NEW QUESTION: 1

Which three business process are supported by Salesforce HC utilization Management? (Choose 3)

- A. Ticketing
- B. Physician Request
- C. Drug Request
- D. Admissions
- E. Appeals

Answer: C,D,E ([LEAVE A REPLY](#))

Reference and details below.

Support and Manage Care Requests

Give your users the tools to collaborate seamlessly on submitting, assigning, and processing care requests. Utilization management makes it easier for payer organizations to gather member and clinical data from providers, streamline care request reviews, and evaluate reviews for medical necessity. Health care providers can quickly submit care requests with fewer phone calls and faxes for preauthorizations.

Health Cloud provides standard objects to support these business processes:

- Prescription drug preauthorization requests
- Service preauthorization requests
- Admissions
- Concurrent (continued stay) reviews
- Appeals
- Complaints and grievances

NEW QUESTION: 2

The Salesforce administrator for ABC Policies Inc, a Health Care Payer Organization, would like to enable the members to enroll in and out of Care Program multiple times. Where, within Health Cloud Settings, should a Health Cloud administrator make changes to accomplish this requirement?

- A. Program Enrollee Settings
- B. Care Program Settings
- C. Health Cloud Settings
- D. Care Request Settings

Answer: (SHOW ANSWER)

Reference and details below.

NEW QUESTION: 3

Which three of the following features are included with a Health Cloud License?

- A. Intelligent Form Reader with Amazon Textract
- B. Surveys
- C. Intelligent Document Automation

D. Care Coordination(Patient Services)

E. EHR Mulesoft Templates

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

Which credentials are available to track against providers with standard Health Cloud? (Choose two.)

A. Specialties

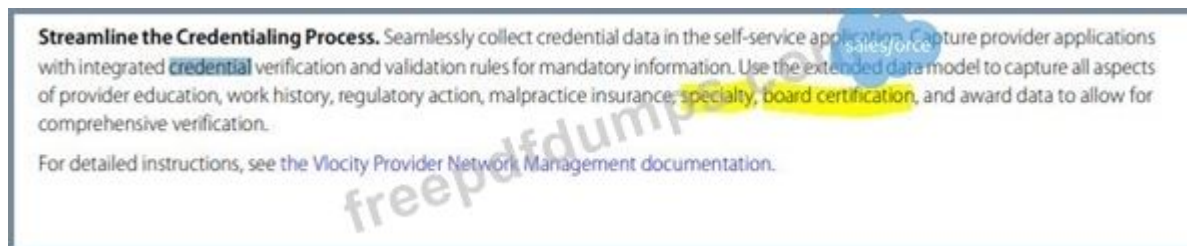

B. Facility Relationship

C. Business License

D. Board Certification

Answer: A,D ([LEAVE A REPLY](#))

Reference and details below.

NEW QUESTION: 5

An Health Cloud administrator has setup risk recalculation by setting the recalculate flag to true, but is not seeing the recalculation score for the patient. Which of the following is mostly likely the reason why the recalculation score for the patient is not displaying?

A. Risk scores can only be calculated using the CMS recalculation API.

B. CMS risk scores cannot be recalculated in Health Cloud.

C. CMS risk scores should be recalculated using only third party APIs.

D. Risk scores are recalculated only for patients that are affiliated with a Care Program.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 6

In which two ways can an administrator support the Health department so that the team can efficiently assess the individual, enroll them in a program, and monitor them during emergency? (Choose two)

A. Create a healthcare provider enrollment flow

B. Install emergency Response Management unmanaged package

C. Leverage pre-configured flows provided with Health Cloud

D. Create Patient Enrollment Console

Answer: B,C ([LEAVE A REPLY](#))

Reference and details below.

Using the **Emergency Response Management Console**, create a consistent intake experience using **guided workflows** and pre-built assessments that can quickly adapt as protocols or guidelines change.

NEW QUESTION: 7

In which two ways can a Data Architect ensure PHI/PII data visibility is minimized during the migration of Patient Data from an existing Service Cloud org to a new HC org?(Choose 2)

- A. Use Data Templates to exclude PHI/PII data from being added to Partial Copy Sandboxes
- B. Platform Shield enabled.
- C. Use Salesforce Data Masking when moving data to a Sandbox.
- D. Export Data to a spreadsheet to remove PHI before importing it into a Sandbox
- E. Ensure Sandboxes have

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

Where can a Salesforce administrator configuring different levels of access to patients' care plans, configure team members different levels of access to cases to ensure sensitive data is not shared with the wrong groups?

- A. Permission Set Groups
- B. Profiles
- C. Contact Roles on case
- D. Permission Sets
- E. Case Team Roles

Answer: ([SHOW ANSWER](#))

Reference and details below.

Case Team Role

The Case Team Role object represents a role for a member of the patient care team, such as Caregiver or Physiotherapist. Care coordinators assign roles when they add a member to the private patient site. The case team role also controls access to the case and the care plan, and controls visibility of the user in the site.

NEW QUESTION: 9

Which three options are standard objects available for Insurance Management? (choose 3)

- A. PurchaserPlan
- B. MemberPlan
- C. Insurance Benefit
- D. Insurance Coverage
- E. Coverage Benefit

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

Which 3 of the components are customizable in HC?

- A. Timeline
- B. Life Events
- C. Custom Label
- D. Patient Card

E. EHR Data

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 11

Three steps required to configure HC?

- A. Enable the options for contact to related with multiple accounts
- B. Install HC unmanaged Package
- C. Verify that chatter is enabled
- D. Configure the console view
- E. Install HC managed package

Answer: A,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 12

An insurance organization wants to be able to track specialties and sub-specialties related to practitioner to use in provider search. Which would they store these relationships? (Choose three).

- A. Care provider facility specialty
- B. Healthcare provider specialty
- C. Care Taxonomy
- D. Healthcare provider Taxonomy
- E. Care specialty

Answer: A,D,E ([LEAVE A REPLY](#))

Reference and details below.

Field in Care Provider Searchable Field	Corresponding Field in Source Object
FacilityName	Account.Name
ProviderName	Contact.Name
Specialty	CareSpecialty.SpecialtyType
SubSpecialty	CareTaxonomy.TaxonomyType
PlanType	HealthcarePayerNetwork.NetworkType
IsAcceptingNewPatients	HealthcareFacilityNetwork.PanelStatus
ProviderType	HealthcareProvider.ProviderType
GenderRestriction	HealthcareFacilityNetwork.GenderRestriction
NationalProviderIdentifier	HealthcareProviderNpi.Npi

NEW QUESTION: 13

Which add-on license enhances Health Cloud to allow you to highlight times when a patient is most likely to attend an appointment ?

- A. Einstein Activity Capture
- B. Einstein Analytics Predictions
- C. Einstein Vision

D. Einstein Bots

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 14

Which three standard objects are used in the workflow to manage utilization data? (Choose 3)

- A. Care Request Drug
- B. Care Request Plan
- C. Care Request
- D. Care Diagnosis
- E. Care Authorization

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 15

Within Health Cloud Console, there are two apps available for use depending on work preferences, which console is available within Lightning Experience?

- A. Health Cloud - Individual
- B. Health Cloud - Worklist
- C. Health Cloud - Console
- D. Health Cloud - Personal

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 16

How can Code Sets be managed in Health Cloud?

- A. Health Cloud provides a Code Sets data model that is pre-populated with industry standard procedures and diagnostic code sets.
- B. Health Cloud does not provide a Code Sets data model
- C. Health Cloud provides a Code Sets data model that must be populated from an external source.
- D. Health Cloud provides a Code Sets data model that is pre-integrated to authoritative sources to ensure the latest code sets are always available.

Answer: ([SHOW ANSWER](#))

Reference and details below.

As an admin, it's up to you to populate these objects with the codes your organization needs. As the volume of required codes can be immense, we recommend that you use the Salesforce Data Loader to import code data into your orgs.

NEW QUESTION: 17

Which two steps can an administrator take to configure the Care Program enrollment flow? (Choose two.)

- A. Customize the out of the box enrollment flow template to match requirements.
- B. Use the provided enrollment flow out of the box.
- C. Use the patient approval flow
- D. Customize the care coordinator flow for patient
- E. Customize the provider site flow.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 18

A Salesforce administrator is migrating a Service Cloud org to Health Cloud and is considering using the Health Cloud Provider data model. Which approach should the administrator take if the Custom Provider Search Lightning component is to be used?

- A. If the Provider data model is used, the standard Health Cloud Provider Search component must be used or extended. Custom search components are not supported.
- B. The Provider data model is required for all Service Cloud to Health Cloud migrations, but either the standard or custom search components may be used.
- C. The Standard Health Cloud Provider Search component can be used to search either the Health Cloud Provider data model or a custom Provider data model.
- D. The current data model with the existing component can be used as well as the Provider data model with either custom search component or the Health Cloud Provider Search component.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 19

Which two use cases can be enabled using the Remote Patient Monitoring feature in Health Cloud? (Choose two.)

- A. Bring in all the device generated data for the entire patient population to create a device data lake within Health Cloud.
- B. Monitor the location of the patient using the GPS on their mobile device.
- C. Use a meaningful subset of the data generated by connected devices to drive patient engagement and intervention.
- D. Connect the patient's social media accounts to the patient profile and use information contained in social media feeds to monitor the patient's health.
- E. Use the data generated by connected devices used by patient to monitor the patient's health.

Answer: C,E ([LEAVE A REPLY](#))

NEW QUESTION: 20

How should Members and Patients be represented during the basic set-up of Health Cloud console for Care Coordinators and Managers as per the Salesforce recommendation?

- A. The Individual data model may be used to represent Members and Patients.
- B. Leveraging Person Accounts is the recommended approach to represent Members and Patients.
- C. Salesforce recommends using Member Accounts to represent Members and Patients.
- D. Leveraging Candidate Accounts are the recommended approach to represent Members and Patients.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 21

Which of the following Salesforce and Health Cloud objects can be used to represent Provider and their relationship in a Provider Management data model? (Choose Three.)

- A. Contact
- B. Healthcare Practitioner Facility
- C. Lead
- D. Case
- E. Healthcare Provider

Answer: (SHOW ANSWER)

Reference and details below.

Set Up Data for Provider Cards

The data that helps users identify practitioners is stored in the provider objects. You can use Composite API requests to do populate these objects with provider and practitioner data.

You can create objects individually by using the Lightning Platform SOAP API or REST API. Or you can use the [Composite resource](#) in the REST API to create and link multiple records with a single API call. This lets you create 200 records per call.

Let's say we want to add healthcare provider Dr. Scott Kaplan to your records. This example shows how to use a single API call to create `Account`, `Contact`, `HealthcareProvider`, `PersonEducation`, `HealthcareProviderNpi`, `HealthcarePractitionerFacility`, `HealthcareProviderSpeciality`, `HealthcareFacilityNetwork`, and `HealthcareProviderTaxonomy` records with Dr. Scott Kaplan's data. It also shows how to use a composite request to link records using Dr. Kaplan's `contactId` as the `practitionerId`.

Execute this example using a composite request.

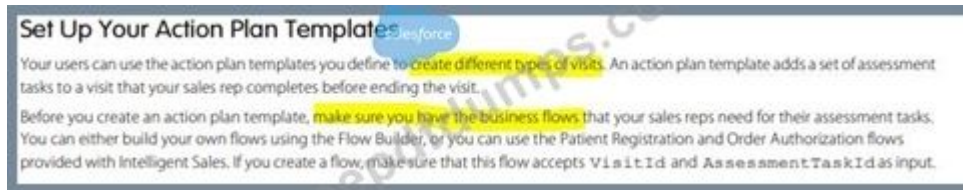

NEW QUESTION: 22

Dr. Jill Mikel at Tahoe Hospital would like to improve the management of patient visits. Which steps should the salesforce Administrator complete to setup a patient visit Process? (Choose two)

- A. Create a Task and add task to an action plan template.
- B. Create flow for the business process.
- C. Create a task and add the task to visit creation.
- D. Create an action plan template add flow and published the template.

Answer: (SHOW ANSWER)

Reference and details below.

Set Up Your Action Plan Templates

Your users can use the action plan templates you define to create different types of visits. An action plan template adds a set of assessment tasks to a visit that your sales rep completes before ending the visit.

Before you create an action plan template, make sure you have the business flows that your sales reps need for their assessment tasks. You can either build your own flows using the Flow Builder, or you can use the Patient Registration and Order Authorization flows provided with Intelligent Sales. If you create a flow, make sure that this flow accepts VisitId and AssessmentTaskId as input.

2. Add task flows in an action plan template and publish it.

- a. In the Items tab of your action plan template, click **Add Flow**.

Warning: Only add task flows to your template. Intelligent Sales doesn't support assessment task definitions.

Consent can take place with the participant providing consent in person, using a tablet or mobile device. Patients and members who aren't physically present can log into their Experience Cloud site, then view and provide consent for documents related to the program.

NEW QUESTION: 23

Which three activities does "The Social Determinants" feature in Health cloud help providers perform? (choose three.

- A. Integrate service such as transportation and meal delivery into their patient care plans and programs.
- B. Track determinants and barriers to care across their patient populations
- C. Track the influence of the social network of the patient on the patients' health outcomes
- D. Automatically import credit scores and income information into the patient record in Health cloud
- E. Plan interventions to help address the barriers to care within their patient populations

Answer: B,C,E (LEAVE A REPLY)

NEW QUESTION: 24

Which two actions should be completed by health cloud admin in order to leverage the health cloud utilization management capabilities?

- A. Install the health cloud unmanaged package extension
- B. Install the health cloud managed package
- C. Install the health cloud care request extensions managed package.
- D. Assign the health cloud social determinants permission set
- E. Assign the health cloud foundation permission set

Answer: B,C (LEAVE A REPLY)

Reference and details below.

Prepare to Set Up Utilization Management

Before you get started, install and configure Health Cloud.

- Install the Health Cloud Care Request Extensions unmanaged package.
- Assign the Health Cloud Permission Set License and the Health Cloud Platform permission set license to yourself and your users.

NEW QUESTION: 25

Which three type of basic Patient or Member information is displayed on the Patient info component? (Choose three.)

- A. List of Patient/Member Conditions
- B. Date of Birth and Age
- C. Thumbnail of Chatter Photo
- D. Primary Care Coordinator
- E. Gender

Answer: B,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 26

Which three options explain why the new clinical data model in Health Cloud is labeled as FHIR aligned and not FHIR compliant? (Choose three)

- A. Some entitles have additional non-FHIR attributes to increase the usability of the data within Salesforce.
- B. The cardinality of a few attributes has been changed (e.g. in picklist scenarios)
- C. Not all attributes in a given FHIR resource may be supported.
- D. It only aligns with FHIR 0STU2 specs.
- E. It does not utilize the latest FHIR R4 standards.

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 27

If a Health Cloud administrator wanted to consume the content of an HL7 v2 - Simple Application message, which step would they need to take?

- A. Write a custom apex class to consume parse and store a native HL7 message
- B. Do Nothing - Health Cloud works out of the box with native HL7 message
- C. Use salesforce Connect
- D. Use an HL7 broker/engine to transform the text based HL7 message into JSON and pass it to the Health Cloud.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 28
