NEW QUESTION: 1

The current SOAP configuration returns a standard exception when the service cannot find a valid instance of the security activity. What action do you take in order to provide specific information to the user when this exception occurs?

- A. Add a Service Error fault condition to the Service SOAP form.
- B. Add a Service Error fault condition to the Parse XML form.
- C. Add a Mapping Error fault condition to the XML Stream form.
- D. Add a Mapping Error fault condition to the Service SOAP form.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 2

A connector can be directly referenced from _____ and _____?
(Choose Two)

- A. data transforms
- B. activities
- C. flows
- D. data pages

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 3

A health plan application includes a process for surgical procedure requests. Currently, there is an evaluation subprocess in which a physician reviews the diagnosis and enters the recommended procedure and its urgency. The request then advances to a medical director who analyzes the feedback and approves the appropriate procedure.

The health care organization has created a new requirement, which states that three physicians can perform the evaluation independently. Only two evaluations are necessary to advance the case to the medical director.

In order to allow the three physicians to review the orders in parallel, how would you configure the process?

- A. Add a Split Join shape, add a list of physicians, and call the evaluation process.
- B. Add a Split Join shape, add a list of physicians, and call the surgical procedure request process.
- C. Add a Split For Each shape, add a list of physicians, and call the evaluation process.
- D. Add a cascading approvals shape that is called by the evaluation subprocess.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

Which element do you configure to create a reusable text style in a skin to apply to both button labels and list entries?

- A. A component
- B. A layout
- C. A mixin
- D. A format

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 5

Which two statements describe the role of the cache manifest in a mobile app?

(Choose Two)

- A. Supports debugging efforts by providing a run-time view of the rules accessed by the app.
- B. Provides access to static resources such as HTML files, image files, or JS files.
- C. Allows downloading of rules for offline use with a mobile app.
- D. Enables users to continue interacting with mobile apps while offline.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

Which two dependencies do you directly enforce with a Wait step?

(Choose Two)

- A. Pausing a case until another case (or all cases) reach a specified status
- B. Pausing a case until a predetermined time expires
- C. Pausing a case until a new child case is created
- D. Pausing a case until a user submits a specified value

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 7

You have a data page with customer dat

a. The data page is configured to reload if it is older than one hour. Which of the following best describes when the data page will be reloaded?

- A. The data page reloads automatically one hour after it was last accessed.

- B. The data page reloads automatically one hour after it was created.
- C. The data page reloads on the next access one hour after it was created.
- D. The data page reloads on the next access one hour after it was last accessed.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

Which two of the following statements are true about the Rule resolution process?

(Choose Two)

- A. The Rule purpose takes precedence over the Rule availability.
- B. An application includes the following set of circumstanced instances of a decision table.
- C. Rule resolution applies to Rules that are instances of classes derived from the Rule- and Work- base classes.
- D. If a user does not have access to the selected Rule, the system sends a message that the Rule is not authorized for execution.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

You are troubleshooting a performance issue with a user interaction that exceeds the maximum time of five seconds. The elapsed time shown in the performance report indicates a total of two seconds.

Which tool do you use to determine what is adding the additional three seconds to the performance measure?

- A. Log Analyze
- B. Performance Profiler
- C. Database Trace
- D. System Management Application

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 10

Users can access an apartment hunting application from different devices with different screen sizes. A screen displays the photos of available properties. By default, the photos are displayed in three columns. When the screen width is less than 800 pixels, the photos should be displayed in two columns.

How do you implement the screen for this requirement?

- A. Circumstance the section rule to display different number of columns at different screen sizes.
- B. Use a column layout with a responsive breakpoint at 800 pixels to hide the left column.
- C. Use a dynamic layout with a responsive breakpoint at 800 pixels to change from inline-grid triple to inline-grid double format.
- D. Circumstance the layout to display different number of columns at different screen sizes.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 11

In an online banking application, customers are not allowed to initiate a request to transfer funds when they have pending transfer requests in an audit stage. Which configuration option do you use to implement this requirement?

- A. Set an entry validation condition on the first stage in the transfer funds case type.
- B. Configure a Validate rule to evaluate if the user has a pending transfer request in the audit stage.
- C. Use a privilege to determine if the customer has a pending transfer request in the audit stage.
- D. Use an Access When condition to determine if the customer has a pending transfer request in the audit stage.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 12

You are adding steps to a process named Select Insurance Policy. Which one of the following steps would be named correctly?

- A. Confirm
- B. Confirm employee
- C. Confirm employee and employer
- D. Employee confirmation

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 13

Which three items are generated and displayed in the compliance score of an application?
(Choose Three)

- A. Rules with unjustified warnings in the application
- B. Percentage of compliant rules in the application
- C. Total core rules used in the application
- D. Unweighted compliance score out of 100
- E. Rules with warnings in the application

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 14

You can call any of the Pega API services by using _____.

- A. SOAP web services
- B. standard HTTP methods
- C. out-of-the-box Pega rules
- D. a data transform

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 15

Which two of the following steps are required to create a Pega Web Mashup?

(Choose Two)

- A. Generate the mashup code.
- B. Configure a list of approved sites for the site origin.
- C. Define attributes to defer for the default action.
- D. Set the data-peg-resizetype attribute to customize the mashup width.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 16

You are assigned to a team to develop a case life cycle design for an application. Why would you design the case life cycle?

- A. Help estimate the total time required for the case life cycle to produce a new policy.
- B. Show technical users how to use Pega developer tools for collecting customer information.
- C. Ensure all team members have a common understanding of how a case is processed and resolved.
- D. Guide the development team with guidelines on how to manage the project development.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 17

What requirement do you satisfy with an Access When record?

- A. Use auto-generated controls.
- B. Use fixed-width styling.
- C. Select the UI design best practice for supporting application usage on a mobile device.
- D. Configure links for user actions.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 18

When a user selects a product in a list, the application displays data about that product. Data is copied to a page property using the Copy data from a data page option. After the data has been copied to the property, when is the data copied to the property again?

- A. When the product is changed
- B. The next time the property is accessed
- C. Never

D. The next time the case is opened

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 19

Which requirement is satisfied by configuring a service level agreement?

- A. Transaction dispute cases are considered more urgent than address change cases.
- B. Users are notified when they receive an assignment.
- C. Requests from customers with elite status go to a dedicated work group.
- D. A transaction review is completed within 24 hours.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 20

Refund requests are queued for overnight processing. What two pieces of information are required to queue the refund request?

(Choose Two)

- A. The date and time at which the queued item can be processed.
- B. The ID of the queue processor.
- C. The ID of the customer requesting the refund.
- D. The case ID of the refund request case.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 21

The lock and roll versioning method _____ and _____.

(Choose Two)

- A. is used for small changes or patches
- B. minimizes the rule data that is carried to a higher version of your application
- C. filters out rules that are unavailable for rule resolution
- D. ensures older versions of application rulesets are preserved unchanged

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 22

An insurance company provides personal property insurance. Jewelry is categorized as a special type of personal property. Requests for jewelry coverage require that a user managing the request is trained to appraise jewelry. The requirement is to route assignments for jewelry appraisals to users who have this skill.

Which one of the following routing approaches would you use?

- A. Route requests to a work group that uses skill rating parameters for work group members.
- B. Route directly to a user who is a member of work group that uses skill rating parameters.
- C. Route requests to a decision table which routes the request to a work group in a location where there are users who have appraisal skills.

D. Route requests to a reporting manager who assigns the request to an available user to ensure fast processing.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 23

You have been asked to create a report definition that includes information about the sales offices and sales representatives. The manager wants to access the report in the Report Browser in the user portal. The manager also wants to include the report in a new report category specifically for the sales group.

What two configurations are required to support this request?

(Choose Two)

- A. Select the report definition option that displays your report in the Report Browser.
- B. Add a category for sales group reports in the Report Browser.
- C. Create a report category rule for sales office reports.
- D. Select the option in the Report Browser that allows users to view your report.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 24

You populate a data page with product information. The product information varies based on the Product ID. Which implementation maximizes reusability?

- A. Create a data page sourced with a connector. Specialize the data page by class based on context.
- B. Create a data page sourced with a report definition. Circumstance the report definition based on context.
- C. Create a data page and report definition for each context. Use parameters to filter the results of the response data transform.
- D. Create a data page sourced with a report definition. Use parameters to specify a filter condition to retrieve specific results based on context.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 25

A user is processing a case and receives an error message that the system could not find an appropriate rule to use. Select two possible reasons rule resolution failed to find a rule to execute.

(Choose Two)

- A. The rule chosen by rule resolution is in a ruleset that is not in the application's ruleset list.
- B. The availability of the rule chosen by rule resolution is set to Blocked.
- C. The user does not have appropriate privilege to access the rule chosen by rule resolution.
- D. The context of the rule chosen by rule resolution does not match the context of the referencing rule.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 26

You are configuring a screen flow as shown below:

Steps three through five must be completed in order. How do you configure the screen flow to meet this requirement?

- A. Select the Enable navigation link option for both steps, and the Only allow navigating back to this step option for step four.
- B. Select the Enable navigation link and Only allow navigating back to this step options for both steps four and five.
- C. Select the Enable navigation link option for both steps, and the Only allow navigating back to this step option for step five.
- D. Select the Enable navigation link option for step four, and the Only allow navigating back to this step option for step five.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 27

The initial Urgency on the Case Type is set to 0. An Assignment Service-Level Agreement is configured with the following details:

- Initial Urgency: 10
 - Assignment ready: Timed delay of 1.5 hours
 - Goal: 1.5 hours and increase Urgency by 15
 - Deadline: 3 hours and increase Urgency by 25
 - Passed deadline: 1 hour, increase Urgency by 5, and limit events to 5
- What is the Assignment Urgency 5 hours after the Case reaches the Assignment?

- A. 55
- B. 50
- C. 25
- D. 60

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 28

The purpose of a Circumstance Template is to _____.

- A. define the values used in a circumstance
- B. provide a list of all potential circumstances in one place
- C. provide a template for business users to change circumstances when completing a task
- D. define the properties used in a circumstance

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 29

A form must support accessibility. How do you enable a user to specify a date?

- A. Configure a text box to allow date entry.
- B. Use a calendar control that displays an entire month.
- C. Provide separate controls for month, day, and year.
- D. Use a calendar control that displays an entire year.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 30

A manager has requested a report that shows the purchase requests for each of the regional cost centers. The manager wants to organize the results so the cost center appears only once on the report and the requests are listed under cost center. How would you configure the report definition?

- A. Use the requests column to group the results.
- B. Summarize the requests column by count.
- C. Use the cost center column to group the results.
- D. Filter the results so that only cost center and requests are included in the report.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 31

How do you replace the Pega logo with the appropriate logo for each operating subsidiary?

- A. Create a harness for each division.
- B. Create a skin for each division.
- C. Create a portal record for each division.
- D. Create a portal header for each division.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 32

A mortgage application process includes two different subprocesses that can run in parallel. When the two subprocesses are complete, the mortgage application process continues. How do you configure the mortgage application process to implement this requirement?

- A. Add a Subprocess shape and select the Spinoff flow option
- B. Add a Create Case shape

- C. Add a Split For Each shape
- D. Add a Split Join shape

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 33

Which two of the following operations are directly supported by Pega API?

(Choose Two)

- A. Create a new case.
- B. Access data from a data page.
- C. Add a property to a data class.
- D. Update a decision table.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 34

An organization wants to automate its existing expense reporting process. Which two actions should the organization take in order to follow Pega's best practices for application design?

(Choose Two)

- A. Build and test the application before rolling it out for review by interested parties to ensure the application is ready for release.
- B. Use DCO to enter business requirements for the application to facilitate direct engagement of IT and business resources.
- C. Build the required features as soon as they are needed during application development to keep the project moving quickly.
- D. Identify the departments responsible for the application design and have them work independently to enhance organizational efficiency.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 35

Users create Insurance Coverage Requests cases to authorize insurance payments. Users enter information that includes the name of the patient, the date of the procedure, and the type of procedure.

After entering the information, users submit the request for a review of the patient's insurance policy. Because multiple users enter requests, duplicate requests can occur. A request is considered a duplicate if the patient name, procedure type, and procedure date match an existing request.

You have been given two requirements:

- Ensure that users can identify duplicate requests.
- If a case is a duplicate, it is not written to the database. Otherwise, write the case to the database.

Which two steps satisfy the requirement that only nonduplicate requests are written to the database?

(Choose Two)

- A. Add a Persist Case step to the case lifecycle design.
- B. Configure a Create Case step to instantiate temporary cases.
- C. Add a Persist Case flow action to case lifecycle design
- D. Configure the case type to instantiate temporary cases.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 36

You are building a web service connector for an application. The configuration values for the endpoint URLs change between staging and production phases. What is the best configuration to ensure that these values update between development phases?

- A. Create new Application Settings that contain the configuration settings for the endpoint URLs for the staging and production phases.
- B. Configure a When rule to update the endpoint URL values as the production phase changes.
- C. Configure a data transform to update the endpoint URL values as the production phase changes.
- D. Create two application versions, one for staging and one for production, using the correct endpoint URL values.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 37

Which are two principles of General Data Protection Regulation (GDPR)?

(Choose Two)

- A. Maximize personal data collection
- B. Share personal data without restriction
- C. Ensure data integrity and confidentiality
- D. Process data transparently

Answer: C,D ([LEAVE A REPLY](#))

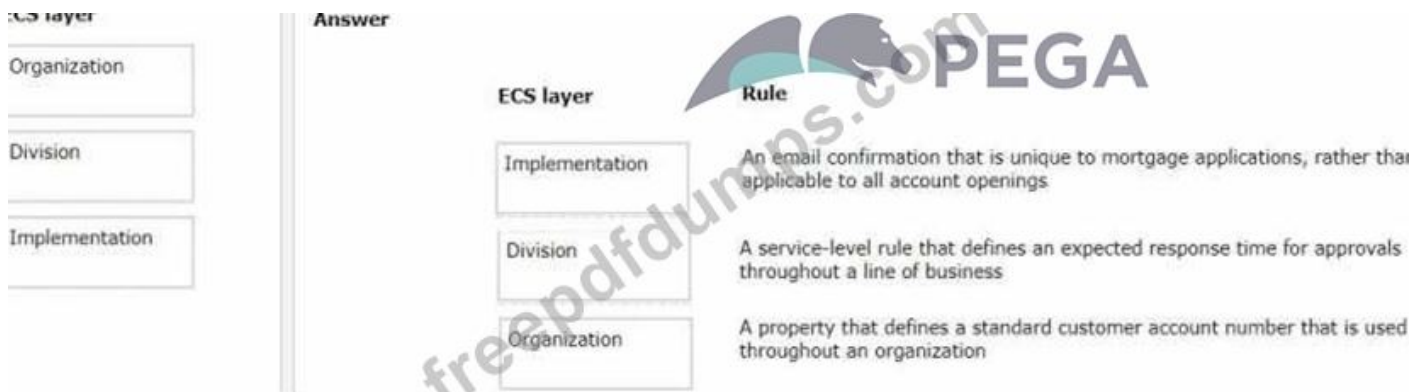

NEW QUESTION: 38

Drag the Enterprise Class Structure (ECS) layers on the left to the appropriate rules on the right.

ECS layer	Answer
Organization	
Division	
Implementation	

ECS layer	Rule
	An email confirmation that is <u>unique to</u> mortgage applications, rather than applicable to all account openings
	A service-level rule that defines an expected response time for approvals throughout a line of business
	A property that defines a standard customer account number that is used throughout an organization

Answer:

NEW QUESTION: 39

An application contains a case type named Time Off. HR requests a report that returns the ID and name of any employee for whom an open Time Off case does not exist.

The ID and Name properties are defined for the class Data-Employee-, and an ID property is also defined for the Time Off class. The ID property in the Time Off class points to records in Data-Employee-.

Select the approach you use to create this report.

- A. Create a report in the Employee class, with a class join to the TimeOff class.
- B. Create a report in the TimeOff class, with a class join to the Employee class.
- C. Create reports in both classes, and set the Employee report as a subreport of the TimeOff report.
- D. Create reports in both classes, and set the TimeOff report as a subreport of the Employee report.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 40

A report definition takes longer than expected to return results. Which two Pega tools do you use to help identify the issue?

(Choose Two)

Response:

- A. Database Trace
- B. PegaRULES Log Analyzer (PLA)
- C. Performance Profiler
- D. Performance Analyzer (PAL)

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 41

Which of the following statements best describes the purpose of the Data-Admin-AuthService?

- A. The AuthService defines how PRPC services are authenticated
- B. The AuthService maps a Servlet to the appropriate authentication and timeout activities
- C. The AuthService is used only when using LDAP authentication
- D. The AuthService defines the password requirements

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 42

Users can select a check box to subscribe to a messaging service. Selecting the check box displays a field for a user to enter a mobile phone number. How do you configure the application to display a field for entering a mobile phone number only when the check box is selected?

- A.** Use a when condition in a data transform to determine whether to show the mobile phone number field.
- B.** Use a when condition in the flow to branch the flow based on case data.
- C.** Use a circumstance on the check box property to create a rule variant that is effective when the check box is selected.
- D.** Use a when condition in the UI form to determine whether to show the mobile phone number field.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 43

You have been asked to add a field to a form in which users enter a Social Security number (nine digits). How would you configure the field to support this requirement?

- A.** Set the minimum and maximum values to "9" in a text field.
- B.** In an edit validate rule, configure a function to test for a Social Security pattern.
- C.** Use an edit validate rule that validates the Social Security pattern.
- D.** Use a decimal property type and make the field required.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 44

Which three approaches are valid for improving activity security?

(Choose Three)

- A.** Limit the activity to calling activities of the same Apply to class.
- B.** Apply a privilege to the activity to restrict the activity to authorized users.
- C.** Configure the activity to restrict individual parameters to authorized users.
- D.** Select the activity type to limit which rule types can call the activity.
- E.** Configure the activity to require authentication to prevent unauthorized use.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 45

When you configure a flow action with a preprocessing action, the system performs the action_____.

- A.** each time the user initiates the flow action
- B.** if the flow action is the default action for the assignment
- C.** when the user updates the details in the assignment
- D.** when the user enters data in the form

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 46

Which three options enable you to populate the list of approvers for a cascading approval using an authority matrix?

(Choose Three)

- A. Decision Tree
- B. When rule
- C. Decision table
- D. Data transform
- E. Activity

Answer: C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 49

Which option represents the relationship between mixins, controls, and formats?

- A. A control specifies a mixin which defines a format.
- B. A control specifies a format which uses a mixin.
- C. A format uses a mixin that defines a control.
- D. A mixin specifies a control which defines a format.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 50

How do you customize the allowed values for a property based on the context of the property using field values?

- A. Create a ruleset for each context, then create a field value record for each value and add the field value record to the appropriate ruleset.
- B. Create a base field value record, then create a circumstance of the base record for each allowed value.
- C. Create a field value record and a unique property record for each allowed value in each context.
- D. Create a field value record for each value and set the context using the Apply to: field.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 51

Alternate stages are used to _____.

(Choose Two)

- A. organize process steps that are not part of the normal course of events.
- B. define the expected flow of events in the life cycle of a case.
- C. define the tasks that users accomplish while the case is in the stage.

D. represent an alternative flow of the case life cycle sequenced from beginning to end.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 52

pyWorkPage stores which type of information?

- A. Data cached from an outside system.
- B. Information about a case.
- C. Information about the Pega server.
- D. Information about the current operator.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 53

Which two situations are appropriate for implementing field-level auditing?

(Choose Two)

- A. In a mortgage application, you want to maintain a history of any changes to the loan amount as the Case progresses through the Case Life Cycle.
- B. In a customer service application, you want to know if a new compliance Case has been created.
- C. In an insurance application, you want to know who adjusts the insurance coverage level.
- D. In a booking application, you want to know why the customer changed their hotel reservation dates.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 54

As a developer for a banking application, you configure a client-based access control (CBAC) rule that has four properties with personally identifiable information: Account ID, Name, Phone number, and Email.

Which privilege do you select so that a customer can change their email but cannot delete it?

- A. Rectify data
- B. Erase data
- C. Read data
- D. Access data

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 55

As part of an employee resignation case, the HR business partner assigned to the employee's department must perform an exit interview. You create a work party called HR Partner to model the HR business partner. HR Partner should be an instance of the _____ class or one of its descendants.

- A. Data-Party-Org
- B. Data-Party-Person

C. Data-Party-Operator

D. Data-Party

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 56

The reason you want to run a process immediately before taking performance readings is _____.

A. to allow the rules to assemble

B. to train the system which process we're going to measure

C. to make sure we know which buttons to click so we can be quick

D. to make sure there are no bugs in the system

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 57

To ensure a case is not a duplicate, the application should present users with a list of open cases matching either the customer name or the type of inquiry. Which two configuration options satisfy this requirement?

(Choose Two)

A. Add a weighted condition to compare the customer name to existing cases.

B. Add a must-match condition to list only cases that match the type of inquiry.

C. Add a must-match condition to list only cases that match the customer name.

D. Add a weighted condition to compare the type of inquiry to existing cases.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 58

Reference module: Rule resolution

Rule	Applies To Class	RuleSet Name	RuleSet Version	Circumstance Property	Circumstance Value	Availability
1	MyCo-PL-Loan	MyCoLoan	01-01-01			Yes
2	MyCo-PL-Loan	MyCoLoan	01-01-01	Risk	High Risk	Yes
3	MyCo-PL-Loan	MyCoLoan	01-01-02	Risk	Low Risk	Yes
4	MyCo-PL-Loan	MyCoLoan	01-01-03			Yes
5	MyCo-PL-Loan	MyCoLoan	01-01-04			Blocked
6	MyCo-PL-	MyCoPL	01-01-01			Yes
7	MyCo-PL-	MyCoPL	01-01-05			Yes

Based on the image, given that Primary Page Class = MyCo-PL-Loan and Clipboard Value of Risk Property = "", which rule executes?

- A. 4
- B. 5
- C. None. An error is logged.
- D. 2

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 59

A chemical supplier processes thousands of online orders each day. The supplier provides a material safety data sheet (MSDS) for each of the 100+ cleaning products in stock. When buyers select an item to order, the application displays the MSDS. The MSDS rarely changes. Which of the following options ensures the MSDS is up to date when an order is created?

- A. Create a data page that contains the MSDS for each cleaning product.
- B. Create a parameterized data page that loads a new MSDS for each product.
- C. Configure a keyed data page that allows multiple pages for each key.
- D. Create a keyed data page with the MSDS for each cleaning product.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 60

A case type includes the following security requirement: After a transaction dispute enters the Review stage, only the customer or the case manager assigned to the dispute can cancel the dispute. Before the Review stage, the customer or the customer service representative who created the case can cancel the transaction dispute.

Which three types of rules are needed to configure the security requirement?

(Choose Three)

- A. Privilege
- B. Access control policy condition
- C. Access when
- D. Access control policy

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 61

Multiple development teams will be working in the same ruleset. What approach would you take to enable this requirement?

- A. Use circumstanced instances of a base ruleset.
- B. Use different ruleset versions.
- C. Use different branch rulesets.
- D. Use separate application rulesets for each team.

NEW QUESTION: 62

A requirement states that when an assignment is in review, its work status is set to Open-Review. Which two steps do you perform to implement this requirement?

(Choose Two)

- A. Create a field value rule for the Open-Review status.
- B. Apply the Open-Review status to the appropriate assignments.
- C. Add a data transform to the process to apply the Open-Review status before reaching the appropriate assignment.
- D. Add Open-Review as an allowed status on the case type rule.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 63

Which two components does the Application Packaging wizard prompt you to include when you generate an archive file?

(Choose Two)

- A. Checked-out rules
- B. Product rules
- C. Data instances
- D. Data types

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 64

You created a data transform to concatenate a user's first and last name values. You add the concatenate data transform to a flow action as a post-processing action. What occurs when the flow runs?

- A. The data transform runs after the flow action runs if the user enters data in the first and last name fields.
- B. The data transform runs after the user enters data in the first name and last name fields.
- C. The data transform runs every time the user performs the flow action run.
- D. The data transform runs before every flow action run.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 65

Which three of the following represent Pega Platform™ logging levels?

(Choose Three)

- A. Comment
- B. Fatal
- C. Trace
- D. Alert
- E. Warn

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 66

A client requests that you add a footer to the Case Manager portal. How do you satisfy this request?

- A. Change the section layout on the harness referenced on the portal record.
- B. Update the portal format in the skin applied to the portal.
- C. Update the portal type on the portal record.
- D. Configure a navigation record to describe the new portal format.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 67

Which of the following options can you use along with system alerts to determine if your application performance needs optimization?

- A. Performance Profiler
- B. Database Trace
- C. Performance Analyzer (PAL)
- D. Live UI tool

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 68

What is the purpose of the pyDefault data transform?

- A. To initialize property values when a case is created
- B. To set internal case properties, never override pyDefault
- C. To propagate property values from a parent to a subcase
- D. To use the superclass feature

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 69

Direct Capture of Objectives (DCO) aims to increase which two aspects of application delivery?

(Choose Two)

- A. Speed
- B. Performance

- C. Coding
- D. Accuracy

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 70

The purpose of a Circumstance Definition is to _____.

- A. define the values used in a circumstance
- B. define the values available to an end user in the application
- C. define the properties used in a circumstance
- D. define the list of all circumstance values for a rule

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 71

An application includes three case types. Members of the App: Users access role are not allowed to run reports for one of the case types. Which two configurations can you apply to satisfy this requirement?

(Choose Two)

- A. Use the Access Manager and set the Run reports action for the case type to No Access for the user role.
- B. Create an Access Deny record and set the Run reports action to No Access.
- C. Apply an Access When record to test for the user role to the Run reports action in the Access Manager
- D. Apply an Access When record to test the case type to the Run reports action in the Access Manager

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 72

What does the orange triangle in this screen indicate?

External Data Entities

The screenshot displays the 'External Data Entities' configuration in Pega. It shows two data types: 'Customer' and 'Exchange rate'. For 'Customer', the source system is 'Customer SOR' (green circle), the data page is 'Customer', and it is sourced by 'GetCustomerData' (green circle). For 'Exchange rate', the source system is 'ExchangeRates' (yellow triangle), the data page is 'Exchange rate list', and it is sourced by 'SimulateGetExchangeRates' (yellow triangle with a double arrow). A watermark 'freepdfdumps.com' and the PEGA logo are visible over the interface.

DATA TYPE	SOURCE SYSTEMS	DATA PAGE	SOURCED BY
Customer 1 data page	Customer SOR	Customer	GetCustomerData
Exchange rate 1 data page	ExchangeRates	Exchange rate list	SimulateGetExchangeRates

- A. The data page's connector is not properly configured
- B. The service returned an error
- C. The service could not be reached
- D. The data page source system is simulated

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 73

An applicant submits a loan request. The system validates information on the loan application and calculates the credit score of the applicant based on credit reports and the account history with the bank.

- If the credit score is unacceptable, the customer is notified of the result and the loan application is closed.
- If the credit is acceptable, the loan application is forwarded to a loan officer for review.
- If the loan officer approves the loan request, the loan application is sent to the underwriting department for processing.
- If the loan officer rejects the loan request, the customer is notified of the result and the loan application is closed.
- Select the case life cycle design that most closely follows the guidelines for identifying and naming stages for the use case.

A. Option C

B. Option B

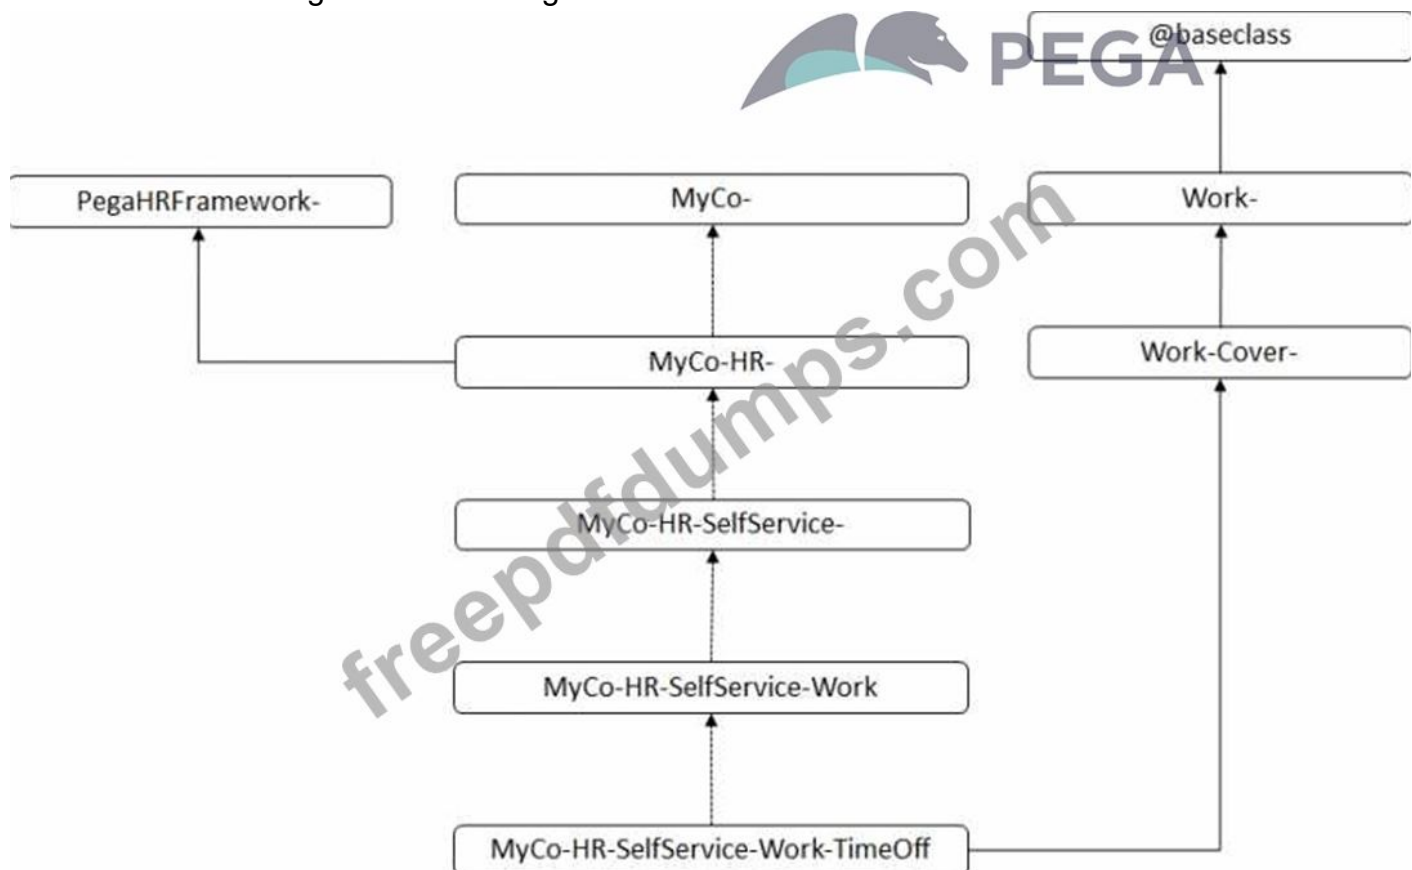

C. Option A

D. Option D

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 74

Consider the following inheritance diagram:

Which of the following classes is NOT in the inheritance path of MyCo-HR-SelfService-Work-TimeOff and therefore cannot contribute rules during rule resolution? (Choose One)

- A. MyCo-
- B. PegaHRFramework-
- C. None of the above
- D. @baseclass

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 75

Scenario: Your application has a top-level Purchase Request Case Type and a Purchaser Order child Case Type.

Drag the strategy options below into the correct boxes.

The screenshot shows a Pega configuration interface for case type locking strategies. It contains several text boxes for conditional logic and a list of strategy options at the bottom.

The Purchase request Case Type locking strategy options are Allow one user and Allow multiple users:

If the Case locking strategy is selected on the Purchase Request Case Type,

Case locking strategy options are unavailable on the Purchaser Order Case Type.

If both the Purchase Request and Purchase Order Cases are locked until a user submits or closes the Case, the locking strategy on the Purchase Request Case Type is set to and the

option on the Purchase Order Case Type is unchecked.

At the bottom, there are three strategy options in boxes:

- Allow other users to access parent Case when the child Case is opened
- Allow one user
- Allow multiple users

Answer:

Allow multiple users

Allow one user

Allow other users to access parent case when the child case is opened

NEW QUESTION: 76

Use _____ to use conditional logic to determine which data should be propagated.

- A. a data transform
- B. the property mapper
- C. a decision tree
- D. a data page

NEW QUESTION: 77

Select two benefits of using Global Resource Settings.

(Choose Two)

Response:

- A. Global Resource Settings allow you to manage settings in one place.
- B. Global Resource Settings allow you to define settings for all your different environments in one location.
- C. Global Resource Settings improves the performance for integration with the external system.
- D. Global Resource Settings allow you to manage settings without needing to unlock rulesets.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 78

A help desk ticket case type is defined as follows:

If the Process ticket step is configured to set the status to Pending-Triage, when is the status of the case set to Pending-Triage?

- A. When the Triage stage completes
- B. When the Process ticket step completes
- C. When Verify solution step starts
- D. When the Process ticket step starts

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 79

Which answer best describes the benefit of using screen flows?

- A. Screen flows provide a way to add an assignment to a process that is preconfigured with one or more actions a user can take.

- B.** Screen flows provide an easy way to add a step to a process that is preconfigured with functionality, such as sending an email or creating a case.
- C.** Screen flows help you organize separate tasks into steps so you can control how, when, and by whom work is performed for each step.
- D.** Screen flows help a single user complete complex tasks by presenting multiple screens in a logical sequence.

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 80

In which scenario would a Declare OnChange rule be appropriate?

- A.** When a user updates their address, the active case is suspended until the address can be confirmed.
- B.** When a manager approves a case, the case is routed back to the appropriate case worker.
- C.** When a developer changes a view, the change is checked into a development branch.
- D.** During a nightly backup process, only updated fields are backed up.

Answer: **A** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 81

You are implementing a UI form collecting job applicant information. Users must provide values to certain fields before submitting the form. Which configuration adds asterisks to indicate the mandatory fields on the form?

- A.** Configure the mandatory fields as Required in the section rule
- B.** Use multiple Validate rules for each mandatory field
- C.** Use an Edit Validate rule to verify if each of the mandatory properties has a value
- D.** Use a Validate rule to verify the mandatory fields have a value

Answer: **A** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 82

You have a requirement to create an email correspondence that can be reused by other applications. In which two layers of the Enterprise Class Structure could you apply the email correspondence rule?

(Choose Two)

- A.** Organization
- B.** Division
- C.** Implementation
- D.** Framework

Answer: **A,B** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 83

Which statement about managing encrypted data in Pega Platform is true?

- A.** Property-level encryption is a time-efficient method to encrypt data.

- B. Encryption policies apply to Work- and Data- classes only.
- C. Filter conditions cannot reference encrypted properties in reports.
- D. Each organization uses a custom key to encrypt its data.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 84

What effect does the Use all workbasket assignments in user's work group option have on how workbaskets are searched when using the Get Next Work functionality?

- A. The workbaskets associated with the user are checked first. If no assignments are found in the user's workbaskets, the user's worklist is checked.
- B. This option organizes all assignments in all of the workbaskets the user is associated with into a single list before the list is filtered and sorted.
- C. When a user clicks the Next Assignment link, the system checks the user's worklist. If assignments are available in the user's worklist, the assignments are filtered and sorted.
- D. This option limits the workbasket search to only those workbaskets defined in the user's work group.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 85

The page .Product contains data retrieved from an external system of record using a data page. How do you ensure .Product always contains the most current data from the data page?

- A. Select Refer to a data page on .Product.
- B. Select Copy data from a data page on .Product.
- C. Define a reference property that refers to the data page.
- D. Configure .Product to refer to a keyed data page.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 86

Select three best practices when developing activities.

(Choose Three)

- A. Only use activities to support queue processing and interfaces
- B. Keep activities short. Limit your activities to fewer than 25 steps.
- C. Limit customer Java steps whenever possible.
- D. Limit activity calls to 3 or less to prevent performance problems.
- E. Limit use of activities. Use alternative rule types such as data transforms when possible.

Answer: B,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 87

A requirement states that you must add a control that shows a list of book titles. The titles change on a daily basis. The book records are maintained on a database. The control must show the

most current information. The organization schedules updates to the application on a weekly basis.

Which of the following configurations would you use?

- A.** Add a drop-down control and source the list using the property that identifies the items in the list.
- B.** Add a drop-down control and source the list using a data page.
- C.** Add a radio button control that identifies each employee with a button.
- D.** Add a drop-down control and use a list of items in the control's property

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 88

You want to write all errors detected when loading a data page to a log file. How would you do that?

- A.** Use the error handling flow.
- B.** Use an existing function in the error handling data transform.
- C.** Invoke the error handler from the post processing activity in a data page.
- D.** Use a transition condition.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 89

Consider the following partial requirement for configuring the Get Next Work functionality in Pega: All workbaskets with which a user is associated must be checked first. Then, all eligible assignments from all workbaskets must be consolidated into a single list before being filtered and sorted.

Which two options must you select in the Operator ID record to implement this part of the requirement?

(Choose Two)

- A.** Merge workbaskets
- B.** Operator is available to receive work
- C.** Use all workbasket assignments in the user's work group
- D.** Get from workbaskets first

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 90

Which of the following requirements satisfy the inheritance of permissions from parent class?

- A.** Auditors must have read only access to cases in the Work-Claims-VehicleDamage and Work-Claims-BodilyInjury classes.
- B.** Managers can edit cases in Work-Claims-VehicleDamage but not in Work-Claims-BodilyInjury classes.
- C.** Users can modify cases in Work-Claims-BodilyInjury but not in Work-Claims-VehicleDamage.
- D.** Users can create cases in Work-Claims-BodilyInjury but not in Work-Claims-VehicleDamage.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 91

A branch ruleset is a ruleset that _____.

(Choose Two)

- A.** Prevents developers from seeing work of all team members
- B.** Is based off of another ruleset
- C.** Contains rules that are not in active development
- D.** Is designed for large projects

NEW QUESTION: 92

The [_____] appender records system events such as errors, while the [_____] appender records events that affect performance.

Solution:

PEGA

ALERT

Determine whether the given solution is correct?

Response:

- A.** Correct
- B.** Incorrect

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 93

Team A and Team B are developing features for an insurance application. Team A is assigned a user story to improve the user experience when users enter personal and bank account details. Team B is assigned to build a declare expression to calculate the total premium amount. Both teams used branches for development.

What step does each team need to take before merging their changes to the main application?

- A.** Both teams must resolve conflicts that the system detects between their branch and the application.

B. Neither team is required to resolve any conflicts and can directly merge the changes to the main application.

C. Only team A should resolve conflicts and team B can directly merge changes to the main application.

D. Only Team B should resolve conflicts, and Team A can directly merge changes to the main application.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 94

A Fulfillment report needs to list the user ID of the employee who packages the items to ship in an Order case. The report provides information from the MyCo-Orders-Work-Ship and Data-Admin-Operator-ID classes.

Which two options independently satisfy the report requirements?

(Choose Two)

A. Configure a class join on the Fulfillment report definition to join operator information to each case.

B. Specify both classes on the Pages & Classes tab on the Fulfillment report definition.

C. Use an association rule to join operator information to each case to populate the Fulfillment report.

D. Add the user ID to the Fulfillment report definition as a parameter.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 95

Which two of the following are prerequisites for creating a branch rule for parallel development?

(Choose Two)

A. Save a copy of the original rule into the base ruleset.

B. Create an access group that references the team application. Add developers to the access group.

C. Circumstance the original rule.

D. Create a team application.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 96

The business is switching its application branding to use a warmer color scheme and to include responsive behavior to the user interface. Which two of the following rules must be modified to implement this change?

(Choose Two)

A. Flow action rule

B. Skin rule

C. Application rule

D. Section rule

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 97

How do you configure the field to support this requirement?

- A. Set the minimum and maximum values to "10" in a text field.
- B. Use an edit validate rule that validates the tax identification number pattern.
- C. Use a decimal property type and make the field required.
- D. Configure a validate rule to test the tax identification number pattern.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 98

In a new hire process, a hiring manager needs to be automatically notified, by email, when a job application case reaches a Collect Work Sample assignment. How would you configure this correspondence requirement?

- A. After the assignment, add a SendEmail SmartShape.
- B. Add a notification to the assignment.
- C. Add a SendCorrespondence local action to the assignment.
- D. Add a CorrNew notification to the assignment.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 99

An application recommends mobile phone plans to customers. Which type of rule predicts the customer response to an offer based on existing data?

- A. When
- B. Map Value
- C. Analytical Model
- D. Predictive model

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 100

A data page is used to retrieve data from an external system. If an error occurs, you want to display a message to the user and send an email to the system administrator. How do you implement this requirement?

- A. Configure an error handling process that displays the error message and sends an email.
- B. Create a custom error handler flow that displays the error message and sends an email.
- C. Invoke the connector from an activity and use standard Obj- methods to add an error message end send an email.
- D. Create an error handler data transform that adds an error message to the data page and sends an email.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 101

The keyword Primary is a prefix to the value in the current case. You have added weighted conditions to duplicate case search in a case type. How do you configure the condition fields to differentiate between fields on the current case and fields on the existing case?

- A. Suffix the keyword Primary to the value used in the current case.
- B. Prefix the keyword Primary to the value used in the current case.
- C. Prefix the keyword Primary to the value used in the existing case
- D. Suffix the keyword Primary to the value used in the existing case

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 102

Which two statements are valid regarding Pega Web Mashups?

(Choose Two)

- A. A user can view their worklist in an external portal and select items to take action on.
- B. A mashup can allow access to Dev Studio for full system configuration.
- C. Pega Platform limits a mashup to working on existing cases.
- D. A mashup display starts by calling either a flow or a harness from a Pega application.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 103

Which component is used to choose between two decision logic paths in a decision strategy?

- A. Filter
- B. Switch
- C. Adaptive Model
- D. Set Property

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 107

You are preparing to migrate an application to the User Acceptance Testing environment. What three actions should you perform before you create the archive file?

(Choose Three)

- A. Create the product rule in a production ruleset.
- B. Lock production rulesets.
- C. Associate data instances with an application ruleset.
- D. Merge branched rulesets.
- E. Check in rules in the application ruleset.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 108

Which two steps do you perform to update the logo in a portal header?

(Choose Two)

- A. Reference the image in the portal skin.
- B. Update the portal header to reference the new image.
- C. Reference the image in the application record.
- D. Upload the new image to a binary file record.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 109

Choose two scenarios that you configure using procedural processing.

(Choose Two)

- A. A restaurant reservation page in which the user chooses a reservation time and the system returns the number of available tables.
- B. A flight booking page where customers can adjust the location and date of the departure and return flights. The ticket prices recalculate after the customer chooses the "recalculate price" option.
- C. A purchase order request page with a summary of items. The order total price updates after the customer changes a quantity.
- D. A prescription order page with a list of available prescriptions sent from the customer's health care provider. When the user opts to fill one or more prescriptions, the cost summary updates.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 110

You want to create a new minor version of an application ruleset to add a new feature to your application. The new feature will be made available to users in a phased rollout. How do you update the application to add the new ruleset version?

- A. Create a new application version and add the new ruleset version as a production ruleset.
- B. Lock and roll the existing ruleset, and create a new application version.
- C. Create a branch ruleset and a new application, and add the branch ruleset to the application.
- D. Lock and roll the existing ruleset, and update the existing application version.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 111

You have a connector that creates a new customer record in an external system. Where do you invoke the connector from?

- A. Flow action
- B. Data page
- C. Activity
- D. Integrator shape in a flow

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 112

What are two outputs of the Static Assembler?

(Choose Two)

- A. Number of rules cached
- B. The application version.
- C. The name of the application
- D. Number of rules assembled

- E. A log file
- F. The access group of the application

Answer: D,E ([LEAVE A REPLY](#))

NEW QUESTION: 113

Your application requires a cascading approval for expense reports. Approvals must follow the submitter's reporting structure, with the following thresholds.

A manager must approve expense reports up to USD500. A director must approve expense reports up to USD1500. A vice president must approve expense reports of USD1500 or greater.

How do you configure the approval process?

- A. Select the reporting structure configuration, then select All levels.
- B. Select the reporting structure configuration with custom levels, then configure a decision table to determine the number of levels.
- C. Select the reporting structure configuration with custom levels, then configure when rules to determine the number of levels.
- D. Select the authority matrix configuration option.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 114

For what reason would you configure an Access Deny record?

- A. To explicitly prevent users from deleting cases to satisfy a company policy.
- B. To prevent users from performing a specific flow action.
- C. To prevent users from updating cases during a particular stage of the case life cycle.
- D. To prevent users from deleting attachments to a case.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 115

You are requested to configure a Service level agreement which has the following expected configurations:

Time delay: 2 hours

Goal: 5 hours + 25 urgency

Deadline: 2 hours + 10 urgency

Past deadline: 1 hour + 5 urgency and 6 per event

Which is the urgency when have passed 6.5 hours if the initial urgency is set to 20 and assignment is reached at 9:00am?

- A. 80
- B. 75
- C. 95
- D. 85

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 116

What approach do you take to simplify the process of migrating data instances from one environment to another environment?

- A. Associate each data instance with an application ruleset.
- B. Use the Include data types setting in the Product rule.
- C. In the Application Packaging wizard, select the instances you want to include in the Data Instances to Include step.
- D. Save the data instances to an application ruleset.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 117

In the Answer Area, drag each mobile application solution on the left to the correct scenario.

Mobile Application Solution	Scenario
SDK Applicatio	Globobank wants to build a mobile app of its Pega Platform application to embed in its mobile app.
Signed Application	Metrobank wants to build a mobile app for distribution on Android and iOS app stores.
Unsigned application	Localbank wants to build a mobile app for a Pega Platform application, but developer certificates cannot be distributed to app developers.

Answer:

Mobile Application Solution	Scenario
SDK Applicatio	SDK Applicatio
Signed Application	Signed Application
Unsigned application	Unsigned application

NEW QUESTION: 118

A global application with infrastructure nodes located throughout the world requires certain operations to start executing at midnight GMT. Select two possible designs for this use case. (Choose Two)

- A. Use the Queue-For-Processing method in an activity and design a dedicated queue processor.
- B. Use the Run in background step in the case life cycle and design a dedicated queue processor.
- C. Use the Run in background step in the case life cycle and design a standard queue processor.
- D. Use the Queue-For-Processing method in an activity and design a standard queue processor.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 119

Identify the log you examine to view warnings, errors, and information messages about internal operations.

- A. Services-PAL
- B. Alert log
- C. Pega log
- D. BIX log

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 120

Consider two classes in an Employee Human Resources application: an "Employee" class, and a "TimeOff" class. The TimeOff class has an "EmployeeID" column that points to records in the Employee class. An "Employees with No TimeOff" report must be created. What is the most likely approach?

- A. Create a report in the Employee class, with a class join to the TimeOff class
- B. Create reports in both classes, and set the TimeOff report as a subreport of the Employee report
- C. Create a report in the TimeOff class, with a class join to the Employee class
- D. Create reports in both classes, and set the Employee report as a subreport of the TimeOff report

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 121

You are asked to create a custom status named Open-Review. This status is to be applied to assignments in one application. How do you satisfy the request?

- A. Circumstance the existing Open Field Value record on the application name and update the status value to Open-Review.
- B. Create a Field Value record named Open-Review for .pyStatusWork and configure an Access When record to apply the status to the correct application.
- C. Add the Open-Review status to the Application record for the application.
- D. Create a Field Value record named Open-Review for .pyStatusWork with the Apply To class set to the class group.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 122

A form listing nearby restaurants has four columns:

- Restaurant name
- Restaurant location
- Thumbnail image of the seating area
- Make reservation (check box)

You want to ensure that users have the information they need to make a reservation regardless of screen size. When viewed on a small screen, you do not need to display the images.

What three configuration steps do you take to support this requirement?

(Choose Three)

- A. Set the importance of the Restaurant name column to Primary.
- B. Set the importance of the image column to Secondary.
- C. Set the importance of the Restaurant location and Make reservation columns to Secondary.
- D. Set the importance of the Restaurant name and Make reservation columns to Primary.
- E. Set the importance of the Make reservation column to Primary.
- F. Set the importance of the image column to Other.

NEW QUESTION: 123

In which of the following situations would you use a data transform?

(Choose Two)

- A. Execute a flow action
- B. Copy data between pages
- C. Create properties after the case has been created
- D. Set default values when creating a case

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 124

Which two types of issues are identified by using Pega Platform alerts?

(Choose Two)

- A. Functional
- B. Performance
- C. Security
- D. Configuration

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 125

Pega provides a feature to upload attachments out-of-the box. Which attachment feature must be configured by a system architect?

- A. The steps in which attachments are allowed
- B. The attachment rule set
- C. User access to attachments and document security
- D. The uploaded attachments are read-only

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 126

Which two approaches reduce the possibility of rule caching causing performance issues in your application?

(Choose Two)

- A. Remove branch rulesets in your production system.
- B. Only allow rule checkout for operators who need to work in checked out rules.
- C. Classify the nodes in your system.
- D. Add a ruleset to multiple application records.
- E. Create multiple access groups.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 127

You want to display an error message to the user if the data page fails to retrieve data. The data page is sourced by a REST connector. How do you detect the error?

- A. Use a transition condition in the activity step invoking the connector.
- B. Use the error handler flow on the connector.
- C. Use a when condition in the response data transform configured for the connector.
- D. Apply the standard `pxErrorHandlingTemplate` data transform in the response data transform.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 128

You are preparing to create a new major version of an application ruleset in which there are multiple minor and patch versions. How do you create the new ruleset version?

- A. Create a new application ruleset using the appropriate version number, then copy the highest version of existing rules into the new ruleset version.
- B. Use the Ruleset Maintenance wizard to skim the relevant ruleset versions to copy the highest version of existing rules to the new ruleset version.
- C. Use the Application Structure landing page to lock and roll the existing ruleset versions to the new version.
- D. Use the Ruleset Maintenance wizard to merge the existing rules in the relevant ruleset versions to the new version.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 129

Creating [] to run [] automatically when the value of [] changes, is a form of [].

Solution:

Creating [automatic forward chaining] to run [a specified property] automatically when the value of [an activity] changes, is a form of [Declare OnChange rules].

Determine whether the given solution is correct?

A. Incorrect

B. Correct

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 130

An assignment service-level agreement (SLA) is configured with the following details:

- Initial urgency: 15
 - Assignment ready: Timed delay of 2 hours
 - Goal: 1 hour and increase urgency by 10
 - Deadline: 2 hours and increase urgency by 15
 - Passed deadline: 1 hour, increase urgency by 10, and limit events to 10
- Assuming no other urgency adjustments, what is the assignment urgency 4.5 hours after the case reaches the assignment?

A. 25

B. 60

C. 40

D. 50

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 131

Consider the following table where a correspondence is circumstanced based on country.

Version	Circumstance
01-01-01	None
01-01-01	.Country = CAN
01-01-10	.Country = USA
01-01-15	None
01-01-20	.Country = USA
01-01-30	.Country = USA, Withdrawn
01-01-30	.Country = CAN

If .Country=USA, which version of the correspondence will run?

- A. 01-01-2020
- B. 01-01-2010
- C. 01-01-2015
- D. 01-01-1930

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 132

An order fulfillment process includes a request for quotes from multiple shippers. You want the system to automatically call a quote request subprocess for each vendor. How would you configure your process?

- A. Add a Subprocess shape for the request subprocess and specify the Spinoff option.
- B. Add a Split Join shape and run the request subprocess for each vendor on a page list.
- C. Add a Split For Each step to the case lifecycle and run the subprocess for each vendor on a page list.
- D. Add a Split For Each shape and run the request subprocess for each vendor on a page list.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 133

In which two situations do you configure local data storage?

(Choose Two)

- A. Storing reference data as part of the application
- B. Defining valid values for a property
- C. Saving case data in an application
- D. Caching data retrieved from an external system

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 134

Teams X and Y work on different enhancements in the same ruleset. The release date for each enhancement is uncertain. Which two options allow each team to keep its work separate?

- A. Create a branch ruleset for each team.
- B. Create access groups for each of the teams.
- C. Create a new ruleset version for one of the teams.
- D. Apply privileges to the rules each team configures.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 135

How do you ensure that each user sees the appropriate logo in their portal?

- A. Specialize the portal header in the division layer of the Enterprise Class Structure (ECS).
- B. Circumstance the portal harness on the user's division.
- C. Add a when condition to the portal record to determine which image to display.
- D. Reference the appropriate image on the user's Operator ID record.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 136

Applicants must attach four different files to their passport application: a PDF of a completed application form, a scan of a birth certificate or social security card, a scan of a valid photographic identification, and a scan of a recent photograph.

One file of each type must be attached to advance the case to an agent for review and approval.

An authorized passport agent can review all attachments only.

How many attachment categories do you create to satisfy this requirement?

- A. Four attachment categories, one for each file type
- B. Two attachment categories, one for application form PDFs and one for scanned documents.
- C. One attachment category for all passport application-related files
- D. None, you can use the out-of-the-box PDF and Scanned document attachment categories

Which type of record identifies the application that a user opens when logging in to Designer Studio?

- A. Operator ID
- B. Application
- C. Access group
- D. Case Type

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 138

Which of the following statements is true about the relationship between base rules and circumstanced rules?

- A. A new circumstanced rule always gets created in next higher ruleset version.
- B. A base rule is created by removing circumstancing condition from a rule.
- C. A base rule is needed as a backup if a circumstanced rule gets deleted.
- D. The name of circumstanced rule remains same as the base rule.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 139

An application contains a rule with an Apply to: class of TGB-HRApps- Work- Expenses. When updating the application, you want to change the Apply to: class of the rule to TGB. How do you prevent the application from using the rule in TGBHRApps- Work-Expenses!

- A. Set the availability of the rule in TGB-HRApps-Work-Expenses to "Blocked."
- B. Set the availability of the rule in TGB-HRApps-Work-Expenses to "Not Available."
- C. Set the availability of the rule in TGB to "Final."
- D. Set the availability of the rule in TGB-HRApps-Work-Expenses to "Withdrawn."

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 140

In a prepare job offer process, you configured a Split For Each shape. The shape runs a compensation approval subprocess to a list containing four managers. The prepare job offer process resumes as soon as one manager completes the approval process.

Which join condition in the Split For Each shape supports this requirement?

- A. An Iterate join condition
- B. An Any join condition
- C. A Some join condition
- D. An All join condition

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 141

You use the Application Import wizard to import an archive file on a destination system. When does the destination system begin executing the imported rules?

- A. Users can start executing rules as soon as the rules are imported.
- B. Pega Platform ensures that an entire ruleset is imported before the rules in it start executing.

C. Users can start executing the new rules the next time they log in regardless of whether the import is complete or not.

D. Pega Platform ensures that the entire ZIP file is imported before users can execute the imported rules.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 142

On mobile devices, a form defined with dynamic layouts forces horizontal scrolling. Where do you configure the responsive behavior to address this issue?

A. In the harness

B. In the application skin

C. In the section holding the dynamic layouts

D. In the portal

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 143

Use the _____ keyword to reference a parameter in the same rule in which the parameter is defined.

A. Local

B. THIS

C. Param

D. Parent

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 144

An application contains a flow action with an Apply to: class of TGB-HRApps-Work-TimeOff.

When updating the application, you have a requirement to move the flow action to TGB-HRApps-Work so it can be used by more than one case type.

How do you prevent the application from using the rule in TGB-HRApps-Work- TimeOff?

A. Set the availability of the flow action in TGB-HRApps-Work-TimeOff to "Not available".

B. Set the availability of the flow action in TGB-HRApps-Work-TimeOff to "Withdrawn".

C. Set the availability of the flow action in TGB-HRApps-Work-TimeOff to "Blocked".

D. Set the availability of the flow action in TGB-HRApps-Work to "Final".

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 145

Select two benefits of using Application Settings.

(Choose Two)

A. Application Settings allow you to manage settings throughout the application's page views and channel interfaces.

B. Application Settings affords greater flexibility for changing values between environments when working with external systems.

C. Application Settings improves the performance for integration with the external system.

D. Application Settings allows you to define settings for your different environments in one location.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 146

Log files capture notification of [_____]. Each log is managed by an [_____]. To download a log file, you need [_____] credentials for the application server that hosts Pega Platform.

Solution:

- appender
- administrative
- events

Determine whether the given solution is correct?

Response:

A. Correct

B. Incorrect

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 147

Consider the following table where a correspondence is circumstanced based on country.

Version	Circumstance
01-01-01	None
01-01-01	.Country = CAN
01-01-10	.Country = USA
01-01-15	None
01-01-20	.Country = USA
01-01-30	.Country = USA, Withdrawn
01-01-30	.Country = CAN

If .Country=USA, which version of the correspondence will run? Response:

A. 01-01-15

B. 01-01-30

C. 01-01-10

D. 01-01-20

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 148

You need to update the navigation menu in a portal. Which tool do you use to identify the rule that contains the menu?

- A. Live UI
- B. The Tracer
- C. The System Management Application (SMA)

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 153

Your team is building an application for a contact center that handles a variety of customer requests. Business policies require that each customer interaction be conducted with the most appropriate next available Customer Service Representative (CSR).

What is the best way to implement this requirement?

- A. Use a ToWorklist router and Pega's Get Next Work functionality
- B. Use a To Leveled Group router and Pega's Get Next Work functionality
- C. Use a To Work basket router and Pega's Get Next Work functionality
- D. Use a ToWorkGroup router and Pega's Get Next Work functionality

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 154

A business process requirement states that users should be able to modify the shipping address at any time and not interrupt the primary case. Which of the following options is the best way to design for this requirement?

- A. Add a process in a stage.
- B. Add a step in a process.
- C. Add an optional process to any stage in the case type.
- D. Add a local action to the case type.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 155

An agent is configured to run at a 600-second interval with a maximum number of entries set to 50. There are 75 entries in the scheduled queue. If the agent runs at 2:30 P.M., when does the agent run again?

- A. One hour after the last run because the master agent runs only once per hour
- B. 600 seconds after the last run started

- C. Depends on the number of nodes in the cluster
- D. 600 seconds after the agent activity processes 50 entries

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 156

An insurance application contains a top-level case type named Auto Claim and a Damage Appraisal child case. The company has determined that only one user may open and work on a case at one time. However, users working on damage appraisals should not lock out users working on the parent Auto Claim case.

Which two configurations satisfy this requirement?

(Choose Two)

- A. Select Default locking on the Auto Claim case type.
- B. Select Do not lock the parent case when the child case is open on the Auto Claim case type.
- C. Select Optimistic locking on Damage Appraisal.
- D. Select Do not lock the parent case when the child case is open on the Damage Appraisal case type.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 157

The business process for an automobile insurance claim consists of the following phases: According to Pega best practices, which phase can you implement as a child case?

- A. Review
- B. Repair
- C. Submission
- D. Verification

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 158

A client wants to replace the Pega logo in the Case Manager and Case Worker portals. Instead of using the company logo, the client wants you to use the logos for each of the company's operating subsidiaries - a user in the ABC subsidiary sees the logo for ABC, and a user in the XYZ subsidiary sees the XYZ logo.

How do you add the logos to the application?

- A. Upload each logo to a unique section.
- B. Upload each logo to the portal record.
- C. Upload each logo to a unique binary file record.
- D. Reference each logo in a skin.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 159

You are designing a travel plan application. A hotel booking step displays a form in which users select a hotel and enter the number of days they are staying at the hotel. The form displays the total cost for the hotel room.

The form also includes fields for selecting, at extra cost, options for valet parking. The cost for any selected options are totaled and then added to the total cost for the room to equal the grand total, which is displayed in a field.

Which two of the following properties would you use as the target properties?

(Choose Two)

- A. Total cost for the hotel room
- B. Price of each option
- C. Total cost of options
- D. Number of days at the hotel

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 160

In a flow, an integrator shape calls a connector that writes data to a system of record. The system of record is not currently available. How do you simulate the service call invoked from the integrator shape?

- A. Create a simulation activity for the connector.
- B. Simulate the data page using a data transform.
- C. Configure global resource settings for the connector.
- D. Leave the flow in draft mode and simulate integration values in a data transform.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 161

In the event-action model of dynamic UI, which of the following statements is correct regarding event processing?

- A. A control always has one or more action sets.
- B. Actions attached to an event execute in random order.
- C. An action can be performed for only one event per control.
- D. An event can be configured to perform multiple actions.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 162

Which of the following options is a reason to have a Declare OnChange rule suspend all processing on a work item?

- A. To replace a declare expression.
- B. To test that the Tracer returns a result.
- C. When an unexpected business exception occurs.
- D. When you have performance issues.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 163

You want to allow users to use an application on a mobile device, even if the device is not connected to a network. Which configuration option supports this requirement?

- A. Configure properties to copy data from data pages.
- B. Simulate external data sources when the application is offline.
- C. Source drop-down lists and repeating layouts using data pages.
- D. Configure UI elements to use native controls on mobile devices.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 164

Which performance tool do you run to determine the specific step executed by your requestor session that is causing a problem?

- A. The Performance Analyzer (PAL)
- B. The Database Trace tool
- C. The PegaRULES Log Analyzer (PLA)
- D. The Performance Profiler tool

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 165

Data transforms are often used prior to and after invoking the connector. What is the purpose of the data transforms?

- A. Map data to the application data structure
- B. Set authentication data for the request
- C. Invoke parse rules on the connector response
- D. Map data from the protocol-specific response format

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 166

The risk premium for a property insurance quote is based upon the location, size, and age of a house. Which two types of decision rules are best suited to configuring this decision?

(Choose Two)

- A. Strategy
- B. Decision tree
- C. When
- D. Decision Table

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 167

You want operators in two separate units to be able to perform work routed to either unit. Which configuration supports this requirement?

- A. On each operator's record, associate the operator with both units.
- B. On each unit record, associate both operators with each unit.
- C. On the work group record, associate the operators with the work group.
- D. On each operator's record, associate the operator with the same work group.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 168

What two artifacts must you prepare before delegating a rule?

(Choose Two)

- A. An unlocked ruleset that is added to the Production ruleset list of the Application rule
- B. An Access Role that has access to the ruleset used to organize delegated rules
- C. A locked ruleset that is added to the Production ruleset list of the Application rule
- D. An Access Group that has access to the ruleset used to organize delegated rules

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 169

Which record do you configure to add an item to the left-pane menu in the Case Manager portal?

- A. Harness record
- B. Portal record
- C. Navigation record
- D. Skin record

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 170

Which two configurations can you use to include access groups into your Product rule?

(Choose Two)

- A. Export the access groups using the Access Manager.
- B. Add the access groups to the application record.
- C. Add the access group to the Product record in the Individual instances to include section.
- D. Associate the access groups with a ruleset included in the application.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 171

You want to configure a Pega Web Mashup gadget to use the value of an element from the host page as the value of a gadget attribute or an action parameter. Which of the following options is the correct syntax?

- A. data-pegas-parameters="{Customer:'[page/id/Account]'}" where the Document Object Model (DOM) element is named "Account"
- B. [gadget/gadgetName/property] where gadgetName is the name of the mashup, and property is the name of a property that is used in a Pega application
- C. [page/function/token] where token is a string that has meaning to the function
- D. data-pegas-parameters="{Customer:'[page/id/Account]', Level:'gold'}"

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 172

A requirement states: The tax identification number must contain 10 digits. How do you configure the field to support this requirement?

- A. Use an edit validate rule that validates the tax identification number pattern.
- B. Set the minimum and maximum values to "10" in a text field.
- C. Use a decimal property type and make the field required.
- D. Configure a validate rule to test the tax identification number pattern.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 173

Business users are not able to update a delegated business rule. Select two possible causes. (Choose Two)

- A. The availability of the delegated business rule is set to Blocked.
- B. The delegated business rule is not in an unlocked production ruleset.
- C. The delegated business rule is currently being executed by another user.
- D. The business users do not have appropriate privileges in the access group.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 174

An organization uses a common process to address account inquiries from customers. Each division maintains its own workbaskets for processing account inquiries.

Select the configuration that standardizes the process while ensuring that users in each division only see assignments appropriate to their division.

- A. Pass the workbasket name as a property reference using values on a data page.
- B. Use a skill-based router to route assignments to users in the appropriate division.
- C. Use a load-balanced router to route assignments to the appropriate division.
- D. Circumstance the flow based on the operator division to route assignments.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 175

The customer, a medium size toy maker, wants to fulfill orders received during the peak season in December and process them in batches multiple times a day. How do you implement this use case?

- A. Create batches of orders and send each batch for processing when it gets full.
- B. Create scheduled jobs, one for each run, that can process accumulated orders.
- C. Create one scheduled job and select its run schedule as multiple times a day.
- D. Create a queue processor that can process orders received by the company.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 176

When users select the model of their vehicle, the application displays the specifications for the model. There are hundreds of vehicle model requests per day and the vehicle model information is only updated once a month.

Which is the best implementation for this use case?

- A. Configure a keyed data page that allows multiple pages per key.
- B. Create a vehicle information data page for each vehicle model.
- C. Create a parameterized vehicle information data page which loads the desired vehicle information.
- D. Create a keyed data page with vehicle information.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 177

Management reports that have an unacceptably large number of cases are incorrectly identified as duplicate cases. Which two approaches could you use to modify the duplicate case search process so that it produces fewer invalid duplicates?

(Choose Two)

- A. Adjust the threshold value.
- B. Adjust the condition weights.
- C. Add a Persist Case step after the Duplicate Search step.
- D. Do not use a must match condition.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 178

Several development teams work on different enhancements. The release date for each enhancement is uncertain. Which two options allow each team to keep its work separate?

(Choose Two)

- A. Create a new application for each team.
- B. Create a production ruleset for each team.

- C. Create a new ruleset version for each team.
- D. Set up a branch ruleset for each team.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 179

Which two of the following situations require an activity?

(Choose Two)

- A. Call a connector from a data page
- B. Call a connector from a flow
- C. Simulate a data page
- D. Simulate a connector

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 180

Which variable in the assignment urgency calculation allows a user to increment the service level urgency on a case-by-case basis?

- A. .pxUrgencyWork.
- B. .pxUrgencyAssignSLA.
- C. .pyUrgencyAssignAdjust.
- D. .pxUrgencyAssign

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 181

Which two situations would you choose to use a Pega API rather than a custom API?

(Choose Two)

- A. As a member of a golf course maintenance crew, you want to be able to submit maintenance reports and view their status.
- B. As a financial auditor, you need an external system to notify a Pega Platform application that a specific event in a child case has occurred.
- C. As the manager of a golf course, you need to be able to access specific player score details from a Pega Platform application, perform calculations on that data, and then send newly created data to an external system of record.
- D. As an orchestra director using a mobile rehearsal time and note logging app, you want to view a list of your musicians' time logs.

NEW QUESTION: 182

A requirement states: When a business guest checks out of a hotel, the guest must complete a hotel review to receive a corporate discount. Select the case type relationship that satisfies the requirement.

- A. Configure hotel review as a child case of the checkout request.
- B. Configure both checkout request and hotel review as top-level cases.
- C. Configure hotel review as a spin-off case of the checkout request.
- D. Configure checkout request as a child case of hotel review.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 183

You are creating the assets for a generalized, reusable application. In which layer of the Enterprise Class Structure (ECS) do you create the assets?

- A. Framework layer
- B. Pega Platform layer
- C. Division layer
- D. Implementation layer

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 184

Which performance tool would you use to collect performance data for individual steps in a data transform?

- A. Clipboard
- B. Performance Profiler
- C. Database Trace
- D. Performance Analyzer (PAL)

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 185

Consider the following user story:

As a loan officer, I want to be able to automatically accept the next available application for review so I can complete the next highest priority case. How do you implement this user story?

- A. Use a ToWorkbasket router and Pega's Get Next Work functionality.
- B. Use a ToDecisionTree router and the GetNextWorkCriteria decision tree.
- C. Use a ToLeveledGroup router and Pega's Get Next Work functionality.
- D. Use a ToWorklist router and the GetNextWorkCriteria decision tree.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 186

Adding instructions to a step _____.

- A. Describes to an end user what should be done in the step.
- B. Instructs an architect how to build the step.
- C. Defines what the step should do.
- D. Describes the business value of the step.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 187

Which situation should you address with a rule circumstance?

- A. A process does not execute if a user is not married.
- B. An online order process optionally allows customers to update the credit card number saved with their account.
- C. A national insurance company requires a different minimum for liability coverage in each state.
- D. A service level notifies the assigned user when a goal interval is exceeded, and notifies the user's manager when a deadline interval is exceeded.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 188

Which configuration controls the access to an attachment category?

- A. Configure the privilege DeleteOwn, and then assign it to a user so that a user can delete their own attachments.
- B. Configure client-based access control on the class where the attachment exists to restrict access to the attachment.
- C. Configure a visible when rule, IsDocumentPrivate to allow users to view an attachment if the rule returns as false.
- D. Configure a when rule to allow users to delete an attachment if the rule returns as false.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 189

Which statement demonstrates a well-written specification?

- A. Reduce time needed for time-off approvals from three weeks to one.
- B. User passwords shall be encrypted using AES-256 encryption.
- C. If the complainant type is "Provider," then provider information must be populated during the Triage Stage in the Basic Research Step.
- D. The product catalog should be easy to navigate.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 190

Which two options do you consider when creating a pre-processing data transform?

(Choose Two)

- A. The effect if the flow action is reloaded
- B. The timing of the commit for the flow action
- C. The potential reuse of the flow action
- D. The security setting for the flow action

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 191

How does a developer review information about queue processors running in their system?

- A. In Admin Studio, navigate to the Queue processors landing page.
- B. In Dev Studio, from the case life cycle, select the Run in background automation.
- C. In Dev Studio, from the Records Explorer, select Queue Processor.
- D. In Admin Studio, navigate to the Jobs landing page.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 192

A new hire process includes an Interview Job Applicant assignment. In the assignment, the interviewer assigns an interview score. When the case is submitted, it is routed to a Decision shape.

If the score is 69 or less, the applicant is automatically rejected and the case is resolved. If the score is 70 or more, the case advances to an Assessment assignment. If rejected, both a rejection email and letter must be automatically sent to the candidate.

How would you configure this correspondence requirement?

- A. Add a CorrNew utility to the Assess Candidate connector leaving the Decision shape.
- B. Add a CorrNew utility to the Reject Candidate connector leaving the Decision shape.
- C. Add a Send Email Smart Shape to the Reject Candidate leaving the Decision shape.
- D. Add a notification to the Decision shape.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 193

An application contains a rule with an Apply to: class of TGB-HRApps-Work-Review in a locked ruleset. There is a higher unlocked ruleset. How do you prevent the application from using the rule in TGB-HRApps-Work-Review?

- A. Save a new version of the rule, applied to TGB-HRApps-Work-Review, and set the availability of the rule to Blocked.
- B. Save a new version of the rule, applied to TGB-HRApps-Work-Review, and set the availability of the rule to Not Available.
- C. Save a new version of the rule, applied to TGB-HRApps-Work-Review, and set the availability of the rule to Withdrawn.
- D. Save a new version of the rule, applied to TGB, and set the availability of the rule to Final.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 194

A requirement states that the Users role cannot open a purchase request during the Audit stage of the case life cycle. How do you identify the case stage to satisfy this requirement?

- A. Configure an Access Deny record.
- B. Configure a When record.
- C. Configure an Access When record.
- D. Configure a Privilege record.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 195

In a Hospital from Urgency department there is a configuration requested where doctor and nurses will have access to open cases by patients and add some needed information. The application requests the following configurations:

- Patients can have access only the case which is related to them.
- Patients can not access to any other case in the application
- Doctors and nurses have full access to see all the cases.
- Doctors and nurses are able to edit, attach or add all the information to any of the cases.

Which configurations will support this requirement?

- A. Configure an Access of Role to Object and set open case type to 5
- B. Configure an Access of Role to Object and set open case type to 1
- C. Use Access of Role to Object (ARO) to grant full case access to doctors/nurses, and ABAC (Access Control Policy Conditions) to restrict patients to their own cases.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 196

In which order are rules and data instances applied for a service?

1. Service rule
2. Service Package
3. Service Activity
4. Mapping rule (from format received by the service to Clipboard structure)
5. Mapping rule (from Clipboard structure to format specified by service type)

- A. 2, 1, 3, 4, 5
- B. 1, 2, 4, 3, 5
- C. 2, 1, 4, 3, 5
- D. 1, 2, 3, 4, 5

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 197

Select two configuration options that enable you to use the same data page for populating a list and looking up information based on the selected item in the list.

(Choose Two)

- A. Set the data page Edit mode to editable so the list of values can be updated.
- B. Use page list keys on the data page to identify the selected list item.
- C. Add parameters to the data page to store the value of the selected list item.
- D. Use the Access pages with user defined keys option on the data page.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 198

You create a report that uses data from two classes. Which of the following reporting requirements requires the use of a subreport?

- A. Columns to display are: Operator Name, Operator Division, Count of Purchase Requests created by the operator. Filter the results by unresolved status.
- B. Columns to display are: Operator Name, Operator Division, Count of Purchase Requests created.
- C. Columns to display are: Manager, Name, Count of operators that report to each manager.
- D. Columns to display are: Operator Name, Last updated Case ID, Last updated Case Status, Update Date.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 199

On a Pega project, who is typically responsible for designing the application architecture?

- A. Lead System Architect
- B. System Architect
- C. Senior System Architect
- D. Business Architect

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 200

The Report Browser allows users to _____.

(Choose Two)

- A. Delete reports
- B. Create business metrics
- C. Create reports
- D. Create process metrics

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 201

One concern about integrating with external systems is managing connection information as the application migrates from one server to another. You address this concern using _____.

- A. Circumstances
- B. Global Resource Settings
- C. Dynamic Class References
- D. Branches

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 202

In processing a parent case P-1, two child cases C-1 and C-2 are created. Which of the following statements is correct about the processing of P-1, C-1, and C-2?

- A. Either C-1 or C-2 must be resolved before P-1 can be resolved.
- B. Both C-1 and C-2 must be resolved before P-1 can be resolved.
- C. C-1 must be resolved before C-2 can be resolved.
- D. P-1 must be resolved before either C-1 or C-2 can be resolved.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 203

Why is application versioning important?

- A. Application versioning provides the ability to clone rules.
- B. Application versioning provides the ability to version data classes without impacting existing data classes.
- C. Application versioning preserves prior application versions.
- D. Application versioning provides a means to organize applications by priority.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 204

You have a requirement to update account information in an external database. Account information is stored in a single table. What are the two necessary steps to read and write data to the database table?

(Choose Two)

- A. Run the External Database Table Class Mapping wizard.
- B. Configure activities to read and write data using Obj- methods.
- C. Configure a data page to use SQL connect rules.

D. Create a local storage to hold the data.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 205

In your organization, employees work between 8:00 AM and 5:00 PM EST only. Some Assignments are sent to the employee Work Queue between 5:01 PM and 07:59 AM, but work does not begin until regular business hours start. For Assignments that come in after hours, which Assignment Ready option do you use to delay the start of Service-Level Agreements until 8:00 AM each day?

- A. Immediately
- B. No configuration needed
- C. Dynamically defined on a property
- D. Time delay

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 206

Use data propagation in a case type to automatically copy values from a parent case to which related cases when they are created?

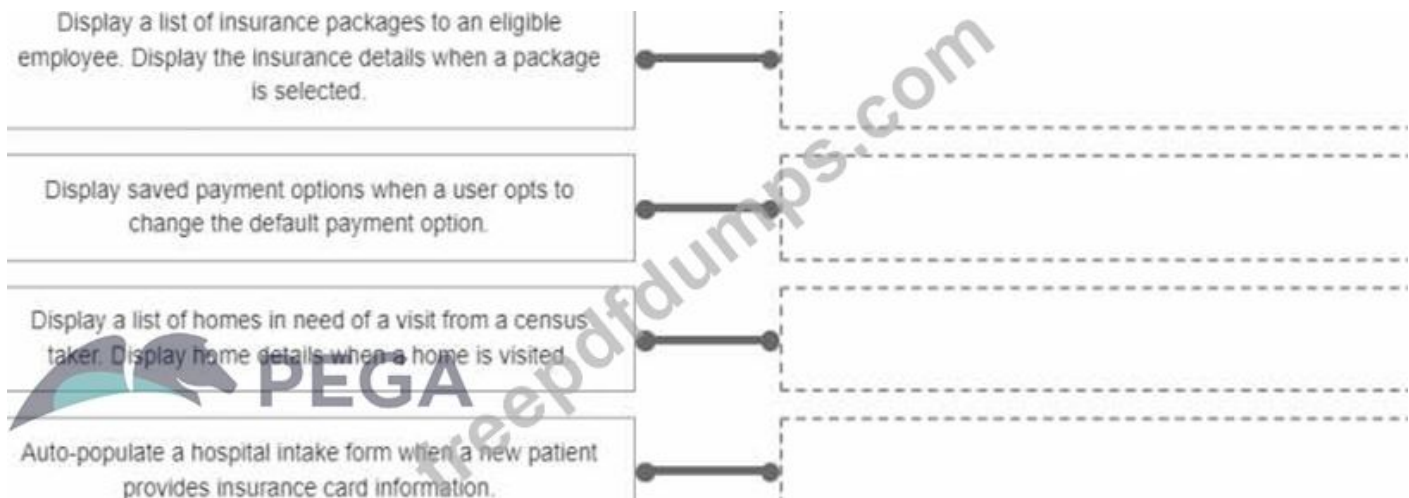

- A. All top-level cases created on the same day
- B. Its parent case
- C. Subcases/child cases created from that case type
- D. Any existing cases in the application

Answer: ([SHOW ANSWER](#))

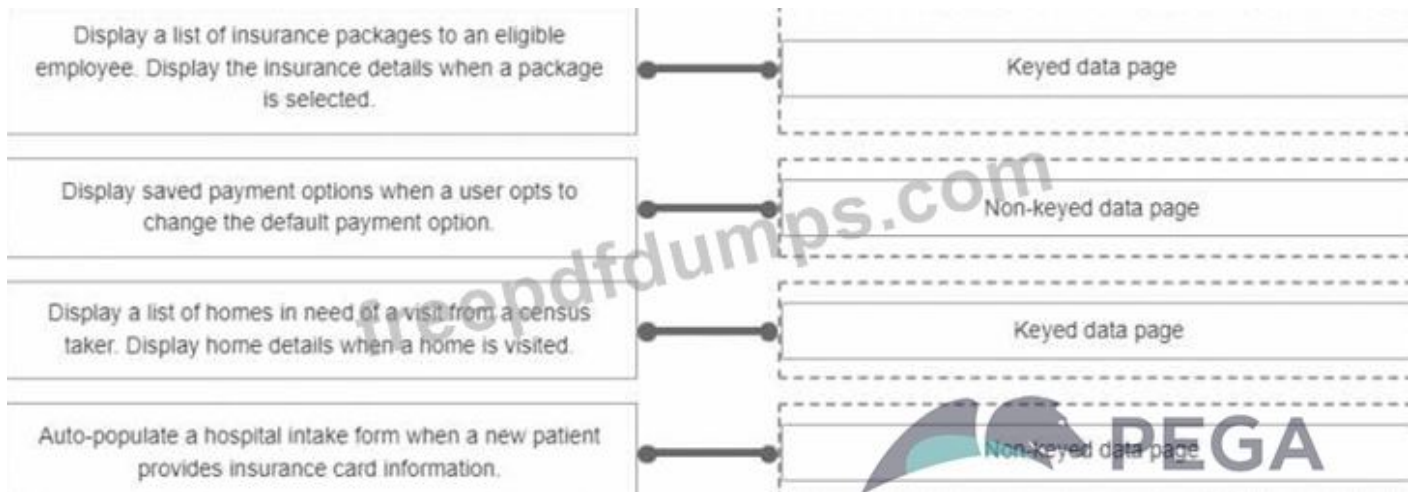

NEW QUESTION: 207

Drag the data page configuration from the bottom to the scenario that best suites the business needs.

Display a list of insurance packages to an eligible employee. Display the insurance details when a package is selected.	●	—	●
Display saved payment options when a user opts to change the default payment option.	●	—	●
Display a list of homes in need of a visit from a census taker. Display home details when a home is visited.	●	—	●
Auto-populate a hospital intake form when a new patient provides insurance card information.	●	—	●

Solution:

Determine whether the given solution is correct? Response:

- A. Correct
- B. Incorrect

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 208

You are building an application with several development teams. Requirements state that the respective support contact name from each team appears on the header of the application as it moves through the various development phases.

What configuration best allows you to accomplish this requirement?

- A. Configure a data transform to populate the appropriate support contact name for each respective development phase. Update the data transform as each production phase changes and direct the application's header to use the name value sourced from the data transform.
- B. Configure a When condition to update the the support contact name depending on what production phase the application is in. Have your application display the appropriate name value sourced from conditional logic.
- C. Create a new Application Settings configuration entering the appropriate support contact names for each respective development phase. Direct the header to reference the Application Settings to display the support contact name.
- D. Create multiple applications, one for each development phase that lists the appropriate support contact name on the header. Release a new application for each development phase.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 209

How do you ensure that only a manager can run a specific flow action?

- A. Add a privilege to the flow action form, then add the privilege to a role assigned to the access group for managers.
- B. Add an Access When condition to the flow action to determine whether the user is a manager.
- C. Add a validate rule to the flow action form to determine whether the user is a manager.
- D. Add a pre-processing activity to the flow action form to determine whether the user is a manager.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 210

In which of the following situations would you simulate a data page?

- A. When the data page writes data to the external system
- B. When the interface definition is not finalized
- C. When the connector is available for the integration
- D. When a large amount of data needs to be simulated

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 211

Organize each rule in the appropriate layer of the Enterprise Class Structure (ECS).

<u>ECS Layer</u>	<u>Answer Area</u>
Organization	An email confirmation for mortgage applications sent within two hours of receipt
Framework	A service level rule that defines expected response times for all applications in a department
Division	A standard business process expected to be extended for specific application requirements
Implementation	A property that defines a standard customer account number used throughout an organization

Answer:

<u>ECS Layer</u>	<u>Answer Area</u>
Organization	Implementation An email confirmation for mortgage applications sent within two hours of receipt
Framework	Division A service level rule that defines expected response times for all applications in a department
Division	Framework A standard business process expected to be extended for specific application requirements

NEW QUESTION: 212

You are updating an application that is comprised of a number of ruleset versions. How do you copy the highest version of each rule in the different ruleset versions into a higher ruleset version?

- A.** Use the Application Structure landing page to lock the current ruleset versions and increment the application to a new ruleset version.
- B.** Use the Application rule form to create a branched ruleset, then merge the rulesets into the new branch.
- C.** Use the Ruleset Maintenance wizard to move the rules from the existing rulesets into the new ruleset.
- D.** Use the Ruleset Maintenance wizard and skim the rulesets to collect the highest version of every rule into the new ruleset version.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 213

An application for a retail company runs an activity nightly to identify and discount aged inventory. For each aged item, the activity discounts the unit price by 20 percent, then rounds the price down to end in \$0.97.

If the price already ends in \$0.97, the item is already discounted and is skipped. Using the Obj-Browse method, the first step generates a list of items that expire within one week. The PageName parameter provided to the Obj-Browse method is DiscountItems. The second step updates the unit price property of each qualifying item.

Which step page is best for the iteration in step two?

- A.** DiscountItems
- B.** DiscountItems.pxResults
- C.** pyWorkPage
- D.** No Step page is necessary

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 214

Which two statements demonstrate the role of a report?

(Choose Two)

- A.** Reports are used to assess process performance.

- B. Reports are used to source a list of selectable items while working in an assignment.
- C. Reports are used to select items from a list while working in an assignment.
- D. Reports are used to update data in a database.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 215

Users create Insurance Coverage Requests cases to authorize insurance payments. Users enter information that includes the name of the patient, the date of the procedure, and the type of procedure.

After entering the information, users submit the request for a review of the patient's insurance policy. Because multiple users enter requests, duplicate requests can occur. A request is considered a duplicate if the patient name, procedure type, and procedure date match an existing request.

You have been given two requirements:

- Ensure that users can identify duplicate requests.
- If a case is a duplicate, it is not written to the database. Otherwise, write the case to the database.

Which two options configure the application so that users can identify duplicate requests?

(Choose Two)

- A. Add a duplicate search step to the case lifecycle design.
- B. Configure weighted conditions.
- C. Configure a Validate rule to validate matching cases.
- D. Configure a duplicate search decision table and add it to a Decision shape.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 216

You want to allow a user to run a specific flow action without conditions. Which two steps must you perform?

(Choose Two)

- A. Add an Access When record to the flow action.
- B. Add the privilege to the user's access group.
- C. Reference module: Rule resolution
- D. Add the privilege to a user role that is available to the user's access group.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 217

A budgeting application uses a job scheduler to automatically email customers once a week with a breakdown of their weekly expenses. Due to the international usage of the application, stakeholders require peak performance at all hours.

Which solution addresses this performance concern?

- A. Dedicate and classify a node for the job scheduler.

- B. Limit the number of operators who access the application.
- C. Ensure customers use a common access group.
- D. Configure the job scheduler to run at off-hours.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 218

You are working on an update to an application which only affects some rules for a certain case type. For migration to a production system, the customer wants the updated rules released as a new patch version of the application ruleset. How do you create the new ruleset version?

- A. Create a branched ruleset and then copy the affected rules into the new branched ruleset.
- B. Skim the relevant rulesets to copy the highest versions of the existing rules to the new version.
- C. Lock the current ruleset and then roll (increment) the ruleset version.
- D. Merge the existing rules in the relevant rulesets to the new version.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 219

You are creating a report that lists all open Personal Injury cases for an Auto Claim case. What three options do you use to configure the join for this report?

(Choose Three)

- A. Specify the join type to include all rows in the Personal Injury class.
- B. Specify a join for the Auto Claim class.
- C. Specify the join type to only include matching rows.
- D. Create the report in the class group.
- E. Create the report in the Auto Claims class.
- F. Specify a join for the Personal Injury class.

Answer: C,E,F ([LEAVE A REPLY](#))

NEW QUESTION: 220

Sourcing a data page directly from a UI control is an example of which pattern?

- A. Snapshot pattern
- B. System of Record (SoR) pattern
- C. Reference pattern
- D. Alias pattern

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 221

Which two statements accurately describe the use of a symbolic index?

(Choose Two)

- A. <PREPEND> inserts a new element in a value list or page list property as the first element.
- B. <LAST> sets or retrieves an element value from the end of a value list or page list property.

C. <CURRENT> inserts a new element in a value list or page list property at the currently referenced index.

D. <APPEND> adds an element at a designated location in a value list or page list property.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 222

What are three valid ways to exchange data through a Pega Web Mashup?

(Choose three.)

A. Use a queue processor to pass updated attributes to the gadget on the hosting web page.

B. Use an action object configured as a script to perform additional actions on a web mashup gadget.

C. Use the Javascript function doAction() to set or read data values through the hosting web page.

D. Use the data-pega-event-onpagedata attribute to configure the default value for the gadget.

E. Use an SQL call to exchange data between the mashup and hosting web page.

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 223

Adding parameters to a rule enables you to _____.

A. copy data from a data page option on a property

B. help improve business users' ability to adapt to changing business conditions

C. define the values used in a circumstance

D. separate the functional behavior of a rule from specific business contexts

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 224

Which requirement could be satisfied with a user action?

A. An application randomly sends a survey to customers once their case is resolved.

B. Allow a user to transfer a case to another employee at any stage of the case.

C. Requiring a separate approval process whenever an order exceeds USD 10,000.

D. Reassign any task that remains open after three days to another user.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 225

Users are spending excess time researching duplicate cases to determine whether to process or resolve the cases. Which two options allow you to reduce the number of potential duplicate cases?

(Choose Two)

A. Increase the weighting threshold.

B. Decrease the weighting threshold.

C. Decrease the weights of the weighting conditions.

D. Increase the weights of the weighting conditions.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 226

In a rental application, prospective tenants must attach a bank statement from the past three months. You want to ensure that members of the Rental Agency work queue can view the attachment, but no one can delete attachments.

What two configuration settings, when used in combination on the attachment category, achieve this behavior?

(Choose Two)

- A.** Add the Always when rule and select the Delete any action.
- B.** Add the Never when rule and select the Delete any action.
- C.** Add the RentalAgencyWorkQueue privilege and select the View action.
- D.** Add the RentalAgencyWorkQueue privilege and select the Edit action.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 227

During the development of your application, you created operators for testing purposes. You are preparing to migrate the application to another environment. You do not want to include the operators in the archive file.

Which two options exclude the operators?

(Choose Two)

- A.** In the Operators step in the Application Packaging Wizard, clear the check boxes next to the operator names. In the Product rule, clear the Include associated data items check box.
- B.** In the Operators step in the Application Packaging wizard, clear the check boxes next to the operator names. In the Product rule, clear the Include data types check box.
- C.** Before you run the Application Packaging wizard, remove the associated ruleset from the operator records.
- D.** Before you run the Application Packaging wizard, save the operators to an organization ruleset. Select the Exclude non-versioned rules check box in the Product rule.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 228

The TGB organization structure has a Sales unit, and it belongs to a Marketing division. TGB plans to add new units for the East, Central, and West geographical sales regions. These regional units report to the Sales unit.

How do you configure the organizational hierarchy to support the new structure?

- A. Add the regional units as sub-units to the Sales unit.
- B. Add the regional units to the Marketing division.
- C. Add the regional units to the TGB organization.
- D. Add a new Regional unit to the Marketing division and add the East, Central, and West regional units as child units to the Regional unit.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 229

You are analyzing application performance and notice one or more data transforms exceeding preferred performance parameters. Which of the following performance tools do you use to help troubleshoot the issue?

- A. Performance Analyzer
- B. PegaRULES Log Analyzer
- C. Database Trace
- D. Performance Profiler

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 230

The primary purpose of a service level is to _____.

- A. Track assignment status over time
- B. Assign cases to the appropriate case worker
- C. Help ensure timely completion of assignments
- D. Generate service level reports

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 231

Your application has a top-level Purchase Request Case Type and a Purchaser Order child Case Type. The company determines that only one user at a time may open and work on a Case. However, users working on purchase orders should not lock out users working on purchase requests. How do you configure the lock settings for both Case Types?

- A. Select the Allow multiple users locking option on the Purchase Request Case Type and select the Allow access for the parent Case when the child Case is opened option on the Purchase Order Case Type.
- B. Select the Allow one user locking option on the Purchase Order Case Type and the Allow access for the parent Case when the child Case is opened option on the Purchase Request Case Type.

C. Select the Allow one user locking option on the Purchase Order Case Type and the Allow access for the parent Case when the child Case is opened option on the Purchase Order Case Type.

D. Select the Allow one user locking option on the Purchase Request Case Type and select the Allow access for the parent Case when the child Case is opened option on the Purchase Order Case Type.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 232

Which three decisions would you model with a When rule?

(Choose Three)

A. Determine whether to include a column when running a report.

B. Determine whether a UI field should be visible.

C. Determine if a process runs.

D. Determine whether to perform a data transform.

E. Recalculate an expression whenever one of the input values changes.

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 233

Consider this business use case:

Responses to customer service requests are required within 24 hours of receipt. Due to seasonal fluctuations, response times may be adjusted at the discretion of business managers. You create a service level agreement (SLA) to monitor response times.

Which solution allows adjusting the response times on demand?

A. Delegate the SLA to the business managers so they can configure seasonal adjustments.

B. Create multiple circumstances of the SLA to account for the seasonal adjustments.

C. Plan a release cycle for updating the SLA for each of the expected seasonal adjustments.

D. Define the response times using property values that are circumstanced to account for the seasonal adjustments.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 234

What are the minimum components of a user interface (UI) action set?

A. Two actions and one event

B. One action and one condition

C. One action and one event

D. One action, one event, and one condition

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 235

Which layer of the Enterprise Class Structure contains generalized assets that are then extended by specific implementations?

- A. Framework
- B. Organization
- C. Implementation
- D. Division

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 236

Which of the following statements is true about the rule resolution process?

- A. If the system finds more than one rule instance during rule resolution, users are provided with a choice of which rule to use depending on context.
- B. The class (context) of a rule takes precedence over the availability of the rule.
- C. If a user does not have access to the selected rule, the system sends a message that it could not find an appropriate rule to execute.
- D. Rule resolution applies to rules that are instances of classes derived from the Rule and Work-base classes.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 237

Which two of the following steps are needed to implement Global Resource Settings?
(Choose Two)

- A. Create a property for each environment
- B. Create a data transform
- C. Create a report definition
- D. Create a data page

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 238

Which two conditions do you test with a unit test?
(Choose Two)

- A. A data page populates without any errors.
- B. An application is successfully migrated to a test system.
- C. A property value is set correctly by a data transform.
- D. An application displays user views for 20 users within three seconds.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 239

As you run a case instance, you notice it takes a significant amount of time to advance from one view to the next view. You run the case multiple times and notice the same slow performance. How do you proceed?

- A. You use the Performance Analyzer (PAL).
- B. You use the Database Trace tool.
- C. You use the Performance Profiler tool.
- D. You use Pega Predictive Diagnostic Cloud™ (PDC).

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 240

In which of the following cases would you use a paragraph?

(Choose Two)

- A. To provide the user with the ability to enter rich text
- B. To display an image
- C. To define a piece of text that is used in several screens in the application
- D. To display read-only text in rich text format

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 241

In which of the following RuleSets is it most appropriate to define connector rules integrating with an Enterprise Service Bus?

- A. The Enterprise Int RuleSet (MyCoInt)
- B. The Framework RuleSet (MyCoSelfServiceFW)
- C. The Framework Int RuleSet (MyCoSelfServiceFWInt)
- D. The Enterprise RuleSet (MyCo)

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 242

Identify the log you examine to view performance-related issues.

- A. Pega log
- B. BIX log
- C. Alert log
- D. Service-PAL log

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 243

Which requirement is supported by attribute-based access control (ABAC)?

- A. Managers can reschedule but not delete appointments.
- B. Personal identifying information in the Work-Baking- class is restricted.
- C. Bakers with a rating of 4 or better can add recipes to the database.
- D. Customers have view access to all attachments on a case.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 244

What advantage does skimming provide over lock and roll as a versioning option?

- A. Skimming is most efficient for major and minor updates. Lock and roll is most useful for patches.
- B. Skimming carries blocked rules forward. Lock and roll does not carry blocked rules forward.
- C. Skimming saves checked out rules. Lock and roll does not save checked out rules.
- D. Pega provides a skimming wizard but not a lock and roll wizard.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 245

The terms "connector" and "service" are from the perspective of _____.

- A. The external system. Thus, a connector is when external systems connect to your application to requests data, and a service is when your application requests request data from an external system.
- B. Your application. Thus, a connector is when your application requests data from an external system, and a service is when external systems request data from your application.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 246

A loan origination case requires the loan application be routed to an underwriter for verification. Any underwriter in the department can complete the verification. How would you route the verification assignment?

- A. To a specific user
- B. To a work queue
- C. To the current user
- D. To the reporting manager

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 247

Which layer of the Enterprise Class Structure contains assets that cannot be reused in other applications?

- A. Division
- B. Implementation

C. Organization

D. Framework

Answer: (SHOW ANSWER)

NEW QUESTION: 248

How do you identify if a result in a decision rule cannot be returned?

A. Test for completeness

B. Test for conflicts

C. Test for missing conditions

D. Test the rule using a unit test

Answer: B (LEAVE A REPLY)

NEW QUESTION: 249

Which requirement do you implement with an access control policy?

A. Only a manager can authorize a refund exceeding USD1000.

B. Only a specialized appraiser can provide an appraisal of art for a homeowner's insurance policy.

C. Only an administrator can delete a duplicate address change request.

D. Only a customer service representative can view an unmasked account number.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 250

A list report includes columns for purchase requests and regional cost centers. A manager wants the report to show the total number of purchase requests for each of the regional cost centers.

How do you configure the report definition?

A. Summarize the purchase requests column by count.

B. Use the purchase requests column to group the cost centers.

C. Filter the results so that the report includes only cost center and purchase requests.

D. Summarize the regional cost centers by count.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 251

An online shopping application collects and displays the user's shipping address. An address contains a street number, city, state, and zip code. This information is always presented together in a group, whether it is used for an order confirmation or for invoice billing.

Which UI component is appropriate for displaying the address information?

A. Section

B. Portal

C. Skin

D. Control

Answer: A (LEAVE A REPLY)

NEW QUESTION: 252

Which three use cases demonstrate the Pega dynamic UI behavior?

(Choose Three)

- A. Unmask a password field when users click an icon.
- B. Automatically calculate order total when users change quantities.
- C. Display a message upon form submission that a date field must be in the future.
- D. Display partner information fields when a screen loads for married applicants.
- E. Display a shipping address section when users select the Different than billing address check box.

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 253

Which two tasks are required to build a mobile app from a Pega Platform application?

(Choose Two)

- A. Configure access to Dev Studio.
- B. Create a certificate set.
- C. Configure access to the Pega Mobile Build Server.
- D. Set up push notifications to developers.

Answer: B,C [\(LEAVE A REPLY\)](#)

NEW QUESTION: 254

In which two use cases do you use a Connect SQL rule?

(Choose Two)

- A. Execute custom SQL statements to improve performance of queries and updates to the PegaRULES database
- B. Execute SQL statements that contain database vendor specific syntax.
- C. Execute a complex SQL statement such as a join or stored procedure against an external database.
- D. Update an external table as part of a distributed transaction

Answer: B,C [\(LEAVE A REPLY\)](#)

NEW QUESTION: 255

A company with multiple applications spanning different business units wants to send a standard confirmation email to customers whenever a case is created. Which is the appropriate layer of the Enterprise Class Structure (ECS) for the email correspondence?

- A. Division
- B. Unit
- C. Implementation
- D. Organization

Answer: A [\(LEAVE A REPLY\)](#)

NEW QUESTION: 256

To reduce training requirements, the business wants to keep their existing third-party UI and connect it to Pega as the back end. How can the third-party application use Pega Platform?

- A. By using database tables for staging the requests
- B. By calling Pega's REST endpoints using the Pega API
- C. By exposing third-party application services
- D. By using middleware tools in application servers

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 257

Which report requires joining classes?

- A. A list of all cases created by the operator along with the work status of each case
- B. A list of all child cases showing the work urgency of their parent
- C. A list of all worklist assignments grouped by the operator who is performing the action
- D. A list of flow actions and average turnaround time, categorized by Performer

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 258

You are integrating two Pega Web Mashups into a client's mortgage loan financing page. What do you configure to successfully embed both mashups?

- A. Run the mashups on the same thread.
- B. Define identical URLs for each mashup.
- C. Identify unique names for each mashup.
- D. Load both mashups simultaneously.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 259

A job recruiter screens candidates to assess their qualifications. The recruiter determines whether the candidate matches the targeted position, matches a different position in the company, or does not match any position.

A decision table, based on the recruiter's feedback, automatically advances the case through a corresponding connector named Selected Position, Targeted Position, and Reject.

How would you configure the condition column(s)?

- A. Create one column for feedback with three rows for the three possible decisions.
- B. Create a single column for Position.
- C. Create separate columns for Matches Position, Matches Another Position, and Does Not Match Any Position.
- D. Create separate columns for Selected Position, Targeted Position, and Reject.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 260

When designing reports with multiple data sources, in which two ways is an association rule different from a class join?

(Choose Two)

- A. You can join multiple classes with class joins, while you cannot join multiple classes with associations.
- B. Class joins are unique to each report. Associations are reusable in any report.
- C. A class join is required to add a filter condition to your report.
- D. Anyone with the appropriate permissions can use associations when creating reports in the User portal.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 261

An application must support two case types. The case types are released into production on separate schedules. Given these requirements, which specialization approach do you use?

- A. All rules are managed in the same ruleset and circumstanced by case type.
- B. The case types are organized in the same class. Each case type is managed with a unique ruleset.
- C. The case types are organized in unique classes. Both case types are managed with a single ruleset.
- D. The case types are organized in unique classes. Each case type is managed with a unique ruleset.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 262

An application contains the class group MyCo-HR-SelfService-Work. There are two classes derived from Work- class:

- MyCo-HR-SelfService-Work-TimeOff
- MyCo-HR-SelfService-Work-Expense

If a report is created in the MyCo-HR-SelfService-Work class group, what instances will the report return?

- A. Only instances of MyCo-HR-SelfService-Work
- B. Instances of MyCo-HR-SelfService-Work-TimeOff and MyCo-HR-SelfService-Work-Expense
- C. Instances of MyCo-HR-SelfService-Work-TimeOff and MyCo-HR-SelfService-Work-Expense, unless they are stored in different database tables
- D. Instances of all Work- derived classes

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 263

As a developer for an online shopping application, you decide to encrypt credit card details that customers enter in an order case type. Which data encryption approach do you choose to encrypt the data?

- A. Class level
- B. Property level
- C. Application level
- D. Case level

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 264

An applicant submits a loan request. The system validates information on the loan application and calculates the applicants credit score based on credit reports and customers account history with the bank.

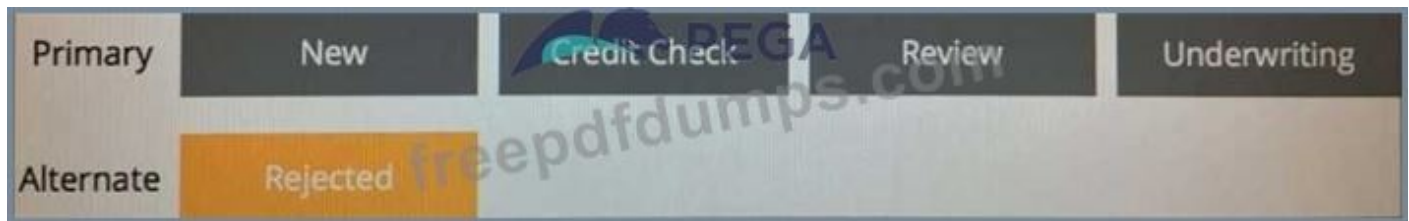

- If the customers credit score is unacceptable, the customer is notified of the result and the loan application is closed.
- If the customers credit is acceptable, the loan application is forwarded to a loan officer for review.
- If the loan officer approves the loan request, the loan application is sent to the underwriting department for processing.
- If the loan officer rejects the loan request, the customer is notified of the result and the loan application is closed.

Select the case life cycle design that most closely follows the guidelines for identifying and naming stages for the use case.

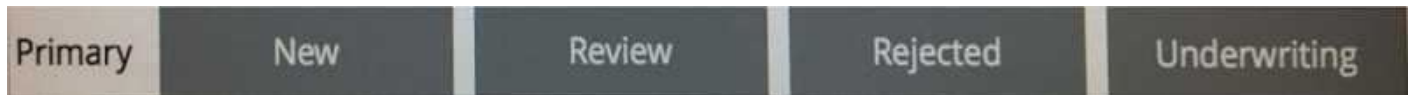

A.

B.

C.

D.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 265

What three questions should you ask when creating a correspondence?

(Choose Three)

- A. When does the correspondence need to be sent?
- B. Which email server should the correspondence use?
- C. How often should you send the correspondence?
- D. How will the correspondence be sent?
- E. Who is the user that receives the correspondence?

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 266

There are five instances of a rule in the rules cache. The only differences between these are the circumstance setting and ruleset version has access to all ruleset versions. On 1 June 2017, which instance is chosen by rule resolution if .Country = Algeria?

Ruleset Version Circumstance

Selfservice: 01-01-01 None

Selfservice: 01-01-01 .Country = Algeria

Selfservice: 01-01-02 Start Date = 1 January 2017

End Date = 31 December 2017

Selfservice: 01-01-03 None, Based Rule checked

Selfservice: 01-01-05 None

- A. Selfservice: 01-01-02 (Circumstance: Start Date = 1 Jan 2017; End Date = 31 Dec 2017)
- B. Selfservice: 01-01-01 (No Circumstance)
- C. Selfservice: 01-01-01 (Circumstance: .Country=Algeria)
- D. Selfservice: 01-01-03 (Circumstance: None, Base Rule Checked)
- E. Selfservice: 01-01-05 (No Circumstance)

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 267

When you create a new application, which two of the following best practices apply?
(Choose Two)

- A. Always choose the UI Kit option from the New Application wizard.
- B. Make error messages clear and understandable to end users.
- C. Test your new application only after you complete all development.
- D. Design your application for technical efficiency, not end-user experience.
- E. Brand your application with your organizational logo.

Answer: B,E ([LEAVE A REPLY](#))

NEW QUESTION: 268

Which two options can you use to provide test data when unit-testing a rule?
(Choose Two)

- A. Open a case, then copy values from pyWorkPage in the Run Rule dialog.
- B. Create a data transform and select the data transform in the Run Rule dialog.
- C. Use the Clipboard tool to populate values on the clipboard page runRulePage.
- D. Create an activity to populate the clipboard page pySimulationDataPage.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 269

While testing a business process to approve an expense report, you receive an error. Which tool allows you to review the rule execution to determine the source of the error?

- A. The Clipboard tool
- B. The Tracer
- C. The Application Profiler
- D. The Dependency Analyzer

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 270

Where can you NOT include a paragraph?

- A. Flow
- B. Section
- C. Paragraph
- D. Correspondence

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 271

You need to determine if all paths of a flow will execute correctly. Select two rules used to simulate service calls.

(Choose Two)

- A. data transform
- B. SQL connector
- C. data object
- D. data page

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 272

When does data propagation occur?

- A. Whenever a parent's value changes
- B. When a parent's value changes and a data transform is used to configure the data propagation
- C. When the subcase or spin-off case is created
- D. When a subcase's or spin-off case's value changes

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 273

A user reports that an application takes five seconds to complete a step and present the next step in a process. Which tool allows you to gather and analyze performance data for the form submission?

- A. Database Trace
- B. Performance Profiler
- C. Tracer
- D. Performance Analyzer (PAL)

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 274

Which statement describes a benefit of parallel development with branches?

- A. Developers cannot check in an updated rule until the rule is unit tested.
- B. Updated rules are reviewed for guardrail warnings before they can be checked in.
- C. A team of developers can implement application functionality without impacting developers in other teams.
- D. Developers cannot update rules in rulesets that have been released to production.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 275

Which two rule types can you mark as a relevant record?

(Choose Two)

- A. Decision table
- B. Section
- C. Skin
- D. Property

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 276

The PegaRULES Log Analyzer (PLA) is a standalone web application available from the Marketplace on Pega Community.

- A. TRUE
- B. FALSE

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 277

What is the importance of application versioning?

- A. Application versioning provides the ability to clone rules.
- B. Application versioning provides the ability to version data classes without impacting existing data classes.
- C. Application versioning preserves prior application versions.
- D. Application versioning provides a means to organize applications by priority.

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 278

Offline support requires which two configurations?

(Choose two.)

- A. A set of privileges to run sections in an offline environment.
- B. Appropriate case types configured for offline processing.
- C. Access groups set up to allow offline access to users.
- D. An authorization activity to manage offline permissions.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 279

Which performance tool do you run to examine a query made to the database?

- A. The Performance Analyzer (PAL)
- B. The Performance Profiler tool
- C. The Database Trace tool
- D. The PegaRULES Log Analyzer (PLA)

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 280

Based on the information in the chart. If you execute the rule when .Dept=Accounting. which version does Pega use?

Rule Ver.	Circumstance
01-01-01	None
01-01-01	.Dept=Accounting
01-01-15	None
01-01-25	None, Base rule selected
01-01-30	.Dept=Accounting
01-01-35	None

- A. 01-01-01, None
- B. 01-01-01
- C. 01-01-25
- D. 01-01-30, .Dept=Accounting

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 281

What are two consequences of exposing columns for reporting?

(Choose Two)

- A. Backward chaining declare expressions cannot use exposed properties.
- B. Tables require additional space due to additional columns.
- C. The database may not comply with normalization standards.
- D. Record inserts and updates require more processing time.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 282

A class group is used to _____.

- A. store data from different child classes in a single table
- B. combine related properties by usage
- C. identify a layer of the Enterprise Class Structure
- D. assign work to a specific group of users

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 283

Drag the description to the correct image on the left.

Field history

Field	Old value	New value	User	Date
Payment Type	Credit Card	Cash	Sample App Administrator	3/23/20 3:59 PM

Field history

Field	Old value	New value	User	Date
Payment Type	Credit Card	Cash	Sample App Administrator	3/23/20 3:59 PM

Field history

Field	Old value	New value	User	Date
Payment Types			Sample App Administrator	3/23/20 3:59 PM

In a Roadside Assistance Case, when a user changes the Payment type field from Credit Card to Cash, the change is tracked in the Case Audit tab field history.

In a Roadside Assistance Case, when a user adds a new Payment type to the Payment Types field group list, the change is tracked in the Case Audit tab field history.

In a Roadside Assistance Case, when a user changes the Payment type field in the Payment Types field group list, from Credit Card to Cash, the change is tracked in the Case Audit tab field history.

Solution:

Field history

Field	Old value	New value	User	Date
Payment Type	Credit Card	Cash	Sample App Administrator	3/23/20 3:59 PM

In a Roadside Assistance Case, when a user changes the Payment type field from Credit Card to Cash, the change is tracked in the Case Audit tab field history.

Field history

Field	Old value	New value	User	Date
Payment Types			Sample App Administrator	3/23/20 3:59 PM

In a Roadside Assistance Case, when a user changes the Payment type field in the Payment Types field group list, from Credit Card to Cash, the change is tracked in the Case Audit tab field history.

Field history

Field	Old value	New value	User	Date
Payment Types			Sample App Administrator	3/23/20 3:59 PM

In a Roadside Assistance Case, when a user adds a new Payment type to the Payment Types field group list, the change is tracked in the Case Audit tab field history.

Determine whether the given solution is correct? Response:

A. Incorrect

B. Correct

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 284

Match each condition with the correct definition.

Condition	Definition
Security	(A) A When rule returns true the request is queued.
Mapping	(B) Authentication fails when using the service.
Queue When	(C) A valid instance of the service activity cannot be found.
Service	(D) Error occurs while transforming incoming data from the request message to the clipboard.

- A. Security->(B), Mapping->(A), Queue When->(D), Service->(C)
- B. Security->(C), Mapping->(D), Queue When->(A), Service->(B)
- C. Security->(D), Mapping->(B), Queue When->(A), Service->(C)
- D. Security->(B), Mapping->(D), Queue When->(A), Service->(C)

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 285

If a customer reports an issue with their online order, an Investigation case is created. All assignments for Investigation cases are higher priority than assignment Which configuration supports the requirements to have a greater default urgency on Investigation case assignments?

- A. Create a SLA rule and ensure that the assignment is ready immediately.
- B. Configure an optional action to enable manual changes to case urgency.
- C. Increase the initial urgency on the case type settings.
- D. Create a SLA rule and increase the initial urgency.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 286

Which two configurations are required when adding a Split for Each shape to your case life cycle? (Choose Two)

- A. Enter a rule that stores the audit note that you want to include in the subprocess.
- B. Define when the parent process resumes processing.
- C. Enable users to get back to the subprocess after the case moves forward.
- D. Enter the Page List or Page Group property that is the basis of the split.

Answer: B,D ([LEAVE A REPLY](#))
