### NEW QUESTION: 1

You are changing a business catalog in a specific client.Which scope are you working in?

- A. Development
- B. Customizing
- C. Configuration
- D. SAP Standard

**Answer: B (LEAVE A REPLY)**

### NEW QUESTION: 2

Which of the Mowing deployment options allow modification of SAP source code even if not recommended?

Note There are 2 correct answers to this question

- A. SAP S/4HANA
- B. SAP S/4HANA Cloud extended edition
- C. SAP S/4HANA Cloud public edition
- D. SAP S/4HANA Cloud private edition

**Answer: A,D (LEAVE A REPLY)**

The deployment options that allow modification of SAP source code, though not recommended, include SAP S/4HANA (on-premise) and SAP S/4HANA Cloud private edition. Both these options provide the flexibility for organizations to modify SAP source code to meet specific business needs. However, such modifications are discouraged because they can complicate future upgrades and maintenance.References= SAP S/4HANA deployment options documentation

### NEW QUESTION: 3

In a new implementation, how is data migrated directly from an SAP ERP system to RISE with SAP S/4HANA Cloud, private edition?

- A. A Remote Function Call (RFC) connects the SAP ERP source system to the SAP S/4HANA Migration Cockpit.
- B. Point-to-point integration connects the SAP ERP source system to the SAP S/4HANA Migration Cockpit.
- C. Extract, Transform, and Load (ETL) tools are used to migrate data from the SAP ERP source system to RISE with SAP S/4HANA Cloud, private edition (through a separate SAP HANA staging database).
- D. The Software Update Manager (SUM) tool migrates the legacy database from the SAP ERP source system to RISE with SAP S/4HANA Cloud, private edition.

**Answer:** [\(SHOW ANSWER\)](#)

For data migration directly from an SAP ERP system to RISE with SAP S/4HANA Cloud, private edition, the use of Extract, Transform, and Load (ETL) tools is standard. This process involves extracting data from the existing SAP ERP system, transforming it to fit the new data structures of SAP S/4HANA, and then loading it into the SAP S/4HANA environment through a staging database. This method ensures data integrity and compatibility with the new system's architecture. References= This approach is outlined in SAP S/4HANA migration guidelines and supported by tools and best practices provided by SAP for ensuring a smooth transition.

### NEW QUESTION: 4

What is identified in a customer's system through the SAP Readiness Check? Note: There are 2 correct answers to this question

- A. Recommended SAP Business Technology Platform Extensibility Suite services
- B. Overview of financial data quality
- C. Recommended SAP API Business Hub prebuilt integration content
- D. Related simplification items and corresponding compatibility packages

**Answer:** [B,C \(LEAVE A REPLY\)](#)

### NEW QUESTION: 5

You are trying to analyze and prioritize custom code that needs to be adapted and optimized. Which technology do you use? Note: There are 2 correct answers to this item.

- A. Custom Code Migration SAP Fiori app
- B. SQL performance tuning worklist and SQL monitor
- C. SAP Readiness Check
- D. ABAP development tools in Eclipse

**Answer:** [\(SHOW ANSWER\)](#)

### NEW QUESTION: 6

You are preparing for an implementation project

What do you find in the SAP Roadmap Viewer? Note There are 2 correct answers to this question

- A. Business process flows
- B. Example project plan
- C. Scope item set-up instructions
- D. Relevant SAP Best Practices package

**Answer: A,D (LEAVE A REPLY)**

The SAP Roadmap Viewer provides users with a comprehensive set of tools and documentation to guide their implementation projects. Among the resources available, Business Process Flows help outline the step-by-step processes that should be followed during implementation, ensuring a structured and efficient approach.

Additionally, the Relevant SAP Best Practices package offers pre-configured solutions and guidelines that leverage SAP's industry insights to streamline implementation and reduce risks and costs. References= SAP Roadmap Viewer documentation

#### **NEW QUESTION: 7**

Which data migration options do you have for a new implementation of SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question.

- A. Migrate data using staging tables
- B. Migrate data using selective data transition
- C. Migrate data directly from SAP system
- D. Migrate data via Software Update Manager (SUM)

**Answer: A,C (LEAVE A REPLY)**

#### **NEW QUESTION: 8**

For which functional requirement would you choose RISE with SAP S/4HANA Cloud, private edition over RISE with SAP S/4HANA Cloud?

- A. Variant configuration
- B. Financial operations
- C. Advanced ATP
- D. Consumer industries

**Answer: D (LEAVE A REPLY)**

#### **NEW QUESTION: 9**

Which of the following security measures is the customer responsible for?

- A. Application-level user management
- B. Deactivation of SAP technical users
- C. Change logging through audit trails
- D. API management

**Answer: A (LEAVE A REPLY)**

Among the listed security measures, the customer is typically responsible for application-level user management. This includes setting up and managing user accounts, roles, and permissions within the SAP system to ensure that only authorized users have access to specific functionalities. It's crucial for maintaining the security and integrity of the application's data and operations. References= SAP security best practices documentation

#### **NEW QUESTION: 10**

A customer needs to move their system from the current version of SAP S/4HANA (on-premise) to SAP S/4HANA Cloud, private edition. What type of transition do you recommend?

- A. System Upgrade
- B. Lift & Shift
- C. System Conversion
- D. Selective Data Transition

**Answer: C ([LEAVE A REPLY](#))**

For a customer moving from SAP S/4HANA on-premise to SAP S/4HANA Cloud, private edition, the recommended transition type is a System Conversion. This approach involves converting the existing SAP system to the SAP S/4HANA Cloud, private edition without re-implementing the entire system. It allows the customer to retain their historical data and configurations while transitioning to the cloud environment. References= SAP S/4HANA transition options documentation

#### **NEW QUESTION: 11**

What are some characteristics of the SAP Integration Suite architecture model? Note: There are 2 correct answers to this question.

- A. Failover to be configured by customer
- B. Multitenancy with data isolation
- C. Virtualization and automated failover
- D. Single-tenant solution

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 12**

What are some services covered by the contract for SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question.

- A. Business process configuration
- B. Infrastructure management
- C. Technical managed services
- D. Managed Operations Control Center

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 13**

Which of the following activities are part of defining a customer specific organizational structure? Note:

There are 2 correct answers to this question.

- A. Use the SAP Solution Builder organizational structure functionalities
- B. Create a new company code for the relevant country
- C. Use transaction SPRO and SAP Reference IMG
- D. Activate SAP Best Practices for the specific customer country

**Answer: (SHOW ANSWER)**

#### **NEW QUESTION: 14**

What are some capabilities of Ariba Network in the SAP Business Network Starter Pack for RISE with SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question.

- A. Enabling suppliers and buyers to form relationships and conduct transactions over the internet
- B. Facilitating electronic processing of orders, invoices, and payment documents to suppliers
- C. Collecting and tracking equipment information in a cloud-based central repository
- D. Enabling companies to connect with business partners for intercompany collaboration through an open network built on SAP Business Technology Platform

**Answer: A,B (LEAVE A REPLY)**

The SAP Business Network Starter Pack for RISE with SAP S/4HANA Cloud, private edition, featuring Ariba Network, offers capabilities essential for modern procurement and supply chain operations. Ariba Network enables suppliers and buyers to establish relationships and conduct transactions online, streamlining processes like order placement, confirmation, and invoicing. This network supports the electronic processing of various documents, making it easier for companies to manage their procurement activities effectively and transparently. References= These functionalities are outlined in SAP Ariba documentation, which details how the Ariba Network facilitates these crucial procurement and supply chain interactions.

#### **NEW QUESTION: 15**

You are working on a Selective Data Transition project, where most of the solution is being redesigned. Which approach do you use?

- A. Shell Conversion
- B. Mix & Match
- C. Lift & Shift
- D. Dual-stack Split

**Answer: (SHOW ANSWER)**

#### **NEW QUESTION: 16**

What are some components included in an SAP Best Practice? Note: There are 2 correct answers to this question.

- A. Scope-item fact sheet
- B. Test Script
- C. Learning Journey access
- D. Relevant SAP Fiori apps

Answer: ([SHOW ANSWER](#))

**Valid E-S4CPE-2023 Dumps** shared by Actual4test.com for Helping Passing E-S4CPE-2023 Exam! Actual4test.com now offer the **newest E-S4CPE-2023 exam dumps**, the Actual4test.com E-S4CPE-2023 exam **questions have been updated** and **answers have been corrected** get the **newest** Actual4test.com E-S4CPE-2023 dumps with Test Engine here: [https://www.actual4test.com/E-S4CPE-2023\\_examcollection.html](https://www.actual4test.com/E-S4CPE-2023_examcollection.html) (**61 Q&As Dumps, 30%OFF Special Discount: Freepdfdumps**)

#### NEW QUESTION: 17

How do you transition to the new SAP S/4HANA output management framework during a system conversion to RISE with SAP S/4HANA Cloud, private edition?

- A. Set up the Business Communication Services for outbound communication.
- B. Set up SAP S/4HANA output control.
- C. Define the master forms with Adobe Document Services.
- D. Define required SAP S/4HANA output parameters.

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 18

When is a customer required to upgrade their SAP S/4HANA Cloud, private edition system?

- A. When two support packs have been released for the current base release.
- B. When the current base release has only 12 months of mainstream maintenance remaining
- C. When the base release falls out of mainstream maintenance
- D. When the latest base release is launched

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 19

What Application Lifecycle Management solution is included in the SAP Enterprise Support offering for RISE with SAP S/4HANA Cloud, private edition?

- A. SAP Solution Builder

- B. SAP Focused Run
- C. SAP Cloud ALM
- D. SAP Solution Manager

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 20**

You are working on a Selective Data Transition project, where most of the solution is being redesigned. Which approach do you use?

- A. Mix & Match
- B. Dual-stack Split
- C. Lift & Shift
- D. Shell Conversion

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 21**

What Application Lifecycle Management solution is included in the SAP Enterprise Support offering for RISE with SAP S/4HANA Cloud, private edition?

- A. SAP Solution Manager
- B. SAP Focused Run
- C. SAP Cloud ALM
- D. SAP Solution Builder

**Answer:** C ([LEAVE A REPLY](#))

SAP Cloud ALM is the Application Lifecycle Management solution included in the SAP Enterprise Support offering for RISE with SAP S/4HANA Cloud, private edition. This solution provides comprehensive tools and resources to support the full lifecycle of applications, from planning and implementation through operation and optimization. SAP Cloud ALM is specifically designed for cloud environments, offering tailored capabilities that enhance the efficiency and effectiveness of managing applications in the cloud. References= Information about SAP Cloud ALM and its integration into SAP support offerings can be found in SAP's official documentation on Application Lifecycle Management and SAP Enterprise Support services.

**NEW QUESTION: 22**

Which tool migrates the database and converts the data during a system conversion to SAP S/4HANA Cloud, private edition?

- A. Rapid Activation of SAP Fiori
- B. Software Update Manager
- C. Simplification Item Check
- D. Maintenance Planner

**Answer:** B ([LEAVE A REPLY](#))

### NEW QUESTION: 23

An SAP ECC customer is transitioning to SAP S/4HANA Cloud private edition. What must you consider regarding a solution for output management? Note: There are 2 correct answers to this question.

- A. The Electronic Data Interchange (EDI) output channel is not supported anymore
- B. The SAP Forms Service by Adobe is the only supported technology for output
- C. The new SAP S/4HANA output control and the old SAP ECC framework can co-exist
- D. The Smart Forms and SAPscript technologies are still supported

**Answer: B,C (LEAVE A REPLY)**

As part of the transition from SAP ECC to SAP S/4HANA Cloud, private edition, it is important to understand that SAP Forms Service by Adobe remains the only supported technology for output management, ensuring continuity and support for form processing. Additionally, the new SAP S/4HANA output control can co-exist with the old SAP ECC framework, providing a transitional path where both systems' output management functionalities are maintained during migration phases. This dual support enables businesses to adapt gradually without disruption to their existing output management processes. References= SAP S/4HANA output management documentation

### NEW QUESTION: 24

Which Application Programming Interfaces can you use in integration scenarios for RISE with SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question.

- A. SAP Application Interface Framework (AIF)
- B. IDoc
- C. File
- D. OData

**Answer: B,D (LEAVE A REPLY)**

### NEW QUESTION: 25

Which technologies detect critical performance hot spots and prioritize opportunities for custom code optimization?

- A. SQL performance tuning worklist and SQL monitor
- B. Obsolete Data Handling tools
- C. ABAP development tools in Eclipse
- D. Custom Code Migration SAP Fiori apps

**Answer: A (LEAVE A REPLY)**

The technologies specifically designed to detect critical performance hot spots and prioritize opportunities for custom code optimization in SAP S/4HANA Cloud, private edition, include the SQL performance tuning worklist and the SQL monitor. These tools are integral for analyzing database interactions and identifying inefficient or problematic SQL queries. They provide a comprehensive view of database performance and suggest

optimizations to enhance the efficiency of custom code, particularly where it interacts with the database. References= These tools are discussed within the context of performance optimization in SAP's official documentation for SAP S/4HANA Cloud, private edition, particularly emphasizing their role in maintaining and improving system performance

### **NEW QUESTION: 26**

What are some advantages for a customer when converting their existing SAP ECC system to RISE with SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question.

- A.** A rapid conversion of their existing SAP ERP/ECC environment to a modern, cloud-based architecture
- B.** Reimagining business processes and taking advantage of standardized best practices
- C.** Keeping their existing SAP ERP 6.0 version and minimizing the changes and risks during the migration to u cloud
- D.** Gaining the full Enterprise Management scope as a subscription

**Answer: A,B (LEAVE A REPLY)**

The transformation from SAP ECC to RISE with SAP S/4HANA Cloud, private edition, offers significant advantages. This includes a rapid conversion of existing SAP ERP/ECC environments to a modern, cloud-based architecture, which enhances performance and scalability. Additionally, it enables the reimagining of business processes through the adoption of standardized best practices, which can significantly improve operational efficiency and business agility. References= SAP S/4HANA Cloud, private edition implementation with SAP Activate S4CP01, S4C03 (2022), Sections on Conversion and Business Process Standardization.

### **NEW QUESTION: 27**

In which tool do you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- A.** Custom Fields app
- B.** Runtime Authoring mode (Adapt UI)
- C.** Custom CDS Views app
- D.** Extensibility Inventory app

**Answer: A (LEAVE A REPLY)**

The Custom Fields app is the appropriate tool for enabling customer-specific fields to be available for UIs and reports within the same business context. This app allows users to create and manage custom fields and then make them available for specific applications and reports by adjusting settings and enabling them for use. It provides a user-friendly interface for defining and assigning field properties relevant to different business scenarios. References= SAP documentation on Custom Fields and Logic app

### **NEW QUESTION: 28**

Which tool migrates the database and converts the data during a system conversion to SAP S/4HANA Cloud, private edition?

- A. Software Update Manager
- B. SAP S/4HANA Migration Cockpit
- C. SAP Data Services
- D. Custom Code Migration

**Answer: (SHOW ANSWER)**

#### **NEW QUESTION: 29**

What is identified in a customer's system through the SAP Readiness Check? Note: There are 2 correct answers to this question.

- A. Recommended SAP Business Technology Platform Extensibility Suite services
- B. Recommended SAP Fiori apps
- C. Business Warehouse extractor compatibility
- D. Recommended SAP API Business Hub prebuilt integration content

**Answer: (SHOW ANSWER)**

#### **NEW QUESTION: 30**

What are some components of the RISE with SAP offering? Note: There are 3 correct answers to this question.

- A. SAP Transformation Navigator
- B. SAP Business Process Intelligence Discovery Reports
- C. SAP Ariba Network
- D. SAP Readiness Check
- E. SAP Transportation Management

**Answer: B,D,E (LEAVE A REPLY)**

RISE with SAP offering includes several key components. SAP Business Process Intelligence Discovery Reports provide insights into existing processes and suggest improvements aligned with SAP best practices.

The SAP Readiness Check is a tool that evaluates the readiness of an existing SAP system for conversion to SAP S/4HANA, identifying potential challenges and requirements. SAP Transportation Management, included in the RISE with SAP bundle, offers comprehensive transportation planning and management functionalities integrated into the SAP ecosystem. References= SAP S/4HANA Cloud, private edition implementation with SAP Activate S4CP01, S4C03 (2022), Sections on RISE Components and SAP Readiness Check.

#### **NEW QUESTION: 31**

Which of the following are key-user in-app extensions that can be completed in SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question.

- A. Create a custom application UI with UI Adaptation at Runtime

- B. Define a Core Data Service (CDS) view with the ABAP Development Tools in Eclipse
- C. Define a custom table in the Custom Business Objects SAP Fiori app
- D. Create a custom object with the Business Object Processing Framework (BOPF)

**Answer:** ([SHOW ANSWER](#))

**Valid E-S4CPE-2023 Dumps** shared by Actual4test.com for Helping Passing E-S4CPE-2023 Exam! Actual4test.com now offer the **newest E-S4CPE-2023 exam dumps**, the Actual4test.com E-S4CPE-2023 exam **questions have been updated** and **answers have been corrected** get the **newest** Actual4test.com E-S4CPE-2023 dumps with Test Engine here: [https://www.actual4test.com/E-S4CPE-2023\\_examcollection.html](https://www.actual4test.com/E-S4CPE-2023_examcollection.html) (61 Q&As Dumps, **30%OFF Special Discount: Freepdfdumps**)

#### **NEW QUESTION: 32**

How often is a release upgrade required for RISE with SAP S/4HANA Cloud, private edition?

- A. When the base release falls out of mainstream maintenance
- B. When the latest base release is launched
- C. When the current base release has only 12 months of mainstream maintenance remaining
- D. There is no time requirement for upgrades

**Answer: A** ([LEAVE A REPLY](#))

For RISE with SAP S/4HANA Cloud, private edition, a release upgrade is required when the base release falls out of mainstream maintenance. This policy ensures that all system components remain fully supported and benefit from the latest security patches, performance improvements, and functionality enhancements. By upgrading in this manner, organizations ensure compliance with SAP's support structures and minimize risks associated with running unsupported software. References= This upgrade policy is detailed in SAP's maintenance and support documentation, which outlines the lifecycle management practices for SAP S/4HANA Cloud, private edition.

#### **NEW QUESTION: 33**

Which of the following are key-user in-app extensions that can be completed in RISE with SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question.

- A. Define a Core Data Service (CDS) view with the ABAP Development Tools in Eclipse.
- B. Create a custom object with the Business Object Processing Framework (BOPF).
- C. Define a custom table in the Custom Business Objects SAP Fiori app.
- D. Create a custom application UI with UI Adaptation at Runtime.

**Answer: A,C** ([LEAVE A REPLY](#))

**NEW QUESTION: 34**

For which SAP S/4HANA deployment options would you always choose a greenfield approach? Note: There are 2 correct answers to this question.

- A. SAP S/4HANA On Premise
- B. SAP S/4HANA Cloud, private edition
- C. SAP S/4HANA Cloud, extended edition
- D. SAP S/4HANA Cloud

**Answer: C,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 35**

Which of the following security measures is the customer responsible for?

- A. API management
- B. Change logging through audit trails
- C. Application-level user management
- D. Deactivation of SAP technical users

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 36**

In which type of extensibility are extensions loosely coupled?

- A. Side-by-Side Extensibility
- B. Classic Extensibility
- C. Key User Extensibility
- D. Developer Extensibility

**Answer: A ([LEAVE A REPLY](#))**

In the context of SAP systems, Side-by-Side Extensibility refers to the type of extensions that are loosely coupled. This approach leverages the SAP Cloud Platform to create and run extensions independent of the core SAP system. It provides a high degree of flexibility and agility, allowing businesses to develop and deploy enhancements without impacting the underlying core software. This method is particularly advantageous for maintaining system integrity and ease of upgrades. References= SAP documentation on system extensibility

**NEW QUESTION: 37**

Which of the following are key-user in-app extensions that can be completed in RISE with SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question.

- A. Define a custom table in the Custom Business Objects SAP Fiori app.
- B. Create a custom application UI with UI Adaptation at Runtime.
- C. Define a Core Data Service (CDS) view with the ABAP Development Tools in Eclipse.
- D. Create a custom object with the Business Object Processing Framework (BOPF).

**Answer: A,B ([LEAVE A REPLY](#))**

In RISE with SAP S/4HANA Cloud, private edition, key-user in-app extensions allow for significant customization within the provided framework to meet specific business needs. Two such capabilities are defining custom tables through the Custom Business Objects SAP Fiori app, which enables users to create and manage their own database tables within the system, and creating custom application UIs with UI Adaptation at Runtime, which allows for modifications to the user interface of applications directly in the live system without traditional development processes. References= These features are outlined in the official SAP documentation for SAP S/4HANA Cloud, private edition, which describes the scope and capabilities of in-app extensions available to key users.

### **NEW QUESTION: 38**

Which of the following activities are part of defining a customer specific organizational structure? Note There are 2 correct answers to this question

- A. Activate SAP Best Practices for the specific customer country
- B. Use transaction SPRO and SAP Reference IMG
- C. Use the SAP Solution Builder organizational structure functionalities.
- D. Create a new company code for the relevant country

**Answer: (SHOW ANSWER)**

Defining a customer-specific organizational structure involves several critical activities. One key step is using transaction SPRO and the SAP Reference IMG (Implementation Guide), which provides the necessary tools for configuring all parts of the system according to the organization's needs. Additionally, creating a new company code for the relevant country is essential to tailor the system for local legal and business requirements, reflecting the organizational structure specific to that market. References= SAP ERP configuration documentation

### **NEW QUESTION: 39**

For which SAP S/4HANA deployments are the RISE with SAP services offered? Note: There are 2 correct answers to this question.

- A. SAP S/4HANA Cloud, public edition
- B. SAP S/4HANA on HANA Enterprise Cloud
- C. SAP S/4HANA Cloud, private edition
- D. SAP S/4HANA

**Answer: (SHOW ANSWER)**

### **NEW QUESTION: 40**

A customer needs to move their system from the current version of SAP S/4HANA (on-premise) to SAP S/4HANA Cloud, private edition. What type of transition do you recommend?

- A. Selective Data Transition
- B. System Conversion

C. System Upgrade

D. Lift & Shift

**Answer: A ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 41**

What solution for managing the application lifecycle is included in the SAP Enterprise Support offering for SAP S/4HANA Cloud, private edition?

A. OSAP Focused Run

B. SAP Cloud ALM

C. SAP Solution Manager

D. SAP Focused Build

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 42**

Which features does the Custom Code Migration SAP Fiori app provide? Note There are 2 correct answers to this question

A. Identify SAP Fiori apps that best fit the customer's needs based on historical transaction volume and usage

B. Get statistical information about the findings in customer's development objects that need to be adapted

C. Check the customer defined artifacts against the simplification database to analyze which items do not comply with SAP S/4HANA

D. Analyze how many business functions are active in the customer's system and whether they are compatible

**Answer: B,C ([LEAVE A REPLY](#))**

The Custom Code Migration SAP Fiori app provides valuable functionalities to facilitate the transition to SAP S/4HANA. It includes tools for gathering statistical information about the findings in the customer's development objects, highlighting areas that need modification or adaptation. Additionally, it features a compatibility check against the simplification database, which identifies custom code that does not comply with SAP S/4HANA standards, aiding in efficient and compliant system upgrades. References= SAP Fiori app documentation on Custom Code Migration

#### **NEW QUESTION: 43**

You are trying to analyze and prioritize custom code that needs to be adapted and optimized. Which technology do you use? Note: There are 2 correct answers to this item.

A. Custom Code Migration SAP Fiori app

B. SAP Readiness Check

C. ABAP development tools in Eclipse

D. SQL performance tuning worklist and SQL monitor

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 44**

For which SAP S/4HANA deployments are the RISE with SAP services offered? Note:  
There are 2 correct answers to this question.

- A.** SAP S/4HANA on HANA Enterprise Cloud
- B.** SAP S/4HANA Cloud, public edition
- C.** SAP S/4HANA
- D.** SAP S/4HANA Cloud, private edition

**Answer: A,C (LEAVE A REPLY)**

#### **NEW QUESTION: 45**

What are some characteristics of RISE with SAP S/4HANA Cloud, private edition? Note:  
There are 2 correct answers to this question.

- A.** It has the lowest TCO across all SAP S/4HANA Cloud offerings.
- B.** It supports full flexibility with system enhancements and modifications.
- C.** It allows existing SAP ERP customers to retain their development investments.
- D.** It includes SAP Central Business Configuration to manage parallel implementation projects.

**Answer: (SHOW ANSWER)**

#### **NEW QUESTION: 46**

How is data migrated directly from an SAP ERP system to SAP S/4HANA Cloud, private edition?

- A.** Extract, Transform, and Load (ETL) tools are used to migrate data from the SAP ERP source system to SAP S/4HANA Cloud, private edition (through a separate SAP HANA staging database)
- B.** The Software Update Manager (SUM) tool migrates the legacy database from the SAP ERP source system to SAP S/4HANA Cloud, private edition
- C.** A Remote Function Call (RFC) connects the SAP ERP source system to the SAP S/4HANA Migration Cockpit.
- D.** SAP Integration Suite connects the SAP ERP source system to the SAP S/4HANA Migration Cockpit.

**Answer: C (LEAVE A REPLY)**

**Valid E-S4CPE-2023 Dumps** shared by Actual4test.com for Helping Passing E-S4CPE-2023 Exam! Actual4test.com now offer the **newest E-S4CPE-2023 exam dumps**, the Actual4test.com E-S4CPE-2023 exam **questions have been updated** and **answers have been corrected** get the **newest** Actual4test.com E-S4CPE-2023 dumps with Test Engine here: <https://www.actual4test.com/E->

**NEW QUESTION: 47**

When do you use the SAP Fiori Launchpad App Manager?

- A. To maintain technical catalogs
- B. To view where launchpad content is used
- C. To create custom catalogs
- D. To manage business catalogs with references to Fiori app tiles in technical catalogs

**Answer: B (LEAVE A REPLY)**

The SAP Fiori Launchpad App Manager is used primarily to manage and oversee where launchpad content is utilized within the system. This tool provides administrators with visibility into how and where various components of the Fiori launchpad are deployed, helping in the effective management and configuration of user access and customization of the launchpad experience. References= This usage is described in SAP Fiori administration tools documentation, which outlines the roles and functionalities of different management tools within the Fiori ecosystem.

**NEW QUESTION: 48**

What are some components included in an SAP Best Practice? Note: There are 2 correct answers to this question.

- A. Scope-item fact sheet
- B. Test Script
- C. Relevant SAP Fiori apps
- D. Learning Journey access

**Answer: A,B (LEAVE A REPLY)**

**NEW QUESTION: 49**

Where do you identify new and changed features in the latest release of SAP S/4HANA?

Note: There are

2 correct answers to this question.

- A. Feature Scope Description
- B. What's New Viewer
- C. Customer Influence Portal
- D. SAP Road Maps

**Answer: A,B (LEAVE A REPLY)**

**NEW QUESTION: 50**

Which features does SAP User Experience Management by Knoa provide? Note: There are 2 correct answers to this question.

- A. Integration with SAP Learning Hub

- B. Visibility into the lifecycle of errors
- C. 24 x 7 analysis of user interactions
- D. Automatic ticket generation in the event of repeated operating errors

**Answer: (SHOW ANSWER)**

**NEW QUESTION: 51**

You want to deploy SAP Best Practices in a new implementation of RISE with SAP S/4HANA Cloud, private edition. What are some of the activities completed by SAP? Note: There are 3 correct answers to this question.

- A. Managing the additional license requirements
- B. Initial business process scoping with the Digital Discovery Assessment
- C. Activation of required business functions in client 000
- D. Best Practice scope item activation in the system
- E. Provisioning of a client with the desired client setup alternative

**Answer: A,C,E (LEAVE A REPLY)**

**NEW QUESTION: 52**

What are some components of the RISE with SAP offering? Note: There are 3 correct answers to this question.

- A. SAP Transportation Management
- B. SAP Business Process Intelligence Discovery Reports

**NEW QUESTION: 54**

What are prerequisites if you want to transfer data with the Migrate Your Data - Migration Cockpit app using a separate SAP HANA database in RISE with SAP S/4HANA Cloud? Note: There are 2 correct answers to this question.

- A. You have to activate a certain scope item.

- B. You have to set up the integration.
- C. You have to have developer skills.
- D. You have to create the migration objects.

**Answer: (SHOW ANSWER)**

When using the Migrate Your Data - Migration Cockpit app with a separate SAP HANA database in RISE with SAP S/4HANA Cloud, it's necessary to activate specific scope items which enable the functionalities required for data migration. Additionally, creating custom migration objects is essential for defining how data will be structured and handled during the migration, ensuring that it fits the new system's requirements. References= These prerequisites are specified in the SAP S/4HANA Cloud implementation guides, which detail the setup and use of the Migration Cockpit for effective data transfers.

### **NEW QUESTION: 55**

You need to integrate the headquarters of a company running on SAP S/4HANA Cloud, private edition with a subsidiary running on SAP S-4HANA Cloud public edition Which Integration technologies do you use? Note There are 2 correct answers to this question

- A. SAP Integration Suite
- B. SAP Cloud Connector
- C. SAP Open Connectors
- D. SAP Cloud Integration Automation Service

**Answer: A,D (LEAVE A REPLY)**

For integrating the headquarters of a company running on SAP S/4HANA Cloud, private edition with a subsidiary running on SAP S/4HANA Cloud public edition, the SAP Integration Suite and SAP Cloud Integration Automation Service are recommended. The SAP Integration Suite, formerly known as SAP Cloud Platform Integration, offers a comprehensive toolset for connecting different SAP environments seamlessly. Additionally, the SAP Cloud Integration Automation Service provides tools for automating integration tasks, ensuring consistent data flow and reducing manual errors.
