NEW QUESTION: 1

What are the properties of the data replication framework?

- A. Supports Peer-to-Peer (P2P) or mediated communication.
- B. Integrates into existing integration technologies e.g. Application Link Enabling (ALE) especially Intermediated Documents (IDoc).
- C. Supports integration scenarios based on a Service Oriented Architecture (SOA) especially used WEB-Services,
- D. Allows for an easy "growth path" from existing technology to SOA because it wraps the different communication channels.
- E. To deal with business deviation, complex deviation and cross-unit derivatives

Answer: A,B,C,D (LEAVE A REPLY)

NEW QUESTION: 2

You create and replicate a (time-dependent) cost center in Edition A (validity 01.01.2017 - 31.12.9999). Next, you change and replicate the cost center responsible person in Edit on B (validity 01.01.2018- 31.12.9999).

What happens in the target system cost center master data table (CSKS)? Please choose the correct answer.

- A. The first data set is updated with the data of the second data set
- B. A second data set is created {from 01.01.2018) and the first data set is NOT updated
- C. The first data set is marked for deletion and a second data set is created (from 01.01.2018)
- D. The first data set is restricted in its validity (until 31.12.2017) and the second data set is created {from 01.01.2018)

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 3

Which domains are covered out of the box by SAP Master Data Governance, consolidation and mass processing?

There are 3 correct answers to this question.

- A. Finance
- B. Custom objects for single table with flex mode
- C. Custom object for single table with reuse mode
- D. Business Partner
- E. Material

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

MDG for Materials makes reuse of existing technologies for the replication of the materials and related data to other connected business systems.

- A. ALE for connected SAP ERP or third-party systems.
- B. CIF to connect to SAP SCM.
- C. None of the above.
- D. SOA to connect to third-party systems, but also to import data.

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 5

Which options do you have by default to define key mapping in SAP Master Data Governance? There are 2 correct answers to this question.

- A. Define the key mapping manually per object ID and target system
- B. Load key mapping during data import
- C. Define the key mapping during change request processing
- D. Define the key mapping during the data replication

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 6

One FPM OVP Floorplan configuration, with at least a main page, what is included in these?

- A. A Change Request section that includes the Change Request UIBB, both automatically added by MDG Communicator.
- B. SAP MDG stores data in one of two persistencies: staging area or active area. Data in the staging area is not ready for consumption and usually has to be approved by a master data steward to be sent to the active area.
- C. SAP BusinessObjects Data Services). These might be sufficient for loading data in non-SOA based format (such as csv-files or, IDoc-XML) into the active area.

D. For business partners, transaction BUPA_SEND is available, which includes complete address data.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 7

You need to add a custom field of a standard entity to the corresponding user interface. What is SAP's best practice?

Please choose the correct answer.

A. Copy only the User Interface Building Block (UIBB), in which you want to add the field, apply the adjustment and assign the new UIBB to the UI configuration instead of the standard UIBB.

B. Create a customizing for the UI configuration of the standard entity and apply the adjustment in the customizing.

C. Copy the whole UI configuration of the standard entity, adjust it and assign your new UI configuration in the SAP Master Data Governance customizing to the standard entity.

D. Modify the UI configuration of the standard entity in the TA SE80 transaction.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 8

What are the key capabilities of data transfer?

A. Export from client systems and MDG system, including master data, key mapping, and value mapping

B. Records with a matching score lower than the low threshold are not regarded as duplicates.

C. Import to MDG system, including master data, key mapping, and value mapping

D. Conversion from IDoc format to SOA-Messages

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 9

Which of the following activities can you perform to adapt the validation behavior for a change request step?

There are 2 correct answers to this question.

A. Define change request steps for a rule-based workflow

B. Adjust the change request type parameter to the validation BAdI

C. Configure the properties of the change request step for a standard business workflow

D. Add the impacted entity type to the edit on type

Answer: (SHOW ANSWER)

NEW QUESTION: 10

Your customer wants to implement a complex agent determination with the standard workflow. Which options does SAP Master Data Governance (MDG) offer?

There are 2 correct answers to this question.

- A.** A standard SAP MDG customizing table assigns organizational objects (user,org unit,etc.) directly to a workflow step.
- B.** A BAdI allows the implementation of ABAP coding for freely defined agent determination concepts.
- C.** A pre-defined change request status can be assigned to the relevant change request type.
- D.** A FPM UI can be configured to allow the flexible agent determination.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 11

How to use context-based adaptations?

- A.** CBA reduces the need to make extra copies of application configurations.
- B.** Each adaptation of a configuration contains only the delta changes to its base configuration.
- C.** The adaptation of a FPM application depends on runtime parameters. A particular adaptation, or configuration, is applied when the application is called.
- D.** The parameters for CBA are provided by the generic MDG schema USMD_GEN: OTC, logical action, change request type, and change request step.
- E.** None of the above.

Answer: (SHOW ANSWER)

NEW QUESTION: 12

Why has the edition concept been introduced to SAP Master Data Governance (MDG), financials? Please choose the correct answer.

- A.** Because SAP MDG,financials uses the reuse mode for data storage
- B.** Because SAP MDG,financials uses the flex mode for data storage
- C.** Because the amount of financial master data requires a specific grouping within the governance process
- D.** Because some financial master data is time-dependent

Answer: D (LEAVE A REPLY)

NEW QUESTION: 13

How is the material in SAP Master Data Governance (MDG) for material activated in a typical MDG setup to the underlying client of the same system?

Please choose the correct answer.

- A.** Automatically due to the flex mode via the pre-delivered standard handler class
- B.** Automatically due to the flex mode via replication using IDocs or Web services
- C.** Automatically due to the reuse mode via replication using IDocs or Web services
- D.** Automatically due to the reuse mode via the pre-delivered standard handler class

Answer: D (LEAVE A REPLY)

NEW QUESTION: 14

What are the features of UI Configuration with Floorplan Manager?

- A.** A reference to the application controller, the generic MDG Web Dynpro component USMD_GEN_OCP
- B.** The UI configurations are created and maintained for every data model, and are used in single processing while processing the change request.
- C.** The UI configuration is configured with the FPM, which is a Web Dynpro ABAP application that provides a framework for developing UIs consistent with the SAP UI guidelines.
- D.** A FPM application is composed of the following important components, which need to be configured

Answer: (SHOW ANSWER)

NEW QUESTION: 15

Which steps can you perform before you apply the Filter and Remove (FAR) process step to automatically remove records in the background?

There are 3 correct answers to this question.

- A.** Best Record Calculation
- B.** Activation
- C.** Standardization
- D.** Validation
- E.** Matching

Answer: A,D,E (LEAVE A REPLY)

NEW QUESTION: 16

What data is covered in SAP Master Data Governance for Material in the pre-delivered MM standard data model?

There are 3 correct answers to this question.

- A.** Sales
- B.** Bill of Material
- C.** Customer
- D.** Plant
- E.** Valuation

Answer: A,D,E (LEAVE A REPLY)

NEW QUESTION: 17

As the figure, Information Steward, illustrates, in addition to building a solid data foundation for reporting, the Data Services platform also provides a framework for ongoing governance of enterprise information assets.

The EIM 4.0 release includes a new interface for the business user - Information Steward. Once the data has been integrated and analyzed, Info Steward allows the data steward to easily share metrics with executives, and to monitor Key Performance Indicators, including what that are shown in the figure:

- A. Quality KPIs and associated metrics
- B. The quality trend over time
- C. A scorecard that measures data quality
- D. Duplication detection is based on SAP HANA.

Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 18

Your customer uses SAP Master Data Governance in a co-deployment scenario with NO additional target systems for the governed master data. Financial data is NOT included. What are the advantages?

There are 2 correct answers to this question.

- A. Customizing synchronization is NOT required
- B. Data Replication configuration and monitoring is NOT required
- C. Change request configuration effort is reduced
- D. Additional authorization concept is NOT required

Answer: (SHOW ANSWER)

NEW QUESTION: 19

The status of the change request and the workflow step are used in the process logic of the workflow in order to determine the following:

- A. The possible actions in the UI.
- B. The next workflow step.
- C. None of the above.
- D. The next change request status.

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 20

13) What do you customize to prepare the identification of duplicates during change request processing?

There are 2 correct answers to this question.

- A. Assign weights for comparison-relevant fields
- B. Select comparison-relevant fields
- C. Define recency and source system reliability
- D. Set up the sort method for the data model

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 21

How do you ensure that the workflow engine runs properly? There are 2 correct answers to this question.

- A. Switch on the workflow engine business function in the switch framework.
- B. Run the relevant business configuration set using transact on SCPR20.
- C. Run the semi-automatic workflow setup using transact on SWU3.
- D. Create the default WF-BAT CH user.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

What are the following further basics about defining key mappings?

- A. Review and enhance the basic mapping rules in customizing if required or you created your own Business Objects.
- B. Key mapping can be used without any Customizing.
- C. Support for ID-mapping, including key mapping of master data and value mapping of organizational data
- D. Key mapping is required in communication if you work with unharmonized keys in your system landscape.

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 23

Which threshold definitions for fuzzy matching and matching using Business Address Service (BAS)-Adapter are possible?

There are 3 correct answers to this question.

- A. Match groups that have matches above an upper threshold are sent to a change request automatically.
- B. Records within open match groups are processed separately as single records.
- C. Records within open match groups are rejected automatically.
- D. Match groups that have matches above an upper threshold are approved automatically.
- E. Match groups that have matches below an upper threshold are open and approved or rejected manually.

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 24

You upload a file with new or changed master data. What are the implications regarding the change request?

There are 2 correct answers to this question.

- A. Multiple change request will be created depending on configuration and file size
- B. A change request must be created pr or to the start of the upload
- C. A change request can be created at the end of the upload
- D. Objects already in a change request will be updated to the same

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 25

In which case must you use a referencing relationship from entity type E1 to entity type E2?

Please choose the correct answer.

- A. Entity type E1 is an attribute of the entity type E2
- B. Entity type E1 is part of the key of the entity type E2
- C. Entity type E2 is of storage/use type 1
- D. Entity type E1 is of storage/use type 4

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 26

You use File Download to extract supplier master data from the SAP Master Data Governance system. What content can you download?

Please choose the correct answer.

- A. Selected parts of many supplier master data records of one entity type (of storage usage type 1 or 4) in one step, if BP is the current standard data model in your user master.
- B. Selected parts of many supplier master data records of one entity type (of storage usage type 1 or 4) in one step, independent of the current standard data model in your user master.
- C. Many complete supplier master data records in one step, if BP is the current standard data model in your user master.
- D. Any storage usage type, if BP is the current standard data model in your user master.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

What is user and Administration Roles for Configuration in Transaction PFCG?

- A. SAP_MDGA_MENU - Master Data Governance: Analytics
- B. SAP_BC_TREX_ADMIN
- C. SAP_ESH_LOCAL_ADMIN
- D. None of the above.

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 28

Depending on the release used in the SAP client system, different scenarios apply for data transfer. The method of export master data for the import of MDG lists three common scenarios. You should take note of what are the points about these scenarios:

- A.** SAP MDG stores data in one of two persistencies: staging area or active area. Data in the staging area is not ready for consumption and usually has to be approved by a master data steward to be sent to the active area.
- B.** SAP BusinessObjects Data Services). These might be sufficient for loading data in non-SOA based format (such as csv-files or, IDoc-XML) into the active area.
- C.** MDG-F does not use data export / data import framework. Instead, it uses file upload / file download functionality. For more information, see the initial load of MDG-F system and documents working with Master Data governance / financial / file uploads and downloads.
- D.** For business partners, transaction BUPA_SEND is available, which includes complete address data.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 29

What are the transaction sale?

- A.** Generate Partner Profiles (WE20)
- B.** Create RFC Connections (SM59)
- C.** Maintain Distribution Model (MD64)
- D.** Define and Assign Logical Systems
- E.** Business system

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 30

Which data quality improvement check can you apply for SAP Master Data Governance - business partner with the integration of SAP and non-SAP external solutions?

Please choose the correct answer.

- A.** Value added tax checks with the Service Mapping Tool (SMT)
- B.** Credit-worthiness check (for example via Duns & Bradstreet interface) with the Data Import Framework (DIF)
- C.** Address checks with the Enrichment Framework
- D.** Duplicate checks with the Customer Vendor Integration (CVI)

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 31

What are the hints about defining governance scope?

- A. By deactivating or reactivating an entity, relationship, or attribute, you do not change any dictionary or database object; you change only the ability of MDG to edit the chosen object.
- B. When you take a field out of governance scope, it becomes read-only on the MDG UI and you may wish to remove it.
- C. None of the above.
- D. You can use the customizing activity Import BC Set to Reset Governance Scope to set the governance scope to the EPH6 model which contains only identifying and descriptive data.
- E. Governance scope determines the fields from the data model that can be edited by the MDG application.

Answer: A,B,D,E (LEAVE A REPLY)

NEW QUESTION: 32

What is DRF SAP GUI Transactions?

- A. Consists of business objects to be replicated
- B. DRFSUB: Subscribe business objects for replication
- C. DRFF: Define filter criteria
- D. DRFCC: Check customizing for DRF
- E. DRFIMG: Customizing for DRF

Answer: (SHOW ANSWER)

NEW QUESTION: 33

What are the includes in FPM OVP floorplan configuration?

- A. High volume exports from MDG to client systems.
- B. Pages, sections, toolbars, wiring, and more
- C. Export Master Data
- D. A reference to the application controller, the generic MDG Web Dynpro component USMD_GEN_OCP

Answer: (SHOW ANSWER)

NEW QUESTION: 34

How is database storage handled by SAP Master Data Governance (MDG) using the reuse mode? There are 2 correct answers to this question.

- A. Existing ERP structures are used.
- B. Active data sets are removed from the SAP MDG staging area after change request activation.
- C. Tables defined in the SAP MDG data model store the active data.
- D. Active data sets are held in the SAP MDG staging area also after change request activation.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 35

When an entity is checked, the method CHECK_ENTITY is called once for each entity type of the changed master data. In this method you define all rules for checking the entities in the data model.

When checking a change request, which methods are called consecutively:

- A. CHECK_CREUQUEST_FINAL
- B. CHECK_CREQUEST (once for each entity type of the changed master data in the change request)
- C. None of the above.
- D. CHECK_CREQUEST_START

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 36

Which of the following is reference data or customizing data for SAP Master Data Governance? There are 3 correct answers to this question.

- A. Plants
- B. Cost Center Postings
- C. Purchasing Organizations
- D. Sales Orders
- E. Country Code

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 37

What are the data transfer available for data transfer in MDG for material?

- A. Out-of-the-box replication using Data Replication Framework (DRF)
- B. More data segments and object types
- C. The first step of a data transfer is the export of the master data to an IDoc-XML file
- D. Enterprise Services (inbound processing)

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 38

Changes from other systems or business processes shall automatically trigger change requests in SAP Master Data Governance (MDG). What do you use to implement this request?

Please choose the correct answer.

- A. Enrichment Spot
- B. Data Replication Framework
- C. Governance and convenience API
- D. Change request API

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 39

What are the features of logical action?

- A. It provides enhanced determination of business activities.
- B. It allows flexible navigation between UIs.
- C. MDG-S, MDG-C: Business Partner (BP)
- D. It provides a high-level process definition not tied to any business object.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 40

In which process steps can you integrate Business Rule Framework plus checks and Business Rule Framework plus enhancements?

There are 3 correct answers to this question.

- A. Matching
- B. Standardization
- C. Best Record Calculation
- D. Filter and Remove
- E. Validation

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 41

In which SAP Master Data Governance customizing activity can you define the SLAs (days and hours by priority)?

Please choose the correct answer.

- A. Create Change Request Type
- B. Configure Properties of Change Request Step
- C. Define Change Request Actions
- D. Define Priorities for Change Request

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 42

You compare SAP Master Data Governance (MDG), consolidation and mass change with SAP MDG, central governance. Which capabilities are unique for SAP MDG, consolidation and mass change?

There are 2 correct answers to this question.

- A. Mass changes can be performed
- B. All process-related UIs are SAP Fiori-based
- C. Best records can be calculated
- D. SAP HANA fuzzy search can be integrated

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 43

Which replication options can you offer to the business user when you define an edition?

There are 3 correct answers to this question.

- A. The business user can choose between replication per change request and replication per edition.
- B. Replication per change request only
- C. The business user can choose between replication per change request and replication per entity type.
- D. Replication per edition only
- E. Replication per entity type only

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 44

You set FPM expert and admin mode as shown in the figure, Setting FPM Expert and Admin Mode. Specify your user with the parameter for FPM_CONFIG_EXPERT as follows:

- A. All of the above
- B. A - Admin Mode (= Customizing)
- C. X - Expert Mode (= Configuration)
- D. M- Import Mode (= Configuration)

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 45

The figure, The Appearance of Rules-Based Workflow in MDG 9, shows some of the Improvements since EhP6 version, What are the including?

- A. Descriptions are displayed beside the keys.
- B. Table Settings can be influenced and personalized in multiple ways.
- C. Switching to edit mode prevents unwanted changes.
- D. The work item manager is responsible for processing work items, including the deadline monitoring.

E. XML Export / Import in the Tools menu is only active if activated via personalization (Administrative Usage).

Answer: (SHOW ANSWER)

NEW QUESTION: 46

How does SAP Master Data Governance (MDG) ensure that the same object on an entity levels NOT processed in different change requests?

Please choose the correct answer.

A. The object is locked when it is assigned to a change request until the corresponding change request is withdrawn or finally approved.

B. The object is locked when it is assigned to a change request until the current change request processor forwards the change request to the next processor in the governance process.

C. The object is locked when it is assigned to a change request until the object is successfully saved and validated.

D. The object is locked when it is assigned to a change request until the change request step defined in SAP MDG customizing as 'unlocking step' is executed.

Answer: B (LEAVE A REPLY)
