

NetworkAppliance.NS0-403.v2022-09-06.q47

Exam Code:	NS0-403
Exam Name:	NetApp Certified Hybrid Cloud - Implementation Engineer
Certification Provider:	Network Appliance
Free Question Number:	47
Version:	v2022-09-06
# of views:	1132
# of Questions views:	470
https://www.freepdfdumps.com/NetworkAppliance.NS0-403.v2022-09-06.q47.html	

NEW QUESTION: 1

Click the Exhibit button.

```
terraform {
  required_providers {
    netapp-cloudmanager = {
      source = "NetApp/netapp-cloudmanager"
      version = "21.6.0"
    }
  }
}
```

Referring to the exhibit, what would happen if there is a newer version of netapp-cioudmanager available when you install the provider with the terraform init command?

- A. The newer version will be downloaded only when it is a patch release.
- B. Only the exact version 21.6.0 is downloaded.
- C. Any version below version 21.6.0 is installed.
- D. The newer version will be downloaded.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 2

You are developing an Ansible playbook to create a volume within a NetApp ONTAP cluster. In this scenario, which Ansible module would be used to collect a list of existing aggregates?

Response:

- A. na_elementsw_cluster_config
- B. na_ontap_gather_facts
- C. netapp_e_facts
- D. na_ontap_cluster

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 3

What are the three pillars of observability in DevOps? (Choose three.)

- A. traces
- B. errors
- C. metrics
- D. versions
- E. logs

Answer: ([SHOW ANSWER](#))

Explanation

<https://www.dynatrace.com/resources/ebooks/three-pillars-of-observability/#:~:text=Observability%20is%20div>

NEW QUESTION: 4

Your customer is writing a curl command to test an API call to deploy Cloud Volumes OWTAP for AWS. They want to know what the content-Type parameter should be set to in the header of the HTTP request.

In this scenario, what would you tell the customer?

- A. Set the parameter to text/plain.
- B. Set the parameter to application/json
- C. Set the parameter to text/html.
- D. Set the parameter to application/xml

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 5

A customer is experiencing an I/O bottleneck with one VMware hosted workload in their NetApp HCI cluster that is part of their hybrid cloud. The solution must be immediate and non-disruptive. In this scenario, which corrective action should the customer perform?

Response:

- A. Modify the QoS on this particular workload to allow it to use the resources available.
- B. Dynamically migrate the workload to a different NetApp HCI ESXi host in the cluster.
- C. Dynamically migrate the workload including storage to a nearby AWS region.
- D. Add additional memory and CPU to the ESXi host.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 6

Your organization is adopting DevOps techniques to accelerate the release times of your product. The organization wants to have more communication between teams, quick iterations, and a better method for training work in progress.

In this scenario, which three methodologies would you recommend? (Choose three.)

- A. waterfall
- B. agile

- C. scrum
- D. iterative
- E. kanban

Answer: B,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 7

You are asked to accelerate your company's release cycle by adopting DevOps practices. As part of this project, you want to use infrastructure as code to deploy your storage environments during the CI/CD pipeline.

In this scenario, which tool would you use to satisfy this requirement?

- A. Ansible
- B. Selenium
- C. Maven
- D. Docker

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 8

A team is implementing automated builds of Dev/Test environments. The team must ensure consistent and repeatable environments.

In this scenario, which two actions will satisfy this requirement? (Choose two.)

- A. Use variables in build scripts to identify environments.
- B. Ensure that build scripts log to the same output file.
- C. Use infrastructure as code to build the environments.
- D. Ensure that a service desk ticket is automatically logged when an environment is built.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

Which file would you configure to ensure that certain files are never committed to a local Git repository?

Response:

- A. package.json
- B. .exclude
- C. .gitignore
- D. .npmrc

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 10

You are deploying persistent storage for Kubernetes with NetApp Trident.

In this scenario, what are the two objects that you must create? (Choose two.)

- A. Kubernetes StorageClass
- B. Trident volume

- C. Trident virtual storage pool
- D. Trident backend

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 11

You have an on-premises AFF A320 cluster that will use SnapMirror to replicate all data to the cloud instance shown in the exhibit.

Which action will enable end-to-end connectivity for SnapMirror?

Response:

- A. Set up an outbound connection from the HA mediator instance to the AWS EC2 service.
- B. Set up a VPN connection between the AFF A320 network and the AWS VPC.
- C. Create a VPC Endpoint from the HA mediator to the AWS S3 service.
- D. Set up a FabricPool connection between the AFF A320 network and the AWS VPC.

Answer: (SHOW ANSWER)

NEW QUESTION: 12

You need to find the documentation for an Ansible module without access to the Internet. In this scenario, which command will show you the documentation for na_ontap_volume?

- A. ansible-help netapp.ontap.na_ontap_volume
- B. ansible-doc netapp.ontap.na_ontap_volume
- C. ansible -doc netapp.ontap.na_ontap_volume
- D. ansible-doc -lookup netapp.ontap.na_ontap_volume

Answer: (SHOW ANSWER)

NEW QUESTION: 13

Your customer has problems scaling their on-premises compute infrastructure for their Apache Spark clusters; costs are growing rapidly.

The customer wants to move their Spark applications to the cloud but is concerned about the difficulty of provisioning and managing their Spark clusters in the cloud and the associated compute costs for hosting their workloads.

Which product would satisfy their requirements?

Response:

- A. NetApp Cloud Volumes ONTAP
- B. Spot Wave by NetApp
- C. NetApp ONTAP AI
- D. NetApp Astra Control

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 14

Your organization is adopting DevOps principles to deliver innovation rapidly. Which three methods support this approach? (Choose three.)

- A. Plan to reduce the blast radius of failures.
- B. Implement version control for code changes.
- C. Automate processes as much as possible.
- D. Allow more people within the organization to approve changes.
- E. Implement daily stand-up meetings for all team members.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 15

What are two differences between a container and a VM?

(Choose two.)

Response:

- A. VMs boot up faster than containers exposing the same application.
- B. Containers are more portable than VMs because they isolate the applications from the infrastructure.
- C. Containers that are deployed on a host all share the OS kernel, whereas VMs do not.
- D. Containers can only communicate with other containers on the same host; VMs can communicate across routable networks.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16

You are setting up a DevOps practice for your company. In this scenario, which three tools would you use?

(Choose three.)

Response:

- A. ConfigAdvisor
- B. Jenkins
- C. Github

- D. Docker
- E. ConfigBuilder

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 17

You are responsible for setting up a process to handle version control for developers' source code. You need to decide which tools you will use.

In this scenario, which two tools would satisfy the requirement? (Choose two.)

- A. subversion
- B. Jfrog
- C. Docker Hub
- D. git

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 18

Your company's infrastructure includes on-premises multivendor resources and public cloud Amazon Elastic Compute Cloud (Amazon EC2) instances on AWS.

Your company is also planning on expanding its public cloud infrastructure to Azure and Google Cloud.

You need to implement a tool to monitor the performance issues and errors for your entire environment, using real-time service-level indicators.

In this scenario, which tool should you implement to achieve this goal?

Response:

- A. NetApp OnCommand Performance Manager
- B. NetApp Cloud Insights
- C. Amazon Cloudwatch
- D. NetApp Active IQ Unified Manager

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 19

You are using REST APIs to deploy and manage storage that is provided by NetApp Cloud Volumes ONTAP in Microsoft Azure. You are a federated user, and you want to communicate with an authenticated endpoint.

In this scenario, how should you acquire the JWT access token?

- A. Use a JWT access token generator.
- B. Use the refresh token generator.
- C. Use an e-mail address and password
- D. Use the API key generator.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 20

You are deploying NetApp Cloud Volumes ONTAP in Azure. As part of this deployment, you must enable NetApp Volume Encryption (NVE) to protect your data at rest. In this scenario, which supported step would you perform?

Response:

- A. Use Azure storage service encryption.
- B. Install External Key Manager.
- C. Enable the Onboard Key Manager.
- D. Purchase an Encryption license.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

Using Astra Control, which three steps must be completed to protect your Kubernetes-based applications?

(Choose three.)

- A. Choose the application to protect.
- B. Set the snapshot schedule.
- C. Copy the protection. YAML file to the/etc/ directory.
- D. Install the appropriate application agent
- E. Set the snapshot retention.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

As a DevOps engineer, you want a single tool that uses one automation language consistently across orchestration, application deployment, and configuration management.

In this scenario, which tool would you choose?

- A. Selenium
- B. Docker
- C. Octopus
- D. Ansible

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

A customer has implemented a NetApp-based hybrid cloud solution using AFF A700 on premises and Cloud Volumes ONTAP for AWS. When attempting to cut over workloads from on-premises to AWS, a final SnapMirror update fails.

In this scenario, what are two validation points to ensure cutover success?

(Choose two.)

Response:

- A. network connectivity between the sites
- B. OnCommand Cloud Manager installed
- C. bandwidth on the source volumes
- D. capacity on the destination volumes

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 24

Your customer wants to use NetApp Trident to automate data lake provisioning on premises using a NetApp AFF array in AWS using NetApp Cloud Volumes ONTAP. Their unstructured datasets will require 200 TB of storage, will be accessed by hundreds of worker nodes simultaneously, and will have millions of small files in a complex directory hierarchy.

In this scenario, which Trident driver is appropriate for this task?

- A. ontap-nas
- B. ontap-nas-economy
- C. aws-cvs
- D. ontap-nas-flexgroup

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 25

You have deployed your application to an NKS cluster in your on-premises environment with ONTAP Select. You now want to move your application to an AWS environment. What are two ways to accomplish this task?

(Choose two.)

Response:

- A. Use SnapMirror.
- B. Use SnapSync.
- C. Use CloudMirror.
- D. Use Cloud Sync.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 26

You have a hybrid storage environment with on-premises ONTAP 9.8 clusters and Cloud Volumes ONTAP for AWS 9-8 clusters. You have a requirement to automatically discover, map, and classify your data.

In this scenario, which NetApp service satisfies this requirement?

- A. Cloud Sync
- B. Cloud Secure
- C. Cloud Data Sense
- D. Cloud Volume Service

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

Your development team wants to create a separate workspace for staging within your NetApp Cloud Central account. Appropriate user rights for this workspace must be assigned to one developer on the team.

In this scenario, which role would you assign to this developer?

Response:

- A. Account Manager
- B. Account Admin
- C. Group Admin
- D. Workspace Admin

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

You have an on-premises AFF A400 system with SnapMirror replication to a Cloud Volumes ONTAP system. You have a corruption on a source volume and you want to make the destination volume in Cloud Volumes ONTAP writable.

In this scenario, which action would you perform on the replication relationship in Cloud Manager?

Response:

- A. sync
- B. delete
- C. break
- D. reverse resync

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 29

You are asked to help a customer architect a private cloud solution using a tightly integrated converged infrastructure that can be managed by the vendor. You decide to present FlexPod Managed Private Cloud as a solution.

In this scenario, what are three results of this solution?

(Choose three.)

Response:

- A. validated designs that are available for a variety of applications
- B. the ability to present storage using FC, iSCSI, or NFS
- C. allows for a variety of server vendors
- D. the ability to provide rapid redeployment of resources using software-defined service profiles
- E. only available with software-defined storage

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 30

You are asked to implement a monitoring solution for your VM environment that is hosted on NetApp storage; however, you have no budget for this task. You decide to use Cloud Insights to accomplish your task. What are two capabilities of this solution?

(Choose two.)

Response:

- A. Integrate Cloud Insights with your ActiveIQ information.
- B. Create customized, real-time dashboards.
- C. Set up monitoring and alerting.
- D. Enable user data access auditing.

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 31

A customer was running a traditional application with the data being provided by an NetApp ONTAP NFSv3 export. The customer is now migrating that same application to run with a container in a Kubernetes environment using NetApp Trident.

In this scenario, how would the customer ensure that the new container-based application has access to the same data?

- A. Import the volume using the tridentctl command and provide the corresponding persistent volume claim YAML.
- B. Define a backend YAML in Trident and use the kubectl command to create the backend in the Trident namespace.
- C. Define the connection information for the NFSv3 export in the storage class object and then reference the storage class in the persistent volume claim.
- D. Use the rsync command to copy the data to a worker node in the Kubernetes cluster and allow the kubelet to auto-discover the storage for the container.

Answer: (SHOW ANSWER)

NEW QUESTION: 32

You are sending API commands to NetApp Cloud Manager. In this scenario, which type of authorization is used?

Response:

- A. OAuth 1.0
- B. No Auth
- C. API key
- D. bearer token

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 33

Your developers each need their own unique copy of source code. Currently, you have 300 developers, and the source code that they are working on is 200 GBs in size.

Which NetApp ONTAP feature would help to solve this issue with the least amount of overhead?

- A. FlexGroups
- B. FlexCache
- C. FlexClone
- D. SnapMirror

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 34

You are asked to provision storage for a development team to make use of NetApp Trident in their Kubernetes environment. You are advised that the development environment will be frequently performing large numbers of deployments. You want to ensure you do not exhaust the storage volume system limits.

In this scenario, which backend would you recommend to satisfy the requirements?

- A. ontap-nas
- B. ontap-san
- C. ontap-nas-economy
- D. ontap-nas- flexgroup

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 35

Which DevOps principle implies that your documentation and your configuration are the same?

- A. continuous monitoring
- B. continuous deployment
- C. infrastructure as code

D. continuous testing

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 36

Your software development team creates and deploys applications to Kubernetes. You want to provide the team with metrics from the applications resource usage. In this scenario, which two products would satisfy this requirement?

(Choose two.)

Response:

- A. Cloud Insights
- B. OnCommand System Manager
- C. OnCommand Unified Manager
- D. Application Lifecycle Manager

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 37

You are working with your development team to automate the deployment of Cloud Volumes ONTAP instances across various hyperscalers. The developers are asking you for specific RESTful API calls and other details to facilitate the automation.

In this scenario, which two links would you provide to them? (Choose two.)

- A. the link to the Swagger interface found on the connector instance
- B. the link to the API documentation on cloud.netapp.com
- C. the link to the Swagger interface found on cloud.netapp.com
- D. the link to the API documentation on readthedocs.io

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 38

You are asked to administer your NetApp Cloud Central account settings to manage users, service accounts, workspaces, connectors, and subscriptions.

In this scenario, which REST API would you access?

- A. Tenancy API
- B. Cloud Manager API
- C. ONTAP API
- D. AWS API

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 39

You are researching different automation frameworks. One of the main features that you are seeking is the ability to provide an end state of what a particular environment should look like versus needing to define each step that is required to get to the end state.

In this scenario, which keyword should you be looking for as you research various automation frameworks?

- A. declarative
- B. interrogative
- C. RESTful
- D. imperative

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 40

You are writing a script to verify, update and display discrepancies of IT assets in the corporate content management database (CMDB). You must use the RESTful API to interface with the CMDB server. What are two common formats for the RESTful API responses?

(Choose two.)

Response:

- A. SGML
- B. Markdown
- C. XML
- D. JSON

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 41

Which three volume workflows are supported by Trident for Kubernetes?

(Choose three.)

Response:

- A. volume clone
- B. volume replication
- C. volume import
- D. volume snapshots
- E. LUN resize

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 42

Your customer wants to stream large amounts of real-time data from multiple sources at the application level into their Apache Spark platform for transformation before it goes into their machine learning platform.

In this scenario, which technology should be used for this task?

- A. NetApp Global File Cache
- B. NetApp Cloud Sync service
- C. NetApp SnapMirror
- D. Apache Kafka

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 43

You are using Nvidia DeepOps to deploy Kubernetes clusters on top of NetApp ONTAP AI systems. In this scenario, which automation engine is required?

- A. Ansible
- B. Jenkins
- C. Puppet
- D. Terraform

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 44

Your company asks you to deploy a new version control management system. In this scenario, which two tools would accomplish this task?

(Choose two.)

Response:

- A. GitHub
- B. Confluence
- C. ALM
- D. SourceForge

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 45

You have existing OnCommand Workflow Automation workflows. You are required to run these existing workflows in Ansible.

```

---
- hosts: localhost
  gather_facts: false
  name: wfa test
  vars:
    username: "admin"
    password: "Netapp123!"
    workflow_name: "Create a Cron Schedule"
  tasks:
    - name: get workflow
      uri:
        url:
"https://<wfa_host>/rest/workflows?
name=
{{ workflow_name|urlencode }}"
        validate_certs: false
        user: "{{ username }}"
        password:
"{{ password }}"
        method: GET
        headers:
          Accept:
application/json
          register: get_response
        - debug:
msg="{{ get_response.json
[0].uuid }}"

```

When you run the playbook that is shown in the exhibit, what is displayed?

Response:

- A. headers
- B. UUID
- C. XML
- D. YAML

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 46

You have an application that runs once per month to provide analytics and report generation. You are asked to use cloud compute resources to run this application. However, your existing environment consists of a single AFF A300 HA pair.

In this scenario, which two actions would satisfy the requirements?

(Choose two.)

Response:

- A. Configure FabricPool on existing aggregates by using Amazon Simple Storage Service (Amazon S3).

- B. Use the NetApp Cloud Backup Service.
- C. Use the NetApp Cloud Volumes Service in AWS.
- D. Use the NetApp Cloud Sync service.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 47

Your company is implementing NetApp Cloud Insights to monitor the company's onpremises NetApp AFF storage and Amazon Elastic Compute Cloud (Amazon EC2) instances. Which information is required to configure the Amazon EC2 data collector to monitor the performance of the EC2 instances?

Response:

- A. AWS IAM Management Console password
- B. AWS root user
- C. NetApp Cloud Manager password
- D. AWS IAM access key ID

Answer: D ([LEAVE A REPLY](#))
