### NEW QUESTION: 1

During development, one of your peers asks you for help on how to call an external web service. Which activity should you recommend that they use?

- A. Invoke activity
- B. Invoke API activity
- C. SOAP Request/Reply activity
- D. HTTP Request/Response activity

Answer: ([SHOW ANSWER](#))

### NEW QUESTION: 2

TIBCO BusinessWorks processes can be run as a REST server.

- A. false
- B. true

Answer: ([SHOW ANSWER](#))

### NEW QUESTION: 3

You have a situation in which an external source supplies an XSLT file to perform the transformation, and you want to leverage the file.

Which activity helps you accomplish this goal?

- A. Invoke XSLT
- B. Transform XML
- C. Mapper
- D. Render XML

Answer: ([SHOW ANSWER](#))

### NEW QUESTION: 4

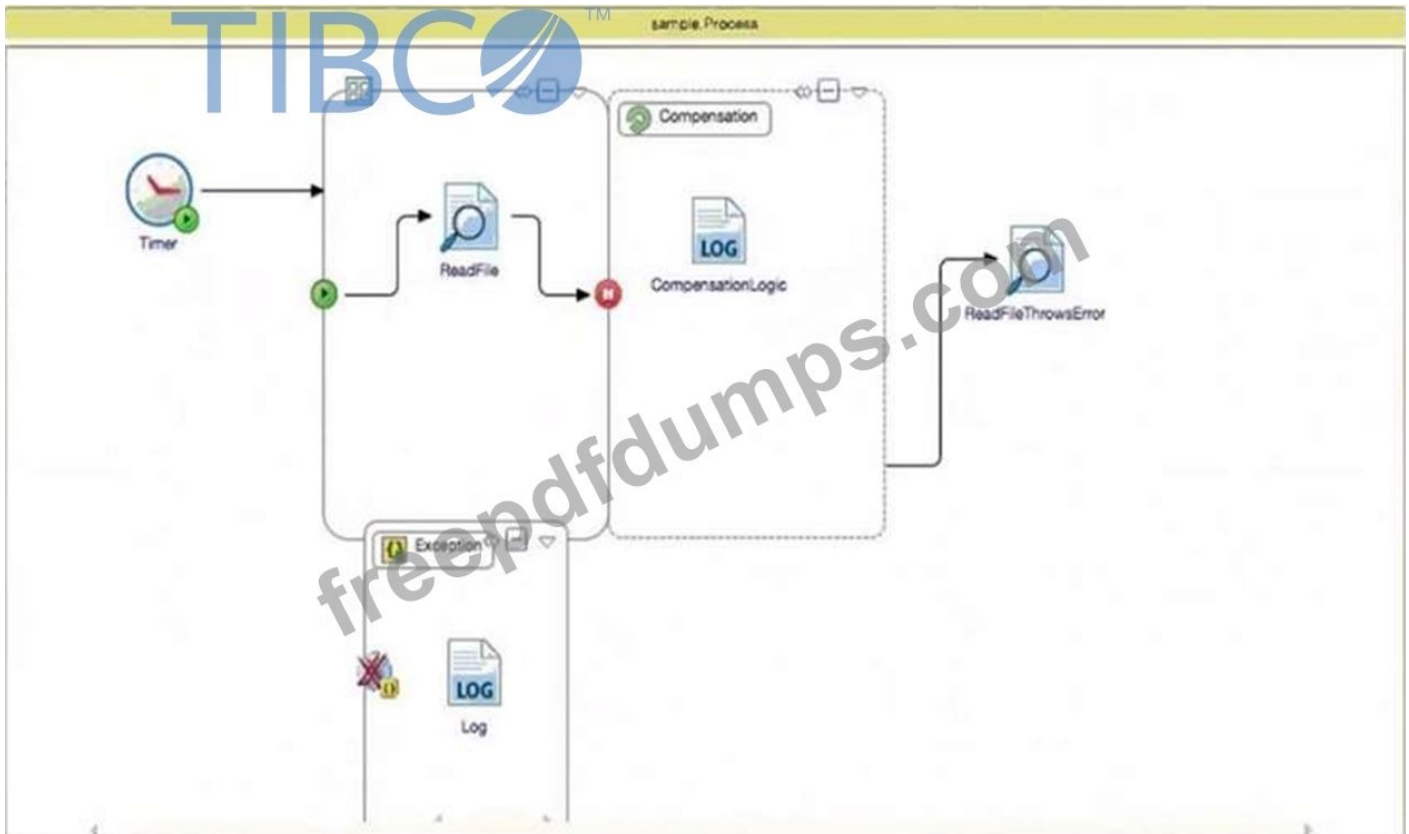

Select 2 types of shared objects that can be included in shared modules. (Choose two.)

- A. Network configuration files
- B. XML files
- C. WSDL files
- D. Schema files

Answer: C,D ([LEAVE A REPLY](#))

**NEW QUESTION: 5**

Refer to the exhibit:

There are two fault handlers. One fault handler acts at the Scope Level, while the other fault handler is at the Process Level.

What happens if the File Read activity throws a FileNotFoundException?

- A. Both fault handlers will be executed, and both Log and Log1 will be executed.
- B. The fault handler surrounding the Read File activity will be executed, and the Log activity will be executed.
- C. The job will error out since there are conflicting fault handlers.
- D. The fault handler at the Process Level will be executed, and the Log1 activity will be executed.

Answer: B ([LEAVE A REPLY](#))

**NEW QUESTION: 6**

What is the default setting for the log level of an AppNode log file?

- A. |WARN
- B. ERROR
- C. INFO

D. DEBUG

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 7**

You have a multi-agent, multi-machine environment with a seeder count of 16. What should the quorum size be in this configuration?

- A. 18
- B. 32
- C. 16
- D. 8

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 8**

You are using machines in multiple environments. They have TIBCO ActiveMatrix BusinessWorks installed and are in the same IP subnet. You need to ensure that the machines from one environment are not able to connect to another environment. You must achieve this goal without using additional network technology.

What should you do?

- A. Ensure that all machines that belong to an environment have the same machine name
- B. Ensure that all machines that belong to an environment have the same network name
- C. Ensure that all agents that belong to an environment have the same agent name
- D. Ensure that all agents that belong to an environment have the same network name

Answer: D ([LEAVE A REPLY](#))

**NEW QUESTION: 9**

In order to secure the access to the REST API of the TIBCO ActiveMatrix BusinessWorks Agent, which file controls the setting that enables security and which types of passwords are accepted?

- A. The setting is controlled in bwagent.tra, and the passwords are accepted in OBF, MD5, and CRYPT format.
- B. The setting is controlled in bwagent.ini, and the passwords are accepted in OBF, MD5, and CRYPT format.
- C. The setting is controlled in bwagent.tra, and the passwords are accepted in SHA, PKCS5, and CRYPT format.
- D. The setting is controlled in bwagent.ini, and the passwords are accepted in SHA, PKCS5 and CRYPT format

Answer: A ([LEAVE A REPLY](#))

**NEW QUESTION: 10**

What are two methods for implementing activity level error handling in TIBCO ActiveMatrix BusinessWorks?

(Choose two.)

- A. Fault Handlers
- B. Error Transitions
- C. Event Handlers
- D. Conditional Transitions
- E. onError Activity

**Answer: A,B ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 11**

What defines a messaging framework for communication between two entities?

- A. SOAP
- B. HTTP
- C. WSDL
- D. XML

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 12**

You have a TIBCO ActiveMatrix BusinessWorks application running on multiple AppNodes, which are part of the same AppSpace. You want to read or update the module shared variable state.

Which option should you select?

- A. bw.engine.persistenceMode = "datastore"
- B. bw.engine.persistenceMode = "true"
- C. bw.engine.persistenceMode = "AppSpace"
- D. bw.engine.persistenceMode = "group"

**Answer: D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 13**

The TIBCO Enterprise Administrator has multiple components, such as the server, the TEA Agent, and the server UI. Which communication mechanism do the server and the TEA Agent component use to talk to each other?

- A. REST
- B. TIBCO Rendezvous
- C. Shared File system
- D. TIBCO Enterprise Message Service

**Answer: A ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 14**

While designing applications, if you wish to use the same JMS Connection Resource in multiple application modules, where should you configure it?

- A. application
- B. plug-in
- C. application module

D. shared module

Answer: ([SHOW ANSWER](#))

**NEW QUESTION: 15**

Which two shared module functionalities are exported to the application and other shared modules? (Choose two.)

- A. private processes
- B. service bindings
- C. shared resources
- D. reference bindings
- E. public processes

Answer: C,E ([LEAVE A REPLY](#))

**NEW QUESTION: 16**

Select 3 architectural elements that are included in REST services. (Choose three.)

- A. Resource metadata
- B. Applications
- C. Data elements
- D. Resource identifier

Answer: A,C,D ([LEAVE A REPLY](#))

**NEW QUESTION: 17**

A TIBCO ActiveMatrix BusinessWorks application connects to a database and a TIBCO EMS instance. On deployment, a system administrator has to replace the connection parameters to the Production database and EMS instance.

Which type of properties can be used from the TIBCO Enterprise Administrator solution to modify this connection's parameters?

- A. Global Variables
- B. Process Properties
- C. Application Properties
- D. Module Properties

**Answer: C ([LEAVE A REPLY](#))**

**NEW QUESTION: 18**

You deploy a REST application to an AppSpace with two AppNodes on the same machine. Where should you set the swagger doc properties so that every AppNode can host the swagger docs independently?

- A. AppSpace
- B. Domain
- C. AppNode
- D. bwagent

**Answer: C ([LEAVE A REPLY](#))**

**NEW QUESTION: 19**

A Custom XPath function has been created in a TIBCO ActiveMatrix BusinessWorks Project. How can the function be made available (at design time) to other projects? (Choose two.)

- A. by adding the Custom XPath function to a target project
- B. by exporting the deployable plug-ins and fragments
- C. by exporting the Custom XPath function resource
- D. by installing the Custom XPath function into TIBCO ActiveMatrix BusinessWorks target project
- E. by installing it into host repository deployable plug-ins and fragments

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 20**

Select the 2 types of modules that are available in TIBCO BusinessWorks. (Choose two.)

- A. BusinessWorks Module
- B. Package module
- C. Shared Module
- D. Application Module

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 21**

Which type of activity is required to implement an asynchronous event in a running process and then proceed with executing the process instance when an appropriate event is received?

- A. Regular activity
- B. Process Starter activity
- C. Catch and Rethrow activity
- D. Signal-in activity

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 22**

Which two statements are true about the fault tolerance feature of TIBCO ActiveMatrix BusinessWorks applications? (Choose two.)

- A. Managed fault tolerance requires activation mode to be set to Single AppNode. while non-managed fault tolerance requires activation mode to be set to Multiple
- B. Managed fault tolerance requires persistence mode to be set to group, while non-managed fault tolerance requires persistence mode to be set to datastore.
- C. Managed fault tolerance supports checkpointing. while non-managed fault tolerance does not support checkpointing.
- D. Managed fault tolerance requires persistence mode to be set to memory, while non-managed fault tolerance requires persistence mode to be set to group.
- E. In managed fault tolerance. AppNodes are aware of other AppNodes in the AppSpace. while in non-managed fault tolerance. AppNodes are unaware of other AppNodes in the AppSpace.

**Answer: B,E ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 23**

You are defining a process that uses a JMS Send Message activity to send a message to a backend application.

This application replies asynchronously and does not maintain the order of messages.

Which activity should you use if you need to correlate the replies from this application back in your original process?

- A. Get JMS Queue Message
- B. JMS Request Reply
- C. Wait for JMS Request
- D. JMS Receive Message

**Answer: D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 24**

TIBCO Enterprise Administrator cannot find a domain.

What is the problem?

- A. The TIBCO Enterprise Administrator cannot access the local file system.
- B. The domain was created in local mode.
- C. The domain was created in enterprise mode
- D. The TIBCO Enterprise Administrator cannot connect to the database.

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 25**

Each process in TIBCO BusinessWorks is a service.

- A. True
- B. False

**Answer: ([SHOW ANSWER](#))**
