<a href="https://www.freepdfdumps.com/SAP.C_S4CFI_2302.v2023-09-18.q59.html">https://www.freepdfdumps.com/SAP.C_S4CFI_2302.v2023-09-18.q59.html</a>	

### NEW QUESTION: 1

You are creating users in SAP S/4HANA Cloud

For which purpose do you use the business catalogs?

- A. To provide users access to the apps. relevant for their business functions
- B. To configure the authorization objects for which the user is responsible
- C. To create or change passwords for users per business role
- D. To add, change or delete new process steps within the scope item

**Answer: A (LEAVE A REPLY)**

You use the business catalogs to provide users access to the apps relevant for their business functions. Business catalogs are collections of apps that are grouped by business roles or scenarios. You assign business catalogs to business roles to grant users access to the apps they need to perform their tasks.

Reference: <https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/7e30637d0a0545f99f6a65242a44940d.html>

### NEW QUESTION: 2

What are some reasons you cannot remove a test process from a test plan? Note: There are 2 correct answers to this question.

- A. The test plan user has not been created yet.
- B. Data binding exists with another process.
- C. The test process has not been made visible
- D. The test plan has already been executed

**Answer: B,D (LEAVE A REPLY)**

Some of the reasons you cannot remove a test process from a test plan are:

Data binding exists with another process

The test plan has already been executed These reasons prevent you from deleting a test process from a test plan because they would affect the integrity and validity of the test results. The test plan user not being created yet or the test process not being made visible do not prevent you from removing a test process from a test plan. Reference:

[https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

### **NEW QUESTION: 3**

You want to authenticate employees in SAP Cloud Identity.

In which app can you download a .CSV file with the list of users?

- A. Maintain catalog roles
- B. Maintain communication users
- C. Maintain business roles
- D. Maintain business users

**Answer: D (LEAVE A REPLY)**

You can download a .CSV file with the list of users in the Maintain Business Users app. This app allows you to manage the user accounts and authorizations for SAP S/4HANA Cloud. You can also use this app to upload a .CSV file with user data to create or update multiple users at once. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

### **NEW QUESTION: 4**

When setting up integrations with external systems, how many communication arrangements should you create?

- A. One for each communication user you intend to use
- B. One for each communication scenario you are implementing
- C. One for each communication protocol you are using
- D. One for each external system you want to interface with

**Answer: (SHOW ANSWER)**

When setting up integrations with external systems, you should create one communication arrangement for each communication scenario you are implementing. A communication arrangement is a configuration that defines how your system communicates with an external system using a specific communication scenario. A communication scenario is a predefined integration content that describes the inbound and outbound communication between your system and an external system using a specific communication protocol and interface. Reference: [https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

### **NEW QUESTION: 5**

What are some services SAP delivers as part of the RISE with SAP S/4HANA Cloud solution? Note: There are 2 correct answers to this question.

- A. Release upgrade planning
- B. Business process configuration

- C. Technical upgrade installation
- D. Infrastructure management

**Answer: (SHOW ANSWER)**

Some services that SAP delivers as part of RISE withSAP S/4HANACloud solution are:

Release upgrade planning

Business process configuration

RISE withSAP S / 4 HANACloudis an offering that provides customers with everything they need to transform their business withSAP S / 4 HANACloud , such as subscription licenses , implementation services , cloud infrastructure , embedded analytics , etc

### **NEW QUESTION: 6**

Which options are available for the bank account revision in SAP S / 4HANA Cloud? Note: There are 2 correct answers to this question

- A. Activate via dual control
- B. Activate directly
- C. Activate via machine learning
- D. Activate automatically

**Answer: A,B (LEAVE A REPLY)**

The options available for the bank account revision in SAP S / 4HANA Cloud are:

Activate via dual control

Activate directly You cannot activate a bank account via machine learning or automatically in SAP S / 4HANA Cloud. Reference: <https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/b6e2e2e06e4946ecad2ab27af385aa72.html>

### **NEW QUESTION: 7**

What are the prerequisites for using the SAP Fiori Test Your Processes app? (Choose two.)

- A. SAP Best Practices are activated in the quality system
- B. The productive system is connected to the implementation landscape
- C. The test scripts are uploaded in the productive system
- D. The quality system is connected to the Test Execution Service on SAP Business Technology u Platform

**Answer: A,D (LEAVE A REPLY)**

The prerequisites for using the SAP Fiori Test Your Processes app are:

SAP Best Practices are activated in the quality system

The quality system is connected to the Test Execution Service on SAP Business Technology Platform

You do not need to connect the productive system to the implementation landscape or upload the test scripts in the productive system for using the app. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/bf3d6e0c6f4740a09ed5d3c3981b8f1d.html>

### **NEW QUESTION: 8**

What determines the set of data migration objects available from the Migrate Your Data application?

- A. The selected source system
- B. The customer legacy system
- C. The selected target fields
- D. The selected business scenarios

**Answer: D (LEAVE A REPLY)**

The set of data migration objects available from the Migrate Your Data application depends on the selected business scenarios that are scoped for the implementation project. The source system, the customer legacy system, and the target fields do not determine the data migration objects. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/bf3d6e0c6f4740a09ed5d3c3981b8f1d.html>

### **NEW QUESTION: 9**

You are configuring cash operations.

To which object do you assign the cash management flow types?

- A. Liquidity items
- B. Bank account types
- C. Planning levels
- D. General ledger accounts

**Answer: (SHOW ANSWER)**

You assign the cash management flow types to liquidity items when you configure cash operations.

Liquidity items are categories that classify cash flows based on their sources and uses. Cash management flow types are attributes that define the nature and direction of cash flows for different transactions. Reference: <https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

### **NEW QUESTION: 10**

Why do you perform realignment in Profitability Analysis (CO-PA)?

- A. To adjust assigned characteristics
- B. To correct posted general ledger accounts
- C. To correct exchange rate valuation
- D. To adjust derived values fields

**Answer: (SHOW ANSWER)**

Realignment in Profitability Analysis (CO-PA) is used to adjust assigned characteristics, such as customer group or product hierarchy, based on changes in master data or derivation rules. Realignment does not affect general ledger accounts, exchange rate valuation, or derived value fields. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/9e9a7e16afef4cc0ad2ab27af385aa72.html>

### **NEW QUESTION: 11**

What are the steps for conducting automated business process testing? (Choose three.)

- A. Assess data management
- B. Create a test plan
- C. Run the test
- D. Create a test system
- E. Correct and rerun failed test processes

**Answer: B,C,E (LEAVE A REPLY)**

The steps for conducting automated business process testing are create a test plan, run the test, and correct and rerun failed test processes. You do not need to assess data management or create a test system for automated testing. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/bf3d6e0c6f4740a09ed5d3c3981b8f1d.html>

### **NEW QUESTION: 12**

Which tool do you use to run the SAP Cloud Integration Automation Service for SAP S/4HANA Cloud?

- A. SAP Activate Roadmap
- B. SAP Maintenance Planner
- C. SAP Solution Manager
- D. SAP Best Practices Explorer

**Answer: (SHOW ANSWER)**

You use the SAP Best Practices Explorer to run the SAP Cloud Integration Automation Service for SAP S/4HANA Cloud. The SAP Best Practices Explorer is a web-based tool that allows you to discover and consume predefined integration content for connecting SAP S/4HANA Cloud with other SAP Cloud solutions. The SAP Cloud Integration Automation Service is a tool that allows you to discover, configure, and deploy predefined integration content for connecting SAP S/4HANA Cloud with other SAP Cloud solutions. Reference: [https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

### **NEW QUESTION: 13**

How do you identify errors in a test plan? Note: There are 2 correct answers to this question.

- A. Review failed process steps.
- B. Review canceled actions
- C. Re-run the test plan.
- D. Review the detailed action log.

**Answer: A,D (LEAVE A REPLY)**

You can identify errors in a test plan by doing the following:

Review failed process steps

Review the detailed action log These methods allow you to see which process steps did not execute successfully and why they failed. You can also see detailed information about each action performed during the test execution. Re-running the test plan or reviewing canceled actions do not help you identify errors in a test plan, as they do not provide any additional information about the cause of failure.

Reference: [https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

### NEW QUESTION: 14

You reviewed the project scope and identified the corresponding resources. Based on the SAP Activate methodology, which activities must you perform in the Explore phase? Note: There are 2 correct answers to this question.

- A. Define the organizational structure and chart of accounts
- B. Use the Quality system to demonstrate SAP Best Practices processes.
- C. Conduct the Fit-to-Standard analysis to identify fits and gaps.
- D. Conduct the Digital Discovery Assessment to identify fits and gaps.

**Answer: (SHOW ANSWER)**

Based on the SAP Activate methodology, you perform the following activities in the Explore phase:

Define the organizational structure and chart of accounts

Conduct the Fit-to-Standard analysis to identify fits and gaps The Explore phase is where you validate your business requirements against the standard solution provided by SAP S/4HANA Cloud. You define your organizational structure and chart of accounts using self-service configuration UIs or expert configuration tools. You conduct the Fit-to-Standard analysis using predefined test scripts or custom test plans. Reference: [https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

### NEW QUESTION: 15

What is the purpose of the Test Automation Tool?

- A. Performs actions in a simulated user interface on behalf of the assigned test user.
- B. Provides information on your actual tenant configuration.
- C. Provides information on the business app(s) to be used for testing
- D. Populates business data for each testscreen.

**Answer: A (LEAVE A REPLY)**

The purpose of the Test Automation Tool is to perform actions in a simulated user interface on behalf of the assigned test user. The Test Automation Tool is a tool that allows you to execute predefined or custom test scripts for business process testing in your system. The Test Automation Tool does not provide information on your actual tenant configuration, the business app(s) to be used for testing, or populate business data for each test screen. You need to use other tools or apps for those tasks.

Reference: [https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

### NEW QUESTION: 16

The credit profile is used to store which information in the customer master data? (Choose two.)

- A. The customer credit group
- B. The credit exposure
- C. The scoring rules
- D. The credit decisions

**Answer: A,D (LEAVE A REPLY)**

The customer credit group and the credit decisions are two of the information that are stored in the credit profile in the customer master data. The customer credit group determines which customers are checked together for credit limit purposes. The credit decisions record the results of the credit checks performed for

the customer. Reference: <https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

#### **NEW QUESTION: 17**

Which asset characteristic controls if an asset is under construction?

- A. Capitalization date
- B. Asset class
- C. Settlement profile
- D. Depreciation key

**Answer: C (LEAVE A REPLY)**

Settlement profile is one of the asset characteristics that controls if an asset is under construction.

Settlement profile defines how an asset under construction is settled to other assets or cost objects when it is completed or partially completed. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/bf3d6e0c6f4740a09ed5d3c3981b8f1d.html>

#### **NEW QUESTION: 18**

You want to perform scripted calculations in your planning model. How can you achieve this on the SAP Analytics Cloud?

- A. Data Actions
- B. Value Driver Trees
- C. Data Wrangling
- D. Input Tasks

**Answer: A (LEAVE A REPLY)**

You can use Data Actions to perform scripted calculations in your planning model on the SAP Analytics Cloud. Data Actions allow you to define complex calculations using formulas and scripts that can be triggered manually or automatically. Reference:

<https://help.sap.com/doc/00f68c2e08b941f081002fd3691d86a7/release/en-US/f2db0ee54bb94daeb2da059eaa538ac9.html>

#### **NEW QUESTION: 19**

Which adjustments can be made using the Query Builder? Note: There are 3 correct answers to this question.

- A. Add, remove, or customize fields in queries
- B. Create parameters to read values from the user settings
- C. Create custom Core Data Services (CDS) views for use in queries
- D. Copy a query from an SAP-delivered standard query
- E. Add business logic to queries

**Answer: A,B,D (LEAVE A REPLY)**

You can use the Query Builder to perform the following adjustments to queries:

Add, remove, or customize fields in queries

Create parameters to read values from the user settings

Copy a query from an SAP-delivered standard query

Add business logic to queries You cannot use the Query Builder to create custom Core Data Services (CDS) views for use in queries. You need to use the Custom CDS Views app for that purpose. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/b6e2e2e06e4946ecad2ab27af385aa72.html>

#### **NEW QUESTION: 20**

What activities are applied to the entire system and cannot be changed after confirmation? Note: There are 2 correct answers to this question

- A. Group currency
- B. Fiscal year variant
- C. Scoping
- D. Configuration activities

**Answer: A,B (LEAVE A REPLY)**

The activities that are applied to the entire system and cannot be changed after confirmation are:

Group currency

Fiscal year variant These activities define the global settings for your system, such as the currency used for consolidation and reporting, and the fiscal year used for financial accounting. You cannot change these settings after confirming them in SAP Central Business Configuration. Scoping and configuration activities can be changed after confirmation using self-service configuration UIs or expert configuration tools. Reference: [https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

#### **NEW QUESTION: 21**

Which feature is available with a resubmission in Collections & Dispute Management?

- A. It documents the details of a customer's pledge to pay an invoice
- B. It provides a specific reason why a customer needs to be contacted again
- C. It initiates the dispute resolution process for one or several invoices
- D. It transfers the dispute case to the collections worklist

**Answer: B (LEAVE A REPLY)**

A resubmission in Collections & Dispute Management is a feature that provides a specific reason why a customer needs to be contacted again. A resubmission allows you to schedule a follow-up activity for a customer contact and specify the resubmission reason and date. Reference: <https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

### **NEW QUESTION: 22**

How can you post accruals in SAP S/4HANA Cloud? 3 answers

- A. Use the accrual engine
- B. Post a recurring entry
- C. Use the Microsoft Excel upload
- D. Use document parking
- E. Enter them manually

**Answer: A,B,E (LEAVE A REPLY)**

You can post accruals in SAP S/4HANA Cloud by using one of the following methods:

Use the accrual engine

Post a recurring entry

Enter them manually You cannot use the Microsoft Excel upload or document parking to post accruals in SAP S / 4HANA Cloud. Reference: [https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

### **NEW QUESTION: 23**

What are maintenance functions of the financial statement version (FSV) with the "Manage Global Hierarchies" app? (Choose two.)

- A. Create G/L account master data
- B. Assign semantic objects
- C. Assign profit centers
- D. Create draft hierarchy versions

**Answer: C,D (LEAVE A REPLY)**

The maintenance functions of the financial statement version (FSV) with the "Manage Global Hierarchies" app are:

Assign profit centers

Create draft hierarchy versions You cannot use this app to create G/L account master data, assign semantic objects, or add new nodes to the FSV hierarchy. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/7e30637d0a0545f99f6a65242a44940d.html>

### **NEW QUESTION: 24**

In SAP Central Business Configuration, which changes are possible for the Starter System after content activation? Note: There are 3 correct answers to this question.

- A. Delete existing organizational entities

- B. Create additional product-specific configurations
- C. Add new organizational entities
- D. Edit existing product-specific configurations
- E. Change the group ledger scenario

**Answer: B,C,D (LEAVE A REPLY)**

The changes that are possible for the Starter System after content activation are:

Create additional product-specific configurations

Add new organizational entities

Edit existing product-specific configurations The Starter System is a temporary system that is used for scoping and configuration activities during the Explore phase. After content activation, you can still make changes to your product-specific configurations or organizational entities using self-service configuration UIs or expert configuration tools. You cannot delete existing organizational entities or change the group ledger scenario after content activation. Reference:

[https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

#### **NEW QUESTION: 25**

How can you migrate data to SAP S/4HANA Cloud, public edition? Note: There are 2 correct answers to this question.

- A. Staging database
- B. RFC calls
- C. File templates
- D. Core Data Services

**Answer: C,D (LEAVE A REPLY)**

You can migrate data to SAP S/4HANA Cloud, public edition by using one of the following methods:

File templates

Core Data Services File templates are predefined Excel files that allow you to enter and upload data to staging tables in SAP S/4HANA Cloud using the SAP S/4HANA Migration Cockpit. Core Data Services are data models that allow you to access and manipulate data in SAP S/4HANA Cloud using SQL statements or ABAP code. Reference:

[https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

#### **NEW QUESTION: 26**

Which Key Performance Indicators are available in the Treasury Executive Dashboard in SAP Analytics Cloud? (Choose two.)

- A. Open Disputes by Country
- B. Payments per Company Code
- C. Counterparty Risk - Utilization Overview
- D. Liquidity by Region

**Answer: C,D (LEAVE A REPLY)**

The Key Performance Indicators that are available in the Treasury Executive Dashboard in SAP Analytics Cloud are:

## Counterparty Risk - Utilization Overview

Liquidity by Region These KPIs provide insights into the exposure and liquidity situation of the treasury organization. Open Disputes by Country and Payments per Company Code are not KPIs available in the Treasury Executive Dashboard. Reference:

[https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD\\_FOR\\_TREASURY\\_MANAGEMENT/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD_FOR_TREASURY_MANAGEMENT/latest/en-US)

### NEW QUESTION: 27

Which of the following security measures is the customer responsible for?

- A. Application-level user management
- B. Change logging through audit trails
- C. Deactivation of SAP administrative users
- D. API management

**Answer: A (LEAVE A REPLY)**

One of the security measures that the customer is responsible for is application-level user management. Application-level user management is the process of creating and maintaining users and assigning them to business roles and catalogs that define their access rights and authorizations in the system. Change logging through audit trails, deactivation of SAP administrative users, and API management are security measures that SAP is responsible for. Reference:

[https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

### NEW QUESTION: 28

Based on the SAP Activate methodology, which of the following tests are formal, and therefore must be documented during implementation? (Choose two.)

- A. String test
- B. Business process test
- C. Integration test
- D. Unit test

**Answer: B,C (LEAVE A REPLY)**

Based on the SAP Activate methodology, business process test and integration test are formal tests that must be documented during implementation. Business process test verifies that all business processes work as expected in the Quality system. Integration test verifies that all interfaces and integrations work as expected in the Quality system. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/bf3d6e0c6f4740a09ed5d3c3981b8f1d.html>

### NEW QUESTION: 29

Which function of SAP Financial Statement Insight utilizes machine learning?

- A. Visualization of account group performance
- B. Business exception detection
- C. Dynamic adaptation of hierarchical structures

D. Flexible comparisons across multiple characteristics

**Answer: B (LEAVE A REPLY)**

Business exception detection is one of the functions of SAP Financial Statement Insight that utilizes machine learning. Business exception detection is a feature that identifies and highlights unusual patterns or outliers in financial data based on machine learning algorithms. Visualization of account group performance, dynamic adaptation of hierarchical structures, and flexible comparisons across multiple characteristics are not functions that utilize machine learning. Reference:

[https://help.sap.com/viewer/product/SAP\\_FINANCIAL\\_STATEMENT\\_INSIGHT/latest/en-US](https://help.sap.com/viewer/product/SAP_FINANCIAL_STATEMENT_INSIGHT/latest/en-US)

### NEW QUESTION: 30

You are implementing SAP S/4HANA Cloud for a company that manufactures bicycles and bicycle parts. The accountant is confused with the available account types.

When creating an account for costs of printing marketing materials, which account type should they choose?

- A. Secondary cost account
- B. Non-operating expense
- C. Balance Sheet
- D. Primary cost account

**Answer: D (LEAVE A REPLY)**

When creating an account for costs of printing marketing materials, you should choose primary cost account as the account type. Primary cost accounts are used to record costs that are incurred directly by a cost object, such as materials or services purchased from external vendors. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

### NEW QUESTION: 31

Which types of datasets are required for predictive scenarios? (Choose two.)

- A. Active Dataset
- B. Application Dataset (output)
- C. Training Dataset
- D. Testing Dataset

**Answer: (SHOW ANSWER)**

Training Dataset and Testing Dataset are two types of datasets that are required for predictive scenarios. Training Dataset is used to train the predictive model based on historical data. Testing Dataset is used to validate the predictive model based on new data. Reference:

<https://help.sap.com/doc/00f68c2e08b941f081002fd3691d86a7/release/en-US/f2db0ee54bb94daeb2da059eaa538ac9.html>

#### **NEW QUESTION: 32**

You are implementing the Treasury Trading via Trading Platforms functionality.

Which actions can you perform with the Manage Trade Requests App on the SAP Cloud Platform? Note: There are 2 correct answers to this question.

- A. Select transaction rate
- B. Block requests
- C. Create hedge requests
- D. Split request

**Answer: A,B (LEAVE A REPLY)**

You can perform the following actions with the Manage Trade Requests app on the SAP Cloud Platform:

Select transaction rate

Block requests You cannot use this app to create hedge requests or split requests. You need to use other apps such as Hedge Management Cockpit or Hedge Request Overview for those actions. Reference: [https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD\\_FOR\\_TREASURY\\_MANAGEMENT/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD_FOR_TREASURY_MANAGEMENT/latest/en-US)

#### **NEW QUESTION: 33**

Your customer wants to simplify the process of outgoing payment management. Which offering do you recommend?

- A. SAP Cash Application
- B. SAP Multi-Bank Connectivity
- C. SAP RealSpend
- D. SAP Bank Analyzer

**Answer: B (LEAVE A REPLY)**

If a customer wants to simplify the process of outgoing payment management, you should recommend SAP Multi-Bank Connectivity as an offering. SAP Multi-Bank Connectivity is a cloud-based solution that allows customers to connect with multiple banks and payment service providers through a single channel and manage their payments efficiently and securely. Reference:

#### **NEW QUESTION: 34**

For which objects can you perform budget availability control? (Choose two.)

- A. Project

- B. Cost Center
- C. Internal Order
- D. Profit Center

**Answer: (SHOW ANSWER)**

You can perform budget availability control for projects and internal orders. Budget availability control allows you to monitor and control the budget consumption of these objects and prevent overspending.

Reference: <https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

#### **NEW QUESTION: 35**

In which scenario would you use Read Access Logging (RAL) to determine the information?

- A. If a business user accessed data in a custom field of an application
- B. If a business user accessed a business partner's personal data
- C. If a business user has restrictions when accessing data in an application
- D. If the authorizations for a business user are missing or insufficient

**Answer: B (LEAVE A REPLY)**

You would use Read Access Logging (RAL) to determine if a business user accessed a business partner's personal data. RAL is a tool that allows you to monitor and log read access to sensitive data in your system, such as personal data of customers or employees. RAL helps you comply with data protection regulations and audit requirements. Reference:

#### **NEW QUESTION: 36**

How does an implementation consultant support the customer during Fit-to-Standard workshops? Note: There are 2 correct answers to this question.

- A. Demonstrate SAP Best Practices in the starter system.
- B. Determine set up instructions for Customer-Driven Integrations.
- C. Highlight gaps that require decisions on configuration or extensibility.
- D. Conduct end-user training on all active scope items.

**Answer: (SHOW ANSWER)**

An implementation consultant supports the customer during Fit-to-Standard workshops by doing the following:

Demonstrate SAP Best Practices in the starter system

Highlight gaps that require decisions on configuration or extensibility The Fit-to-Standard workshop is a process where the customer validates the fit of their business requirements with the standard solution provided by SAP S/4HANA Cloud. The implementation consultant helps the customer understand how the standard solution works and identify any gaps that need to be addressed by configuration or extensibility options. The implementation consultant does not determine set up instructions for Customer-Driven Integrations, conduct end-user training on all active scope items, or create custom test scripts for testing scenarios. These tasks are performed by other roles such as integration experts, key users, or test managers. Reference: [https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

**NEW QUESTION: 37**

Which of the following consumer applications are integrated out-of-the-box with the payment card process of SAP digital payments add-on? Note: There are 3 correct answers to this question

- A. SAP Cash Application
- B. SAP Real Spend
- C. External Billing
- D. CH Contract Accounting
- E. SAP S/4HANA Cloud for Customer Payments

**Answer: A,C,E (LEAVE A REPLY)**

SAP Cash Application, External Billing, and SAP S/4HANA Cloud for Customer Payments are three consumer applications that are integrated out-of-the-box with the payment card process of SAP digital payments add-on. These applications allow you to accept and process payment card transactions from your customers using SAP digital payments add-on as a payment service provider. Reference: [https://help.sap.com/viewer/product/SAP\\_DIGITAL\\_PAYMENTS\\_ADDON/latest/en-US](https://help.sap.com/viewer/product/SAP_DIGITAL_PAYMENTS_ADDON/latest/en-US)

**NEW QUESTION: 38**

In the Organizational Structure app in SAP Central Business Configuration, which of the following entities can be added under the Company root node? Note: There are 2 correct answers to this question

- A. Sales Organization
- B. Purchasing Organization
- C. Division
- D. Plant

**Answer: A,B (LEAVE A REPLY)**

In the Organizational Structure app in SAP Central Business Configuration, you can add the following entities under the Company root node:

Sales Organization

Purchasing Organization These entities represent organizational units that are responsible for selling or procuring products or services. Division and Plant are not entities that can be added under the Company root node, but under other nodes such as Sales Organization or Company Code. Reference:

[https://help.sap.com/viewer/product/SAP\\_CENTRAL\\_BUSINESS\\_CONFIGURATION/latest/en-US](https://help.sap.com/viewer/product/SAP_CENTRAL_BUSINESS_CONFIGURATION/latest/en-US)

**NEW QUESTION: 39**

Which of the following can be transported using the Software Collection apps in SAP S/4HANA Cloud? Note: There are 2 correct answers to this question.

- A. Custom business roles
- B. Custom business objects
- C. variants and changes
- D. Migration projects

**Answer: (SHOW ANSWER)**

The following can be transported using the Software Collection apps in SAP S/4HANA Cloud:

Custom business roles

Custom business objects These are examples of custom content that you can create and transport using the Software Collection apps. You cannot transport variants and changes or migration projects using the Software Collection apps. You need to use other tools or apps for those tasks. Reference:  
[https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

### **NEW QUESTION: 40**

Which activities are completed in SAP Central Business Configuration? Note: There are 2 correct answers to this question.

- A. Create customer-specific master data.
- B. Activate countries not covered by SAP Best Practices.
- C. Add extensions to standard processes.
- D. Add customer-specific data within SAP Best Practices content.

**Answer: C,D (LEAVE A REPLY)**

The activities that are completed in SAP Central Business Configuration are:

Add extensions to standard processes

Add customer-specific data within SAP Best Practices content SAP Central Business Configuration is a tool that allows you to configure and customize your SAP S/4HANA Cloud solution using predefined content and settings. You cannot use SAP Central Business Configuration to create customer-specific master data, activate countries not covered by SAP Best Practices, or create new business processes. Reference:

[https://help.sap.com/viewer/product/SAP\\_CENTRAL\\_BUSINESS\\_CONFIGURATION/latest/en-US](https://help.sap.com/viewer/product/SAP_CENTRAL_BUSINESS_CONFIGURATION/latest/en-US)

### **NEW QUESTION: 41**

SAP Activate for SAP S/4HANA Cloud Methodology and Best Practices

How does the implementation consultant support the customer during Fit-to-Standard workshops? 2 answers

- A. Review current custom code in the customer system
- B. Show and explain all available self-service configuration UIs
- C. Demonstrate SAP Best Practices in the starter system
- D. Highlight gaps that require configuration or extensibility decisions

**Answer: C,D (LEAVE A REPLY)**

The implementation consultant supports the customer during Fit-to-Standard workshops by performing the following activities:

Demonstrate SAP Best Practices in the starter system

Highlight gaps that require configuration or extensibility decisions The implementation consultant does not review current custom code in the customer system or show and explain all available self-service configuration UIs during Fit-to-Standard workshops. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/bf3d6e0c6f4740a09ed5d3c3981b8f1d.html>

**NEW QUESTION: 42**

Master Data Management and Migration

Which project team is responsible for preparing and performing the master data loads?

- A. Project leader team
- B. Customer project team
- C. Implementation team
- D. Basis team

**Answer: C (LEAVE A REPLY)**

The implementation team is responsible for preparing and performing the master data loads. The implementation team consists of consultants from SAP or partners who have the expertise and tools to perform data migration tasks. The project leader team, the customer project team, and the basis team are not responsible for master data loads. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/bf3d6e0c6f4740a09ed5d3c3981b8f1d.html>

**NEW QUESTION: 43**

According to the General Data Protection Regulation (GDPR) laws, when are SAP customers considered data controllers?

- A. When they use SAP cloud applications
- B. When they engage other businesses in the European Union
- C. When they request implementation of a cloud solution
- D. When they extract legacy data in preparation for migration

**Answer: A (LEAVE A REPLY)**

According to the General Data Protection Regulation (GDPR) laws, SAP customers are considered data controllers when they use SAP cloud applications. A data controller is an entity that determines the purposes and means of processing personal data, such as an organization that uses cloud applications to collect and manage personal data of its employees or customers. A data processor is an entity that processes personal data on behalf of a data controller, such as a cloud service provider that hosts and maintains cloud applications for its customers. Reference: <https://www.sap.com/products/s4hana-cloud/data-protection.html>

**NEW QUESTION: 44**

Fit-to-Standard Workshop

Which of the following are outcomes of the Fit-to-Standard workshop? 3 answers

- A. Gap identification and mitigation
- B. Expert configuration definition
- C. System landscape optimization
- D. Identification of source code changes
- E. Solution impact on business processes

**Answer: (SHOW ANSWER)**

The outcomes of the Fit-to-Standard workshop are:

Gap identification and mitigation

Expert configuration definition

Solution impact on business processes The Fit-to-Standard workshop is a process where the customer validates the fit of their business requirements with the standard solution provided by SAP S/4HANA Cloud. The workshop identifies any gaps between the customer's requirements and the standard solution, defines any expert configuration needed to close the gaps, and assesses the impact of the solution on the customer's business processes. Reference:

[https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

#### **NEW QUESTION: 45**

What does the journal entry type control?

- A. The ledgers updated by the posting values
- B. The types of accounts allowed to be posted to
- C. The transaction currency types allowed to be posted
- D. Whether a posting posts a debit or credit value

**Answer: (SHOW ANSWER)**

The journal entry type controls the types of accounts allowed to be posted to. For example, journal entry type AA allows posting to asset accounts, journal entry type SA allows posting to G/L accounts, and journal entry type AB allows posting to both asset and G/L accounts. The journal entry type does not control the ledgers updated, the transaction currency types allowed, or whether a posting posts a debit or credit value. Reference: <https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

#### **NEW QUESTION: 46**

Which organizational units are directly linked to a plant? (Choose two.)

- A. Storage location
- B. Credit control area
- C. Company code
- D. Sales office

**Answer: (SHOW ANSWER)**

Storage location and company code are two organizational units that are directly linked to a plant. A storage location represents a physical or logical place where materials are stored within a plant. A company code represents an independent legal entity that is required for external reporting. Reference: <https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

#### **NEW QUESTION: 47**

Which technology is used to integrate SAP S/4HANA Cloud with other SAP and non-SAP applications?

- A. SAP Change and Transport System
- B. SAP Landscape Transformation Replication Server
- C. Direct connectivity
- D. SQL Connect function

**Answer: (SHOW ANSWER)**

Direct connectivity is the technology that is used to integrate SAP S/4HANA Cloud with other SAP and non-SAP applications. Direct connectivity allows you to establish secure connections between SAP S/4HANA Cloud and other systems using HTTPS or RFC protocols. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/0c7d0a8a9f9e4d1f9a0c3c8e1f6b3e2d.html>

#### **NEW QUESTION: 48**

What are the available methods through which you can fill staging tables in the SAP HANA database of the target system? Note: There are 3 correct answers to this question.

- A. SAP Smart Data Access
- B. SAP SQL Anywhere
- C. Customer's ETL tools
- D. XML templates
- E. SAP HANA Smart Data Integration (SDI)

**Answer: A,C,E (LEAVE A REPLY)**

You can use the following methods to fill staging tables in the SAP HANA database of the target system:

SAP Smart Data Access

Customer's ETL tools

SAP HANA Smart Data Integration (SDI) SAP Smart Data Access allows you to access data from remote sources without replicating it in SAP HANA. Customer's ETL tools allow you to extract, transform, and load data from various sources into SAP HANA. SAP HANA Smart Data Integration (SDI) allows you to replicate data from remote sources into SAP HANA in real-time or batch mode. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/b6e2e2e06e4946ecad2ab27af385aa72.html>

#### **NEW QUESTION: 49**

After approving a journal entry as a processor, you see the system has marked the posting as failed.

How do you resolve this?

- A. Correct the indicated errors in the original entry and post it
- B. Ask the requester to correct the journal entry and resubmit it

- C. Ask the requester to create a new entry with the correct data and resubmit it
- D. Create a new journal entry with the correct data and post it

**Answer: A (LEAVE A REPLY)**

After approving a journal entry as a processor, you see the system has marked the posting as failed. To resolve this, you can correct the indicated errors in the original entry and post it. You do not need to ask the requester to correct or resubmit the entry, or create a new entry yourself. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

#### **NEW QUESTION: 50**

In which implementation phase do you perform data load preparation?

- A. Prepare
- B. Realize
- C. Explore
- D. Deploy

**Answer: (SHOW ANSWER)**

Data load preparation is performed in the Realize phase of the implementation project. This phase involves preparing and validating the data migration objects and performing data consistency checks.

Reference: <https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/9d1d6e0c6f4740a09ed5d3c3981b8f1d.html>

#### **NEW QUESTION: 51**

What are customers able to scope in SAP S/4HANA Cloud with Central Business Configuration (CBC)? (Choose three.)

- A. Non-standard scenarios
- B. Pre-defined scenario bundles
- C. Scope extensions
- D. Public sector processes
- E. CD Countries where business processes will run

**Answer: B,C,E (LEAVE A REPLY)**

Customers can scope pre-defined scenario bundles, scope extensions, and countries where business processes will run in SAP S/4HANA Cloud with Central Business Configuration (CBC). CBC does not support non-standard scenarios or public sector processes. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/5a3c7e1a2a2f4d9dbd6e0a2b1f2b6e3c.html>

#### **NEW QUESTION: 52**

What must you create when you build a communication scenario in SAP S/4HANA Cloud? Note: There are 3 correct answers to this question.

- A. Communication arrangement
- B. Communication interface

- C. Communication API
- D. Communication user
- E. Communication system

**Answer: A,C,E (LEAVE A REPLY)**

When you build a communication scenario in SAP S/4HANA Cloud, you must create the following:

Communication arrangement

Communication API

Communication system A communication arrangement is a configuration that defines how your system communicates with an external system using a specific communication scenario. A communication API is an application programming interface that allows you to access and exchange data between your system and an external system using standard protocols and formats. A communication system is a representation of an external system that contains information such as host name, port number, authentication method, etc. Reference:

[https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

#### **NEW QUESTION: 53**

Which tools support your customer to reduce days sales outstanding? 3 answers

- A. Collections Management
- B. Credit Management
- C. Dispute Management
- D. Funds Management
- E. Treasury Management

**Answer: A,B,C (LEAVE A REPLY)**

Collections Management, Credit Management, and Dispute Management are three tools that support your customer to reduce days sales outstanding. These tools allow you to monitor and manage your customer's credit risk, payment behavior, and dispute cases effectively and efficiently. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

#### **NEW QUESTION: 54**

Where can you find content to set up an integration if there is no SAP Best Practices content available?

- A. SAP BTP Cockpit
- B. SAP Fiori Apps Reference Library
- C. SAP API Business Hub
- D. SAP Extensibility Explorer

**Answer: (SHOW ANSWER)**

You can find content to set up an integration if there is no SAP Best Practices content available in the SAP API Business Hub. The SAP API Business Hub is a catalog of APIs, events, and integration flows that allow you to discover and consume services from SAP and selected partners. You can use the SAP API Business Hub to explore, test, and implement integrations between SAP S/4HANA Cloud and other

SAP Cloud solutions. Reference: [https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

**NEW QUESTION: 55**

Which feature is available with a resubmission in Collections & Dispute Management?

- A. It initiates the dispute resolution process for one or several invoices
- B. It documents the details of a customer's pledge to pay an invoice
- C. It transfers the dispute case to the collections worklist
- D. It provides a specific reason why a customer needs to be contacted again

**Answer: D (LEAVE A REPLY)**

A resubmission in Collections & Dispute Management is a feature that provides a specific reason why a customer needs to be contacted again. A resubmission allows you to schedule a follow-up activity for a customer contact and specify the resubmission reason and date. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

**NEW QUESTION: 56**

Which of the following fields is maintained on the general data segment of the customer businesspartner?

- A. House bank
- B. Bank key
- C. Lockbox
- D. Payment method supplement

**Answer: D (LEAVE A REPLY)**

Payment method supplement is one of the fields that is maintained on the general data segment of the customer business partner. Payment method supplement determines additional information for payment transactions such as payment card type or payment card number. Reference:

[https://help.sap.com/viewer/product/SAP\\_S4HANA\\_CLOUD/latest/en-US](https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US)

**NEW QUESTION: 57**

Which of the following details are maintained on the General Data segment of the business partner for a supplier?

- A. Tolerance Group
- B. Communication Language
- C. Payment Terms
- D. Reconciliation Account

**Answer: B (LEAVE A REPLY)**

Communication language is one of the details that are maintained on the General Data segment of the business partner for a supplier. Communication language determines the language used for correspondence with the supplier. Reference:

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html>

**NEW QUESTION: 58**

What hosts the Test Execution Service that drives automated business process testing in SAP S/4HANA Cloud?

- A. Business Technology Platform
- B. SAP Cloud Identity
- C. Manage Your Solution app
- D. SAP HANA Enterprise Cloud

**Answer: A (LEAVE A REPLY)**

The Test Execution Service that drives automated business process testing in SAP S/4HANA Cloud is hosted on the Business Technology Platform. The Business Technology Platform is an open platform that provides services for data management, analytics, application development, integration, and more.

Reference: <https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/bf3d6e0c6f4740a09ed5d3c3981b8f1d.html>

**NEW QUESTION: 59**

When processing a cross-company code transaction between 3 company codes, what is the minimum number of journal entries posted by the system?

- A. 4
- B. 1
- C. 3
- D. 6

**Answer: (SHOW ANSWER)**

When processing a cross-company code transaction between 3 company codes, the minimum number of journal entries posted by the system is 3. One journal entry is posted for each company code involved in the transaction, debiting or crediting the intercompany accounts accordingly. Reference:
