NEW QUESTION: 1

Your organization has a need to use multiple catalogs and share categories across catalogs. Which four options apply to Catalog sharing?

Response:

- A. Multiple catalogs can share the same category by reference sharing.
- B. Public catalog categories cannot be shared across multiple catalogs.
- C. Items cannot be assigned to multiple shared catalogs.
- D. Public catalog categories can be shared across multiple catalogs.
- E. Changing the catalog security from public to private might impact the catalogs that are sharing the category by reference.
- F. Source categories by copying from multiple catalogs.

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 2

Your customer wants to use Descriptive Flexfield segments in Business Intelligence. Which two actions would enable a Descriptive Flexfield segment for Business Intelligence?

Response:

- A. Adding a new segment by using BI Composer
- B. Selecting the BI Enabled check box for the Descriptive Flexfield segment
- C. Re-deploying the Key Flexfields
- D. Deploying the Descriptive Flexfield

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 3

What are the three options that you select in Oracle Product Hub Cloud to publish objects to a spoke system?

Response:

- A. Item Relationships
- B. Item Cross Reference

- C. Items
- D. Item Catalogs
- E. Item Classes

Answer: C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 4

You have been asked to define item and item structure in Oracle Product Hub Cloud, which typically involve the following:

- Create Product Structure
- Manage Product Structure
- Compare Product Structure

Identify the two roles that will enable you to perform these actions.

Response:

- A. Product Data Steward
- B. Product Design Manager
- C. Product Manager
- D. Product Design Engineer
- E. Application Manager

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 5

Which three entities can be controlled through item batch options?

Response:

- A. Change orders
- B. Attachments
- C. New item requests
- D. Structures and packs
- E. Cross references and relationships

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 6

Your customer wants to add default approvers to their change order workflow, to review and approve proposed item changes. How would you configure this?

Response:

- A. Setup and Maintenance > Manage Change Statuses > Select Approval status line > In Status Details section, Add Default Approvers
- B. Setup and Maintenance > Manage Change Order Types > Edit Workflow tab > Select Approval status line > In Status Details section, Add Default Approvers
- C. Setup and Maintenance > Manage Change Order Types > Edit Workflow tab > Select Approval status line > Add Default Approvers
- D. Setup and Maintenance > Manage Change Statuses > Edit Change Order > Click the Workflow tab > Select Approval status line > In Status Details section, Add Default Approvers

E. Setup and Maintenance > Manage Change Order Types > Edit Change Order > Click the Workflow tab > Select Approval status line > In Status Details section, Add Default Approvers

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 7

Which two entities are defined in the Define Facilities activity in a business process model?

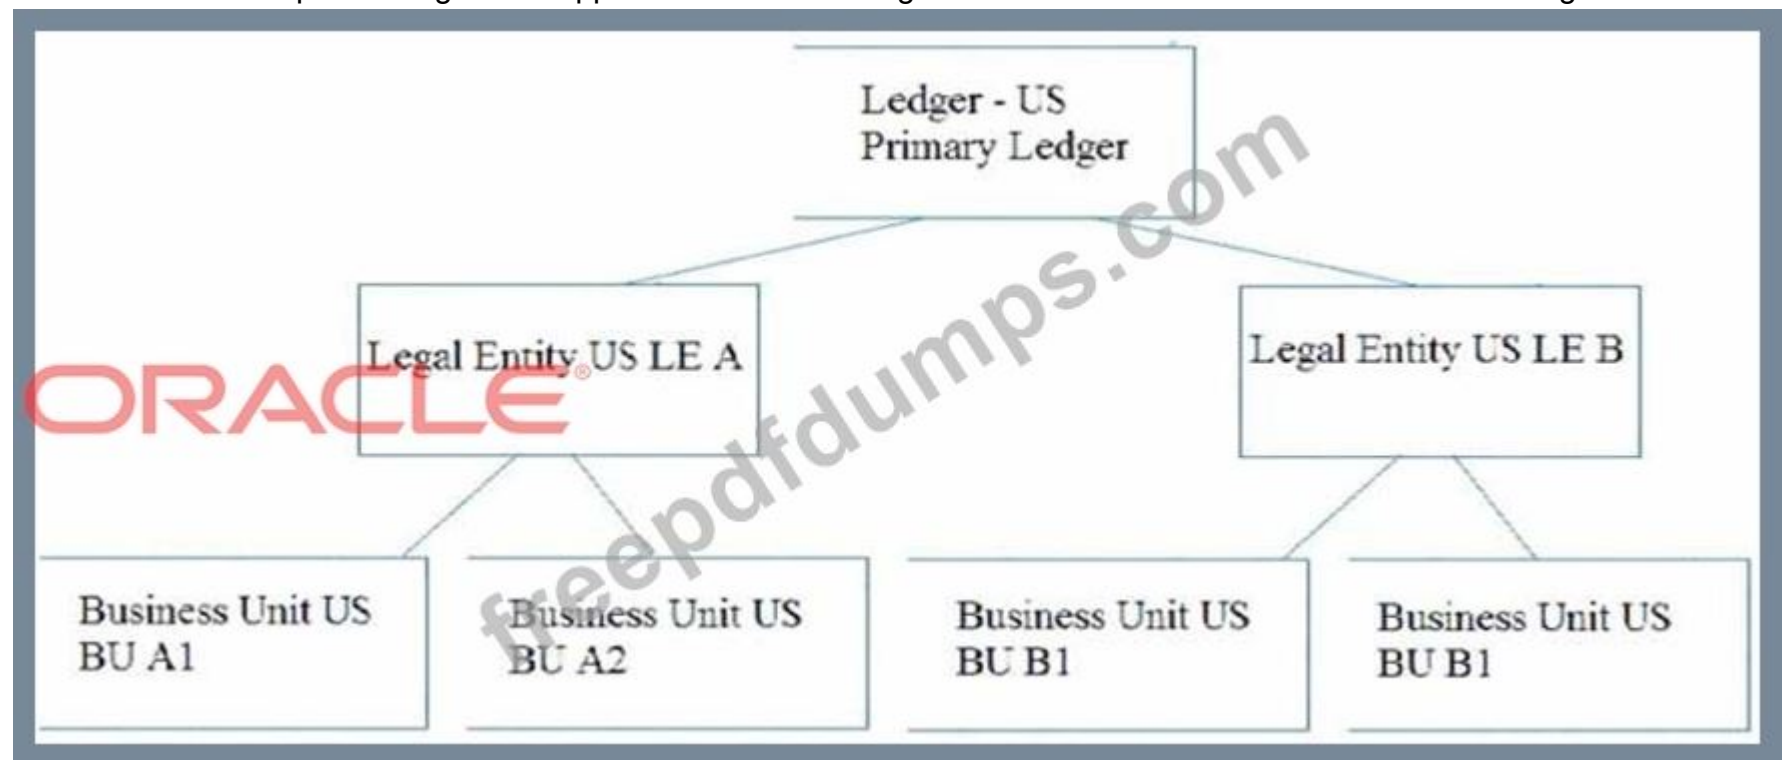

Response:

- A. Reference data sharing, which determines how reference data in the applications is portioned and shared
- B. The primary accounting ledger and any secondary ledgers that provide an alternative accounting representation of the financial data
- C. Inventory organizations, which represent facilities that manufacture or store items
- D. The item master organization, which holds a single definition of the items that can be shared across many inventory organizations

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 8

Your customer is implementing Cloud Applications and their organization structure is described in the following:

They have completed development work and now want to move all configurations along with data to the next instance related to US LE B only, all Business Units perform Financial transactions. How can this be achieved? Response:

- A. While you export, set scope values as US LE A and US LE B, and while you import, set scope as Ledger, US Primary Ledger.
- B. While you export, select tasks related to US BU B1 and US BU B2 only.
- C. While you export, set scope values for US LE B and while you import, it will automatically consider data corresponding to Legal Entity US LE B.
- D. Export everything and while you import, select scope values for US LE A, US BU B1 and US BU B2.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

You are a retail organization and your suppliers upload supplier items on a periodic basis using supplier portal. You want to make sure that suppliers enter minimal and required information and with less errors.

Identify three features you would use in order to fulfill this requirement.

Response:

- A.** Expose required attribute groups to Product Hub Portal
- B.** Creation of suppliers
- C.** Smart Spreadsheets/Templates
- D.** Blending Rules
- E.** Export Suppliers

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 10

Transactional attributes are inherited across the item class hierarchy and the metadata is date-effective. Changes in the metadata are reflected immediately at the item level.

Which two statements are true regarding metadata?

Response:

- A.** Multiple records with the same date range cannot exist if they belong to different domains.
- B.** Both start date and end date for a transactional item attribute are entered by a user.
- C.** End date is calculated automatically based on the next date effective record.
- D.** Only start dates for a transactional item attribute are entered by a user.
- E.** Any changes made at the parent item class for this transactional item attribute would get inherited.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 11

Observe the Mobile Phones item class in the hierarchy shown. You are unable to perform add and remove actions for one of the security configuration rows under the Item Class People section.

Electronics

--Gadgets

--Tablets

--Laptops

--Mobile Phones

Identify the cause for this behavior. Response:

- A. Item class security configurations can be modified only in Security Console.
- B. Item class security configurations cannot be modified at all.
- C. The item class security configuration is locked for the Mobile Phones item class.
- D. The item class security configuration cannot be modified because items already exist under the Mobile Phones item class.
- E. The selected configuration row is inherited from the Gadgets or Electronics item class.

Answer: E ([LEAVE A REPLY](#))

NEW QUESTION: 12

Which three statements are true in regard to Pack Types?

Response:

- A. Pack Types are defined as items in Product Hub.
- B. They are used to describe Global Trade Item Number (GTIN) hierarchy level.
- C. They are known as Trade Item Unit Descriptors (TIUD)
- D. Pack Types define each level in a packaging hierarchy.
- E. Pack Types are defined as Catalogs in Product Hub

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 13

Organizations may decide to create either new items or new revisions to capture major changes that affect the form, fit and function of an item. Which statement is true regarding revisions?

Response:

- A. A revision will always require users to create a change order to add a revision to an item.
- B. A revision is required attribute to be selected when you create a new item.

- C. A revision is not required as long as the item is not approved.
- D. A revision will always be created when an item is created.
- E. A revision is not required when you create an item until a change order is created.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 14

Within Catalogs, which three values can be selected within the Sharing Content attribute?

Response:

- A. Items only: Only categories without assigned items can be shared
- B. Categories only: Only categories with assigned items can be shared
- C. Items only: Only categories with assigned items can be shared
- D. Items and categories: Only one category can be shared
- E. Categories only: Only categories without assigned items can be shared
- F. Items and categories: All categories can be shared

Answer: A,E,F ([LEAVE A REPLY](#))

NEW QUESTION: 15

Your customer wants a For Your Information (FYI) notification to be sent to approvers when a change order workflow is completed.

Which configuration setup on the Notifications page of ChangeOrderApprovalTask will enable this requirement?

Response:

- A. Task Status = Alert, Recipient = Reviewers
- B. Task Status = Complete, Recipient = Reviewers
- C. Task Status = Complete, Recipient = Owner
- D. Task Status = Outcome Update, Recipient = Assignees
- E. Task Status = Complete, Recipient = Assignees

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 16

Your company has ordered 500 units of an item from a specific supplier. As the Receiving Agent, you want to check only 10 percent of the total units received, and decide if you can accept or reject all the units.

Which Inspection Plan fulfills this requirement?

- A. Status-Approved: Plan Type - Receiving: Inspection Level - 100%: Criteria - Supplier
- B. Status-Approved: Plan Type - Purchasing: Inspection Level - ANSI/ASQC 21.4 Standard sampling: Criteria - Supplier
- C. Status - Approved: Plan Type - Receiving: Inspection Level - 10% Sampling inspection level:
- D. Status-Approved: Plan Type - Purchasing: Inspection Level - 10% Sampling inspection level:

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 17

A Retail Customer has defined Item Organization in Oracle Product Hub Cloud and wants to view analytics pertaining to the items imported from legacy, supplier, and manufacturer systems.

Which two Transactional Business Intelligence subject areas of Product Management can fulfill this requirement?

Response:

- A. Product Management - Source System Item Real Time
- B. Product Management - Catalog Item Real Time
- C. Product Management - Related Item Real Time
- D. Product Management - Supplier System Real Time
- E. Product Management - Trading Partner Item Real Time

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 18

Oracle Product Data Quality has standard validation rules that can be used to overcome data quality issues. Identify three events where they are applied.

Response:

- A. when implementing a batch of items
- B. when exporting a batch of items
- C. when running a BI report that identifies data quality
- D. when editing an item
- E. when creating multiple items

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 19

A buyer has requested Product Data Steward to create a laptop item with structure in Product Hub. Product Data Steward is unable to define the structure. Why?

Response:

- A. The Define Data Quality for Products feature is not provisioned.
- B. The Product Development option under Product Management offering is not provisioned.
- C. The Item and Catalog Management and Structures functional areas are not enabled.
- D. The Product Management offering is not provisioned and Define Product Source System feature is not enabled.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 20

Your customer wants to enforce required attributes at each stage for certain departments and each assignee has to provide status of their work.

What is the appropriate design approach you propose to accomplish these requirements?

Response:

- A.** Configure Change Order (with revision) with additional steps to capture required attributes.
- B.** Configure New Item Request to capture required attributes.
- C.** Configure Commercial Change Order with additional steps to capture required attributes
- D.** Configure New Item Request with additional steps to capture required attributes.
- E.** Configure Change Order (with no revision) with additional steps to capture required attributes.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 21

As part of your implementation project, it is required to set up validation rules on items in Product Data Hub. Which option outlines the correct steps needed to create validation rules?

Response:

- A.** Create Rule Set > Select Composite = Yes > Select Type = Assignment > Go to "Edit Rule Set" page and select "Rule Tab" > Create Rule button
- B.** Create Rule Set > Select Composite = Yes > Select Type = Validations > Go to "Edit Rule Set" page and select "Rule Tab" > Create Rule button
- C.** Create Rule button, Create Rule set > Select Composite = No > Select Type = Validations > Go to "Edit Rule Set" page and select "Rule Tab"
- D.** Create Rule Set > Select Composite = No > Select Type = Validations > Go to "Edit Rule Set" page and select "Rule Set" > Create Rule button
- E.** Create Rule Set > Create Rule button > Select Composite = No > Select Type = Validations > Go to "Edit Rule Set" page and select "Rule Tab"

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 22

View the Exhibit.

New Item Request

☒ Enable new item request

Definition Workflow Details

Actions	View	+ X	Detach						
*Step Sequence Number	Response Required From	*Assignee Type	*Assigned To	*Business Entity	*Associated Entity	All Values Required	Required Definition Values	Item Class	Inherited
10	All	Person	FAAdmin	Item operational attributes	Sales and Order Management	-		ROOT_ICC	-

20	One	Role	Product Data Steward	Item associations	Item organization	-		ROOT_ICC	-
20	One	Role	Product Data Steward	Item associations	GTIN relationships	☒		ROOT_ICC	-

Rows Selected 1

New Item Request workflow definition for an item class is displayed in the Exhibit. Based on this configuration, which two options are true? Response:

- A. The Product Data Steward can define Sales and Order Management and all Item operational attributes.
- B. Both FPHADMIN and the Product Data Steward can update the basic attributes of the item by default.
- C. The FPHADMIN can define Sales and Order Management attributes and item structures.
- D. The Product Data Steward can define Item Organization association and GTN (Global Trade Item Number) relationships.

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 23

When creating style and SKU items, your customer wants to manage some attributes at both the style and SKU levels, and manage the remaining attributes only at the style level.

Identify the two setups that are required in the attribute group definitions in order to fulfill this requirement.

Response:

- A. For attribute groups to be managed both at the style and SKU levels, set the Style to SKU field to Defaulted in the context usage.
- B. For attribute groups to be managed both at the style level, set the Style to SKU field to Defaulted in the context usage.
- C. For attribute groups to be managed both at the style and SKU levels, set the Style to SKU field to Inherited in the context usage.
- D. For attribute groups to be managed only at the style level, set the Style to SKU field to None in the context usage.
- E. For attribute groups to be managed only at the style level, set the Style to SKU field to Inherited in the context usage.

Answer: A,E (LEAVE A REPLY)

NEW QUESTION: 24

The security setup for the Laptops Item Class is as shown here. Which three options are true based in this setup?

Security Setup for Laptops Item Class							
Principal	Name	Organization	Item Class	Inherited	Start Date	End Date	Actions
Group	Product Data Steward	MST	Laptops	-	11/26/14		• Create Item Class Item. • Maintain Item Basic. • Maintain Item Pack. • View Item Pack. • Maintain Item People. • View Item Basic.
Group	Product Manager	MST	Laptops	-	11/26/14		• Maintain Item Basic. • View Item Basic. • View Item Attribute. • Maintain Item Attribute.

Response:

- A. Product Data Stewards and Product Managers can create new Laptop items and edit their user-defined attributes.
- B. Product Managers cannot search and view Laptop items.
- C. Product Data Stewards can create new Laptop items and manage pack hierarchies.
- D. Product Managers can view and edit user-defined attributes for Laptop items.
- E. Product Managers can search and view Laptop items.

Answer: C,D,E (LEAVE A REPLY)

NEW QUESTION: 25

Identify two entities where you can define only Descriptive Flexfield segments but not Extensible Flexfields.

Response:

- A. Item Revision
- B. Item Catalogs
- C. Items
- D. Item Cross Reference
- E. Item Supplier Site

Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 26

Your customer has items created in the master organization and the same items are available across two child organizations, each in a unique location.

As part of a data governance use case, the customer wants all the attribute changes for an item to be approved by the respective location-specific Data Stewards.

How would you address this requirement?

Response:

- A. By enabling Change Order Header Rule Based Single Approver at the organization level
- B. By enabling organization-specific item rules for a change order
- C. By defining propagation rules for the organization hierarchy for a change order
- D. By defining two change order types at the organization level

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 27

You are transferring your configuring data from your customer's test environment to your customer's production environment. You are in the Import/Export Lifecycle phase.

What would you do to export your configuration data?

Response:

- A. Setup and Maintenance > Select Implementation Projects button > Create Implementation Project
- B. Navigator > Configuration Packages > Create Configuration Package
- C. Setup and Maintenance > Open Task Pane > Manage Configuration Packages > Create Configuration Package
- D. Navigator > Implementation Projects > Create Implementation Project

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 28

Your Product Manager has created an Engineering Change Order by using the Save As action. The Revision field is blank for the Change Order created.

Which statement is true?

- A. You can see the revision-level attachments for the affected object in the change order context with a blank revision.
- B. You can submit the change order for approval with a blank revision.
- C. You cannot have a change order with a blank revision.
- D. You can manually enter a new revision number later.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 29

Your customer wants to initiate a change order when the value of the Weight attribute in an item is changed by more than 15% in Oracle Product Hub Cloud. What would you do to fulfill this requirement?

Response:

- A. Define an item rule of type 'Validation' and severity 'Needs Approval' on the Weight attribute.
- B. Define an item rule of type 'Assignment' on the Weight attribute to add it to a change order.
- C. Lock updates to the Weight attribute by using edit privileges.
- D. Set up a change policy on the Weight attribute based on the lifecycle phase.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 30

Which two statements are true about implementation projects?

Response:

- A. When an implementation project is created, you cannot add and/or delete any tasks
- B. Each implementation project can only include one offering and its associated functional areas.
- C. You can use implementation projects to identifying what setup data will be exported and imported
- D. You can customize the task list and assign and track each task.
- E. You cannot customize the task list and assign and track each task.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 31

Identify two task names for defining a Source System in Oracle Product Hub Cloud for importing items.

Response:

- A. Manage Spoke Systems
- B. Manage Source System Lookups
- C. Manage Trading Community Messages
- D. Manage Trading Community Source Systems
- E. Manage Source System Entities

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 32

One of your customer employees is assigned as an application administrator. What three functions can the employee perform using Security Console?

Response:

- A. Manage users
- B. Create customers
- C. Assign Roles to users
- D. Perform role analysis
- E. Create Items

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 33

You have scheduled item publication to a spoke system with specific item publication criteria and the following details:

Day 1: First publication date to the spoke system with a publication schedule that runs every five days Day 5: Next schedule process Day 10: Next schedule process Day 15: Next schedule process On Day 12, your customer decides to publish from Day 6.

Identify the parameters that are required to run this request and the data set that would result from this request.

Response:

- A. Set Last Publication Date as Day 6, which will publish all records updated from Day 6 up to Day 10.
- B. Set Criteria Date as Day 6, which will publish all records updated from Day 6 up to Day 12.
- C. Set Criteria Date as Day 6, which will publish all records updated from Day 6 up to Day 10.
- D. Set Last Publication Date as Day 1, which will publish all records updated from Day 6 up to Day 12.

Answer: (SHOW ANSWER)

NEW QUESTION: 34

View the exhibit.

Business Entity	Item
Rule Set Name	ValidateItemClass
Rule Set Type	Validation
Association Type	Item class
Association Name	TCParent
Rule Name	ValidateSourceTargetIC
Severity	Reject
If Expression	TO_ITEM_CLASS("TCCHLDVR") and FROM_ITEM_CLASS("TCParent")
Validation Condition	True
User Message	An item class cannot be changed from TCParent to TCCHLDVR

You have defined a validation rule to validate an item class change for an item with details as in the Exhibit. What is the expected behavior of the validation rule? Response:

- A. Item class change from TCParent to TCCHLDVR is rejected.
- B. Item class change from TCCHLDVR to TCParent is rejected and a request for a change order is made.
- C. Item class change from TCParent to TCCHLDVR requires a change order.
- D. Item class change from TCParent to TCCHLDVR is rejected and a change request is triggered automatically.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 35

Which statement is true about publishing items in Oracle Product Hub Cloud?

Response:

- A. All items that meet the last Publication Date or Criteria Date, irrespective of the Publication Criteria, are published.
- B. All newly created items are published, irrespective of the Publication Criteria.
- C. All items that meet the Publication Criteria, irrespective of the last Publication Date or Criteria Date, are published.
- D. All items that meet the last Publication Date or Criteria Date and the Publication Criteria are published.

Answer: (SHOW ANSWER)

NEW QUESTION: 36

To enable one of your new suppliers to upload product data into Oracle Product Hub Cloud, you define a new Import Map as per the supplier's data template.

Which configuration would you use to make it visible as a template in the Oracle Product Hub Cloud portal such that your new supplier can use it for uploading items?

Response:

- A. File Type
- B. Suppliers flag
- C. Item Class
- D. External flag
- E. Active flag

Answer: D ([LEAVE A REPLY](#))
