NEW QUESTION: 1

A customer is running multiple Oracle DBs over NFS. The volumes are replicated using SnapMirror to a secondary site, which also hosts the development and test systems. They want to streamline the creation of test environments on the secondary site so that they will not have to manually use FlexClone to clone multiple volumes for each request.

In this scenario, which tool satisfies these requirements?

- A. Snap Creator Framework
- B. OnCommand Workflow Automation
- C. OnCommand Unified Manager
- D. NetApp Service Level Manager

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

When volumes are set to be thin-provisioned, what must be monitored for space usage?

- A. aggregate
- B. LUN
- C. Snapshot reserve
- D. volume clone space

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 3

A customer wants a new solution that reaches a near-zero recovery time objective (RTO) and a zero recovery point objective (RPO).

In this scenario, which NetApp solution satisfies the requirements?

- A. SnapMirror
- B. SnapVault
- C. NDMP

D. MetroCluster

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

Your customer is concerned that his volume might run out of space. Which two volume command options would be used to resolve this problem?

(Choose two.)

- A. filesystem-size-fixed
- B. snapshot autodelete
- C. space-guarantee
- D. autosize

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

A previous administrator had configured an external backup system to use node-scoped NDMP for backups, but you want to change this system to use SVM-scoped NDMP.

How do you make this change in ONTAP?

- A. Restart the NDMP service on the SVMs being backed up.
- B. Turn off node-scoped NDMP on the cluster.
- C. Restart the NDMP service on the cluster.
- D. Turn off node-scoped NDMP on the SVMs being backed up.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 6

You have a SnapVault backup from your primary site to your secondary site with a LUN in the volume. In this scenario, what is transferred?

Response:

- A. LUN mapping status
- B. selected Snapshot copies
- C. UUID
- D. serial number

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 7

A client has a 2 TB volume and has enabled the function to automatically delete Snapshot copies in scenarios where capacity will be exceeded. They have set the trigger for this action to the volume | snap_reserve value.

In this scenario, what would trigger this function?

- A. The snap_reserve reaches capacity.
- B. The volume reaches 98% and the snap_reserve is at capacity.
- C. The volume reaches 95%.

D. The volume reaches 95% and the space_reserve is at capacity.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 8

You are creating daily SnapVault backups of a NAS volume that contains the data for your business critical application. You discover that corruption began two weeks ago on the data on that volume.

In this scenario, which statement is true?

A. The restore is disruptive, and all Snapshot copies that are older than two weeks are preserved.

B. The restore is nondisruptive, and all of the most recent Snapshot copies are preserved.

C. The restore is nondisruptive, and all Snapshot copies that are older than two weeks are preserved.

D. The restore is disruptive, and all of the most recent Snapshot copies are preserved.

Answer: (SHOW ANSWER)

NEW QUESTION: 9

Click the Exhibit button.

You need to verify that you have a 10 Gb path between two clusters for SnapMirror traffic.

Referring to the exhibit, how fast is the network path between the clusters?

A. 100 Mb

B. 10 Gb

C. 10 Mb

D. 1 Gb

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 10

A customer has ONTAP 9.5 clusters running at two nearby locations. The customer wants a zero RPO for one mission-critical volume.

In this scenario, which two NetApp solutions satisfy this requirement while using the existing ONTAP clusters? (Choose two.)

A. SnapMirror Synchronous in StrictSync mode

B. SnapMirror Synchronous in Sync mode

C. FabricPool

D. SyncMirror

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 11

You are asked to select a controller platform as a backup target with support for 40GbE, 32 Gbps FC, and the ability to attach three stacks of disk shelves.

Which tool would you use to find the information that you need?

A. Interoperability Matrix Tool (IMT)

- B. Active IQ
- C. Hardware Universe
- D. OneCollect

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

A customer wants to modify the retentioncount of the SnapVault destination volume. Which policy should be used modify the attribute?

- A. Volume policy
- B. SnapMirror policy
- C. Efficiency policy
- D. Snapshot policy

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 13

You are the administrator of an ONTAP cluster, where the majority of users are using Linux machines with home directories mounted using NFS. You keep six daily, four weekly, and one monthly Snapshot copy locally. However, you do not replicate the data to another instance of ONTAP. One of your users reports having accidentally deleted a file, but does not remember the self-serve restore procedure.

How does the user restore the file without having administrator privileges on the cluster?

- A. Copy the deletedfile from the .snapshot directory.
- B. Using ONTAP System Manager, restore the volume from a Snapshot copy.
- C. Issue the snapshot restore-file command.
- D. Issue the volume snapshot restore command.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 14

You are creating a SnapMirror relationship and custom SnapMirror policies are not defined. Which default policy will be applied in this scenario?

- A. Mirror And Vault
- B. Default
- C. DP Default
- D. SM Default

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 15

You are using Veeam Backup & Replication to create Snapshot-based backups of your VMware environment running ONTAP. You added your primary and secondary ONTAP cluster to the Veeam Storage inventory.

However, you are unable to select your secondary ONTAP cluster as a secondary target for your Veeam backup job.

In ONTAP System Manager, which action solves this problem?

- A. Change the security style to NTFS for the volume you want to back up.
- B. Select "Make Snapshot directory visible" for each volume that you want to back up.
- C. Initialize SnapVault for the volume that you want to back up.
- D. Create a vsadmin account to grant cluster access to Veeam for each volume that you want to back up.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 16

You have a NAS volume containing 100 GB of data and daily change rate of 10%. You want to keep seven daily Snapshot copies.

What is the minimum size for the volume?

- A. 220 GB
- B. 110 GB
- C. 170 GB
- D. 100 GB

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 17

You decide to enable SnapMirror network compression on your NetApp clustered Data ONTAP environment.

Which two statements are correct about enabling this feature? (Choose two.)

- A. You may only enable SnapMirror network compression on one HA pair in a cluster, and traffic 1-1 is limited to routing through those nodes.
- B. The compression engine creates multiple transfer threads corresponding to the number of CPUs on the source storage system.
- C. The data is compressed only while it traverses the network.
- D. The data transfer between the clusters must use the NDMP protocol.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 18

After manually implementing a SnapVault relationship between two volumes on two separate clusters, the primary Snapshot copies are working fine. The baseline has been transferred successfully. The relationship is shown as healthy and idle.

However, the updates are not taking place as scheduled on the secondary system.

What is causing the problem?

- A. The Snapshot copy label has not been set correctly in the used SnapMirror policy.
- B. The SnapMirror access has not been configured.
- C. The cluster peering has not been set properly.
- D. The SnapMirror policy schedule has not been enabled.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 19

Click the Exhibit button.

You have configured a vaulting relationship that is not updating hourly Snapshot copies to the destination.

Referring to the exhibit, what is the problem?

- A. There is no hourly schedule in the SnapMirror policy.
- B. The source Snapshot policy is missing the hourly label.
- C. The SnapMirror policy is missing the daily label.
- D. The SnapMirror policy is missing the hourly label.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 20

A customer has application data corruption on a LUN that is in a volume with six other data LUNs. The customer needs to restore the corrupted LUN from a Snapshot copy without affecting the other six LUNs.

Which process would accomplish this task?

- A. Use LUN mapping.
- B. Use volume SnapRestore.
- C. Use the volume Snapshot partial-restore file.
- D. Use a single-file restore.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 21

Network bandwidth between your the primary and secondary sites is limited. You believe that data compression combined with volume SnapMirror would help solve this problem.

In this scenario, which statement is correct?

- A. A SnapMirror source cannot be compressed but the destination volume can be.
- B. Compression can be enabled independently between the source and the destination.
- C. Data compression and SnapMirror are incompatible.

D. Data compression can be enabled on the source storage system and will remain intact through SnapMirror.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

You want to determine the amount of cold data that can be tiered from a FabricPool-enabled aggregate.

In this scenario, which feature satisfies this requirement?

- A. Inactive Data Reporting
- B. Auto Balance
- C. Object Store Profiler
- D. Information Lifecycle Management

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 23

Click the Exhibit button.

A customer is interested in using SnapCenter to support Snapshot copies with their Oracle DB. They virtualized their environment but do not have any block protocols available.

In this solution, which protocol shown in the exhibit is supported?

- A. FC
- B. NFS
- C. SMB3
- D. iSCSI

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 24

A customer has just purchased a new 2-node AFF A220 cluster running ONTAP 9.7 and moved the older 4- node FAS2650 cluster running ONTAP 9.5 to an off-site location. They want to configure replication to the FAS2650 cluster for both disaster recovery and long-term archiving.

In this scenario, how would the customer accomplish this task?

- A. Leave the ONTAP versions, then configure SnapMirror with type DP.
- B. Leave the ONTAP versions, then configure SnapMirror with type XDP.
- C. Downgrade the AFF A220 cluster to ONTAP 9.5, then configure SnapMirror with type XDP.
- D. Upgrade the FAS2650 cluster to ONTAP 9.7, then configure SnapMirror with type TDP.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 25

Your backup cluster reached both the maximum number of parallel replication transfers and the maximum number of FlexVol volumes per node. You need to increase these maximum numbers. In this scenario, which license you would install on the destination to accomplish this task?

- A. SnapRestore License

- B. SnapVault License
- C. SnapMirror Sync License
- D. Data Protection Optimized License

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 26

You have an environment with multiple database servers that are performing scheduled nightly dumps. These dumps vary in both the time to complete and the size of data produced. You need to ensure that there is always enough room in the volume for the data and that a nightly SnapMirror update does not take place until the database dump process is complete.

In this scenario, which NetApp tool ensures that this process is completed every night?

- A. OnCommand Unified Manager
- B. OnCommand Workflow Automation
- C. OnCommand System Manager
- D. OnCommand Insight

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

Click the Exhibit button.

You have been receiving the lag status error notifications shown in the exhibit.

What must you do to correct this problem?

- A. Quiesce the relationship.
- B. Add a schedule to the relationship.
- C. Resynchronize the relationship.
- D. Fan out the relationship.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 28

You want to conserve disk space in your SnapVault destinations. You enable storage efficiency on each of the secondary volumes.

Which two statements are true in this scenario? (Choose two.)

- A. If storage efficiency is enabled on the primary volume, it will be preserved on the secondary volume.
- B. Storage efficiency can be enabled on the secondary volume and SnapVault will manage the schedule.
- C. Storage efficiency can be enabled on the secondary volume, but a manual schedule will need to be assigned.
- D. SnapVault implicitly uses storage efficiency.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 29

You are creating a SnapVault relationship and have concerns about the available capacity on the destination.

In this scenario, which three factors must you consider when you size the destination volume?
(Choose three.)

- A. the rate of data increase on the source
- B. the size of the source volume
- C. the number of Snapshot copies to retain on the destination
- D. the number of Snapshot copies to retain on the source
- E. the autogrow settings on the source volume

Answer: C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 30

You are in a SnapProtect v11 solution environment creating a new subclient with NAS data. Besides the subclient name, what other information is mandatory? (Choose three.)

- A. the storage policy
- B. the backup schedule
- C. the Snap Engine
- D. the backup content path
- E. the retention policy

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 31

You must back up and replicate a Microsoft SQL server using SnapProtect in your clustered Data ONTAP environment.

Which three components must be correctly installed and configured? (Choose three.)

- A. SnapProtectiDataAgent
- B. On Command Workflow Automation
- C. On Command Unified Manager 6.0
- D. SnapProtect v10
- E. SnapDrive for Windows

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 32

You are working for a customer that has deployed a large FlexGroup with ONTAP 9.5. This FlexGroup has a SnapMirror relationship to a system at a disaster recovery site. The FlexGroup is nearly full and needs to be expanded to accommodate additional data.

In this scenario, what must you do to expand the FlexGroup and ensure that the data remains protected?

- A. Break the SnapMirror relationship, expand the source FlexGroup, and re-baseline the SnapMirror.
- B. Break the SnapMirror relationship, expand the source FlexGroup, and update the SnapMirror.
- C. Offline the source FlexGroup, add additional volumes, bring it online, and update the SnapMirror.
- D. Expand the source FlexGroup nondisruptively, and update the SnapMirror.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 33

Your customer needs to activate a destination SVM DR following a disaster.

In this situation, which two actions should be performed? (Choose two.)

- A. From the source cluster, break the SVM DR relationship.
- B. From the destination cluster, break the SVM DR relationship.
- C. Shut down the source cluster.
- D. Start the destination SVM.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 34

You are asked to protect your customer's Exchange environment. You deploy SnapCenter 4.1 and the plug-in for Microsoft Exchange Server. While creating the backup policy, you select the Full and Log Backup from the list of supported backup types.

In this scenario, what would the Full and Log Backup type allow you to protect within Exchange?

- A. all uncommitted transaction logs and all of the databases
- B. all databases but no transaction logs
- C. all databases and all transaction logs
- D. all transaction logs but none of the databases

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 35

Exhibit:

Referring to the exhibit, You have a MetroCluster IP solution that uses Cisco Nexus 3232C back-end switches for a maximum ISL distance of 700 km. What is the maximum round trip ISL latency that is supported in this scenario?

- A. 14 ms
- B. 10 ms

- C. 7 ms
- D. 20 ms

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 36

Click the Exhibit button.

You are configuring cluster peering from cluster2 to cluster1 on your ONTAP 9.7 clusters using ONTAP System Manager. You are given the details shown below to set up the cluster peer relationship. You want to determine why the peering has failed.

Cluster2 intercluster LIFIP: 192.168.0.143 Subnet: 255.255.255.0 Port: e0e passphrase: netapp1234 Cluster1 intercluster LIF IP: 192.168.0.153 Subnet: 255.255.255.0 Port: e0e passphrase: netapp1234 Referring to the exhibit, which statement is correct?

- A. The Target Cluster IP is incorrect.
- B. The Source Cluster IP is incorrect.
- C. The Source Cluster Passphrase is incorrect.
- D. The Target Cluster Passphrase is incorrect.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 37

You are asked to re-purpose a NetApp FAS cluster. You need to verify that all encrypted data has been securely erased.

Which two features would allow you to securely re-purpose the array? (Choose two.)

- A. Disk Sanitize
- B. SnapLock Compliance
- C. NetApp Aggregate Encryption
- D. Secure Purge

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 38

Click the Exhibit button.

A customer needs to add an additional X91143A card into a FAS9000 to allow mirroring between the production system and the disaster recovery FAS9000 platform. Slots 1, 4, 6, 8, and 9 have cards in them.

Referring to the exhibit, in which slot should you install the card?

- A. 7
- B. 5
- C. 3
- D. 10

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 39

You are copying your data and replicating it off site.

What is the called?

- A. a backup
- B. a Snapshot
- C. a version
- D. a demonstration

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 40

A customer wants to enforce prompt tiering when the cooling threshold has been reached. They want to do this even though the data may have been deleted or the data continues to exist in the primary file system.

In this scenario, which tiering policy should be used?

- A. Snapshot-only
- B. None
- C. Backup
- D. Auto

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 41

You want to set up protection relationships at the time of provisioning one or more primary volumes in the source cluster in ONTAP.

Which NetApp management tool enables you to accomplish this task?

- A. OnCommand System Manager
- B. ONTAPCLI
- C. SnapCenter
- D. OnCommand Unified Manager

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 42

What are three prerequisites for replicating an Element OS volume to ONTAP? (Choose three.)

- A. The ONTAP cluster must be running ONTAP 9.3 or later.
- B. SnapVault must be licensed on the ONTAP cluster.
- C. SnapMirror must be licensed on the ONTAP cluster.
- D. Enable SnapMirror on the SolidFire cluster.
- E. SnapMirror must be licensed on the SolidFire cluster.

Answer: C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 43

Click the Exhibit button.

You want to restore a file from the engineering volume that is shown in the exhibit. When you click Restore in OnCommand UnifiedManager, there are no files available to restore.

Referring to the exhibit, what caused this problem?

- A. The engineering volume is unprotected.
- B. No Snapshot copies exist for the engineering volume.
- C. Workflow Automation is not configured to restore files from Snapshot copies.
- D. The engineering volume is currently online.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 44

Which two cloud providers allow you to provision Cloud Volumes ONTAP as a SnapMirror destination?

(Choose two.)

- A. DigitalOcean
- B. AWS
- C. Azure
- D. RackSpace

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 45

You want to find an automated way to handle space utilization in volumes. You have limited space available in your aggregate.

Which solution would solve this scenario?

- A. Enable volume autosize.
- B. Enable aggregate compression.
- C. Enable volume level QoS.
- D. Enable Snapshot autodelete.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 46

Click the Exhibit button.

Your customer has recently implemented a FabricPool solution that uses the default configuration. They notice that no data has moved to the cloud tier. Your customer is concerned that FabricPool might not be functioning properly.

Referring to the exhibit, what is causing the problem?

- A. The performance tier is not 75% full.
- B. The performance tier is not 90% full.
- C. The performance tier is not 100% full.
- D. The performance tier is not 50% full.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 47

Which two tools would you use to verify that an Oracle database has an application-consistent snapshot taken?

(Choose two.)

- A. OnCommand Unified Manager
- B. OnCommand System Manager
- C. SnapCenter
- D. SnapManager for Oracle

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 48

In which two scenarios would a SnapMirror policy be applied? (Choose two.)

- A. a data protection mirror relationship
- B. a SnapVault relationship
- C. a storage virtual machine
- D. a log file

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 49

You want to use a Fabric Pool to store destination SnapMirror data to an external capacity tier. Which tiering policy would be used in this scenario?

- A. none
- B. snapshot-only
- C. backup
- D. auto

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 50

Which two NetApp products reduce the backup time and create a consistent backup for a primary Oracle target?

(Choose two.)

- A. SnapMirror for Open Systems

- B. SnapManager for Oracle
- C. Open Systems SnapVault
- D. SnapProtect

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 51

Click the Exhibit button.

Referring to the exhibit, which volume has the highest level of protection assigned to it?

- A. project_a
- B. new_work_vol
- C. mworthen_src1_lun
- D. my_vol

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 52

A customer is using SnapMirror to replicate their data to a remote site. They notice that storage efficiency is not preserved, and the amount of data at the destination is higher than expected.

In this scenario, which configuration in the destination volume would cause this issue?

- A. Post process deduplication is enabled on the destination.
- B. Post process compression is enabled on the destination.
- C. The volumes are not thin-provisioned on the destination.
- D. There is an existing FlexClone volume on the destination.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 53

Click the Exhibit button.

You have been receiving the lag status error notifications shown in the exhibit.

What must you do to correct this problem?

- A. Quiesce the relationship.
- B. Resynchronize the relationship.
- C. Add a schedule to the relationship.
- D. Fan out the relationship.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 54

Your customer wants to replicate data between two NetApp clusters in different data centers.

Which two actions must be performed to accomplish this task? (Choose two.)

- A. Every controller in both clusters must have at least one inter-cluster LIF configured.
- B. One inter-cluster LIF on each node must be configured.
- C. A peer relationship must be created between the two clusters.
- D. Every inter-cluster LIF must be configured on the same port with a data LIF.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 55

You want to break a SnapMirror relationship and use a specific secondary Snapshot copy. In an ONTAP environment, what should you do?

- A. You can only use the latest Snapshot copy.
- B. You must use the following `~snapmirror break~` command option on the cluster shell: `~-delete-snapshots <snapshot_name>~`.
- C. You must use OnCommand System Manager to perform the SnapMirror break.
- D. You must use the following `~snapmirror break~` command option on the cluster shell: `~-restore-destination-to-snapshot<snapshot_name>~`.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 56

Which two policies would allow an administrator to configure disaster recovery and archiving in the same destination volume? (Choose two.)

- A. Unified7year
- B. MirrorLatest
- C. MirrorAndVault
- D. MirrorAllSnapshots

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 57

Click the Exhibit button.

Your customer wants to protect a volume and replicate it to a secondary volume. The customer has tried to configure this relationship using OnCommand System Manager. Upon reviewing this newly configured relationship, you discover that the configuration does not satisfy the customer's stated requirements.

Referring to the exhibit, what should you do to ensure that the volume is protected?

- A. Initialize the relationship.
- B. Resynchronize the relationship.
- C. Change the schedule to hourly.
- D. Delete the relationship and recreate it.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 58

Click the Exhibit button.

Your customer has recently implemented a FabricPool solution that uses the default configuration. They notice that no data has moved to the cloud tier. Your customer is concerned that FabricPool might not be functioning properly.

Referring to the exhibit, what is causing the problem?

- A. The performance tier is not 50% full.
- B. The performance tier is not 100% full.
- C. The performance tier is not 75% full.
- D. The performance tier is not 90% full.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 59

For DR purposes, data must be replicated between on-premises clusters and multiple public clouds. In this scenario, which solution would simplify management?

- A. Cloud Sync
- B. Cloud Manager
- C. Cloud Volumes ONTAP
- D. Cloud Insights

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 60

Click the Exhibit button.

A customer is interested in using SnapCenter to support Snapshot copies with their Oracle DB. They virtualized their environment but do not have any block protocols available. In this solution, which protocol shown in the exhibit is supported?

- A. iSCSI
- B. FC
- C. SMB3
- D. NFS

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 61

Which two NetApp products reduce the backup time and create a consistent backup for a primary Oracle target? (Choose two.)

- A. SnapMirror for Open Systems
- B. SnapManager for Oracle
- C. SnapProtect
- D. Open Systems SnapVault

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 62

Click the Exhibit button.

You have a SnapProtect v11 environment as shown in the exhibit.

What are the two default Snapshot copies created automatically after creating a Storage Policy.

(Choose two.)

- A. Primary (Classic)
- B. Primary (Tape)
- C. primary (Snap)
- D. Primary (NetApp)

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 63

You decide to enable SnapMirror network compression on your NetApp clustered Data ONTAP environment.

Which two statements are correct about enabling this feature?

(Choose two.)

- A. The data transfer between the clusters must use the NDMP protocol.
- B. The compression engine creates multiple transfer threads corresponding to the number of CPUs on the source storage system.
- C. The data is compressed only while it traverses the network.
- D. You may only enable SnapMirror network compression on one HA pair in a cluster, and traffic 1-1 is limited to routing through those nodes.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 64

Application data needs to be replicated between two FAS9000 clusters running ONTAP 9.7 for DR purposes only. The application has 50 data volumes to be replicated concurrently. You also require that the application can run from the DR site should the production site suffer a disaster.

Referring to the exhibit, what would you use to satisfy therequirements?

- A. SnapVault backups can be used to replicate all the application volumes.
- B. SnapMirror Synchronous can be used to replicate the all the application volumes.
- C. Load sharing can be used to concurrently replicate the data between both systems.
- D. SnapMirror can be used to replicate all the data volumes concurrently.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 65

You want to set up protection relationships at the time of provisioning one or more primary volumes in the source cluster in ONTAP. Which NetApp management tool enables you to accomplish this task?

- A. ONTAPCLI
- B. SnapCenter
- C. OnCommand Unified Manager
- D. OnCommand System Manager

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 66

Your customer is running an older cluster that uses Data ONTAP 8.1 Cluster-Mode. They would like to create a SnapMirror relationship with their new ONTAP 9.5 cluster.

In this scenario, what must the customer do to create the SnapMirror relationship?

- A. The customer must first upgrade the Data ONTAP 8.1 Cluster-Mode storage array to at least ONTAP 9.1 and then create the XDP SnapMirror relationship.
- B. The customer can create a XDP type SnapMirror relationship without needing to perform an upgrade.
- C. The customer must first upgrade the Data ONTAP 8.1 Cluster-Mode storage array to at least ONTAP 8.3 and then create the XDP SnapMirror relationship.
- D. The customer can create a DP type SnapMirror relationship without needing to perform an upgrade.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 67

You have a NAS volume containing 100 GB of data and daily change rate of 10%. You want to keep seven daily Snapshot copies. What is the minimum size for the volume?

- A. 100 GB
- B. 110 GB
- C. 220 GB
- D. 170 GB

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 68

A client has a VMware vSphere environment with several MS SQL servers currently running that provides back-end Web services. You are asked to prepare a disaster recovery solution that would minimize downtime if any of these virtual machines become corrupted and unavailable. Which solution will satisfy the requirement?

- A. Use the NetApp Virtual Storage Console snapshot function to take a complete backup of the entire virtual server that is hosting the database.

- B. Use the NetApp SnapCenter software to take a complete backup of the entire virtual server that is hosting the database.
- C. Use the NetApp SnapCenter plug-in for VMware vSphere to take a complete backup of the entire virtual server that is hosting the database.
- D. Use the NetApp SnapCenter software to take a consistent backup of the database and operating system, followed by another Snapshot copy of the virtual server.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 69

Click the Exhibit button.

Refer to the Exhibit. clusterA, clusterB, and clusterC are in a mirror-mirror cascade relationship. clusterB is offline and not recoverable. You want to continue to protect cluster

In this scenario, which statement is correct?

- A. Synchronize the relationship between clusterA and clusterC, avoiding a new baseline.
- B. Create a SnapVault relationship between clusterB and clusterC.
- C. Resume the relationship between clusterA and clusterC, creating a new baseline.
- D. clusterA will continue to be protected "as-is".

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 70

You received an alert from OnCommand Unified Manager (OCUM) that a NetApp FlexVol is almost out of space.

Which three actions are available to perform from the OCUM events detail Web page? (Choose three.)

- A. Create a job to move the FlexVol.
- B. Acknowledge the event.
- C. Mark the event as "resolved".
- D. Add a note to the event.
- E. Increase the capacity of the FlexVol.

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 71

A Windows user requests assistance to restore a file on a CIFS share that they have mistakenly deleted.

Which tool would restore the deleted file?

- A. Windows Shadow Copy Client
- B. OnCommand Systems Manager
- C. Windows Unified Host Utilities
- D. OnCommand Unified Manager

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 72

A client has a 100 GB NFS volume with a 20% Snapshot reserve that hosts several virtual machines on an aggregate with no additional capacity. There are currently 10 GB of Snapshot copies associated with the past two weeks of activity with the volume. An external monitoring system is reporting that the volume is 99% consumed.

According to NetApp, which action should be used to prevent the volume from going offline?

- A. Delete Snapshot copies from the volume to free up space.
- B. Modify the Snapshot reserve to 10%.
- C. Expand the aggregate on which the volume resides.
- D. Enable storage efficiency on the volume.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 73

You are planning to deploy MetroCluster IP. As part of the implementation strategy, you are asked to verify that you have the relevant hardware for the deployment.

Which two elements are required to deploy your solution? (Choose two.)

- A. storage controllers
- B. iSCSI Ethernet switches
- C. cluster peering network
- D. FC network switches

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 74

A company has a 4-node FAS9000 fabric MetroCluster cluster separated by 101 km. Site A has an unmirrored HDD aggregate. An FC-VI card fails in one of the nodes in site A and a switchover occurs.

Which statement is correct in this scenario?

- A. The distance is not supported.
- B. Only SSD aggregates are accessible.
- C. The aggregate is accessible using Site B's cluster.
- D. The aggregate is accessible using Site A's surviving node.

Answer: (SHOW ANSWER)

NEW QUESTION: 75

Click the Exhibit button.

Commvault IntelliSnap and NetApp SnapCenter are both being used to back up the same Microsoft SQL Server database.

Referring to the exhibit, which action will SnapCenter perform on the Microsoft SQL transaction logs?

- A. delete
- B. move

- C. keep
- D. truncate

Answer: D (LEAVE A REPLY)

NEW QUESTION: 76

Click the Exhibit button.

A customer wants to ensure that their volumes are protected. In ONTAP System Manager, under the Protection section, you see the screen that is shown in the exhibit. The company has an asynchronous mirror policy of less than a 60-minute lag.

Referring to the exhibit, which volume has a lag that exceeds the company policy?

- A. svm_fabricpool:project_b -> svm_fabricpool:project_b_dest
- B. svm_fabricpool:demo_volume -> svm_fabricpool:demo_volume_DR
- C. svm_fabricpool:project_a -> svm_fabricpool:project_a_dest
- D. svm_fabricpool:demo_volume -> svm_fabricpool:demo_volume_dest

Answer: B (LEAVE A REPLY)

NEW QUESTION: 77

Which two cloud providers allow you to provision Cloud Volumes ONTAP as a SnapMirror destination? (Choose two.)

- A. Azure
- B. RackSpace
- C. DigitalOcean
- D. AWS

Answer: (SHOW ANSWER)

NEW QUESTION: 78

You want to set up an important management solution that must comply with FIPS 140-2. The solution should support a multi-clusters environment and should provide centralized management of the encryption keys.

In this scenario, which solution accomplishes the task?

- A. NetApp Storage Encryption (NSE)with external key management using the Key Management Interoperability Protocol (KMIP)

- B. NetApp Volume Encryption (NVE) with onboard key manager using the Key Management Interoperability Protocol (KMIP)
- C. NetApp Volume Encryption (NVE) with external key management server using the Key Management Interoperability Protocol (KMIP)
- D. NetApp Storage Encryption (NSE) with onboard keymanager using the Key Management Interoperability Protocol (KMIP)

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 79

How are the FC-VI links cabled in MetroCluster for ONTAP?

- A. directly to the corresponding local HA partner
- B. controller A is cabled to FC switch A, controller B has both cabled to FC switch B
- C. one cable to each of the two local FC switches
- D. directly to the corresponding remote HA partner

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 80

Your customer is concerned that his volume might run out of space.

Which two volume command options would be used to resolve this problem? (Choose two.)

- A. autosize
- B. space-guarantee
- C. snapshot autodelete
- D. filesystem-size-fixed

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 81

You need to restore a file from yesterday's backup. You know that a Snapshot copy is in place on the volume where the data is stored. Other users are not complaining about lost or corrupt data on the volume.

All users are running Windows 7 on desktop computers.

How would you recover the file quickly without disrupting other users' data?

- A. Have the customer reboot the Windows computer to see if the file is really corrupt.
- B. Perform a SnapRestore of the entire volume where the file resides.
- C. Call the backup administrator and have them load the tape from yesterday's backup and restore the file.
- D. Have the user right-click on the file in the Windows folder, then select "Restore previous versions" from the list of choices.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 82

You have recently installed and set up a new NetApp HCI deployment in your data center that consists of four compute nodes and four storage nodes. Inside this HCI deployment, you are using ONTAP Select for file services. You must protect the data inside the ONTAP Select VM in case of a rack failure.

Which two methods would accomplish this task? (Choose two.)

- A. Enable FabricPools in the ONTAP Select instance.
- B. Replicate the SVMs from inside the ONTAP Select VM to an existing ONTAP cluster using SVM DR.
- C. Replicate the volumes using SnapMirror from inside the ONTAP Select VM to an existing ONTAP cluster.
- D. Using SolidFire real-time remote replication, replicate the hosting volumes to an ONTAP cluster.

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 83

What are two reasons why the status of the SnapMirror relationship is showing ~Healthy: false~? (Choose two.)

- A. A manual update has failed.
- B. It has missed a scheduled transfer.
- C. A transfer operation is in progress.
- D. The lag time has exceeded the threshold.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 84

A customer is using SnapVault to backup Snapshot copies from a primary volume to a secondary volume on a clustered Data ONTAP system.

The retention on the secondary volumes must be 90 days. Volume autosize and SnapshotAutoDelete have been enabled for all secondary volumes.

Which two settings will satisfy this requirement? (Choose two.)

- A. Modify the secondary volume with the -autosize-increment 5GB command.
- B. Modify the secondary volume with the -autosize-reset true command.
- C. Modify the secondary volume with the -space-mgmt-try-first snap_delete command.
- D. Modify the secondary volume with the -space-mgmt-try-first volume_grow command.

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 85

A customer wants to monitor the current utilization of storage capacity to ensure storage availability. They decide to implement quotas on some volumes.

What are three types of quotas that would satisfy the customer's requirement? (Choose three.)

- A. volume
- B. group

- C. aggregate
- D. qtree
- E. user

Answer: B,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 86

You want to modify the existing Snapshot copy schedule to allow for more granularity in your ability to recover data after a corruption or loss.

In this scenario, which two tools allow you to accomplish this task (Choose two.)

- A. OnCommand Unified Manager
- B. NetApp SnapCenter
- C. OnCommand System Manager
- D. ONTAP CLI

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 87

Which two NetApp technologies allow for synchronous replication of data between two remote sites? (Choose two.)

- A. Metro Cluster
- B. SnapVault
- C. SnapMirror
- D. SyncMirror

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 88

After deploying an ONTAP Select 2 node HA cluster at a remote site, you successfully perform manual takeover and giveback before placing the cluster into production. After the cluster runs in production for a week, you notice that you can no longer perform a manual takeover.

In this scenario, what are two causes of this problem? (Choose two.)

- A. The HA interconnect cables have been removed.
- B. ONTAP Deploy has been deleted.
- C. The vSphere HA service has failed.
- D. There is a network disruption between sites.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 89

A FAS2750 cluster administrator experiences network issues during replication updates that pass over a low- bandwidth WAN link to their DR site. They also replicate locally to another cluster for testing and development. The administrator wants to enable network compression only on the existing WAN Link SnapMirror jobs.

In this scenario, which statement is correct?

- A. Network compression is a global option and it cannot be used.
- B. The current DR transfers must be aborted and the option enabled on each job, then resume the transfer.
- C. Network compression is possible but not on a FAS2750.
- D. Network compression must be enabled when initializing the replica, the current jobs need to be deleted and new ones created.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 90

You have a 2-node FAS9000 cluster that must replicate to a 2-node AFF A300 cluster. Both clusters use self-encrypting drives (SEDs) and need to encrypt all data at rest using centralized key management.

Which two features accomplish this task? (Choose two.)

- A. NetApp Volume Encryption (NVE)
- B. Onboard Key Management
- C. External Key Management
- D. NetApp Storage Encryption (NSE)

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 91

Click the Exhibit button.

A customer wants to ensure that their volumes are protected. In ONTAP System Manager, under the Protection section, you see the screen that is shown in the exhibit. The company has an asynchronous mirror policy of less than a 60-minute lag.

Referring to the exhibit, which volume has a lag that exceeds the company policy?

- A. svm_fabricpool:project_b -> svm_fabricpool:project_b_dest
- B. svm_fabricpool:demo_volume -> svm_fabricpool:demo_volume_dest
- C. svm_fabricpool:project_a -> svm_fabricpool:project_a_dest
- D. svm_fabricpool:demo_volume -> svm_fabricpool:demo_volume_DR

NEW QUESTION: 92

A customer is planning the cloud strategy for their Microsoft SQL databases and must be able to protect them from outages. They are planning on using multiple cloud providers for their solution with their current NetApp storage system.

In this scenario, which two products are required to satisfy their backup management needs?

(Choose two.)

- A. CloudSync
- B. FlashPool
- C. Cloud Volumes ONTAP
- D. SnapCenter

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 93

You are asked to implement a DR solution to protect employee home directories on the primary cluster. The solution should provide an RPO of one hour, disaster recovery and archiving configured on the same destination volume of the DR cluster. Your solution should also reduce the amount of secondary storage requirements and use lower network traffic on the WAN links. In this scenario, which NetApp replication technology satisfies these requirements?

- A. SyncMirror
- B. SnapMirror-Sync
- C. SnapMirror
- D. MetroCluster

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 94

Click the Exhibit button.

Referring to the exhibit, which volume has the highest level of protection assigned to it?

- A. mworthen_src1_lun
- B. project_a
- C. my_vol
- D. new_work_vol

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 95

Click the Exhibit button.

Your customer is deploying SnapCenter to protect volumes on an ONTAP Select cluster.

Referring to the exhibit, which licensing is required to protect the Engineering and Marketing volumes?

- A. a SnapManagerSuite controller-based license
- B. a 3 TB SnapCenter capacity-based license
- C. a 5TB SnapCenter capacity-based license
- D. a SnapProtectApps controller-based license

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 96

Which two NetApp features would help you to recover from a file share that was encrypted by a ransomware event? (Choose two.)

- A. SnapRestore
- B. SnapMirror
- C. SnapLock
- D. Snapshot

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 97

A customer is running clustered Data ONTAP and wants to restore 15 files from a secondary SnapVault destination. The customer uses the command `snapmirror restore - file-list`.

Which two statements are true about this operation? (Choose two.)

- A. The maximum number of files that you can select at the same time is eight.
- B. You can choose any destination volume for the restore, as long as the volume type is DP.
- C. You can choose any destination volume for the restore, as long as the volume type is RW.
- D. The maximum number of files that you can select at the same time is one.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 98

Click the Exhibit button.

A customer wants to have a local mirror and a remote mirror of their data.

Referring to the exhibit, which two solutions satisfy these requirements? (Choose two.)

- A. Solution II
- B. Solution I
- C. Solution III
- D. Solution IV

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 99

On a Windows host, you want to make a consistent database backup of a physical SQL server where the database is on iSCSI-connected LUNs on a clustered Data ONTAP system.

In addition to SnapDrive for Windows, which three NetApp software products should be installed to satisfy this requirement? (Choose three.)

- A. On Command Workflow Automation
- B. Snap Manager for SQL
- C. On Command Unified Manager
- D. Microsoft iSCSI Software Initiator
- E. iSCSI Host Utilities

Answer: B,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 100

Your DevOps team reported that one virtual machine on a VMware datastore has been corrupted due to a ransomware attack.

In this scenario, which two methods would solve the issue? (Choose two.)

- A. Clone the volume's Snapshot copy prior to the attack, mount, and storage vMotion.
- B. Restore the VM using SnapCenter Plug-in for VMware vSphere.
- C. Restore the datastore using SnapCenter Plug-in for VMware vSphere.
- D. Restore the Snapshot copy of the volume from ONTAP System Manager.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 101

You have a network outage that affects client access to site

You need to temporarily reverse the SnapMirror relationship of a volume to serve data from site B.

Which two steps must you perform first? (Choose two.)

- A. Abort the SnapMirror relationship.
- B. Take the source volume offline.
- C. Delete the SnapMirror relationship.
- D. Break the SnapMirror relationship.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 102

An administrator wants to use SnapCenter 4.2 to back up and restore both their VMware Horizon environment and Microsoft SQL attached database.

In this scenario, which service account role should be configured to accomplish this task?

- A. backup
- B. sysadmin
- C. operator
- D. administrator

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 103

You want to set up an important management solution that must comply with FIPS 140-2. The solution should support a multi-clusters environment and should provide centralized management of the encryption keys.

In this scenario, which solution accomplishes the task?

- A. NetApp Storage Encryption (NSE) with onboard key manager using the Key Management Interoperability Protocol (KMIP)

- B. NetApp Volume Encryption (NVE) with onboard key manager using the Key Management Interoperability Protocol (KMIP)
- C. NetApp Volume Encryption (NVE) with external key management server using the Key Management Interoperability Protocol (KMIP)
- D. NetApp Storage Encryption (NSE) with external key management using the Key Management Interoperability Protocol (KMIP)

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 104

A customer wants compression enabled on the SnapVault secondary volume.

Which two statements are true? (Choose two.)

- A. A warning message is displayed when you enable compression on a SnapVault secondary volume.
- B. Data transfers will not be storage efficient after enabling compression on the SnapVault secondary volume.
- C. Data transfers will be storage efficient after enabling compression on the SnapVault secondary volume.
- D. A warning message is not displayed when you enable compression on a SnapVault secondary volume.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 105

You configured a SnapMirror relationship with a default policy for the daily mirroring of a volume which contains financial data. Although the data is critical, it only changes on a monthly basis. Using On Command System Manager, which two actions would change the frequency of the SnapMirror updates? (Choose two.)

- A. Edit the parameters of the default schedule.
- B. Select or create a different policy.
- C. Select or create a different schedule.
- D. Edit the parameters of the default policy.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 106

A customer wants to convert some SnapMirror relationships to SnapVault relationships.

How would this be accomplished without creating a new baseline?

- A. Break and delete the relationship followed by SnapMirror resync.
- B. Break the relationship followed by SnapMirror modify.
- C. Break the relationship followed by SnapMirror delete.
- D. Break and delete the relationship followed by SnapMirror resync with relationship type XDP.
