NEW QUESTION: 1

During implementation, the team found that there is a notification controller exposed for an external service that marks the order as paid when notification is received. The notification URL is sent to the service together with the payment request and contains only the URL with orderID as the parameter.

What should the Architect recommend to the team in order to prevent the unauthorized usage of the controller to mark the orders as paid?

- A. Add HTTPS restriction to the controller start node.
- B. Add a session attribute and validate it on the callback.
- C. Add an order token in the callback URL and match the token against the one stored on the order.
- D. Add a customer number in the callback URL and match the customer number against the one stored on the order.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 2

An existing B2C Commerce site has the following aliases configuration:

```

"www.example.com": [
  {
    "locale": "en_US",
  },
  {
    "locale": "de_DE",
    "if-site-path": "de"
  },
  {
    "locale": "en_US",
    "if-site-path": "us"
  },
  {
    "locale": "en_GB",
    "if-site-path": "uk"
  }
],
"www.example.de": [{
  "host": "www.example.com",
  "path": "de"
}],
"www.example.co.uk": [{
  "host": "www.example.com",
  "path": "uk"
}]

```

Which statement related to this configuration is incorrect?

- A. Hostname www.example.com will redirect to www example com/us
- B. Hostname www example.co.uk will redirect to www.example.com/uk.
- C. Site supports multiple hostnames and locates.
- D. Hostname www.example.de will redirect to www.example.com/de.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 3

Northern Trail Outfitters uses an Order Management system (OMS), which creates an order tracking number for every order 24 hours after receiving it. The OMS provides only a web-service interface to get this tracking number. There is a job that updates this tracking number for exported orders, which were last modified yesterday.

Part of this jobs code looks like the following:

Based on the above description and code snippet, which coding best practice should the Architect enforce?

- A. Configure circuit breaker and timeout for the OMS web service call to prevent thread exhaustion.

- B. Post-processing of search results is a bad practice that needs to be corrected.
- C. Standard order import should be used instead of modifying multiple order objects with custom code.
- D. The transaction for updating of orders needs to be rewritten to avoid problems with transaction size.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 4

A client has a single site with multiple domains, locales, and languages. After launch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.

Which version of aliases,Json file below will accomplish this task?

A)

```
{
  "nto.net": "www.ntonet",
  "nto.eu": "www.ntoeu",
  "nto.event.eu": "www.ntoeu"
}
```

B)

```
{
  "www.ntoeu": "www.ntoeu"
}
```

```
{
  "nto.eu": "www.ntoeu",
  "nto.at": "www.ntoat",
  "nto.de": "www.ntode"
}
```

D)

```
{
  "nto.eu": "www.ntoeu",
  "nto.at": "www.ntoeu",
  "nto.de": "www.ntoeu"
}
```

- A. Option B
- B. Option A
- C. Option D
- D. Option C

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 5

The Client has implemented a different category/search layout for mobile and desktop. The code uses a session attribute called deviceType to choose the corresponding layout. This attribute it

populated from the browser user agent. After this implementation they have run into these problems:

- * Sometimes desktop pages are being served to both desktop and mobile customers.
- * Sometimes mobile pages are being served to both desktop and mobile customers.

The page has caching implemented that depends on promotions. SEC is very important and the site traffic is high.

Which solution should the Architect select to resolve the issue without impacting the existing requirements?

- A.** Disable caching for these pages to ensure that the correct template is used to render the mobile and desktop pages.
- B.** Change the URL structure to include desktop and mobile as URL parameters to ensure different cached versions of the page
- C.** Create customer groups for desktop and mobile users and use remote includes based on these groups to render the mobile and desktop pages
- D.** Create customer groups for desktop and mobile users and empty promotions linked to these groups to ensure different cached versions of the page.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 6

The client provided these business requirements:

- * The B2C Commerce platform will integrate with the Client's Order Management System (OMS).
- * The OMS supports Integration using REST services.
- * The OMS is hosted on the Client's infrastructure.

What configurations are needed for this integration with the OMS?

- A.** A service configuration, a hostname alias configuration, and a user credential configuration.
- B.** A service configuration, a service profile configuration, and a user credential configuration.
- C.** A service profile configuration, a WAF configuration, and a service credential configuration.
- D.** A service configuration, a service profile configuration, and a service credential configuration.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 7

During the testing of the login form, QA finds out that the first time the user can log in, but every other login attempt from another computer leads to the homepage and the basket being emptied. Developers tried to debug the issue, but when they add a breakpoint to the login action, it is not hit by the debugger.

What should the Architect recommend developers to check?

- A.** Remove CSRF protection from Login Form Action.
- B.** Add remote include for the login page
- C.** Check Login Form and any included templates for includes that enable page caching.
- D.** Add disable cache page in the template ISML - `<isCache status--off"/>`.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 8

The Client wants to offer custom made container products on its new B2C Commerce storefront. The Client provided two business requirements.

- * Customer can specify container length, width, and height.
- * Customer can specify the material that the container is made of.

The Client also provided the Architect a current data schema (shown below) for reference while preparing the technical documentation.

Which two gaps between the requirements and the data schema should the Architect discuss with the Client?

Choose 2 answers

- A.** The data schema includes a material Price_Markup field, but there isn't a business requirement to factor the material cost into the final price calculation.
- B.** The data schema includes an implied structure that the customer's choices should be captured as custom objects, but there isn't a business requirement to do so
- C.** The data schema includes a Color_ID field, but there isn't a business requirement to allow the customer to specify container color.
- D.** The data schema includes unique identifiers for material and color fields, but neither are reflected in the business requirements.

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 9

A new version of the Page Show controller is required for implementation of Page Designer specific look. It requires implementation of a specific, cache period for Page Designer pages, which is not currently available in the base Storefront Reference Architecture (SFRA) cache.js module. What two steps should the Architect instruct the developer to implement?

Choose 2 answers

- A. Create new Page.js controller in client's cartridge. Extend the code from base and prepend the new cache middleware function to Page-Show route.
- B. Create new ceche.js client's cartridge. Copy cache.js from app_storefront_base and add a function for the Page Designer caching.
- C. Create new cache.js in client's cartridge. Extend cache.js from app_storefront_base and add a function for the Page Designer caching.
- D. Create new Page.js controller in client s cartridge. Copy code from base and modify the Page-Show route to include the new cache middleware function.

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 10

During a load test the storefront shows steady but slow performance on all the paces being tested. The Architect opens Pipeline Profiler and sorts the data by "total time" column. The following come as the top Ave items:

Controller Name	Function Name	Hits	Total Time	Average Time	Minimum Time	Maximum Time
Product	Detail	38,880	23,606,640	607	39	2,311
Search	Show	32,400	15,030,360	464	107	1,143
Home	IncludeHeaderMenu	5,184	10,776,564	2,079	2,056	2,200
Product	HitTile	289,760	7,944,480	27	10	245
Product	ShowInCategory	38,880	2,663,280	68	33	100

Which controller should the Architect focus on to further investigate the performance issue?

- A. Product-HitTile as it has the highest hits during the load test.
- B. Search Show as this is one of the key controllers that the customer uses
- C. Home-IncludeHeaderMenu as It has highest average time.
- D. Product-Detail as It has the highest total time and highest maximum time.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 11

A Retailer has a single storefront site and a Product Management System (PIM). The Pim is Generating the master catalog and storefront categorization catalog every day and it uploading them to SFTP how should the Architect configure the import job flows following the best practices?

- A. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the storefront catalog 3rd flow It global to Import the master catalog.
- B. 1st flow is global to download the files horn SFTP. 2nd flow is global to import the master catalog. 3rd flow Is global to Import the storefront catalog.
- C. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the master catalog. 3rd flow K global to Import the storefront catalog.
- D. 1st flow is global to download the files from SFTP. 2nd flow is global to import the storefront catalog 3rd flow K global to Import the master catalog.

Answer: (SHOW ANSWER)

NEW QUESTION: 12

An Order Management System (OMS) handles orders from multiple brand specific sites, as part of the processing, the OMS sends the processing detail to be added at notes to the orders in B2C Commerce. These processing details are captured temporarily in custom objects, and are later processed by a batch Job that:

- * Processes the custom object to extract the orderid and note data.
- * Tries to load the order.
- * If the order is not found, it deletes the custom object and moves on.
- * If the order is found, it updates notes In the Order, upon successful update of this order, it deletes the custom object.

There is an Issue reported that the job is constantly failing and custom objects are growing in number. On investigating the production look the message below is being logged on each failure:

```
Processing of custom object 1xoskncjdw687769 failed for order 500000001 and has an associated replacement order 100000001. Exception details: com.demandware.core.quota.QuotaLimitExceededException: Limit for quota 'object.OrderPO.relation.notes' exceeded. Limit is 1000, actual is 1001. at com.demandware.core.quota.QuotaExceededException.throwLimitExceed(QuotaExceededException.java:21) at com.demandware.core.quota.QuotaImpl.handleLimitViolation(QuotaImpl.java:333) at
```

What are three solution The Architect can take to fix this issue without losing meaningful data?

Choose 3 answers

- A.** Engage B2C Commerce Support Team to soften the quota limit for "object.OrderPO.relation.notes"
- B.** Using BM site import/export, soften the `<quota id="object.orderPo.relation,notes"> <custom-action>warn<custom-action> </quots>` to make sure that neither order notes are lost and custom object is processed.
- C.** Take the backup of the custom object and delete the custom object to ensure on the next job run the custom objects are getting processed.
- D.** Take the backup of the Order as XML and delete the notes from Order to ensure on the next job run the custom objects are getting processed.
- E.** Take the backup of the Order as XML and delete the Order to ensure on the next job run, the custom objects are getting processed.

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 13

a client uses an external marketing tool to manage promotions and coupons for its multiple brands. They currently have only one brand on B2C Commerce and they get Import-ready feeds created by this tool on an SFTP location.

The marketing team completes the data preparation by the end of the work day.

How should the Architect handle this import?

- A.** Create a job and define three steps: one custom step to download the files from SFTP, and two standard steps to import the promotion and coupons.
- B.** Create a Job and define three custom steps: download the files from SFTP, import promotions, import coupons
- C.** Create a Job and define three steps: one step uses ExecuteScriptModule to download the files from SFTP, end two standard steps to Import the promotion end coupons.
- D.** Create a Job and define three steps: one standard step to download files from sftp end two steps that use Execute Script Module to import the promotion end coupons.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 14

Northern Trail Outfitters (NTO) operate 200 physical stores. NTO has products that are available in some of the physical stores and not available in others. The closest physical store is determined based on customer's post zip code when they are shopping online. Only the products that are available in the customer's closest physical store should be presented to the customer to the search results.

What are the two feasible technical approaches to meet these requirements?

Choose 2 answers

- A.** Create a separate shipping method per physical store. Use post/zip code to determine the applicable shipping method. Show only the products that are not excluded from the shipping method.
- B.** Create a separate site per physical store. Use post/zip code to redirect the customer to the relevant site. Show the products from the site navigation catalog.
- C.** Create a separate pricebook per physical store. Use post/zip code to activate this pricebook through a customer group. Show only the products with price by applying price refinement.
- D.** Create a separate category per physical store use post/Zip code with a mapping to determine the relevant category. Show only the products from this category.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 15

The Client plans to deploy a new payment provider and Order Management System on its existing B2C Commerce website. They have asked an Architect to advise which environment it should use to conduct load testing of its new integrations.

Which environment should be used as the ideal environment for this kind of load test?

- A.** The Production instance of the existing Realm.
- B.** The Development Instance of a rental Realm.
- C.** The Production Instance of a rental Realm.
- D.** The Development Instance of the existing Realm.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 16

A company manages its regional operations as separate businesses. The regional sites (Site A and Site B) operate with:

- * Separate realms
- * Different code bases
- * Different category navigation menus
- * Frequent updates on category structure

The requirement from the business is to provide hreflang link tags on category pages pointing to the same category on the other regional site. Example HTML for one of these links as displayed on Site A is:

```
<link rel="alternate" href="https://www.siteB.com/en_US/womens-new-arrivals" hreflang="en_US" />
```

Which solution should the Architect choose while keeping performance in mind?

- A.** Create a new custom attribute on the Category. Populate the attribute with the other entire site URLs corresponding to locales in JSON Format. Use the attribute to display the hreflang link tag.
- B.** Create additional locales in all realms create a new custom attribute on the category that is localized. Populate the attribute with the other site URLs and use it to display the hreflang tag.
- C.** Create a custom Business Manager module. Ask the business to maintain the hreflang link tags for each regional site in this Business Manager module.
- D.** Create a new custom object type Populate the hreflang mapping for each category and locale in this custom object. Use the custom object to display the hreflang link tag.

NEW QUESTION: 17

An Architect has been approached by the Business with a request to create a custom product finder. The finder would initially be available on only one site, and would eventually be extended to be available on all sites the Business maintains. There is a requirement that these widgets are also available to be used in a Job context for export to other systems.

Each site will have a different category available for use by the product finder.

Where should the Architect store the custom settings for use on both the storefront and in a job context?

- A.** Custom Object with a Site Scope

- B. Jobs Framework parameters
- C. Category custom attributes
- D. Custom Object with an Organizational Scope

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 18

During discovery, the customer required a feature that is not inducted in the standard Storefront Reference Architecture CSFRA). In order to save budget, the Architect needs to find the quickest way to implement this feature.

What is the primary resource the Architect should use to search for an existing community implementation of the requested feature?

- A. Salesforce B2C Commerce Documentation
- B. Salesforce Commerce Cloud GitHub repository
- C. Salesforce Trailblazer Portal
- D. Salesforce Commerce Cloud Trailblazer community

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 19

The client provided these business requirements:

- * The B2C Commerce platform will integrate with the client's Order Management System (OMS).
- * The OMS supports Integration us-no legacy RPC style SOAP services.
- * The OMS is hosted on client s infrastructure.

What is the right cartridge folder to place the WSDL provided for the OMS service?

- A. /cartridge/services
- B. /cartridge/webreferences2
- C. /cartridge
- D. /cartridge/webreferences

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 20

A company that is a shoe-producer is doing Salesforce B2C Commerce implementation. In their Enterprise Resource Warning (ERP) system, the products are marked as being one of three types: boots, sandals, and sneakers. The business requirements based on the type are:

- * The messaging on Product Detail page is different
- * Customers are able to filter their Product Search Results

The customer's operations team asks about the format in which to send this value in the catalog. Which data type should the Architect specify for this attribute In the Data Mapping document?

- A. A custom attribute type set-of-string containing multiple values.
- B. A custom attribute of type enum-of-string (multiselect able value).
- C. A custom attribute of type enum-of-string (single selectable value)
- D. A custom attribute of type string containing comma separated values.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

An Architect to notify by the Business that order conversion dramatically dropped a few hours after go live. Further investigation points out that customers cannot proceed to checkout anymore. The Architect is aware that a custom inventory checks with a third-party API is enforced at the beginning of checkout, and that customers are redirected to the basket page when items are no longer in stock Which tool can clearly confirm that the problem is indeed caused by the inventory check?

- A.** Sales Dashboard from Reports and Dashboards
- B.** Pipeline Profiler from Business Manager
- C.** Service Status from Business Manager
- D.** Realtime Report from Reports and Dashboards
