NEW QUESTION: 1

Your log files are stored in Amazon S3 and you want to keep a copy In Azure Blob storage. In this scenario, which tool do you use for data replication?

- A. Azure Data Box
- B. NetApp Cloud Sync service
- C. AWS Snowball
- D. NetApp Cloud Backup service

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 2

A customer has a multi-cloud environment and wants to deploy Cloud Volumes ONTAP in both AWS and Azure.

In this scenario, which two statements are true? (Choose two.)

- A. The customer must deploy one Connector for AWS and a second Connector for Azure.
- B. The customer must deploy a single Connector for either AWS or Azure and create a VPN connection to the other cloud.
- C. The customer must provide outbound Internet access for any Connector.
- D. The customer must provide a private subnet with only VPC or VNet routing for any Connector.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 3

Your team is deploying a containerized application on Kubernetes. The developers are currently collecting metrics for application response times.

d Insights to augment their

In this scenario, what are three ways that you would monitoring? (Choose three.)

- A. Automatically adjust the size of the cluster based on the workload.

- B.** Provide an overall health view of the Kubernetes cluster.
- C.** Curate application metrics and other Kubernetes monitoring into a single dashboard.
- D.** Collect pod metrics.
- E.** Provide automatic Snapshot copies of the containerized application.

Answer: A,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 4

You want to deploy NetApp Cloud Volumes ONTAP In AWS using NetApp Cloud Manager. In this scenario, which two network protocols need to be specified in the security group rules to initiate a connection with your AWS tenant? (Choose two.)

- A.** ICMP
- B.** SSH
- C.** LDAP
- D.** HTTPS

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 5

You are designing a cloud storage solution for a customer in Microsoft Azure with strict security requirements.

They want to use Azure NetApp Files and they require "krb5p" for all NFS traffic. The workload is highly concurrent and mostly sequential.

In this scenario, how will throughput be affected?

- A.** Throughput will be slightly decreased.
- B.** Throughput will be slightly increased.
- C.** Throughput will be significantly decrease
- D.** Throughput will not be affected.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

Your organization requires you to consolidate your branch office Microsoft Windows file servers into the cloud with the objective to centralize all Microsoft Windows file shares (SMB) into your Active Directory domain. Your organization requires you to extend file shares from your Azure NetApp Files central data sources to your branch office workforce with support for file locking.

In this scenario, which NetApp cloud service provides the desired outcome?

- A.** Cloud Tiering
- B.** ONTAP Select software
- C.** FlexCache technology
- D.** Global File Cache

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 7

Your customer needs assistance developing a cloud storage solution that allows access from both NFSv3 and SMBv3 clients. You recommend Azure NetApp Files.

In this scenario, which two satisfy the requirements? (Choose two.)

- A. Active Directory Domain Services (ADDS)
- B. Azure Active Directory (AAD)
- C. Azure Active Directory Domain Services (AADDs) I
- D. DNS servers that are reachable from the Azure NetApp files delegated subnet

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 8

Exhibit.

Referring to the exhibit, a volume in the Value storage service level is storing 10 TB of data.

What is the maximum number of IOPS that the volume would receive?

- A. 5120
- B. 1280
- C. 512
- D. 128

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 9

You are asked to develop a migration strategy for your customer that is migrating several SMB and NFS workloads from on-premises to Azure NetApp Files.

In this scenario, which three technologies should you consider? (Choose three.)

- A. Azure Storage Explorer
- B. NetApp Cloud Sync service
- C. SnapMirror technology
- D. rsync
- E. robocopy

Answer: A,B,E ([LEAVE A REPLY](#))

NEW QUESTION: 10

You are deploying NetApp Cloud Volumes ONTAP to support a relational database workload. You must protect data from an intermittent loss of network connectivity to a single zone in a public cloud data center.

Which Cloud Volumes ONTAP feature accomplishes this task?

- A. multi-zone high-availability (HA)
- B. intelligent cold-data tiering to object storage
- C. ONTAP storage efficiencies
- D. end-to-end encryption

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 11

You are asked to deploy NetApp Cloud Volumes ONTAP In AWS by using automation tools to help streamline scale and maintain updates.

Which two tools would you use to complete this task? (Choose two.)

- A.** Ansible
- B.** Vagrant
- C.** Terraform
- D.** Helm

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

A customer wants to design a solution that provides unique persistent storage when scaling a StatefulSet application. The customer proposes using a volume claim template in the StatefulSet definition to generate a unique persistent volume and use NetApp Trident to automate the provisioning of the persistent volume.

Which Kubernetes object would be used in this scenario?

- A.** ConfigMap
- B.** HorizontalPodAutoscaler
- C.** CronJob
- D.** StorageClass

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 13

Your company has just merged with another organization. You are responsible for connecting both companies by designing a new multi-region cloud service in Microsoft Azure. Both company's Azure subscriptions and tenants have been merged already. You want to enable cross-region connectivity between the new services and endpoints.

In this scenario, which service do you consider?

- A.** Site-to-Site VPN
- B.** ExpressRoute
- C.** Service endpoints
- D.** VNet Peering

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 14

Which two domain service providers are supported for authentication of Azure NetApp Files SMB shares?

(Choose two.)

- A.** Azure Active Directory External Identities

- B. Azure Active Directory Domain Services (AADDs)
- C. Active Directory Domain Services (ADDS)
- D. Azure Active Directory (Azure AD)

Answer: (SHOW ANSWER)

NEW QUESTION: 15

A customer wants to migrate workloads to Cloud Volumes ONTAP.

In this scenario, which two test cases would you design in your proof of concept to demonstrate the solution?

(Choose two.)

- A. test FCoE
- B. test HA resiliency
- C. test storage efficiencies
- D. test RAID DP

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 16

You are designing an automation solution that you will use across both on-premises and cloud-based NetApp ONTAP systems. You want a single automation solution for both locations to reduce the administrative overhead.

In this scenario, which two automation tools would you use? (Choose two.)

- A. Rest API
- B. CloudFormation
- C. ARM
- D. Ansible

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 17

Exhibit.

Referring to the exhibit, what are three business reasons for the migration to the new target? (Choose three.)

- A. to increase redundancy

- B. to add NFS v4 support
- C. to reduce cost
- D. to increase performance
- E. to refactor the application to use S3 object storage

Answer: A,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 18

Your manager asks you to include steps in your NetApp Hybrid cloud deployment to reduce the risk of a developer accidentally interfering with your mission-critical applications that are in production.

In this scenario, which step would you perform?

- A. Enable multifactor authentication (MFA) for privileged administrators to access NetApp ONTAP software and NetApp Cloud Manager.
- B. Use dedicated NetApp Cloud Manager accounts for development and production environments.
- C. Identify federated NetApp Cloud Manager's identity to your company's SSO.
- D. Isolate the production's VPC network from the development's VPC network.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 19

Your customer requires a centralized repository of media files. The repository will be large (in petabytes), with content creators and editors using it from around the globe. They want a NetApp solution that requires minimal administrative resources and provides a good user experience.

In this scenario, which two NetApp technologies would satisfy these requirements?

(Choose two.)

- A. Flash Cache
- B. FlexGroup
- C. FlexCache
- D. SnapMirror

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 20

You must consolidate your branch office Microsoft Windows file servers into the cloud with the objective to centralize all Microsoft Windows file shares (SMB) into your Active Directory domain. After analyzing your unstructured data set, you find that 10% of the data is active and 90% of your data is archive data. You deploy NetApp Cloud Volumes ONTAP in Microsoft Azure and enable data tiering to tier off data to object storage, leaving all the defaults for the capacity tier.

In this scenario, by default, which storage class is used for your archive data?

- A. hot tier

- B. coldline storage class
- C. nearline storage class
- D. cool storage tier

Answer: ([SHOW ANSWER](#))
