NEW QUESTION: 1

What are prerequisites if you want to transfer data with the Migrate Your Data - Migration Cockpit app using a separate SAP HANA database in RISE with SAP S/4HANA Cloud?

Note: There are 2 correct answers to this question.

- A. You have to have developer skills.
- B. You have to activate a certain scope item.
- C. You have to set up the integration.
- D. You have to create the migration objects.

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 2

What is included in a launchpad app descriptor?

- A. Target mapping to one or more business catalogs
- B. Tile mapping to one or more business roles
- C. Target mapping to one or more tiles
- D. Tile mapping to one or more technical catalogs

Answer: C (LEAVE A REPLY)

NEW QUESTION: 3

In a new implementation, how is data migrated directly from an SAP ERP system to RISE with SAP S/4HANA Cloud, private edition?

- A. A Remote Function Call (RFC) connects the SAP ERP source system to the SAP S/4HANA Migration Cockpit.

- B.** Point-to-point integration connects the SAP ERP source system to the SAP S/4HANA Migration Cockpit.
- C.** Extract, Transform, and Load (ETL) tools are used to migrate data from the SAP ERP source system to RISE with SAP S/4HANA Cloud, private edition (through a separate SAP HANA staging database).
- D.** The Software Update Manager (SUM) tool migrates the legacy database from the SAP ERP source system to RISE with SAP S/4HANA Cloud, private edition.

Answer: ([SHOW ANSWER](#))

For data migration directly from an SAP ERP system to RISE with SAP S/4HANA Cloud, private edition, the use of Extract, Transform, and Load (ETL) tools is standard. This process involves extracting data from the existing SAP ERP system, transforming it to fit the new data structures of SAP S/4HANA, and then loading it into the SAP S/4HANA environment through a staging database. This method ensures data integrity and compatibility with the new system's architecture. References= This approach is outlined in SAP S/4HANA migration guidelines and supported by tools and best practices provided by SAP for ensuring a smooth transition.

NEW QUESTION: 4

Which tool identifies custom code that requires adaptation during a system conversion?

- A.** SAP Readiness Check
- B.** SAP Enable Now
- C.** SAP Intelligent Robotic Process Automation
- D.** SAP Solution Builder

Answer: **A** ([LEAVE A REPLY](#))

NEW QUESTION: 5

What are some prerequisites if you want to transfer data with the Migrate Your Data - Migration Cockpit app using a separate SAP HANA database in SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question

- A.** You have to create the migration objects
- B.** You have to create the migration projects
- C.** You have to set up the integration.
- D.** You have to activate a certain scope item.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

Which of the following activities are part of defining a customer specific organizational structure? Note:

There are 2 correct answers to this question.

- A.** Create a new company code for the relevant country
- B.** Activate SAP Best Practices for the specific customer country

- C. Use the SAP Solution Builder organizational structure functionalities
- D. Use transaction SPRO and SAP Reference IMG

Answer: (SHOW ANSWER)

NEW QUESTION: 7

Which tool migrates the database and converts the data during a system conversion to SAP S/4HANA Cloud, private edition?

- A. Simplification Item Check
- B. Software Update Manager
- C. Maintenance Planner
- D. Rapid Activation of SAP Fiori

Answer: B (LEAVE A REPLY)

NEW QUESTION: 8

How can you check the status of the latest backup for your SAP S/4HANA systems?

- A. Open an OSS message under the component HEC-SRV
- B. Access the Backup Status app in the SAP ONE Support Launchpad
- C. Call the transaction DBACOCKPIT in the SAP S/4HANA system
- D. Access the Backup Status app in SAP for Me

Answer: D (LEAVE A REPLY)

To check the status of the latest backup for SAP S/4HANA systems, users can access the Backup Status app in SAP for Me. This application provides a centralized and comprehensive view of backup activities across all SAP services, allowing users to monitor backup statuses easily and ensure that data protection measures are effectively in place. References= The functionality of the Backup Status app is outlined in SAP's documentation for system administration and monitoring, which guides users on how to utilize SAP for Me for various administrative tasks.

NEW QUESTION: 9

You are trying to analyze and prioritize custom code that needs to be adapted and optimized. Which technology do you use? Note: There are 2 correct answers to this item.

- A. ABAP development tools in Eclipse
- B. SQL performance tuning worklist and SQL monitor
- C. Custom Code Migration SAP Fiori app
- D. SAP Readiness Check

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 10

How often is a release upgrade required for RISE with SAP S/4HANA Cloud, private edition?

- A. When the current base release has only 12 months of mainstream maintenance remaining
- B. When the latest base release is launched
- C. There is no time requirement for upgrades
- D. When the base release falls out of mainstream maintenance

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 11

Which features does SAP User Experience Management by Knoa provide? Note: There are 2 correct answers to this question.

- A. Visibility into the lifecycle of errors
- B. Integration with SAP Learning Hub
- C. 24 x 7 analysis of user interactions
- D. Automatic ticket generation in the event of repeated operating errors

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

What are some relevant activities for an SAP S/4HANA Cloud, private edition upgrade?

Note: There are 2 correct answers to this question

- A. Customer requests the upgrade as part of the yearly entitlement.
- B. SAP informs the customer when a new upgrade is available.
- C. SAP automatically upgrades the system within the agreed maintenance windows.
- D. SAP performs the technical upgrade tasks and the customer is responsible for additional tasks.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 13

Where can you maintain all customer-specific business processes?

- A. SAP GUI Backend
- B. SAP Cloud ALM for Implementation
- C. SAP Solution Builder
- D. SAP Solution Manager

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 14

Which tool migrates the database and converts the data during a system conversion to SAP S/4HANA Cloud, private edition?

- A. SAP Data Services
- B. Custom Code Migration
- C. Software Update Manager
- D. SAP S/4HANA Migration Cockpit

Answer: C (LEAVE A REPLY)

NEW QUESTION: 15

In which type of extensibility are extensions loosely coupled?

- A. Side-by-Side Extensibility
- B. Classic Extensibility
- C. Key User Extensibility
- D. Developer Extensibility

Answer: A (LEAVE A REPLY)

In the context of SAP systems, Side-by-Side Extensibility refers to the type of extensions that are loosely coupled. This approach leverages the SAP Cloud Platform to create and run extensions independent of the core SAP system. It provides a high degree of flexibility and agility, allowing businesses to develop and deploy enhancements without impacting the underlying core software. This method is particularly advantageous for maintaining system integrity and ease of upgrades. References= SAP documentation on system extensibility

NEW QUESTION: 16

For which SAP S/4HANA deployments are the RISE with SAP services offered? Note: There are 2 correct answers to this question.

- A. SAP S/4HANA On Premise
- B. SAP S/4HANA Private Cloud
- C. SAP S/4HANA Public Cloud
- D. SAP S/4HANA on HANA Enterprise Cloud

Answer: (SHOW ANSWER)

RISE with SAP services are offered for deployments that include SAP S/4HANA Private Cloud and SAP S/4HANA on HANA Enterprise Cloud. These services are tailored to provide comprehensive support and infrastructure management for cloud environments, ensuring that businesses can leverage cloud benefits like scalability and managed services effectively while running SAP S/4HANA. These options highlight SAP's commitment to supporting varied deployment strategies that meet diverse organizational needs. References= The inclusion of these deployment options in the scope of RISE with SAP services is detailed in SAP's service descriptions and implementation guides for SAP S/4HANA Cloud.

dumps with Test Engine here:

https://www.actual4test.com/E_S4CPE_2023_examcollection.html (61 Q&As Dumps, **30%OFF Special Discount: Freepdfdumps**)

NEW QUESTION: 17

Which of the following are key-user in-app extensions that can be completed in SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question.

- A. Define a Core Data Service (CDS) view with the ABAP Development Tools in Eclipse
- B. Create a custom application UI with UI Adaptation at Runtime
- C. Create a custom object with the Business Object Processing Framework (BOPF)
- D. Define a custom table in the Custom Business Objects SAP Fiori app

Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 18

In which tool do you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- A. Custom Fields app
- B. Runtime Authoring mode (Adapt UI)
- C. Custom CDS Views app
- D. Extensibility Inventory app

Answer: (SHOW ANSWER)

The Custom Fields app is the appropriate tool for enabling customer-specific fields to be available for UIs and reports within the same business context. This app allows users to create and manage custom fields and then make them available for specific applications and reports by adjusting settings and enabling them for use. It provides a user-friendly interface for defining and assigning field properties relevant to different business scenarios. References= SAP documentation on Custom Fields and Logic app

NEW QUESTION: 19

When do you use the SAP Fiori Launchpad App Manager?

- A. To maintain technical catalogs
- B. To create custom catalogs
- C. To view where launchpad content is used
- D. To manage business catalogs with references to Fiori app tiles in technical catalogs

Answer: A (LEAVE A REPLY)

NEW QUESTION: 20

How is data migrated directly from an SAP ERP system to SAP S/4HANA Cloud, private edition?

- A. A Remote Function Call (RFC) connects the SAP ERP source system to the SAP S/4HANA Migration Cockpit.

B. The Software Update Manager (SUM) tool migrates the legacy database from the SAP ERP source system to SAP S/4HANA Cloud, private edition

C. SAP Integration Suite connects the SAP ERP source system to the SAP S/4HANA Migration Cockpit.

D. Extract, Transform, and Load (ETL) tools are used to migrate data from the SAP ERP source system to SAP S/4HANA Cloud, private edition (through a separate SAP HANA staging database)

Answer: D (LEAVE A REPLY)

NEW QUESTION: 21

How do you transition to the new SAP S/4HANA output management framework during a system conversion to RISE with SAP S/4HANA Cloud, private edition?

A. Define the master forms with Adobe Document Services.

B. Define required SAP S/4HANA output parameters.

C. Set up SAP S/4HANA output control.

D. Set up the Business Communication Services for outbound communication.

Answer: C (LEAVE A REPLY)

When transitioning to the new SAP S/4HANA output management framework during a system conversion to RISE with SAP S/4HANA Cloud, private edition, the key step is to set up SAP S/4HANA output control. This involves configuring the output management settings to align with the new system's architecture, which is designed to offer enhanced capabilities for handling document output, such as extensibility, multi-tenancy, and configuration without modifications. References= This process is detailed in SAP S/4HANA transition guides, which describe the new output management features and configuration steps.

NEW QUESTION: 22

Which of the following security measures is the customer responsible for?

A. Application-level user management

B. Deactivation of SAP technical users

C. Change toggling through audit trails

D. API management

Answer: A (LEAVE A REPLY)

Among the listed security measures, the customer is typically responsible for application-level user management. This includes setting up and managing user accounts, roles, and permissions within the SAP system to ensure that only authorized users have access to specific functionalities. It's crucial for maintaining the security and integrity of the application's data and operations. References= SAP security best practices documentation

NEW QUESTION: 23

When do you use the SAP Fiori Launchpad App Manager?

- A. To maintain technical catalogs
- B. To view where launchpad content is used
- C. To create custom catalogs
- D. To manage business catalogs with references to Fiori app tiles in technical catalogs

Answer: B (LEAVE A REPLY)

The SAP Fiori Launchpad App Manager is used primarily to manage and oversee where launchpad content is utilized within the system. This tool provides administrators with visibility into how and where various components of the Fiori launchpad are deployed, helping in the effective management and configuration of user access and customization of the launchpad experience. References= This usage is described in SAP Fiori administration tools documentation, which outlines the roles and functionalities of different management tools within the Fiori ecosystem.

NEW QUESTION: 24

Which features does SAP User Experience Management by Knoa provide? Note: There are 2 correct answers to this question.

- A. Automatic ticket generation in the event of repeated operating errors
- B. Visibility into the lifecycle of errors
- C. 24 x 7 analysis of user interactions
- D. Integration with SAP Learning Hub

Answer: A,C (LEAVE A REPLY)

SAP User Experience Management by Knoa provides features aimed at enhancing the monitoring and support of SAP systems. One of the key features is the automatic generation of support tickets when repeated operating errors occur, facilitating rapid response and issue resolution. Additionally, the tool performs a 24 x 7 analysis of user interactions, which helps in identifying usage patterns, operational inefficiencies, and areas for improvement in real-time. This continuous analysis supports proactive management and optimization of the user experience across SAP environments. References= These functionalities are highlighted in product documentation and user guides for SAP User Experience Management by Knoa, emphasizing their role in improving system usability and support.

NEW QUESTION: 25

What are some characteristics of the SAP Integration Suite architecture model? Note: There are 2 correct answers to this question.

- A. Single-tenant solution
- B. Failover to be configured by customer
- C. Multitenancy with data isolation
- D. Virtualization and automated failover

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 26

Which tool migrates the database and converts the data during a system conversion to SAP S/4HANA Cloud, private edition?

- A. Software Update Manager
- B. Maintenance Planner
- C. Rapid Activation of SAP Fiori
- D. Simplification Item Check

Answer: (SHOW ANSWER)

The Software Update Manager (SUM) is the primary tool used for migrating the database and converting the data during a system conversion to SAP S/4HANA Cloud, private edition. It handles both the technical migration and the transformation processes needed to align the legacy system data structures with those required by SAP S/4HANA, ensuring that data integrity and system functionality are maintained throughout the conversion process. References= The capabilities and use of SUM for system conversions are detailed in SAP migration guidelines and training materials.

NEW QUESTION: 27

What are some components included in an SAP Best Practice? Note: There are 2 correct answers to this question.

- A. Relevant SAP Fiori apps
- B. Scope-item fact sheet
- C. Learning Journey access
- D. Test Script

Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 28

What are some services covered by the contract for RISE with SAP S/4HANA Cloud, private edition? Note:

There are 2 correct answers to this question.

- A. Managed Operations Control Center
- B. Infrastructure management
- C. Business process configuration
- D. Technical managed services

Answer: B,D (LEAVE A REPLY)

The contract for RISE with SAP S/4HANA Cloud, private edition includes various services to support the operational aspects of the platform. Infrastructure management is a critical service, ensuring that all hardware and network resources are appropriately maintained and optimized for performance and security. Technical managed services are also provided, which encompass the ongoing management of the software environment, including updates, patches, and technical support to ensure the system runs efficiently and issues are resolved swiftly. References= These services are specified in the contractual

agreements and service descriptions provided by SAP for RISE with SAP S/4HANA Cloud, private edition, highlighting the support and maintenance commitments.

NEW QUESTION: 29

How do you transport tested configurations and extensions in RISE with SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question.

- A. Export Software Collection app
- B. Register Extensions for Transport app
- C. Configure Software Packages app
- D. Import Collection app

Answer: ([SHOW ANSWER](#))

In RISE with SAP S/4HANA Cloud, private edition, transporting tested configurations and extensions involves specific apps designed to handle these tasks. The "Export Software Collection app" is used to compile and export configurations that have been tested and are ready for deployment. Additionally, the "Register Extensions for Transport app" is essential for managing and transporting custom extensions safely and effectively across different environments. References= These processes and tools are described in the SAP S/4HANA Cloud, private edition administration guides, focusing on system configuration and management.

NEW QUESTION: 30

Which of the following deployment options allow modification of SAP source code, even if not recommended? Note: There are 2 correct answers to this question.

- A. SAP S/4HANA Cloud, public edition
- B. SAP S/4HANA
- C. SAP S/4HANA Cloud, extended edition
- D. SAP S/4HANA Cloud, private edition

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 31

You are trying to analyze and prioritize custom code that needs to be adapted and optimized. Which technology do you use? Note: There are 2 correct answers to this item.

- A. ABAP development tools in Eclipse
- B. Custom Code Migration SAP Fiori app
- C. SQL performance tuning worklist and SQL monitor
- D. SAP Readiness Check

Answer: ([SHOW ANSWER](#))

Valid E_S4CPE_2023 Dumps shared by Actual4test.com for Helping Passing E_S4CPE_2023 Exam! NEW QUESTION: 32

What are prerequisites if you want to transfer data with the Migrate Your Data - Migration Cockpit app using a separate SAP HANA database in RISE with SAP S/4HANA Cloud?

Note: There are 2 correct answers to this question.

- A. You have to activate a certain scope item.
- B. You have to set up the integration.
- C. You have to have developer skills.
- D. You have to create the migration objects.

Answer: (SHOW ANSWER)

When using the Migrate Your Data - Migration Cockpit app with a separate SAP HANA database in RISE with SAP S/4HANA Cloud, it's necessary to activate specific scope items which enable the functionalities required for data migration. Additionally, creating custom migration objects is essential for defining how data will be structured and handled during the migration, ensuring that it fits the new system's requirements. References= These prerequisites are specified in the SAP S/4HANA Cloud implementation guides, which detail the setup and use of the Migration Cockpit for effective data transfers.

NEW QUESTION: 33

You are preparing for an implementation project. What do you find in the SAP Roadmap Viewer? Note:

There are 2 correct answers to this question.

- A. Relevant SAP Best Practices package
- B. Example project plan
- C. Business process flows
- D. Scope item set-up instructions

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 34

Which Application Programming Interfaces can you use in integration scenarios for RISE with SAP S/4HANA Cloud, private edition? Note: There are 2 correct answers to this question.

- A. IDoc

- B. File
- C. SAP Application Interface Framework (AIF)
- D. OData

Answer: A,D (LEAVE A REPLY)

In integration scenarios for RISE with SAP S/4HANA Cloud, private edition, two primary Application Programming Interfaces (APIs) used are IDoc and OData. IDoc, or Intermediate Document, is a standard data structure for electronic data interchange between application programs written for SAP and between an SAP application and an external program. OData, or Open Data Protocol, provides a uniform way to expose, structure, and manipulate data on the web, and is widely used to integrate with SAP and non-SAP applications in a standard format. References= These APIs are fundamental components discussed in SAP integration strategy documents, particularly emphasizing their roles in enabling smooth and effective communication across different systems.

NEW QUESTION: 35

What are some characteristics of the SAP Integration Suite architecture model Note There are 2 correct answers to this question.

- A. Multitenancy with data isolation
- B. Visualization and automated failover
- C. Single-tenant solution
- D. Failover to be configured by customer

Answer: A,B (LEAVE A REPLY)

The SAP Integration Suite architecture model is characterized by several key features aimed at enhancing scalability and reliability. Multitenancy with data isolation ensures that multiple clients can use the system simultaneously without their data interfering with each other, providing robust security and privacy.

Furthermore, the architecture includes advanced features like visualization tools for monitoring and automated failover mechanisms to ensure continuous operation without human intervention, thereby improving system resilience and uptime. References= SAP Integration Suite architecture documentation

NEW QUESTION: 36

Through which tools can you launch the SAP Cloud Integration Automation Service? Note: There are 2 correct answers to this question.

- A. SAP Maintenance Planner
- B. SAP API Business Hub
- C. SAP Solution Manager
- D. SAP Cloud ALM

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 37

Which of the following services are performed by a partner or by SAP through Cloud Application Services?

- A. Health Check Services
- B. Infrastructure Operation Management
- C. SAP Fiori App Configuration
- D. System Monitoring

Answer: (SHOW ANSWER)

NEW QUESTION: 38

You need to integrate the headquarters of a company running on SAP S/4HANA Cloud, private edition with a subsidiary running on SAP S-4HANA Cloud public edition Which Integration technologies do you use? Note There are 2 correct answers to this question

- A. SAP Integration Suite
- B. SAP Cloud Connector
- C. SAP Open Connectors
- D. SAP Cloud Integration Automation Service

Answer: A,D (LEAVE A REPLY)

For integrating the headquarters of a company running on SAP S/4HANA Cloud, private edition with a subsidiary running on SAP S/4HANA Cloud public edition, the SAP Integration Suite and SAP Cloud Integration Automation Service are recommended. The SAP Integration Suite, formerly known as SAP Cloud Platform Integration, offers a comprehensive toolset for connecting different SAP environments seamlessly. Additionally, the SAP Cloud Integration Automation Service provides tools for automating integration tasks, ensuring consistent data flow and reducing manual errors. References= SAP Integration technology documentation

NEW QUESTION: 39

Which technologies detect critical performance hot spots and prioritize opportunities for custom code optimization?

- A. SQL performance tuning worklist and SQL monitor
- B. Obsolete Data Handling tools
- C. ABAP development tools in Eclipse
- D. Custom Code Migration SAP Fiori apps

Answer: A (LEAVE A REPLY)

The technologies specifically designed to detect critical performance hot spots and prioritize opportunities for custom code optimization in SAP S/4HANA Cloud, private edition, include the SQL performance tuning worklist and the SQL monitor. These tools are integral for analyzing database interactions and identifying inefficient or problematic SQL queries. They provide a comprehensive view of database performance and suggest optimizations to enhance the efficiency of custom code, particularly where it interacts with the database. References= These tools are discussed within the context of performance

optimization in SAP's official documentation for SAP S/4HANA Cloud, private edition, particularly emphasizing their role in maintaining and improving system performance

NEW QUESTION: 40

For which SAP S/4HANA deployments are the RISE with SAP services offered? Note: There are 2 correct answers to this question.

- A. SAP S/4HANA Private Cloud
- B. SAP S/4HANA Public Cloud
- C. SAP S/4HANA on HANA Enterprise Cloud
- D. SAP S/4HANA On Premise

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 41

For which functional requirement would you choose RISE with SAP S/4HANA Cloud, private edition over RISE with SAP S/4HANA Cloud?

- A. Advanced ATP
- B. Consumer industries
- C. Financial operations
- D. Variant configuration

Answer: D (LEAVE A REPLY)

Choosing RISE with SAP S/4HANA Cloud, private edition over RISE with SAP S/4HANA Cloud for the functional requirement of variant configuration is advantageous due to the complex and customizable nature of this feature. Variant configuration in SAP S/4HANA Cloud, private edition allows for greater flexibility and deeper customization to accommodate specific business needs and complex product configurations, which might be restricted in a more standardized cloud environment. References= This distinction is highlighted in SAP documentation comparing the features and capabilities of different SAP S/4HANA deployment options, particularly focusing on the customization and flexibility provided by the private edition for complex configurations.

NEW QUESTION: 42

How can you check the status of the latest backup for your SAP S/4HANA systems?

- A. Call the transaction DBACOCKPIT in the SAP S/4HANA system
- B. Access the Backup Status app in SAP for Me
- C. Open an OSS message under the component HEC-SRV
- D. Access the Backup Status app in the SAP ONE Support Launchpad

Answer: D (LEAVE A REPLY)

NEW QUESTION: 43

What is identified in a customer's system through the SAP Readiness Check? Note: There are 2 correct answers to this question

- A. Related simplification items and corresponding compatibility packages
- B. Recommended SAP Business Technology Platform Extensibility Suite services
- C. Overview of financial data quality
- D. Recommended SAP API Business Hub prebuilt integration content

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 44

Through which tools can you launch the SAP Cloud Integration Automation Service?

Note. There are 2 correct answers to this question

- A. SAP Solution Manager
- B. SAP Maintenance Planner
- C. SAP Cloud ALM
- D. SAP API Business Hub

Answer: B,C (LEAVE A REPLY)

The SAP Cloud Integration Automation Service can be launched through the SAP Maintenance Planner and SAP Cloud ALM. These tools provide capabilities for planning and managing integrations, respectively. The Maintenance Planner allows for the integration of upgrade and maintenance schedules, while SAP Cloud ALM offers comprehensive management of application lifecycle, including integration tasks. References= SAP Cloud Integration Automation Service documentation

NEW QUESTION: 45

For which SAP S/4HANA deployment options would you always choose a greenfield approach? Note: There are 2 correct answers to this question.

- A. SAP S/4HANA Cloud, extended edition
- B. SAP S/4HANA On Premise
- C. SAP S/4HANA Cloud
- D. SAP S/4HANA Cloud, private edition

Answer: A,C (LEAVE A REPLY)

The greenfield approach, where a completely new system is set up without migrating data or configurations from an existing system, is typically used for the deployment options of SAP S/4HANA Cloud and SAP S/4HANA Cloud, extended edition. This approach is chosen to leverage cloud capabilities fully and ensure a clean implementation without legacy constraints. References= These deployment strategies are outlined in SAP's deployment guides and official documentation, which discuss the advantages of starting fresh with cloud-based solutions.

NEW QUESTION: 46

You want to deploy SAP Best Practices in a new implementation of RISE with SAP S/4HANA Cloud, private edition. What are some of the activities completed by SAP? Note: There are 3 correct answers to this question.

- A. Best Practice scope item activation in the system
- B. Initial business process scoping with the Digital Discovery Assessment
- C. Provisioning of a client with the desired client setup alternative
- D. Activation of required business functions in client 000
- E. Managing the additional license requirements

Answer: C,D,E (LEAVE A REPLY)

Valid E_S4CPE_2023 Dumps shared by Actual4test.com for Helping Passing E_S4CPE_2023 Exam! Actual4test.com now offer the **newest E_S4CPE_2023 exam dumps**, the Actual4test.com E_S4CPE_2023 exam **questions have been updated** and **answers have been corrected** get the **newest** Actual4test.com E_S4CPE_2023 dumps with Test Engine here:

https://www.actual4test.com/E_S4CPE_2023_examcollection.html (61 Q&As Dumps, **30%OFF Special Discount: Freepdfdumps**)

NEW QUESTION: 47

Which technologies detect critical performance hot spots and prioritize opportunities for custom code optimization?

- A. SQL performance tuning worklist and SQL monitor
- B. ABAP development tools in Eclipse
- C. Obsolete Data Handling tools
- D. Custom Code Migration SAP Fiori apps

Answer: D (LEAVE A REPLY)

NEW QUESTION: 48

Which SAP S/4HANA deployment option allows classic extensibility, except for the modification of SAP source code?

- A. SAP S/4HANA Cloud, extended edition
- B. RISE with SAP S/4HANA
- C. RISE with SAP S/4HANA Cloud, private edition
- D. SAP S/4HANA On Premise

Answer: (SHOW ANSWER)

RISE with SAP S/4HANA Cloud, private edition allows classic extensibility, except for the modification of SAP source code. This deployment option offers flexibility for customizations and extensions that do not involve altering the core SAP source code, providing businesses the capability to tailor their SAP environment to their specific needs while maintaining a clean core. References= The extensibility capabilities and restrictions of different SAP S/4HANA deployment options are detailed in SAP's official product documentation and training resources.

NEW QUESTION: 49

An SAP ECC customer is transitioning to SAP S/4HANA Cloud, private edition. What must you consider regarding a solution for output management? Note: There are 2 correct answers to this question

- A. The SAP Forms Service by Adobe is the only supported technology for output
- B. The Electronic Data Interchange (EDI) output channel is not supported anymore.
- C. The Smart Forms and SAPscript technologies are still supported.
- D. The new SAP S/4HANA output control and the old SAP ECC framework can co-exist

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 50

A customer needs to move their system from the current version of SAP S/4HANA (on-premise) to SAP S/4HANA Cloud, private edition. What type of transition do you recommend?

- A. System Upgrade
- B. System Conversion
- C. Lift & Shift
- D. Selective Data Transition

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 51

Which of the Mowing deployment options allow modification of SAP source code even if not recommended?

Note There are 2 correct answers to this question

- A. SAP S/4HANA
- B. SAP S/4HANA Cloud extended edition
- C. SAP S/4HANA Cloud public edition
- D. SAP S/4HANA Cloud private edition

Answer: A,D ([LEAVE A REPLY](#))

The deployment options that allow modification of SAP source code, though not recommended, include SAP S/4HANA (on-premise) and SAP S/4HANA Cloud private edition. Both these options provide the flexibility for organizations to modify SAP source code to meet specific business needs. However, such modifications are discouraged because they can complicate future upgrades and maintenance. References= SAP S/4HANA deployment options documentation

NEW QUESTION: 52

What are some key Organizational Change Management success factors? Note: There are 3 correct answers to this question.

- A. Breaking down the process into small, clearly defined activities

- B. Identifying underlying mindsets that must change
- C. Involving employees in the process
- D. Closely aligning project activities to the Waterfall methodology
- E. Documenting deviations from the Golden Rules for future follow-up

Answer: (SHOW ANSWER)

Key organizational change management success factors include breaking down the process into small, manageable activities that are clearly defined, which helps in tracking progress and managing the change effectively. Identifying and addressing underlying mindsets that must change is crucial to ensure that employees adapt to new ways of working, embracing new technologies and processes. Involving employees in the process is also essential as it fosters acceptance and engagement, making the transition smoother and more successful. References= These factors are widely discussed in change management literature and SAP implementation guides, emphasizing the importance of a structured and inclusive approach to managing change in organizational settings.
