when the sales team creates the canvas.
You need to determine the available app formats.
Which two app formats should you select? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Android
B. Desktop
C. iOS
D. Mobile
E. Tablet
Answer: (SHOW ANSWER)

NEW QUESTION: 112
You use Power Automate to create a flow that automatically sends email to a project manager when project team members mark a task as complete.
Project team members are prematurely marking tasks as complete. Project leads must validate that tasks are complete before an email is sent to the project manager to announce task completion.
You need to modify the flow.
Which component should you use?
A. a process argument
B. a condition
C. an expression
D. a trigger
E. a solution
Answer: B (LEAVE A REPLY)
Use a condition and set the action to send an email.
Reference:
https://docs.microsoft.com/en-us/power-automate/add-condition

NEW QUESTION: 113
A company creates a Power BI report for vendors to view purchase orders.
Vendors must view the report by using their own tenant environment.
You need to use a Power BI technology to allow vendors to view the report.
What should you use?
A. dashboard
B. mobile app

C. template app
D. workspace
Answer: A (LEAVE A REPLY)
You can display the Power BI report in the dashboard.
You can set the environment for the dashboard.
Reference:
https://docs.microsoft.com/en-us/power-platform/guidance/coe/setup-powerbi

NEW QUESTION: 114
Hotspot Question
An automobile manufacturer requires workers to collect information about car defects in a defect sheet. Submitted defect sheets must be reviewed by floor managers.
Historically, workers have left out key information from the defect sheets. The floor manager then must contact the worker who submitted the sheet to obtain the missing information.
The automobile manufacturer requires a process that ensures that the floor manager receives a fully completed defect sheet on initial submission.
You need to recommend a Microsoft Power Platform service that fulfills the manufacturer requirements.
Select the answer that correctly completes the sentence.

Answer:

Microsoft Power Platform service solution

A digital version of the defect sheet with rules to ensure pre-submission completion can be created by using

- an AI Builder Model.
- a Power Apps app.
- a Power Automate cloud flow.
- a Power BI report.

NEW QUESTION: 115

Hotspot Question

A user is creating their first Power Apps canvas app.

Which types of controls should you use for each scenario? To answer, select the appropriate options in the answer area.

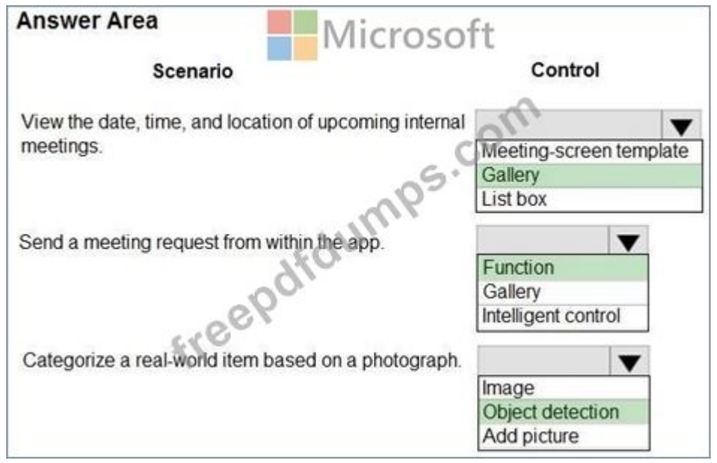

NOTE: Each correct selection is worth one point.

Answer Area

Scenario	Control
View the date, time, and location of upcoming internal meetings.	Meeting-screen template / Gallery / List box
Send a meeting request from within the app.	Function / Gallery / Intelligent control
Categorize a real-world item based on a photograph.	Image / Object detection / Add picture

freepdfdumps.com Microsoft

Answer:

NEW QUESTION: 116

Drag and Drop Question

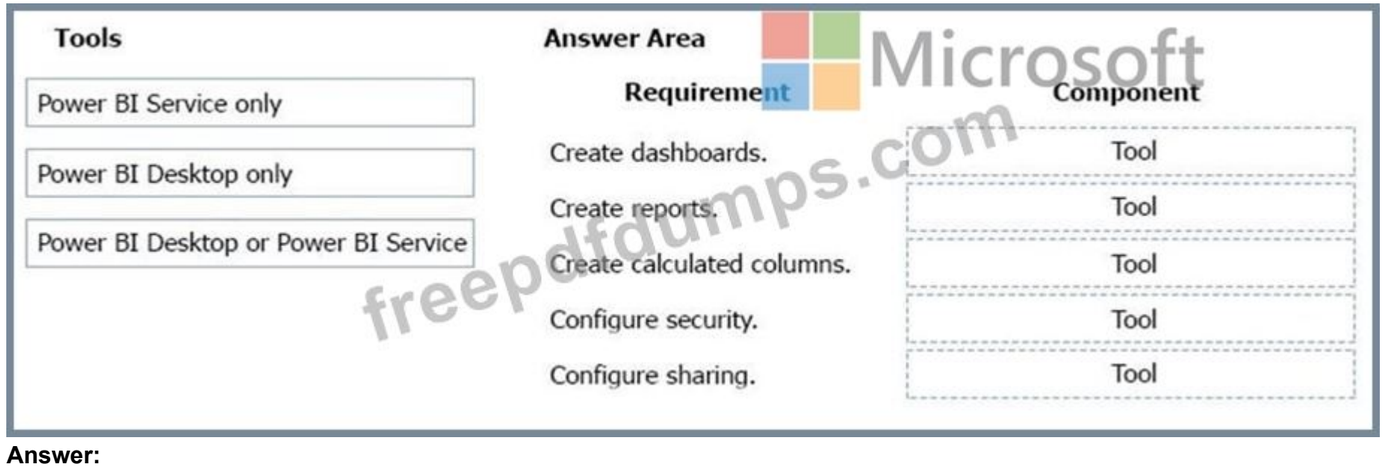

A company is using Power BI to build visualizations.

The company's IT support team needs to know when to install Power BI Desktop on users' computers and where the Power BI Service will suffice to perform tasks.

You need to recommend solutions for the company.

What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

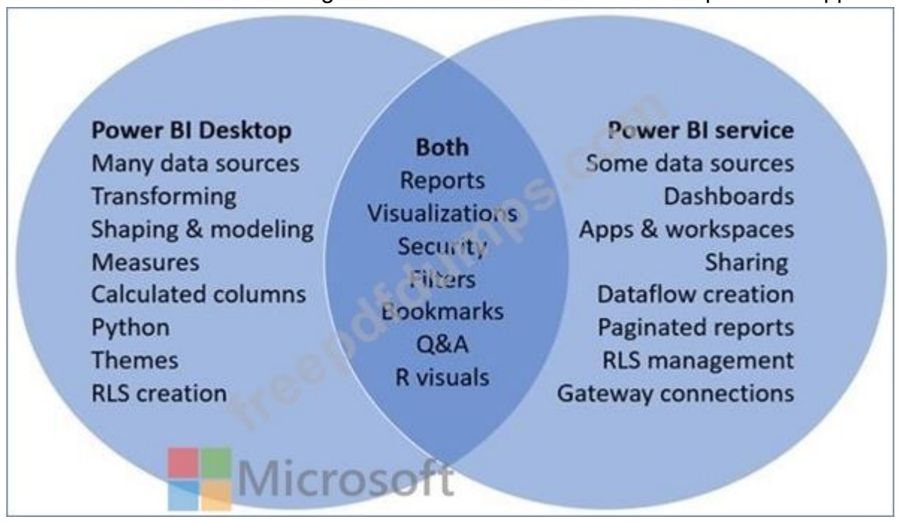

Answer:

Explanation:

In a Venn diagram comparing Power BI Desktop and the Power BI service, the area in the middle shows how the two overlap. Some tasks you can do in either Power BI Desktop or the service.

The two sides of the Venn diagram show the features that are unique to the application and the service.

Reference:

https://docs.microsoft.com/en-us/power-bi/designer/service-service-vs-desktop

NEW QUESTION: 117

A company uses Microsoft Power Platform.

An administrator creates a new data loss prevention (DLP) policy.

You need to identify the Microsoft Power Platform components that must be updated to comply with the policy.

Which two types of components should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Power Automate cloud flows

B. Canvas apps

C. Power BI reports

D. Model-driven apps
E. Power Pages websites
Answer: A,B (LEAVE A REPLY)
DLP policies are created in the Power Platform admin center. They affect Power Platform canvas apps and Power Automate flows.
Reference:
https://learn.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention

NEW QUESTION: 118
You create a canvas app that users can use to view and update information about contacts and their recent orders. The app also sends emails to the contacts and books appointments.
The app uses three data connectors: Dataverse, Outlook, and Bookings.
You add the Copilot control to your app to allow users to ask questions about the contact base by using natural language.
You need to add the appropriate data source to the Copilot control.
Which data source should you add?
A. Contacts table
B. Outlook
C. Bookings
D. Dataverse
Answer: D (LEAVE A REPLY)
You should set Dataverse as the data source for the Copilot control.
Why Dataverse?
Data Location: Your contact base and customer records reside within Dataverse.
Control Purpose: The Copilot control specifically queries table data to answer natural language questions about your records.
Limitations: The Copilot control cannot directly query external service connectors like Outlook or Bookings to aggregate your core contact data.
Configuration Steps
Insert the Copilot control onto your screen.
Select the control and open the Properties panel.
Set the Data source property to your specific Dataverse table (e.g., Contacts).
Select the specific Fields you want the Copilot to read and analyze.
Reference:
https://learn.microsoft.com/en-us/power-apps/maker/canvas-apps/copilot-answer-control-overview

NEW QUESTION: 119
You create a model-driven app for a department.
You need to make the model-driven app available to other department members.
Which two methods should you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Publish the app to AppSource.
B. Send the application's Web URL to other team members by email.
C. Deploy the application to other user's instances through PowerShell.
D. Use the Share feature in the Power Apps designer.
Answer: A,B (LEAVE A REPLY)

It must be in share with right security role setup + share the link so that they can access the app.

NEW QUESTION: 120
Your company uses Dynamics 365.
When a service ticket is created, a technician visit to the customer is required. Technician visits should be consented to by a manager.
You need to ensure that the process is followed.
What should you use?
A. Approval flow
B. Scheduled flow
C. Button flow
D. Bushess rule
Answer: A (LEAVE A REPLY)
You should use approval flows to manage the approval process. These are used for managing approval processes or automating the approval system, like approving an inventory request or approving a leave request.
You should not use schedule flows. Schedule flows are used when you want to perform an action on a specific time or duration, like after an hour or once a day.
You should not use button flows. Button flows are used to automate tasks with a click of a button.
Once a button is clicked, it will trigger an action.
You should not use business rules. These are used when you want to perform a series of tasks in a specific order.

NEW QUESTION: 121
Hotspot Question
A company creates the following Microsoft Power Platform environments to manage a custom model-driven app:
- Development
- Production
You have been granted the System Administrator security role to the development environment and a custom security role named Project Team Member to the production environment.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
You will not be able to access the app until the System Administrator security role is assigned to the app in the development environment.	○	○
You can delete records in the development environment.	○	○
You will not be able to access the app until the Project Team Member security role is assigned to the app in the production environment.	○	○

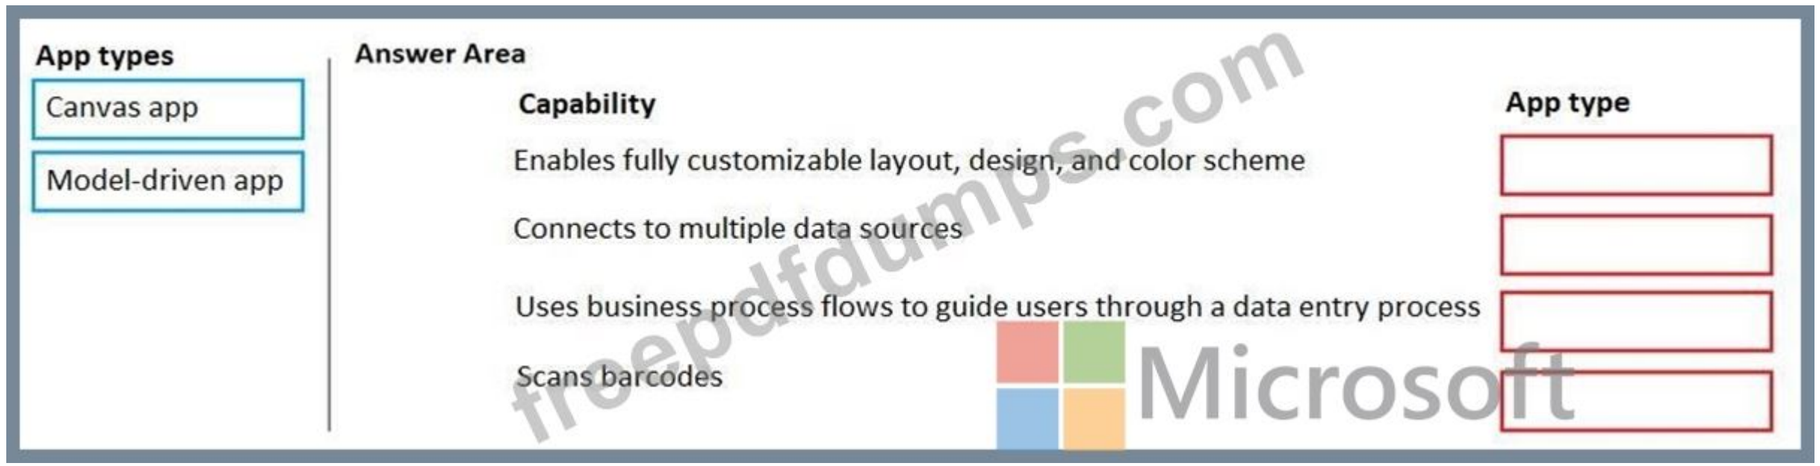

Microsoft
freepdfdumps.com
Answer:

Statements	Yes	No
You will not be able to access the app until the System Administrator security role is assigned to the app in the development environment.	○	○
You can delete records in the development environment.	○	○
You will not be able to access the app until the Project Team Member security role is assigned to the app in the production environment.	○	○

Explanation:
Box 1: No
You already have this access as a System Administrator.
Users who have the Environment Maker, System Administrator, or System Customizer security role can access and edit all model-driven apps within the environment. This is because these security roles have create, read, and write privileges on the Model-driven App table.
Box 2: Yes
If you are the System Administrator role in your CDS (Common Data Service), you would have full permission to customize or administer the environment, including creating, modifying, and assigning security roles.
Currently, within PowerApps, there is no way to prevent CDS System Administrator role from deleting a record in an Entity.
Box 3: No
Other security options are available.
Also, there is no information on what the custom Project Team Member role entails.
Note: Apps can be viewed by valid users with appropriate privileges who sign into Power Apps, the Power Apps mobile app, or Dynamics 365 home page. For a user to view and access apps in an environment, the following privileges, security role, or team membership are required:
- A user who has the write or create privilege on the Model-driven App table makes the user a maker persona. That user can view and access all apps in the environment.
- A user who has only the read privilege on the Model-driven App table, must also have the associated security role(s) that are assigned to the app (or equivalent).
Reference:
https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/app-visibility-privileges
https://docs.microsoft.com/en-us/power-platform/admin/database-security

NEW QUESTION: 122
Drag and Drop Question
Match each type of Power Apps app to its capability.
To answer, drag the appropriate app type from the column on the left to its capability on the right.
Each app type may be used once, more than once, or not at all.
NOTE: Each correct match is worth one point.

Answer:

NEW QUESTION: 123

Hotspot Question

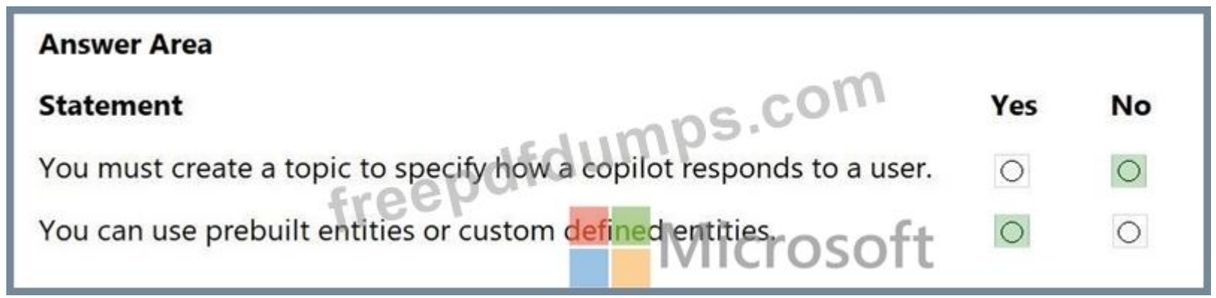

You are developing a Microsoft Copilot Studio copilot for a company.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

freepdfdumps.com
Microsoft

Explanation:
Box 1: No
Microsoft Copilot Studio, Add and manage knowledge for generative answers Generative answers in Copilot Studio allow your copilot to find and present information from multiple sources, internal or external, without created topics.
Box 2: Yes
Use entities and slot filling in copilots
An entity can be thought of as a unit of information that represents a certain type of a real-world subject, like a phone number, zip code, city, or even a person's name. With the knowledge granted by entities, a copilot can smartly recognize the relevant information from a user input and save it for later use.
Reference:
https://learn.microsoft.com/en-us/microsoft-copilot-studio/nlu-boost-conversations
https://learn.microsoft.com/en-us/microsoft-copilot-studio/advanced-entities-slot-filling

NEW QUESTION: 124
You are the Power Platform administrator in your company.
You want to create new users and manage their license assignment. You need to use the appropriate admin center to perform these tasks. What should you use?
A. Microsoft 365 admin center
B. Power Apps admin center
C. Power Platform admin center
D. Dynamics 365 admin center
Answer: A (LEAVE A REPLY)
You should use the Microsoft 365 admin center to create new users and manage their license assignment. You can also manage billing and payment methods in this admin center.
You should not use the Power Platform admin center. You can use this admin center to manage Common Data Service (CDS) environments and consult your environment analytics and capacity.
You should not use the Power Apps admin center. You can use this admin center to manage environments, including the apps and flows within a environment.
You should not use the Dynamics 365 admin center. You can use this admin center to rename, reset and delete a CDS environment.

NEW QUESTION: 125
You are developing a Microsoft Power Platform solution. The solution uses data stored in Microsoft Excel, a Microsoft Dataverse database, and an Azure SQL database.
You must create several visuals to enable the data to display on a screen without moving the data out of its source location.
You need to create the visuals.
Which tool should you use?
A. Power Automate
B. Power Platform Center of Excellence Starter Kit
C. Power Virtual Agents

D. Power BI
Answer: (SHOW ANSWER)
Power BI is a business intelligence and data visualization tool that allows you to connect to various data sources, including Microsoft Excel, Microsoft Dataverse, and Azure SQL databases.
It allows you to create interactive, visually appealing reports and dashboards without having to move the data out of its source location. Power Automate, Power Platform Center of Excellence Starter Kit, and Power Virtual Agents are all different tools that are not specifically designed for creating data visuals in the way that Power BI is.

NEW QUESTION: 126
A company uses Microsoft 365, SharePoint Online, and Dynamics 365 Sales.
You need to recommend tools to build a solution that meets the following requirements:
- Synchronize data from an external Microsoft SQL Server instance.
- Send out of the box report automatically to specific company
executives.
- Ensure that opportunities over a specified amount are approved by a
sales manager.
Which two tools or components should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Microsoft Excel
B. Microsoft Word
C. Power BI
D. Microsoft Dataverse
E. Power Automate
Answer: D,E (LEAVE A REPLY)
We have following task to do,
1) Synchronize data daily - Microsoft Dataverse
2) Access data from an external Microsoft SQL Server instance - Connector (Its not listed in answer)
3) Send an out-of-the box report automatically to specific company executives - Power Automate
4) Ensure that opportunities over a specified amount are approved by a sales manager - Need to check one conditions based on data from CDS - Common Data Service

NEW QUESTION: 127
The Common Data Model (CDM) is a standard and extensible collection of schemas, including entities, attributes and relationships that represents business concepts and activities with well- defined semantics. It consists of a set of standardized, extensible data schemas published by Microsoft and partners to facilitate data interoperability.
Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.
A. Dynamics 365 Business Central
B. Common Data Services (CDS)
C. Business process flow
D. No change is needed.
Answer: D (LEAVE A REPLY)
The Common Data Model (CDM) is a standard and extensible collection of schemas, including entities, attributes and relationships that represents business concepts and activities with well- defined semantics. It consists of a set of standardized, extensible data schemas published by Microsoft and partners to facilitate data interoperability.
You should not change to Common Data Services (CDS). CDS is used to store and manage data used by business applications. The data is stored within a set of entities. CDS uses the CDM to provide a set of standardized entities used by your applications.

You should not change to Dynamics 365 Business Central. This is an end-to-end solution for finance, sales, services, and operations for small and mid-sized companies.

NEW QUESTION: 128
Drag and Drop Question
You plan to implement a model-driven app for a company. Employees will use the app to manage appointments with customers.
The app must meet the following requirements:
- Allow employees to create lists of appointments that occur in the next two weeks.
- Display a pie chart of customer types and a bar chart of completed appointments by employee from the sitemap.
- Allow employees to access notes, emails, and other activities for a particular customer.
- Automatically hide the appointment address columns if an appointment is marked as online.
You need to identify the required components for the model-driven app.
Which components should you use? To answer, move the appropriate components to the correct requirements. You may use each component once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

Answer:

NEW QUESTION: 129
Hotspot Question
A company plans to implement Power Platform solutions.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

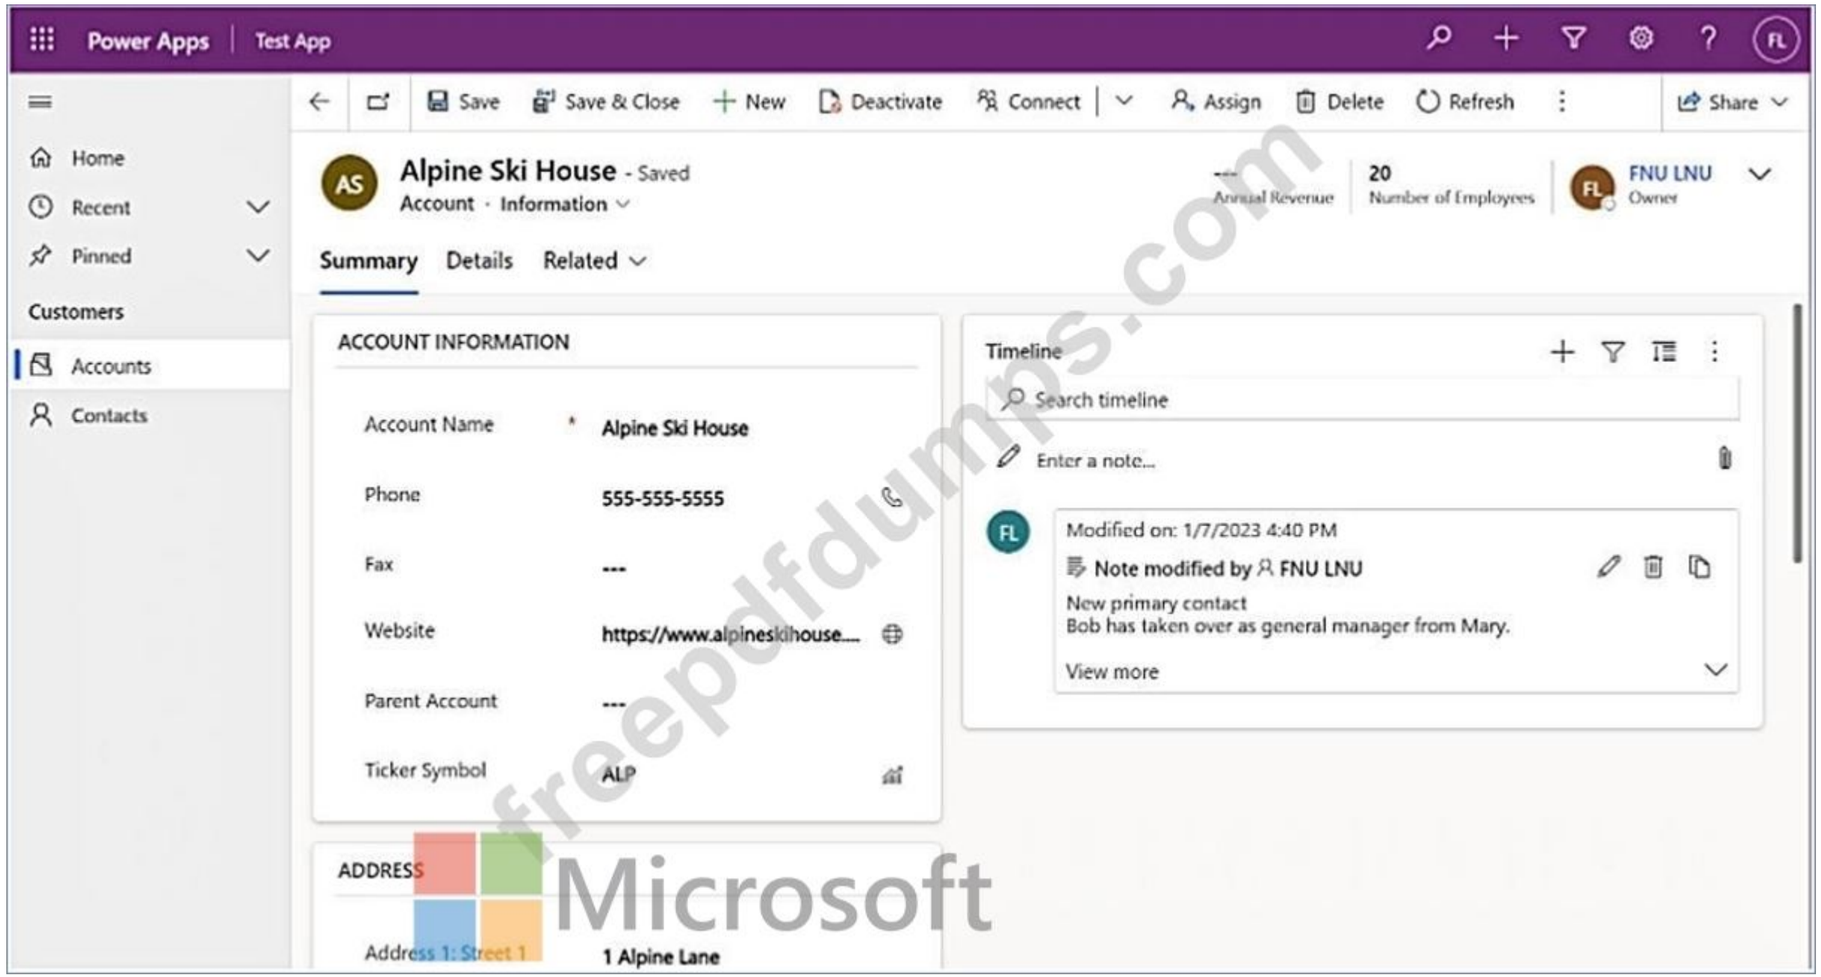

Explanation:
Box 1: Yes
You can create SharePoint integrated canvas apps using Microsoft Lists.
Power Apps can be used in four scenarios with Teams:
Embed a canvas app as a tab app
Embed a canvas app as a personal app
Etc.
Box 2: No
Model-driven Apps run only on Dataverse (formerly Common Data Service) entities, thus you cannot directly reference a SharePoint list.
Reference:
https://docs.microsoft.com/en-us/power-apps/teams/overview
https://docs.microsoft.com/en-us/power-apps/maker/canvas-apps/sharepoint/scenarios- sharepoint-form-from-scratch
https://stackoverflow.com/questions/66673555/how-to-integrate-sharepoint-list-in-model-driven- app-in-powerapps

NEW QUESTION: 130
A company currently does not separate testing, development and production as per standard Application Lifecycle Management (ALM) protocol. The company uses Power Apps for accounting and sales processes. The company needs to use only one login account per user. The company also must prevent development and testing from impacting production.

You need to implement a solution to meet the requirements.
Which method should you select?
A. separate environments
B. separate tenants
C. separate Microsoft Azure Storage Blobs
D. separate connectors
Answer: A (LEAVE A REPLY)
To follow application lifecycle management (ALM) principles, you'll need separate environments for app development and production. Although you can perform basic ALM with only separate development and production environments, we recommend that you also maintain at least one test environment that's separate from your development and production environments.
Reference:
https://docs.microsoft.com/en-us/power-platform/alm/environment-strategy-alm

NEW QUESTION: 131
A retailer has decided to build a canvas app for employees. The app can run on tablets. The application has a custom authentication system.
The company wants to ensure that if an employee uses another application on the tablet, they are automatically signed out of the canvas app after five minutes.
You need to identify the control to trigger the action.
Which control should you select?
A. Display form
B. Timer
C. Screen
D. Toggle
Answer: (SHOW ANSWER)

NEW QUESTION: 132
A user requests the removal of the Fax column from the following form in a model-driven app:

Which form should you open in the app designer?

A. Summary

B. Account

C. Information

D. Alpine Ski House

Answer: (SHOW ANSWER)

NEW QUESTION: 133

Hotspot Question

You are building Power BI visualizations for a team.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Power BI can only retrieve data from up to two different sources for each dashboard.	○	○
Power BI visualizations can be used in canvas apps and model driven apps.	○	○
Power BI can display charts and list boxes on dashboards.	○	○

Answer:

Statements	Yes	No
Power BI can only retrieve data from up to two different sources for each dashboard.	○	●
Power BI visualizations can be used in canvas apps and model driven apps.	●	○
Power BI can display charts and list boxes on dashboards.	●	○

Explanation:
Multiple Datasources can be used in a dashboard

https://docs.microsoft.com/en-us/power-bi/consumer/end-user-visual-type

NEW QUESTION: 134

Drag and Drop Question

You plan to use Power Automate to monitor what people are saying about your company's products.

You store the feedback for research and development purposes.

You need to recommend Power Automate components to use for the solution.

To answer drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split Car between panes or scroll to view content.

NOTE: Each correct selection Is worth one point

Answer:

Explanation:

Box 1: Action

An action is something that occurs as a result of the workflow. For example, send an email or copy a file. In this case, the action is to retrieve the top five posts from a Facebook page.

Box 2: Action

An action is something that occurs as a result of the workflow. For example, send an email or copy a file. In this case, the action is to insert records into a database.

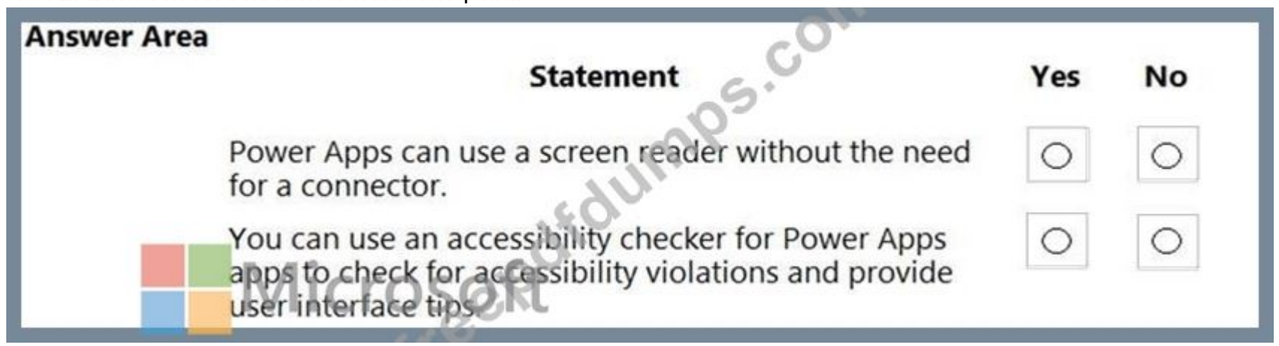

Box 3: Expression

Sometimes users just need to do basic operations like getting the current time, adding numbers together, or replacing a part of a string of text. That's possible inline in any flow action. Microsoft Flow leverages the same Workflow Definition Language used by Azure Logic apps. For new users who are unfamiliar with the expression language, there is an inline help experience that shows how to use each expression as they build out their flow.

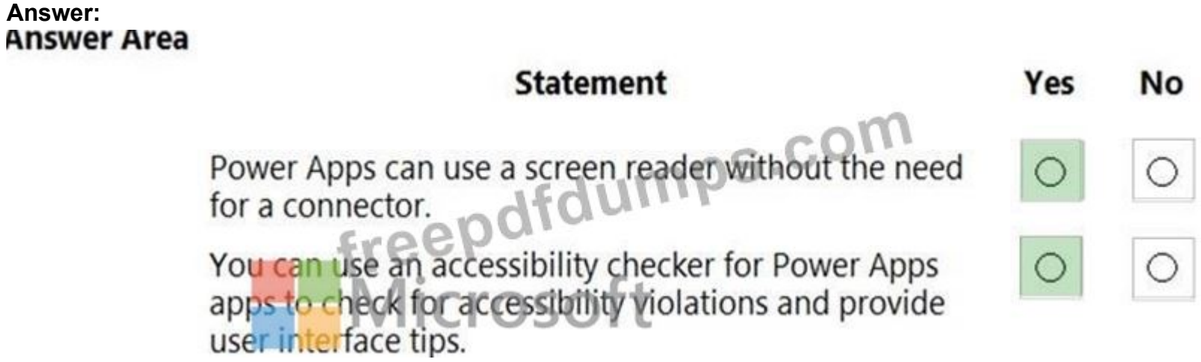

Box 4: Trigger

A trigger is something that triggers or starts the workflow. It could be a new file uploaded to a document library, a new item created in the list or an email sent to your Inbox something that will start (kick-off the workflow). There are two types of triggers:
- Automatic trigger is pre-programmed into the workflow based on a certain rule (i.e. new document or item created, email sent, etc.)
- Manual Trigger is a trigger initiated by a user. Unlike with automatic trigger above, the workflow will only start when initiated manually by the end user (for example, from the Document Library for a selected file). Manual trigger is only supported for certain types of workflows (i.e. Get feedback from your manager for the selected file) Reference:
https://sharepointmaven.com/3-major-components-microsoft-flow/
https://www.avepoint.com/blog/office-365/office-365-automation/
https://flow.microsoft.com/de-de/blog/use-expressions-in-actions/
https://docs.microsoft.com/en-us/power-automate/getting-started

NEW QUESTION: 135
Hotspot Question
You are creating a Power Apps app. You want to ensure that the app can be used by individuals who have a vision impairment.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

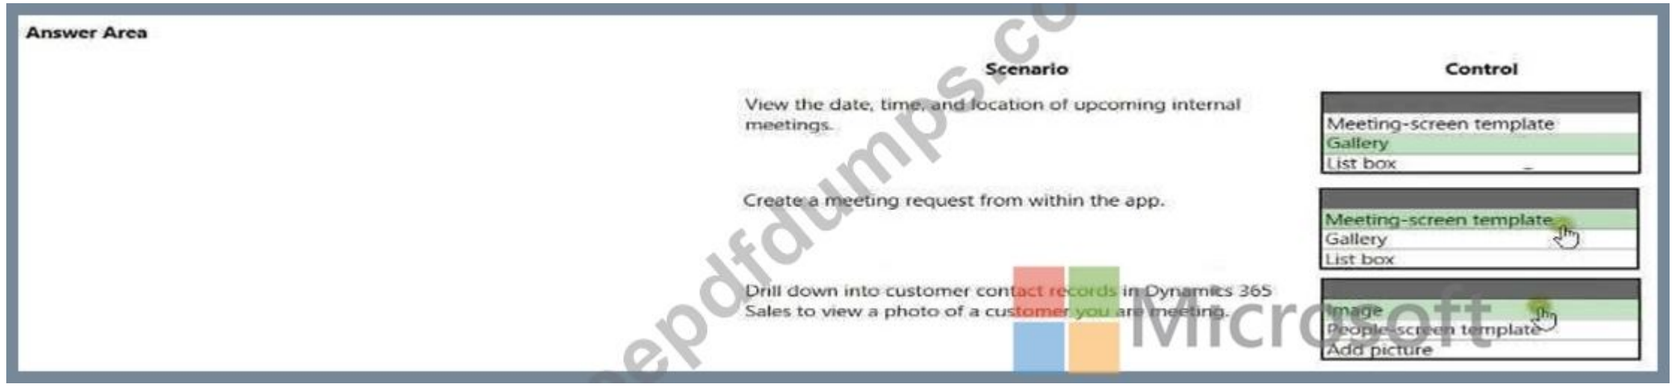

Explanation:
Box 1: Yes
PowerApps has the capability to support screen readers.
Box 2: Yes
Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the Accessibility checker in PowerApps Studio. This tool not only finds potential accessibility issues but also explains why each might be a potential problem for users who have a specific disability and offers suggestions on how to resolve each issue. The Accessibility checker detects screen-reader and keyboard issues for you, and you can find information about how to fix color-contrast issues by using

accessible colors.
Reference:
https://learn.microsoft.com/en-us/power-apps/maker/canvas-apps/accessible-apps
https://docs.microsoft.com/en-us/powerapps/user/screen-reader
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker

NEW QUESTION: 136
Hotspot Question
A user is creating their first Power Apps canvas app.
Which types of controls should you use for each scenario? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

NEW QUESTION: 137
What is a benefit of deploying Microsoft 365 and Dynamics 365 apps in the same tenant?
A. You do not need to manually back up data.

B. Both will use the same time zone.
C. You can use Power BI to display data that comes from both environments.
D. You can implement Single Sign-On (SSO).
Answer: C (LEAVE A REPLY)
https://docs.microsoft.com/en-us/power-platform/admin/use-power-bi

NEW QUESTION: 138
A company is creating a canvas app to track and analyze customer visits to their retail stores.
Data about customer visits is stored on-premises at each retail store location.
The app must display data about customer visits when users launch the app.
You need to ensure that the data is available for consumption by the app.
Which tool should you use?
A. Data gateway
B. Data source
C. Connector
D. Microsoft Dataverse
E. Power Automate
Answer: (SHOW ANSWER)
Data gateway using which the Power platform could establish connection with On-Premise and retrieve the data.

NEW QUESTION: 139
Hotspot Question
A tutoring company has developed and deployed a model-driven app for the administration staff and a canvas app for teachers.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Teachers can access the canvas app by using desktops and mobile devices.	○	○
To access the model-driven app, users must be assigned a security role.	○	○
Administration staff can create personal views and dashboards in the model-driven app.	○	○

Microsoft
freepdfdumps.com

Answer:

Statements	Yes	No
Teachers can access the canvas app by using desktops and mobile devices.	○	○
To access the model-driven app, users must be assigned a security role.	○	○
Administration staff can create personal views and dashboards in the model-driven app.	○	○

NEW QUESTION: 140
Hotspot Question
You are creating a Power Automate approval flow.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
The addition of an expense report to a Microsoft OneDrive folder can initiate an approval flow.	○	○
Approvals must follow a sequential order of approval.	○	○

Answer:

Answer Area

Statements	Yes	No
The addition of an expense report to a Microsoft OneDrive folder can initiate an approval flow.	○	○
Approvals must follow a sequential order of approval.	○	○

Explanation:
Box 1: Yes

Box 2: No
Parallel approvals, integrated approvals, and unanimous approvals are also allowed.
Reference:
https://docs.microsoft.com/en-us/power-automate/modern-approvals
https://docs.microsoft.com/en-us/power-automate/create-approval-response-options

NEW QUESTION: 141
Which data source will be used by Robert, a customer service manager at TPT Limited, who plans to implement a Power Apps portal enabling case submission by customers?
A. Common Data Service
B. Microsoft Azure Storage
C. Microsoft SharePoint
D. Dynamics 365 Connector
Answer: (SHOW ANSWER)

NEW QUESTION: 142
Drag and Drop Question
You need to read data from a Microsoft Excel file into Microsoft Dataverse and then copy that data into an enterprise resource planning (ERP) system.
You need to configure the connector.
What should you use? To answer, drag the appropriate operations to the correct actions. Each operation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Operations

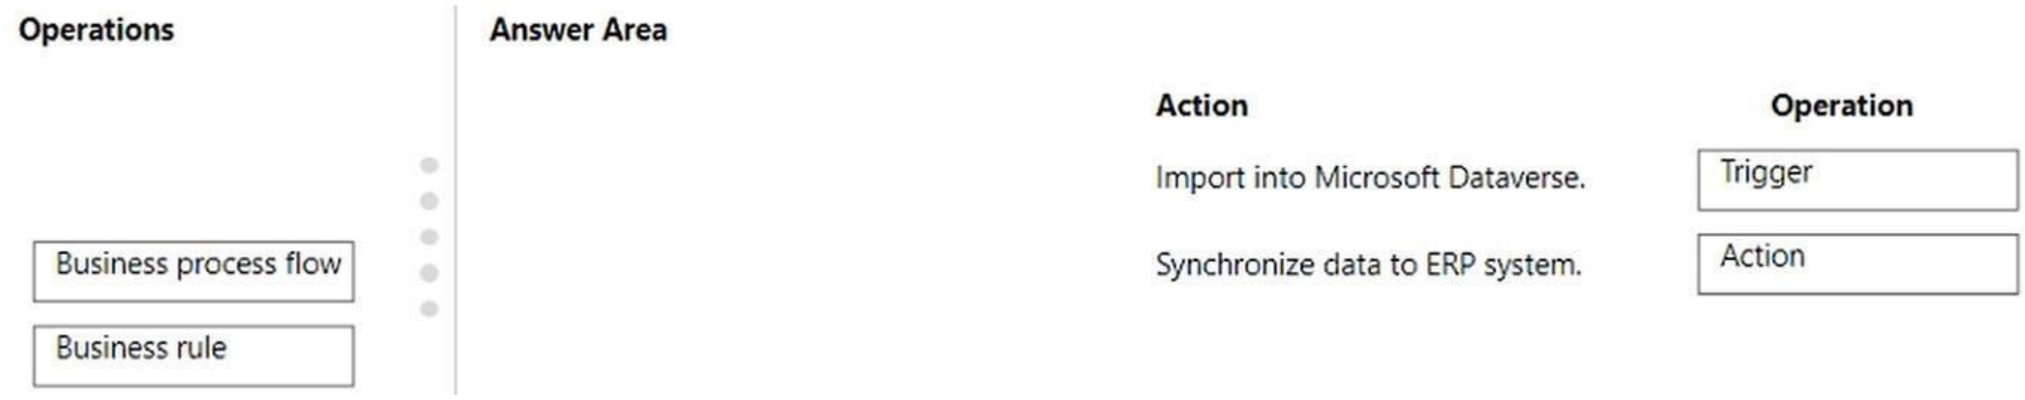

- Trigger
- Action
- Business process flow
- Business rule

Answer Area

Action	Operation
Import into Microsoft Dataverse.	
Synchronize data to ERP system.	

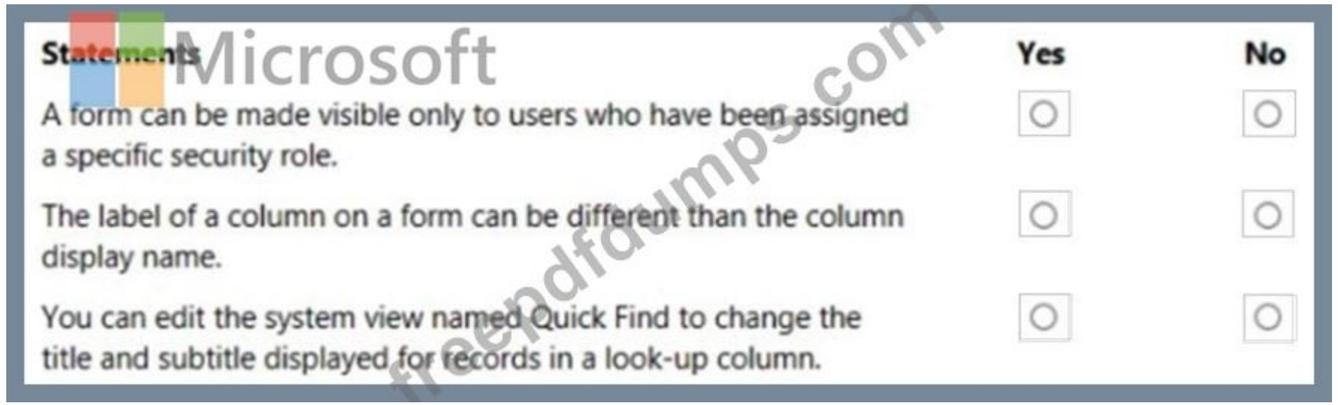

freepdfdumps.com

Answer:

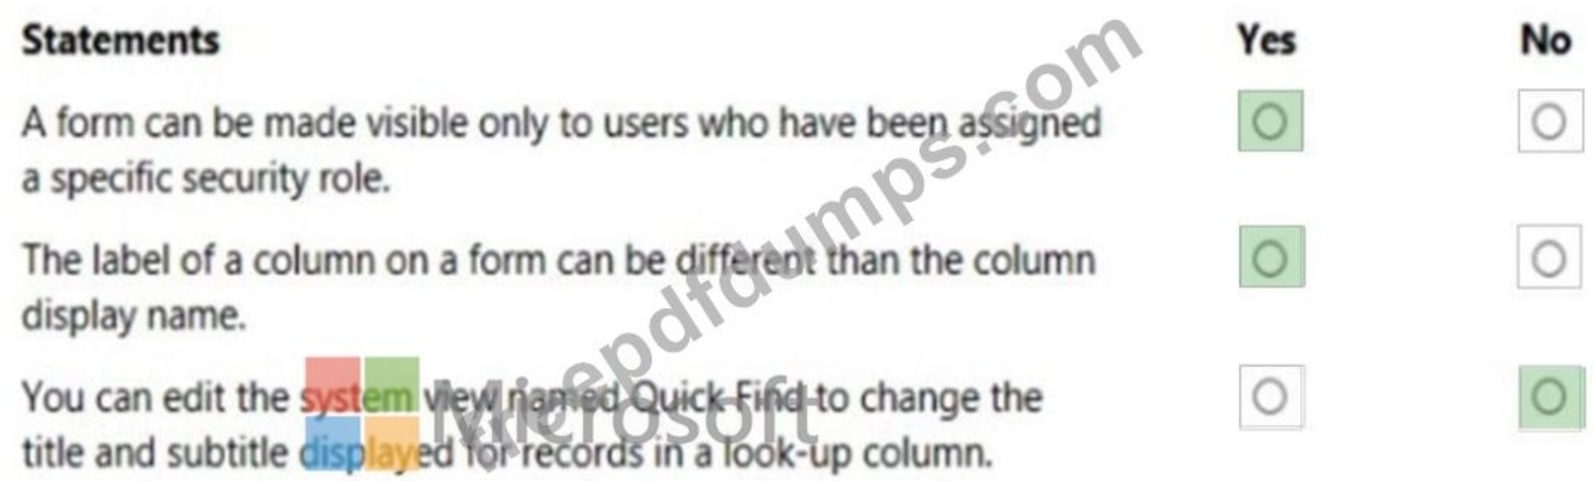

NEW QUESTION: 143
Your coworkers create Power Apps and Power Automate flows to improve business processes.
You need to prevent your coworkers from using the YouTube connector in the company tenant.
What should you create?
A. security role
B. dataflow
C. business rule
D. data loss prevention policy
Answer: D (LEAVE A REPLY)
A Power Platform administrator can create and enforce Data Loss Prevention (DLP) policies in the Power Platform admin center to block specific connectors for Power Apps and Power Automate flows in an environment. These policies, which can be set for different environments, control which connectors can be used, preventing data exposure and leakage.
How DLP Policies Work
1. Admin Action: An administrator signs in to the Power Platform admin center.
2. Access Control: They navigate to Security > Identity and access > App access control, or more commonly, they manage Data Policies to define connector behavior.
3. Policy Creation: Administrators create a DLP policy for a specific environment or tenant.
4. Connector Classification: Within the policy, they classify connectors into categories:
Business: For internal, approved data services.
Non-business: For third-party services that can be used but not combined with business data.
Blocked: To prevent any usage of that connector.
5. Enforcement: When a user tries to use a connector that is classified as "Blocked" in a Power App or Power Automate flow, they will receive an error, preventing the flow or app from functioning with that connector.
Reference:
https://learn.microsoft.com/en-us/power-automate/desktop-flows/data-loss-prevention

NEW QUESTION: 144
Hotspot Question
You create a model-driven app. You need to determine which customization can be made to table forms.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Yes

Different people in your organization may interact with the same data in different ways. Managers may depend on being able to quickly scan information in a row and service people may require a form that streamlines data entry. You can accommodate different requirements by assigning forms to the security roles that different groups of people belong to.

When you have more than one main or other form type defined for a table, you can select which forms users will be able to use based on their security roles.

Because each table must be able to display a form for any user, at least one form must be designated as a fallback form a form visible to users whose security roles do not have any forms explicitly assigned to them.

Box 2: Yes

Label property: By default, the label will match the display name of the column. The name for the form can be overridden by entering a different label here.

Box 3: No

Reference:

https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/control-access-forms

https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/common-field-properties-legacy

NEW QUESTION: 145

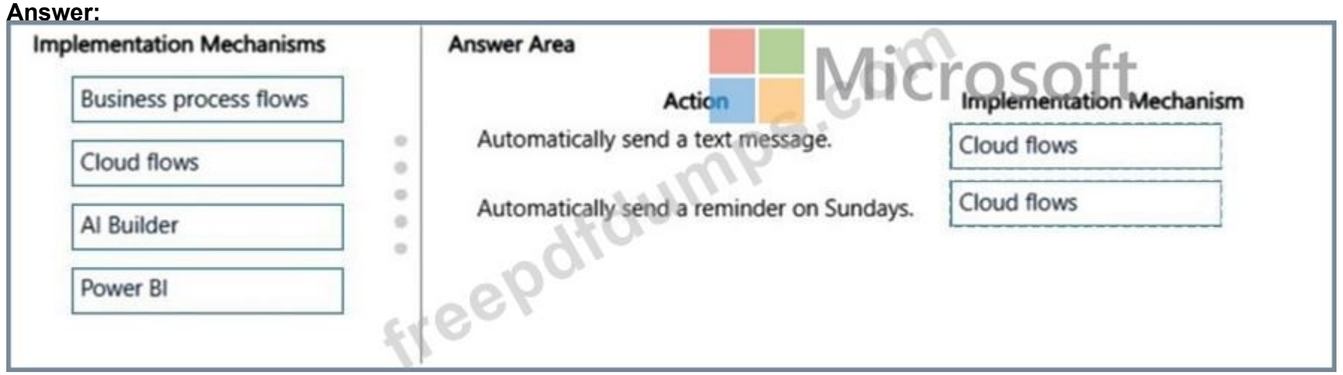

A company has a Power Apps app that is used by most employees. The company is expanding to other countries/regions.

You need to recommend a solution to translate text generated within the Power Apps in near real- time.
What should you recommend?
A. Microsoft Azure Synapse Analytics
B. Microsoft Azure Cognitive Services
C. Common Data Service connector
D. Power BI
Answer: B (LEAVE A REPLY)
https://docs.microsoft.com/en-gb/azure/cognitive-services/welcome?ocid=AID2339762_TWITTER_oo_spl100000827964250
https://powerapps.microsoft.com/en-us/blog/cognitive-services-with-powerapps-using-custom-connectors/

NEW QUESTION: 146
Drag and Drop Question
A company is creating a canvas app to manage weekly status reports from users about projects.
When a status report is submitted, the app must automatically send a text message confirmation.
A reminder must be sent at 8 PM on Sunday to everyone who has not yet submitted a status report for the previous week.
You need to identify the appropriate components to use in the solution.
What should you use? To answer, drag the appropriate implementation mechanisms to the correct action. Each implementation mechanism may be used once, more than once, or not at all.
You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

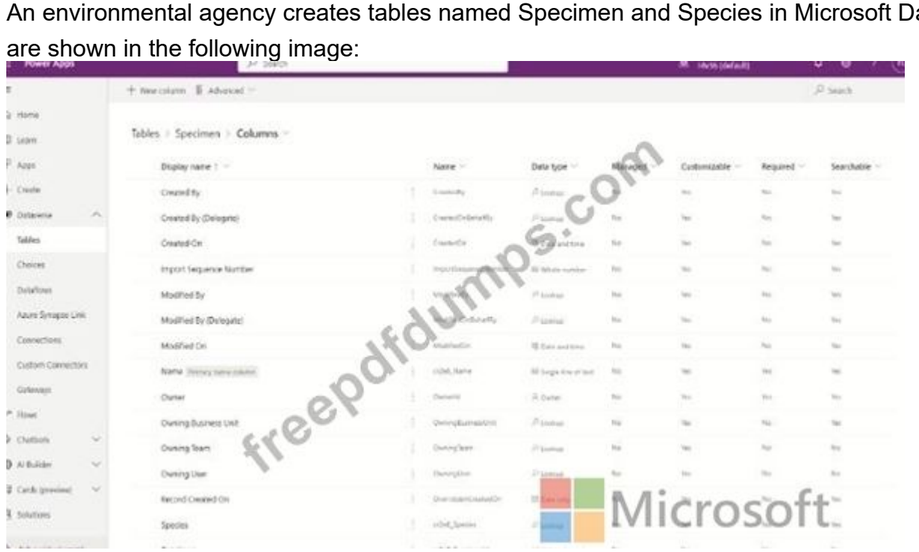

Answer:

Explanation:
Box 1: Cloud flows

Automatically send a text message confirmation.
The tool that meets this requirement is Cloud flows (a feature of Microsoft Power Automate).
Automated & Instant Actions: Cloud flows are explicitly designed to trigger an action automatically when an event occurs, such as a user submitting a status report in a canvas app.
Built-in Connectors: Power Automate offers native connectors (such as Twilio, Plivo, or Azure Communication Services) to seamlessly send automated SMS/text message confirmations directly from a workflow.
Incorrect:
* Business Process Flows
A Business Process Flow cannot automatically send a text message. Business process flows are designed to guide users through a standardized step-by-step interface (like a pipeline or stage bar) and enforce data consistency, but they do not execute automated actions like sending messages.
Box 2: Cloud flows
A reminder must be sent at 8 PM on Sunday to everyone who has not yet submitted a status report for the previous week.
Cloud flows (specifically a Scheduled cloud flow in Power Automate) is the correct tool to meet this requirement.
Scheduled Trigger: Cloud flows allow you to configure a "Recurrence" trigger to run automatically at a specific time and day every week (e.g., every Sunday at 8:00 PM).
Conditional Logic: Within the flow, you can query your data source to check who has not submitted a report for the previous week and use a loop to send an email or Microsoft Teams notification reminder exclusively to those individuals.

https://learn.microsoft.com/en-us/power-apps/maker/canvas-apps/using-logic-flows

NEW QUESTION: 147
Hotspot Question
An environmental agency creates tables named Specimen and Species in Microsoft Dataverse to record specimens that are collected on nature walks as well as their species. Some of the columns of the Specimen table are shown in the following image:

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 148

The front desk of a hotel uses a model-driven app to check in guests.

The hotel wants to create a canvas app for the housekeeping staff to manage cleaning supplies.

The canvas app will connect to a new instance of Microsoft Dataverse.

You need to create a new environment for the housekeeping staff.

What should you use?

A. Microsoft Power Platform admin center

B. Microsoft Azure portal

C. Power Apps maker portal

D. Microsoft 365 admin center

Answer: (SHOW ANSWER)

NEW QUESTION: 149

Drag and Drop Question

A company plans to implement Power BI to analyze retail operations data.

You need to recommend solutions for the company.

Which Power BI components should the company use? To answer, drag the appropriate Power BI components to the correct requirements. Each Power BI component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Dashboard

Set alerts to notify you when data in your dashboards changes beyond limits you set.

Box 2: Report

The reports allow you to view and export the data to excel.

https://docs.microsoft.com/en-us/power-bi/create-reports/service-set-data-alerts

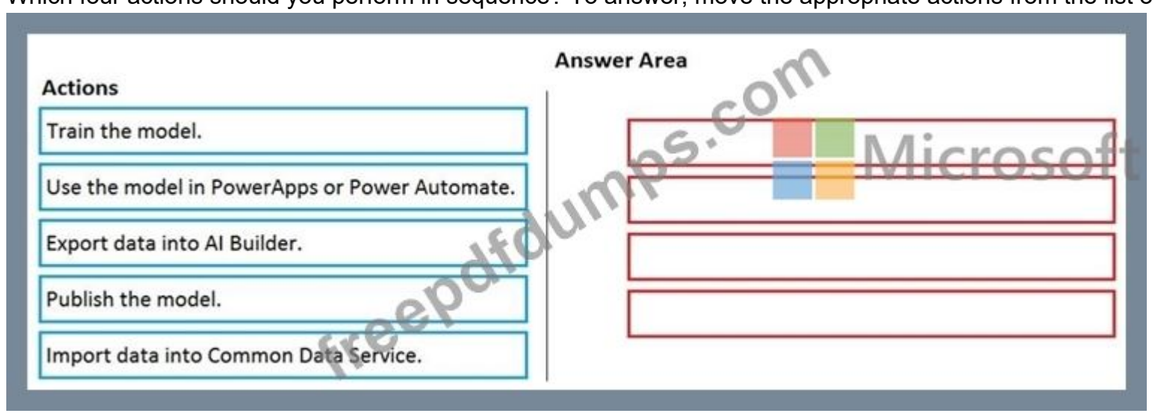

NEW QUESTION: 150

Drag and Drop Question

A bank uses Power Platform apps and flows to support business processes. The company would like to use historical client data to predict whether a client's loan application is likely to be approved or rejected.

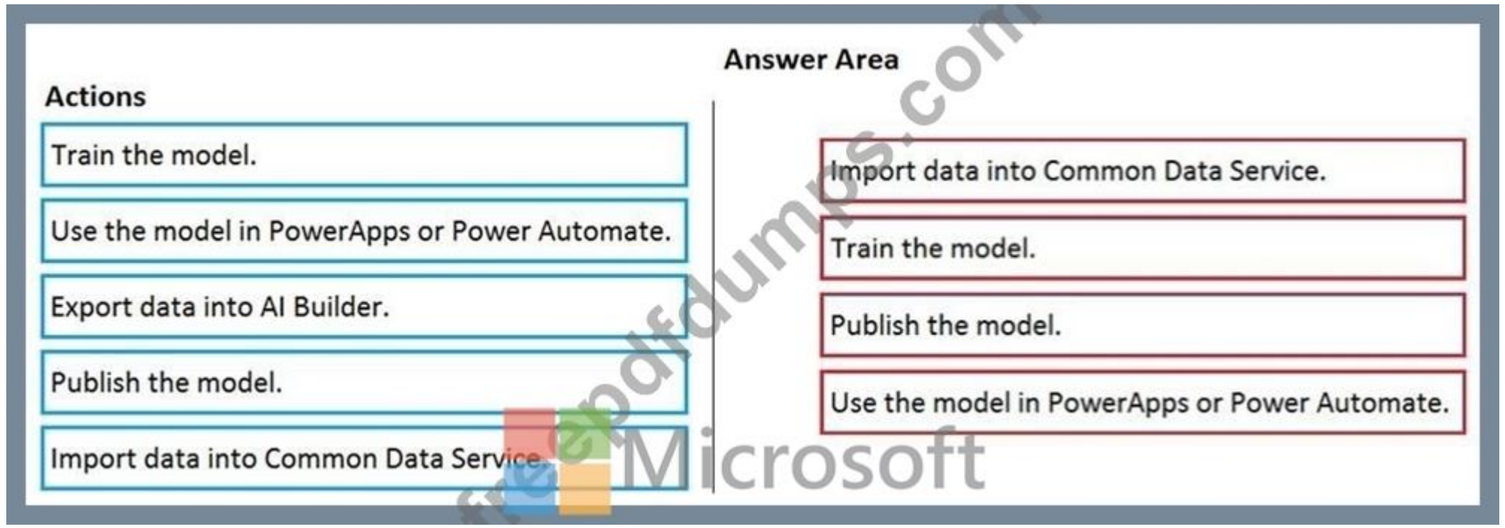

You need to use AI Builder to implement the solution.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

freepdfdumps.com
Microsoft

Answer:

Explanation:

Step 1: Import data into Common Data Service.

AI Builder requires the use of Common Data Service, which is the data platform for PowerApps and allows you to store and manage business data. Common Data Service is the platform on which Dynamics 365 apps are built so if you're a Dynamics 365 customer, your data is already in Common Data Service.

Step 2: Train the model

Step 3: Publish the model

The last step is to publish your model.

Step 4: Use the model in PowerApps or Microsoft Flow.

Reference:
https://docs.microsoft.com/en-us/ai-builder/build-model

NEW QUESTION: 151

Drag and Drop Question

You are creating a Power Apps solution for a company that manufactures bicycles. The company has The following requirements:

- A vendor uploads a Microsoft Excel workbook to the company each week. The workbook contains lists of parts and their current prices. You must automatically Import the data into Microsoft Dataverse as soon as the workbook is uploaded. You must send specific users an alert when new files are uploaded.
- Synchronize customer data with a proprietary accounting database when a user selects a button on the Account form.

You need to recommend the trigger types to use to meet the requirements.

Which trigger types should you use? To answer, drag the appropriate trigger types to the correct requirements. Each trigger type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Trigger types

- Push trigger
- Polling trigger
- Triggers for scheduled flows
- Triggers for business process flow

Answer Area

Requirement	Trigger type
Send a notification when an Excel workbook is uploaded.	
Synchronize customer data with a proprietary accounting database.	

Answer:

Explanation:

Box 1: Push Trigger

It listens for the data on an endpoint they want to wait for an event to occur. When an event has occurred a new run of your workflow instance will be started. Office 365 Outlook, Gmail comes these work on the push triggers. Whenever a mail has been flagged up, the trigger will listen to our data on the endpoint and then the particular actions will happen.

Box 2: Polling Trigger

It is basically an event that periodically makes a call to your service to look for new data. When new data is available causes a new run of your workflow instance with data as an input.

NEW QUESTION: 153
Users within a company use Flow for personal productivity.
Users often overwrite their working flows by editing the definitions and are unable to undo changes after saving a flow.
You need to ensure that users can revert a flow to the current state.
Which two options can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Export
B. Rename
C. Save As
D. Share

Answer: A,C (LEAVE A REPLY)
A: You can export a flow as a package and import it into a different environment, or use it to restore the in the same environment at a later point in time.
C: The ability to make a copy of your flow is often useful when you want to create a flow similar to something you've already created. Or, if you want to maintain a draft of your working flow as you work on adding more functionality.
Here's how:
Go to your My flows page. Click on the More (...) menu item next to the flow that you want to create a copy of. Click on the Save As command.
Reference:
https://flow.microsoft.com/en-us/blog/import-export-bap-packages/ https://flow.microsoft.com/en-us/blog/make-a-copy/

NEW QUESTION: 154
Drag and Drop Question
A company is implementing a customer service solution by using Dynamics 365 Customer Service. The company is extending the solution to meet additional business requirements.
The solution has the following requirements:
- Customers can log on to a secure website and view the progress of
customer service tickets.
- Refund requests over a certain value can be automatically sent for
managerial approval in Microsoft Teams.
- Create a custom page showing a gallery of pictures within the
Dynamics 365 Customer Service app.
You need to use Microsoft Power Platform technologies to implement the solution.
Which technology should you use? To answer, drag the appropriate technologies to the correct requirements. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer Area

Technologies	Requirement	Technology
Power Apps portals	Customers can log on to a secure website and view the progress of customer service tickets.	
Power Automate	Refund requests over a certain value can be automatically sent for managerial approval in Microsoft Teams.	
Canvas apps	Create a custom page showing a gallery of pictures within the Dynamics 365 Customer Service app.

NEW QUESTION: 156

You are editing an existing Power Automate cloud flow. Every day, the flow adds a list of tasks to Microsoft Planner for each email received in a complaints mailbox. The flow then sends a message to you in a Microsoft Teams chat when it completes.

You add an action to the end of the flow to post a Teams message to the central office channel.

You need to update the flow so that tomorrow it will post the message in the central office channel and in the direct chat to yourself.

Which action should you perform next?

A. Add parameters to the action.

B. Turn the flow on.

C. Create a connection.

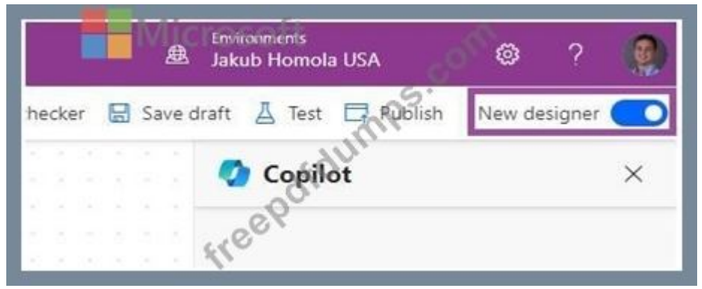

D. Save the flow.

Answer: D (LEAVE A REPLY)

If you open the editing of a cloud flow that you created from a solution (solution-aware cloud flows), you have the following buttons available:

Save draft

Publish

Save draft

Save a draft of a flow whenever you want, even with errors. Make changes to your flow with confidence at your own pace.

Publish a flow

When you're ready for changes to a flow to have an effect at runtime, the flow can be published.

The state of the flow (Draft or Published) shows beside the flow title to indicate if that version of the flow was published, or if the flow has draft changes.

NEW QUESTION: 157

Hotspot Question

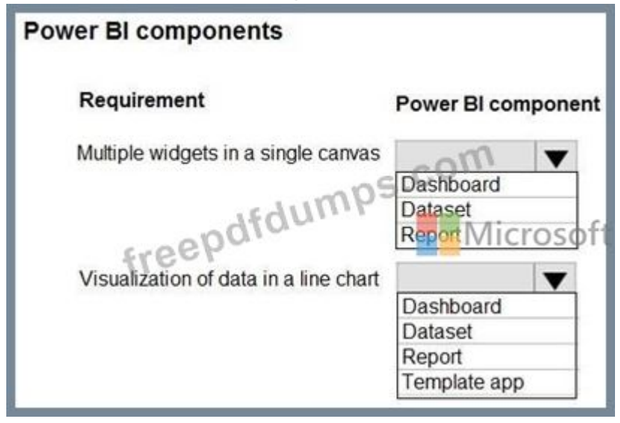

A company uses Power BI to report key performance indicators (KPIs).

The company requires that the KPIs contain the following:

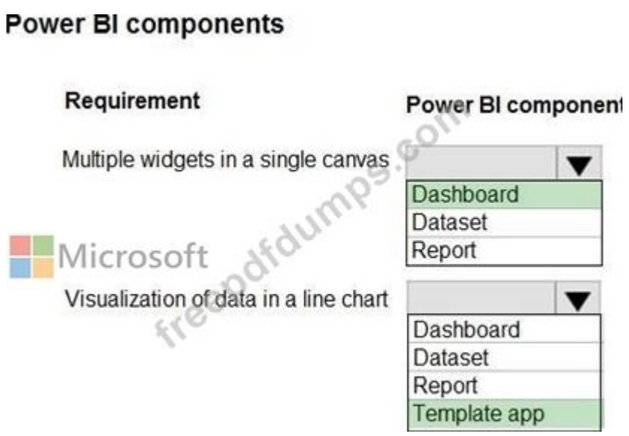

- Multiple widgets in a single canvas
- Visualization of data in a line chart

You need to implement the Power BI components.

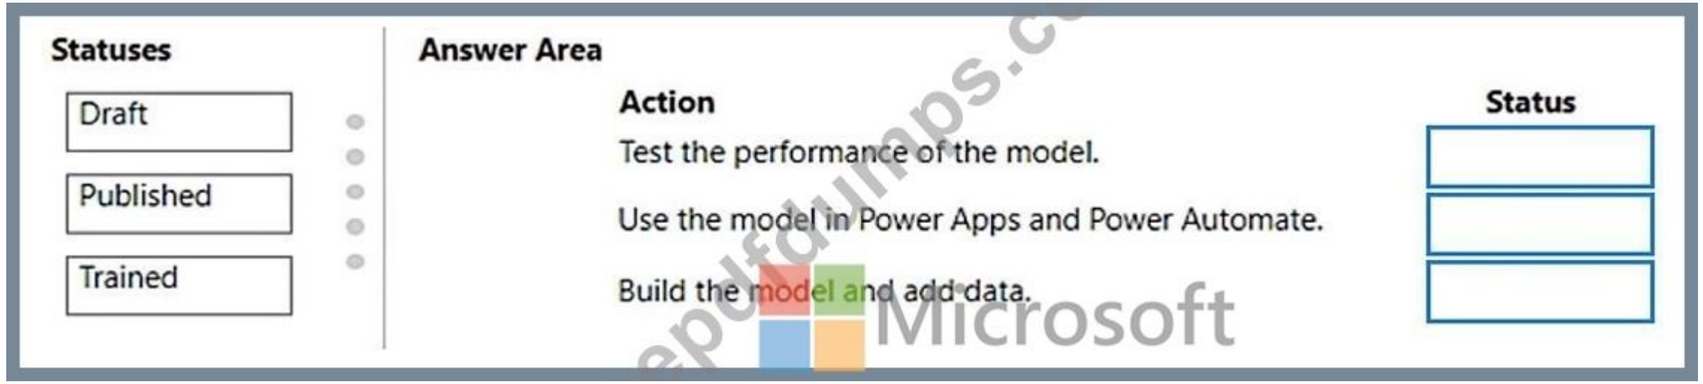

Which components should you use? To answer, select the appropriate options in the answer area.

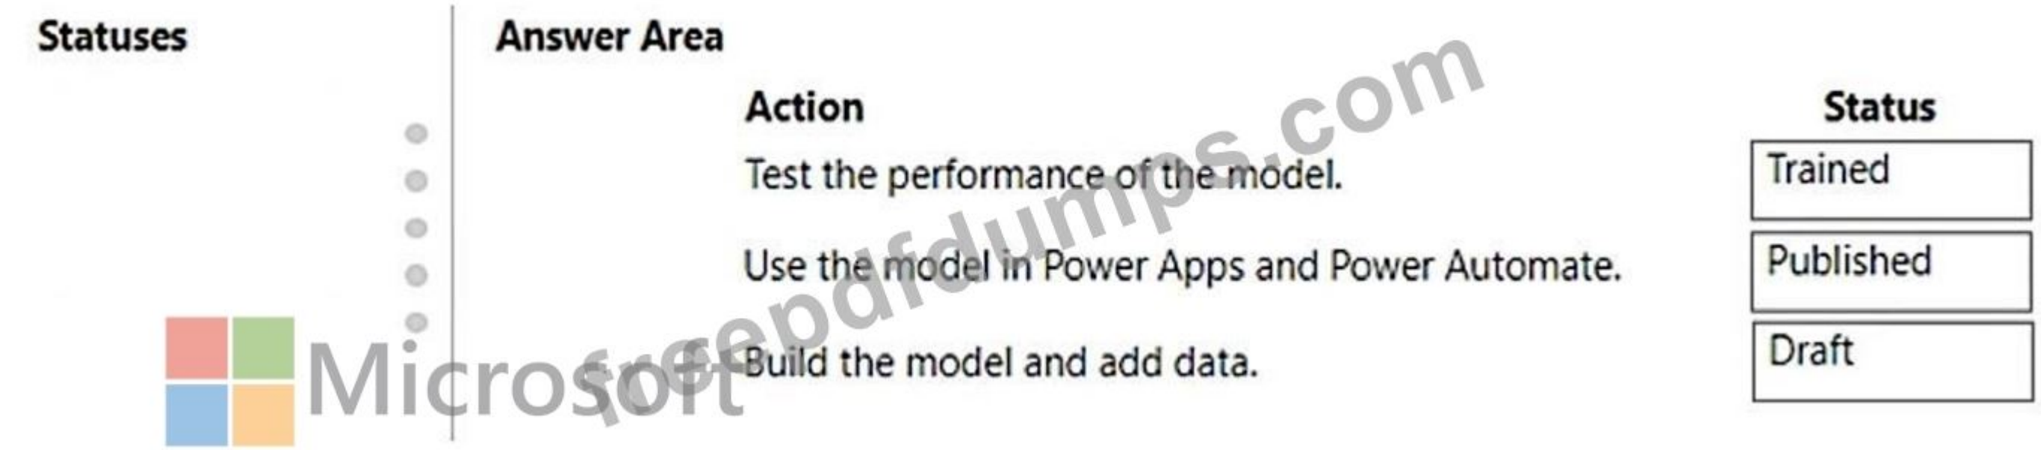

Answer:

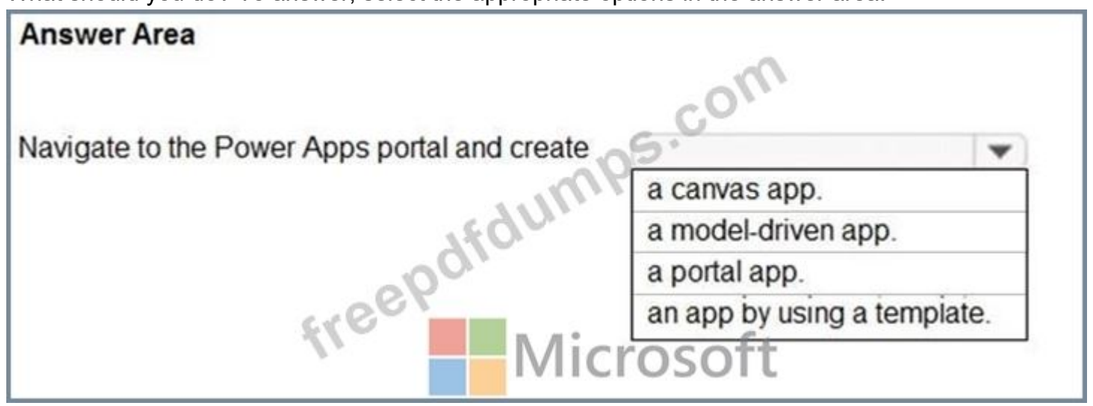

NEW QUESTION: 158
Drag and Drop Question
You are managing a custom model through its lifecycle in AI Builder.
You need to determine the earliest status the model should be in to perform actions.
What is the earliest status required for each action? To answer, drag the appropriate statuses to the correct actions. Each status may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Model-driven apps require a Microsoft Dataverse database.	○	○
A flow instance can only access one Microsoft Dataverse database.	○	○
Canvas apps require a Microsoft Dataverse database.	○	○

NEW QUESTION: 172

Drag and Drop Question

You are implementing a solution for an animal hospital. The animal hospital must contact owners regarding their pets. You need to model the owner and pet object information by using Microsoft Dataverse. The solution must minimize the amount of customization required:

- owner first name
- owner last name
- owner email address
- owner date of birth
- pet name
- pet breed
- pet owner

Which component should you use? To answer, drag the appropriate components to the correct data. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Answer Area

Components	Data	Component
Standard Dataverse table	The owner object	
Custom Dataverse table	The pet object	
Column	The owner's email address	
Relationship	Reference a pet record as belonging to an owner record	

Answer:

Answer Area

Components	Data	Component
Standard Dataverse table	The owner object	Standard Dataverse table
Custom Dataverse table	The pet object	Custom Dataverse table
Column	The owner's email address	Column
Relationship	Reference a pet record as belonging to an owner record	Relationship

Explanation:
Box 1: Standard Dataverse table
Standard: Several standard tables, also known as out-of-box tables, are included with a Dataverse environment. Account, business unit, contact, task, and user tables are examples of standard tables in Dataverse. Most of the standard tables included with Dataverse can be customized.
Box 2: Custom Dataverse table
Custom: Custom tables are unmanaged tables that are either imported from an unmanaged solution or are new tables created directly in the Dataverse environment.

https://docs.microsoft.com/en-us/power-apps/maker/data-platform/types-of-entities

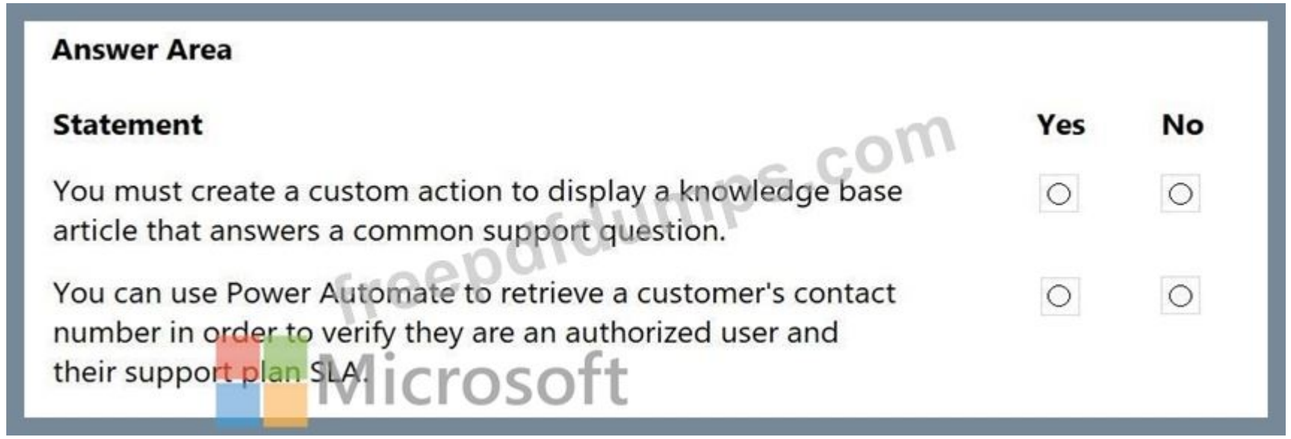

NEW QUESTION: 173

Hotspot Question

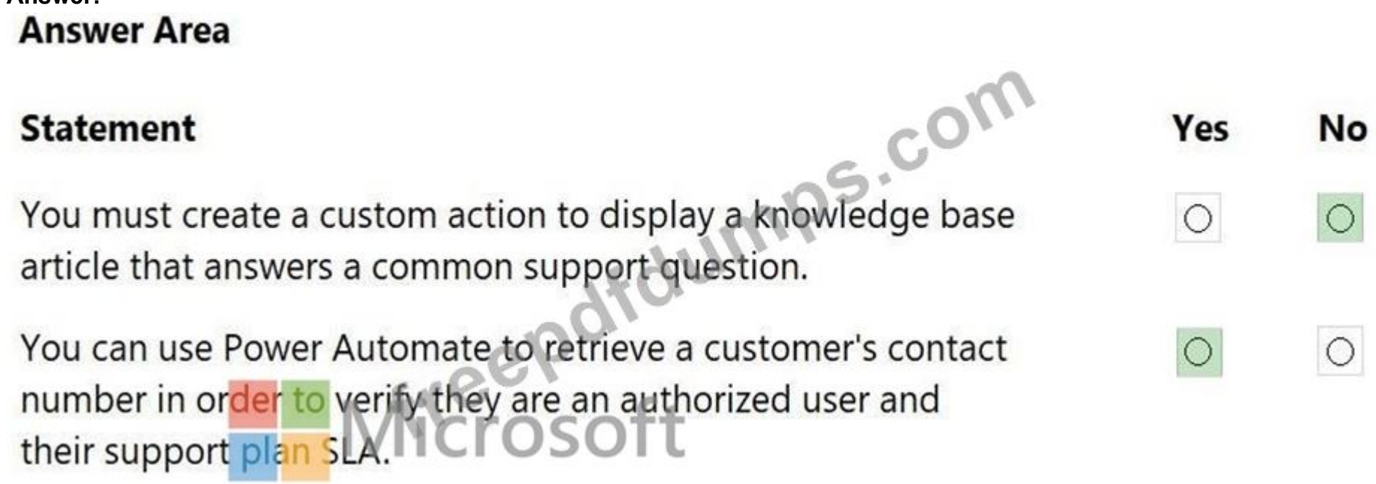

You are authoring a Copilot Studio copilot for a company.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: No

Microsoft Copilot Studio, Add and manage knowledge for generative answers Generative answers in Copilot Studio allow your copilot to find and present information from multiple sources, internal or external, without created topics. Generative answers can be used as primary information sources or as a fallback source when authored topics can't answer a user's query. As a result, you can quickly create and deploy a functional copilot. Makers don't need to manually author multiple topics, which might not address all customer questions.

Box 2: Yes

Microsoft Copilot Studio, Configure end-user authentication for actions

* When creating a Copilot Studio action for an authenticated Copilot Studio project, you can enable end-user authentication, or supply a set of credentials for the copilot to use on behalf of the user.

* Select Copilot author authentication if access to the service associated with the action is implicit, or for low-risk use cases. For example, use this authentication setting to find the phone number for the support team in a given zip code. OR when using a weather API to get the current forecast.

Select User authentication if you must restrict data access to specific groups or individuals in the user community. For example, use this authentication setting if the copilot is meant to retrieve data that only the end user has

access to, or to perform work on their behalf.

NEW QUESTION: 174
A company is implementing Power Automate to streamline operations. The head of customer support relations needs a Power Automate flow that texts a manager when an email meets the following criteria:
- The email is sent as high priority.
- The email is from a customer.
You need to identify how the flow's decision point will know whether the criteria are met.
What should you use?
A. data operations
B. expressions
C. actions
D. triggers
E. variables
Answer: (SHOW ANSWER)

NEW QUESTION: 175
You have a Power Automate flow that saves attachments from emails into OneDrive for Business.
You need to determine why the flow is not working.
What are three possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Navigate to the Power Automate admin center and view the projects.
B. Navigate to the Action Items section of the Power Automate portal.
C. Enable Repair Tips for the flow.
D. Navigate to the flow and view the run history.
E. Navigate to the Power Automate web portal and click view notifications.
Answer: B,C,D (LEAVE A REPLY)
"Action configuration
Flows also fail if a setting in an action of the flow doesn't function as expected. In this case, the error message contains Bad request or Not found, or an error code of 400 or 404 appears.
The error details should specify how to correct the failure. You'll need to click or tap the Edit button and then correct the problem inside the flow definition. Save the updated flow, and then click or tap Resubmit to try the run again with the updated configuration."

NEW QUESTION: 176
You are creating a canvas app.
You select the form factor of the app.
You need to add a source of the data.
What should you use?
A. formula
B. control

C. screen
D. connector
Answer: D (LEAVE A REPLY)

NEW QUESTION: 177
Hotspot Question
Your company has created a Power Virtual Agents chatbot to assist employees with common questions such as checking their vacation balances, office opening hours, and travel expense policies.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Power Virtual Agents capabilities

Statements	Yes	No
To retrieve the user's vacation balance, the bot can use an action.	○	○
Topics are components the bot can recognize in user dialog, such as the name of a particular office.	○	○
A user needs to enter an exact trigger phrase for the bot to respond with appropriate information.	○	○

NEW QUESTION: 178
You are using the Power B1 service to view a visual on a report that has been shared with you.
You need to add the visual to a dashboard as a tile. Which action should you perform?
A. Copy
B. Pin
C. Export data
D. Spotlight
Answer: (SHOW ANSWER)

NEW QUESTION: 179
A company uses Dynamics 365 Supply Chain Management.
When a sales order is created for one of the customers that a specific user manages, a Microsoft Outlook task must be created to remind the user to perform any follow up activities that are required.
You need to implement the functionality to create Outlook tasks.
Which two features should you use? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. AI Builder
B. Power Apps
C. Business Events
D. Power Automate
E. Common Data Service
Answer: C,D (LEAVE A REPLY)

Business events in Microsoft Power Automate
Business events can be consumed in Microsoft Power Automate via the application connector.
The connector has a trigger that is named when a business event occurs. This trigger can be used to subscribe to any of the business events that are available in the target instance of the application.
Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/business-events/business- events-flow

NEW QUESTION: 180
Hotspot Question
A company needs to create several workflows and applications to help streamline their sales operations.
You need to determine which applications are appropriate for given scenarios.
Which applications should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Answer Area

Scenario	Application
Create no-code workflows that use different systems.	Power Automate
Build no-code mobile application.	Power Apps
Build a mobile application by using Microsoft Dataverse.	Power Apps

Azure Logic Apps
Power Apps
Power Automate

NEW QUESTION: 181
Hotspot Question
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: No

You can run apps in a browser or on mobile devices.

Box 2: No

On-premises versions of Microsoft Office can also be used.

Box 3: No

You must ensure that the users you share the app with have the appropriate permissions.

NEW QUESTION: 182
You are creating a Power Pages site for a company.
The company requires a chart on a page to visualize data held within Dataverse.
You need to add the chart to the page.
Which two features can you use? Each correct answer presents a complete solution. (Choose two.) NOTE: Each coned selection is worth one point.
A. Canvas app pie chart control
B. Power BI tile
C. Canvas app line chart control
D. Model-driven app chart
Answer: B,D (LEAVE A REPLY)
Power BI is one of the best tools to deliver insights with simple and interactive visualization. To view dashboards and reports from Power BI on webpages on a website, you must enable Power BI visualization from the Power Platform admin center. You can also embed dashboards and reports created in the new workspace of Power BI by enabling the Power BI Embedded service integration.
Note: Power Pages currently doesn't support the integration of Power BI tiles, reports, and dashboards connecting to datasets located in different workspaces. Ensure that both the dataset and the visualizations are located within the same workspace.
Reference:
https://learn.microsoft.com/en-us/power-pages/configure/add-chart
https://learn.microsoft.com/en-us/power-pages/admin/set-up-power-bi-integration

NEW QUESTION: 183
You are a sales representative. You create a Power BI report to visualize data from a Microsoft Excel workbook.
Users need to be able to view and share the report.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Pin the report to a dashboard.
B. Export the data.
C. Publish the dashboard.
D. Share the dashboard.
Answer: (SHOW ANSWER)
https://docs.microsoft.com/en-us/power-bi/create-reports/service-dashboard-pin-live-tile-from-report
https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards#limitations-and-considerations

NEW QUESTION: 184
Hotspot Question
A company schedules all-hands meetings a few days before they occur. The meetings are scheduled on paper only and advertised on the office bulletin board.
The company requires an automation that allows the office manager to send an SMS to employees the night before the meeting to remind them to attend.
The meeting hosts observe that attendance is low for the meetings.
You need to select the correct type of Power Automate flow to create.
Select the answer that correctly completes the sentence.

Answer:

NEW QUESTION: 185

You are creating a data model in Dataverse for an event planning company.

Individuals can register for multiple events during a cycle. When event planners create an event, details regarding the individuals must copy over to the new event automatically. Organizations must be blocked from registering. You create the table for the events.

You need to identify which Dataverse component to use to finalize the model.

Which component should you identify?

A. Customer column

B. Business rule

C. Relationship

D. Choice column

Answer: B (LEAVE A REPLY)

A Dataverse business rule can be used to make column constraints and to copy data to a different column when a new row is created. Business rules can enforce conditions and actions in real-time as a user interacts with a form, helping to streamline data entry and reduce errors.

Column constraints: Business rules can make a field required, set its value, show or hide fields, and enable or disable fields.

Copying data: You can use a business rule to set the value of one field based on the value of another field when a new row is created. For example, you could copy a value from a "Primary Contact" field to a "Billing Contact" field.

https://www.soutron.com/en_us/blog/general/business-rules-database-design

NEW QUESTION: 186

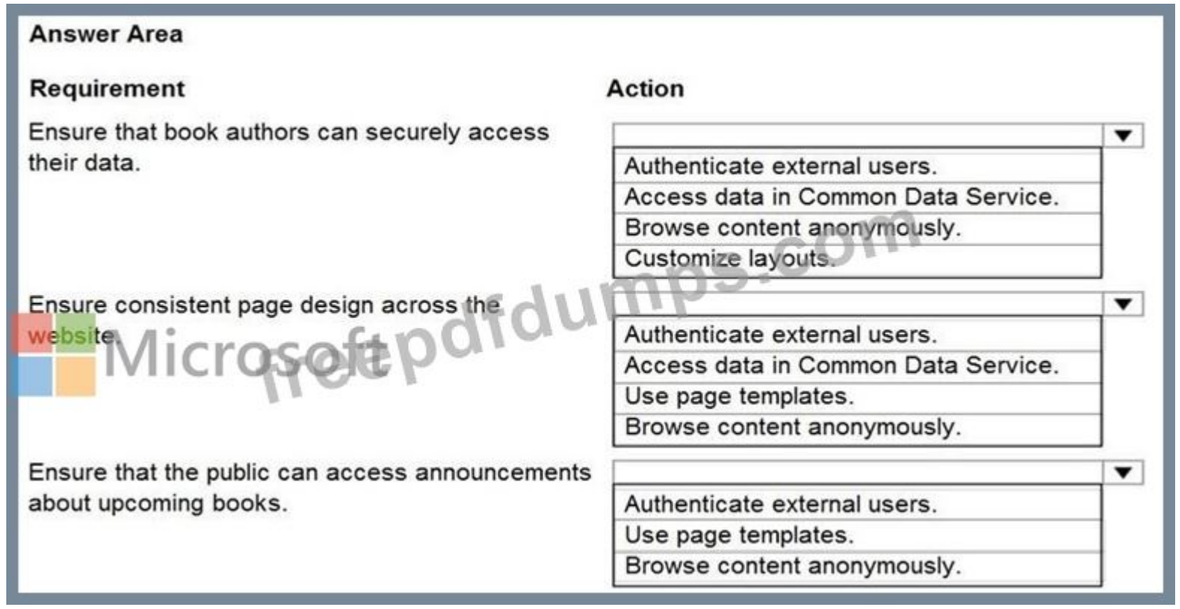

Hotspot Question

A company publishes e-books for independent authors.

The company wants to implement a Power Apps portal solution to make announcements about upcoming books to the general public.

You need to recommend features for the company.

Which features should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Microsoft
freepdfdumps.com

Answer:

Answer Area

Requirement	Action
Ensure that book authors can securely access their data.	Authenticate external users.
Ensure consistent page design across the website.	Use page templates.
Ensure that the public can access announcements about upcoming books.	Browse content anonymously.

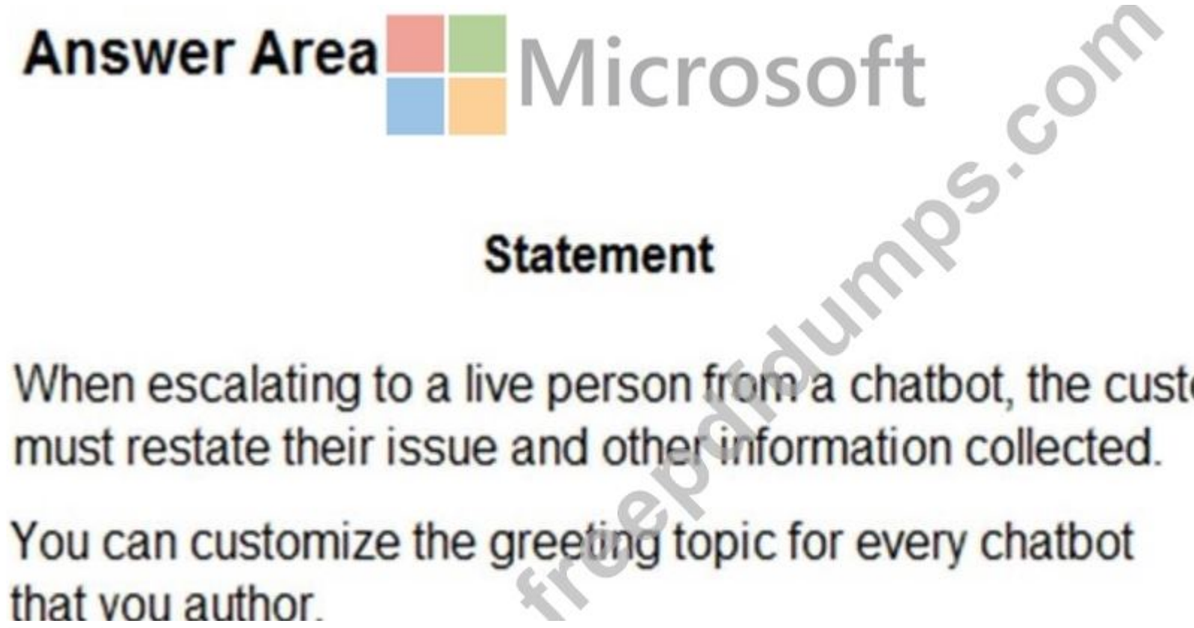

Explanation:
https://docs.microsoft.com/en-us/powerapps/maker/portals/configure/configure-portal- authentication

NEW QUESTION: 187
Hotspot Question
You are authoring a Power Virtual Agents chatbot for a company.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: No

With Power Virtual Agents, you can hand off conversations to live agents seamlessly and contextually.

When you hand off a conversation, you share the full history of the conversation (the context) as well as all user-defined variables. Having access to this context means live agents that are using any connected engagement hub can be notified that a conversation requires a live agent, see the context of the prior conversation, and resume the conversation.

Box 2: Yes

By default, chatbots created with Power Virtual Agents and published to a website will load without a greeting, and will passively wait for the user to start the conversation.

However, you can use custom CSS and JavaScript code to automatically have the bot start the conversation when the bot loads.

Reference:

https://docs.microsoft.com/en-us/power-virtual-agents/advanced-hand-off
https://docs.microsoft.com/en-us/power-virtual-agents/configure-bot-greeting

NEW QUESTION: 188
Drag and Drop Question
A company wants to use a model-driven app for its sales team.
The Sales manager wants to ensure each team member can modify their own views without affecting other views. The IT manager wants to ensure the view is updated for all users.
You need to identify the type of view for the model-driven app.
Which view type will meet the requirements? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 189
What is a benefit of deploying Microsoft 365 and Dynamics 365 apps in the same tenant?
A. Use Common Data Services to connect to application data.

B. You only need to set up groups in Microsoft 365 for permissions to all data.
C. Users can access both Microsoft 365 and Dynamics 365 by using Single Sign-on (SSO).
Answer: A (LEAVE A REPLY)
The advantage is that you can store data in Common Data service, which is the backend of Dynamics 365, and use it with Microsoft 365 solutions such as PowerApps and PowerAutomate.

NEW QUESTION: 190
You are building a canvas app to allow users to record their expenses. The app also will support screen readers for users with visual impairments.
You have the following requirements:
- Use a tool that identifies potential issues.
- Use a tool that provides suggestions for modifying the app.
You need a tool that meets the requirements.
Which tool should you use?
A. Flow Checker
B. Microsoft Trust Center
C. Microsoft Power Platform admin center
D. Accessibility Checker
Answer: (SHOW ANSWER)
The Accessibility Checker is specifically designed to identify potential accessibility issues within apps and provides suggestions for modifying the app to ensure accessibility for users with disabilities, including those who use screen readers. This tool helps developers ensure that their canvas apps are accessible to users with visual impairments, meeting the requirements outlined in the scenario.
https://learn.microsoft.com/en-us/power-apps/maker/canvas-apps/accessibility-checker

NEW QUESTION: 191
TPT Limited is building Power Apps apps using both Dynamics 365 Sales and Microsoft 365.
Which of the following option is applicable for SSO to function?
A. You should not download a product from AppSource to ensure that SSO works with Dynamic 365 Sales and Microsoft 365.
B. You must download a product from AppSource to ensure that SSO works with Dynamic 365 Sales and Microsoft 365.
Answer: (SHOW ANSWER)

NEW QUESTION: 192
Hotspot Question
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Answer Area

Statement	Yes	No
Microsoft Copilot Studio agents can be created directly in Microsoft Teams.	○	○
Microsoft Copilot Studio agents can use the bot testing feature directly within Microsoft Teams.	○	○

freepdfdumps.com

Answer:

Answer Area

Explanation:

Box 1: Yes

Yes - Microsoft Copilot Studio agents can be created directly in Microsoft Teams.

You can create and customize Microsoft Copilot Studio agents directly inside Microsoft Teams.

This method allows you to quickly build agents that belong to a specific team and are visible to its members without ever leaving the Teams app.

How to Build an Agent in Teams

Open the App: Select the Microsoft Copilot Studio icon in your Microsoft Teams app sidebar.

Start Creation: From the Agents tab, select a team and click New agent, or select Start now and choose your desired team.

Name Your Agent: Give the agent a name, select your preferred language, and click Create. The agent-building process will run in the background.

Box 2: Yes

Yes - Microsoft Copilot Studio agents can use bot testing feature directly within Microsoft Teams.

You can test your Microsoft Copilot Studio agents directly within Microsoft Teams. You can seamlessly sideload and chat with your agent in a real-time Teams environment before publishing it for your entire organization.

How to test your agent in Teams

Open your Agent: Navigate to the Microsoft Copilot Studio web app.

Configure the Channel: Go to Channels in the side menu and select the Microsoft Teams and Microsoft 365 Copilot tile.

Install in Teams: Click the See agent in Teams button to sideload the agent directly into your personal Teams environment.

Interact and Debug: You can now interact with the agent natively in Teams to ensure it handles your queries and authentication correctly.

Reference:

https://learn.microsoft.com/en-ca/answers/questions/5816754/copilot-studio-agent-in-teams

NEW QUESTION: 193

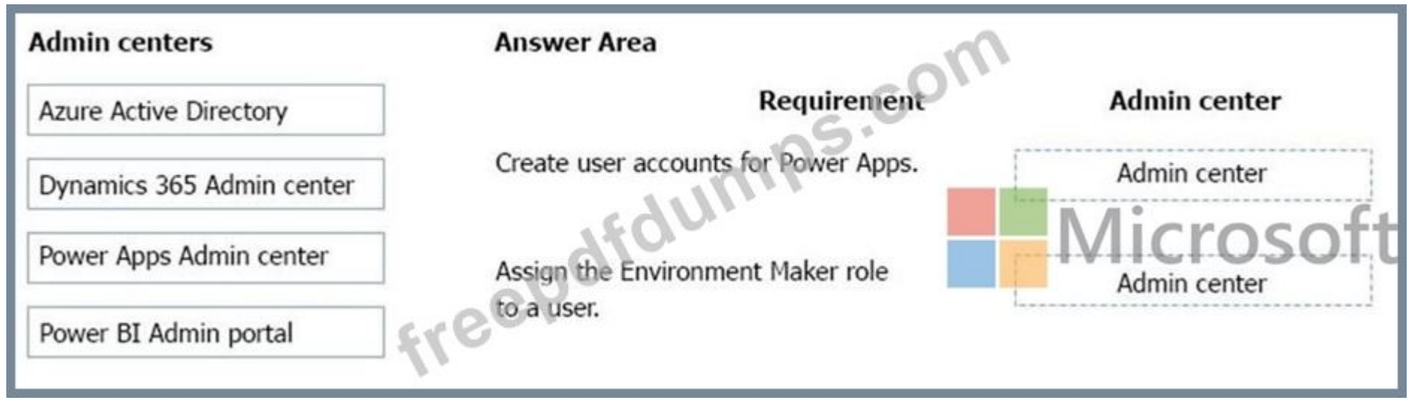

Drag and Drop Question

A company uses Power Apps.

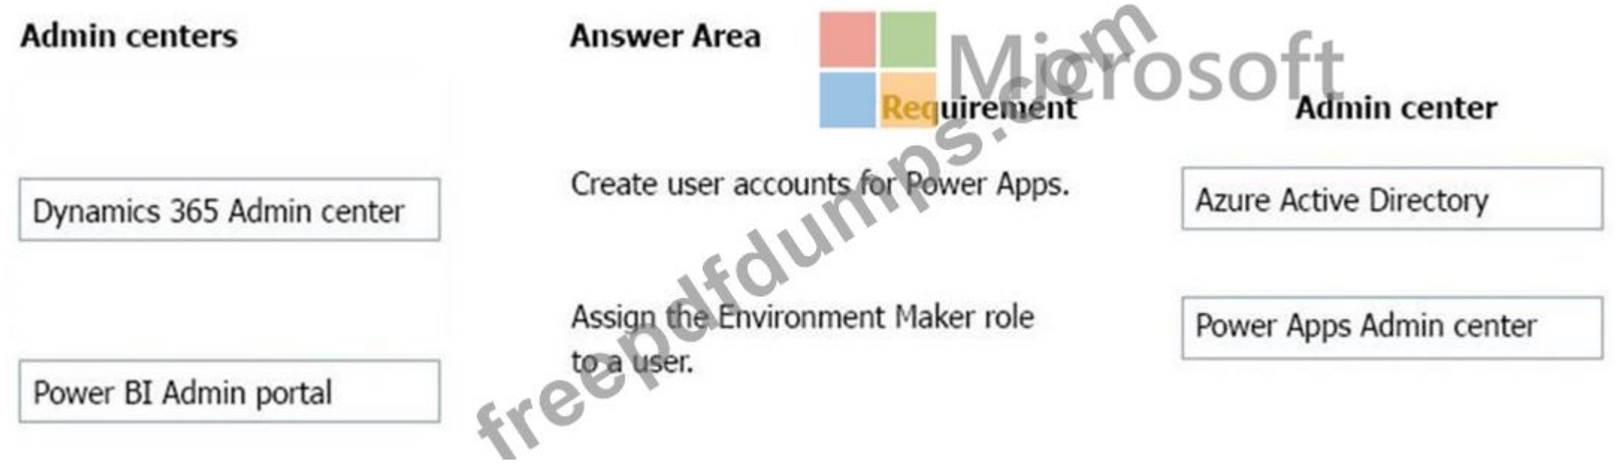

You need to perform administrative tasks for the company.

Which admin centers should you use? To answer, drag the appropriate admin centers to the correct requirements. Each admin center may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Azure Active Directory

Create the company users in the Azure Active Directory.

Box 2: Power Apps admin center

In the Power Apps Admin center, manage environments that you've created and those for which you have been added to the Environment Admin or System Administrator role. From the admin center, you can perform these administrative actions:

Create environments.

Rename environments.

Add or remove a user or group from either the Environment Admin or Environment Maker role.

Etc.

Incorrect Answers:

Use the Dynamics 365 admin center to review the status of your apps and solutions, apply updates, and manage your Dynamics 365 instances, solutions, and apps.

The Power BI admin portal enables you to manage a Power BI tenant for your organization. The portal includes items such as usage metrics, access to the Microsoft 365 admin center, and settings Note: You use the Microsoft 365 admin center to create user accounts for every user who needs access to model-driven apps in Dynamics 365, such as Dynamics 365 Sales and Customer Service.

Reference:

https://docs.microsoft.com/en-us/power-platform/admin/environments-administration

https://docs.microsoft.com/en-us/dynamics365/marketing/dynamics-365-admin-center
https://powerapps.microsoft.com/sv-se/blog/introducing-admin-center-for-powerapps/

NEW QUESTION: 194
You create a Power Apps app and Power Automate flow.
You need to combine multiple types of field values into a single string value and format the string.
What should you use?
A. condition
B. switch
C. environment variable
D. expression
Answer: D (LEAVE A REPLY)
The Concatenate function concatenates a mix of individual strings and a single-column table of strings. When you use this function with individual strings, it's equivalent to using the & operator.
Reference:
https://learn.microsoft.com/en-us/power-platform/power-fx/reference/function-concatenate

NEW QUESTION: 195
You are creating a canvas app to enable users to order tickets. You create an input field for users to input the number of tickets to order.
Users must order a maximum of four tickets and a minimum of two tickets. If a user enters a number except 2, 3, or 4, the input field must display in red. If a user enters the numbers 2, 3, or 4, the input field must display in green.
You need to color the input field based on the user input.
What should you use?
A. formula
B. gallery
C. connector
D. calculated column
Answer: A (LEAVE A REPLY)
For example, we can use the PowerFX IsNumeric to validate field value as Numeric or not.
In the text property of the label provide the below formula.
If(IsNumeric(TextInput1.Text), "Valid", "Invalid")
Reference:
https://softchief.com/2021/12/22/check-field-value-numeric-in-power-apps-canvas-apps/

NEW QUESTION: 196
A company has a website. The website includes a form that allows the company to collect information about leads.
You need to set up an automated workflow to create leads in Dynamics 365 Sales when leads are created on the company's custom website.
What should you create?
A. Task Flow
B. Power Automate flow
C. Dynamics 365 workflow
D. Business Process Flow
Answer: B (LEAVE A REPLY)
