NEW QUESTION: 1

A company has the following requirements:

Mission-critical VMs: hourly replication to disaster recovery site, daily backups of these VMs should be available at the disaster recovery site when required, the mission critical applications need to be available within 20 minutes.

Business-important VMs: daily backups should be stored at the disaster recovery site.

When required, the business-important applications need to be available within four hours.

Define the RPO and RTO for the company's disaster recovery site.

A. Mission-critical VMs: RPO = 24 hours, RTO = 20 minutes; business-important VMs:

RPO = 24 hours, RTO

= four hours

B. Mission-critical VMs: RPO = 24 hours, RTO = four hours; business-important VMs: RPO

= 24 hours, RTO = four hours

C. Mission-critical VMs: RPO = 60 minutes, RTO = 20 minutes; business-important VMs:

RPO = 24 hours, RTO = four hours

D. Mission-critical VMs: RPO = 60 minutes, RTO = one hour; business-important VMs:

RPO = 60 minutes, RTO = four hours

Answer: C (LEAVE A REPLY)

NEW QUESTION: 2

Figure A shows the backup files on a Scale-out Backup Repository (SOBR) created by a single Veeam backup job. The SOBR is configured to offload to capacity tier in move mode. If the offload was completed successfully, what will remain on the performance extents for the files uploaded to the capacity tier?

A. VIB files (metadata and data)

B. VIB and VBK files (metadata only)

C. VBK files (metadata and data)

- D. VBM files (metadata only)
- E. VIB and VBK files (data blocks only)

Answer: B (LEAVE A REPLY)

NEW QUESTION: 3

A backup administrator is planning to install Veeam ONE. Which data collection mode collects the most data per VM?

- A. For vCenter data only
- B. Optimized for advanced scalability deployment
- C. For backup data only
- D. Optimized for typical deployment

Answer: B (LEAVE A REPLY)

Explanation/Reference:

https://helpcenter.veeam.com/docs/one/deployment/data_collection_modes.html?ver=100

NEW QUESTION: 4

A virtual machine in your environment has been hit by a virus. You need to restore the virtual machine as fast as possible. At the same time, you need to make sure that any dormant virus on the backed up virtual machine is detected. What restore method should you use when recovering to a new location?

- A. Instant VM Recovery with "staged restore"
- B. Instant VM Recovery with "secure restore"
- C. SureBackup
- D. Virtual disk restore

Answer: B (LEAVE A REPLY)

Explanation/Reference:

https://helpcenter.veeam.com/docs/backup/em/em_disk_restore.html?ver=100

NEW QUESTION: 5

A company has the following requirements:

Mission-critical VMs: hourly replication to disaster recovery site, daily backups of these VMs should be available at the disaster recovery site when required, the mission critical applications need to be available within 20 minutes.

Business-important VMs: daily backups should be stored at the disaster recovery site.

When required, the business-important applications need to be available within four hours.

Define the RPO and RTO for the company's disaster recovery site.

A. Mission-critical VMs: RPO = 60 minutes, RTO = one hour; business-important VMs: RPO = 60 minutes, RTO = four hours

B. Mission-critical VMs: RPO = 24 hours, RTO = four hours; business-important VMs: RPO = 24 hours, RTO = four hours

C. Mission-critical VMs: RPO = 60 minutes, RTO = 20 minutes; business-important VMs: RPO = 24 hours, RTO = four hours

D. Mission-critical VMs: RPO = 24 hours, RTO = 20 minutes; business-important VMs: RPO = 24 hours, RTO = four hours

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

A backup administrator has replicated a virtual machine between two Hyper-V hosts and now would like to automatically verify the recoverability of the replica. What would they need to do?

A. Start the virtual machine manually using the universal application item recovery wizard

B. Create a virtual switch with no uplinks and start the virtual machine connected to the new switch

C. It is not supported to perform SureBackup replica testing for Hyper-V

D. Create a virtual lab and an application group; create a SureBackup for the replica job and run it once a day

Answer: **C** ([LEAVE A REPLY](#))

NEW QUESTION: 7

Which storage optimization option uses a block size of 512 KB?

A. Local target (large blocks)

B. WAN target

C. Local target

D. LAN target

Answer: **D** ([LEAVE A REPLY](#))

NEW QUESTION: 8

Which of the following is a backup mode that can be configured within a Veeam Agent for Windows backup job?

A. Forward incremental and reverse incremental, both with optional periodic synthetic and/or active full backups

B. Forward incremental with optional periodic synthetic and/or active full backups

C. Reverse incremental with periodic active full backups

D. Reverse incremental with optional periodic synthetic full backups

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

Your company is using Veeam ONE to monitor VM performance in real time. An end user has called to complain about the performance of a VM and has asked you to investigate the cause of the issue. Where in Veeam ONE do you go to view real time VM metrics?

A. In the monitor client under the infrastructure view

- B. In the reporter portal in the workspace tab, VM performance
- C. In the monitor client under the data protection view
- D. In the reporter portal in the dashboards tab, VM performance dashboard

Answer: (SHOW ANSWER)

Explanation/Reference: <https://www.veeam.com/blog/monitoring-vmware-hyperv-environment.html>

NEW QUESTION: 10

A backup administrator is planning to install Veeam ONE. Which data collection mode collects the most data per VM?

- A. Optimized for advanced scalability deployment
- B. For vCenter data only
- C. For backup data only
- D. Optimized for typical deployment

Answer: D (LEAVE A REPLY)

NEW QUESTION: 11

A company has outgrown their current data center and plans to use the second data center as the new primary and needs to migrate their workloads. They are running VMware in both data centers. Which steps would allow this migration to occur without any data loss?

- A. 1. Replication job
2.Failback
3.Commit failback
- B. 1. Replication job
2.Failover plan
3.Permanent failover
- C. 1. Backup job
2.Instant VM Recovery
3.Finalize the Instant VM Recovery
- D. 1. Replication job
2.Planned failover
3.Permanent failover

Answer: (SHOW ANSWER)

NEW QUESTION: 12

A company wants to leverage Veeam DataLabs to automate the creation of a test environment. As testing one large, multi-VM application could require more than a single host, a dedicated VMware ESXi cluster has been identified. The sandbox is to be refreshed weekly or on demand. Select the benefits of using replication jobs in this environment. (Choose two.)

- A. There are additional tests available in DataLabs when replicas are the source

- B. Replication jobs do not stop the sandbox, unlike backup jobs
- C. The VMs are running directly on a high performance datastore, uncompressed
- D. There is a bigger number of VMs supported for multi-VM application tests when replicas are used
- E. Replicas can take advantage of advanced multi-host virtual labs

Answer: C,E (LEAVE A REPLY)

Explanation

https://helpcenter.veeam.com/docs/backup/vsphere/surereplica_advanced_mutihost.html?ver=100

NEW QUESTION: 13

A company wants to leverage Veeam DataLabs to automate the creation of a test environment. As testing one large, multi-VM application could require more than a single host, a dedicated VMware ESXi cluster has been identified. The sandbox is to be refreshed weekly or on demand. Select the benefits of using replication jobs in this environment. (Choose two.)

- A. The VMs are running directly on a high performance datastore, uncompressed
- B. There are additional tests available in DataLabs when replicas are the source
- C. Replicas can take advantage of advanced multi-host virtual labs
- D. There is a bigger number of VMs supported for multi-VM application tests when replicas are used
- E. Replication jobs do not stop the sandbox, unlike backup jobs

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 14

An end user has deleted a business-critical document and they need it back right away. The IT team has been doing hypervisor-level backups of the VM that the document was on. What is the fastest option for this backup administrator to get the user's document back?

- A. Instant VM Recovery
- B. Guest files restore
- C. Virtual disks restore
- D. Entire VM restore

Answer: (SHOW ANSWER)

NEW QUESTION: 15

What transport mode does the Linux backup proxy support?

- A. Automatic
- B. Network
- C. Direct storage access
- D. Virtual appliance

Answer: D (LEAVE A REPLY)

Explanation/Reference:

https://helpcenter.veeam.com/docs/backup/vsphere/backup_proxy.html?ver=100

NEW QUESTION: 16

A NAS backup job has been configured within Veeam Backup & Replication, and is completing successfully, but restore operations have been failing for the last few days. What is causing the failure?

- A. The cache repository assigned for this file share is unavailable for restore operations
- B. The server was added by using an IQN alias which is unable to be resolved
- C. The backup repository is sealed
- D. The credentials added to the share are not allowed read-write access to the share, directories or files

Answer: D (LEAVE A REPLY)

NEW QUESTION: 17

A company is required to have a daily backup with a retention of at least six weeks. The backups are running every eight hours during the day. From the options provided, what backup job would you advise based on their SLA and best practices?

- A. Forever forward incremental backup, with default job settings enabled
- B. Forever forward incremental backup, with a retention of 42 restore points
- C. Forever forward incremental backup, with a retention of 42 restore points, savings six weekly full backups
- D. Forward incremental backup with weekly synthetic full backups and a retention of 42 days

Answer: (SHOW ANSWER)

NEW QUESTION: 18

A company needs to maintain and verify backups at a secondary site to meet the following requirements: RTO of two hours, RPO of 12 hours, four weeks retention. Which of the following backup copy job configurations meets these requirements?

- A. Periodic backup copy job, scheduled for a 12-hour interval, with 112 restore points to retain
- B. Periodic backup copy job, scheduled for a two-hour interval, with 56 restore points to retain
- C. Periodic backup copy job, scheduled for a 12-hour interval, with 56 restore points to retain
- D. Periodic backup copy job, scheduled for a two-hour interval, with 112 restore points to retain

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 19

To suppress Veeam ONE alarms under specific conditions or when a specific event occurs, which of these options can be selected? (Choose three.)

- A. Snapshot creation
- B. Storage snapshot deletion
- C. High CPU usage
- D. Snapshot deletion
- E. Storage snapshot creation
- F. Veeam backup activity

Answer: A,D,F ([LEAVE A REPLY](#))

NEW QUESTION: 20

You fail back a VM replica to the original location. Which of the following requirements needs to be met to be able perform quick rollback during a failback of a replica?

- A. The VM replica must be created with the "Use Changed Block Tracking data" option enabled
- B. The VM replica must have access to the repository where the full backup of the VM resides
- C. Perform failback to VM within the same subnet
- D. Indexing must be enabled for the original VM

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

Exhibit:

Look at the diagram. This daily backup job has been running for over 30 days and no active full backups have been taken since the first run. Which of the following best describes the backup job?

- A. This is forever forward incremental backup, keeping seven restore points
- B. This is a forward incremental backup with transform enabled, keeping four restore points
- C. This is a reverse incremental backup, keeping seven restore points

D. This is a forward incremental backup with Sunday and Wednesday synthetic full, keeping seven restore points

Answer: (SHOW ANSWER)

NEW QUESTION: 22

A company has replicated their critical application VMs to a second data center in another region. Their key application includes two database VMs and three application VMs. For proper operation, the database VMs need to start before the application VMs. What needs to be configured in Veeam to prepare for a disaster recovery situation?

- A. Use Instant VM Recovery
- B. Use on-click failover
- C. Use a planned failover
- D. Use a failover plan

Answer: D (LEAVE A REPLY)

NEW QUESTION: 23

A backup administrator is planning to install Veeam ONE. Which data collection mode collects the most data per VM?

- A. For vCenter data only
- B. For backup data only
- C. Optimized for advanced scalability deployment
- D. Optimized for typical deployment

Answer: C (LEAVE A REPLY)

NEW QUESTION: 24

The backup administrator configured replication for a VM from Data Center 1 to Data Center 2, which runs every day at 1 a.m. A power surge takes out Data Center 1 at 7 a.m. and the administrator fails over the replica at 8 a.m. When the power comes back on, the administrator performs the "failback" action at 2 p.m. and checks the state of the original VM. They recognize that not all data is available. What is missing?

- A. Data from 1 a.m. to 7 a.m.
- B. Data from 1 a.m. to 2 p.m.
- C. Data from 8 a.m. to 2 p.m.
- D. Data from 7 a.m. to 8 a.m.

Answer: B (LEAVE A REPLY)

Explanation/Reference:

NEW QUESTION: 25

Which Veeam Backup & Replication job type offers the shortest recovery time objective (RTO)?

- A. Backup copy
- B. Backup to tape
- C. Replication
- D. File to tape

Answer: C (LEAVE A REPLY)

Explanation/Reference:

<https://helpcenter.veeam.com/docs/backup/vsphere/replication.html?ver=100>

NEW QUESTION: 26

When configuring a SureBackup job, what are some of the criteria for adding servers to an application group? (Choose two.)

- A. VMs cannot be encrypted
- B. VM backups must reside on the same repository
- C. VMs cannot be added to an application group twice
- D. VMs must be running the same OS version
- E. VMs must have at least one valid restore point

Answer: (SHOW ANSWER)

Explanation/Reference:

https://helpcenter.veeam.com/docs/backup/vsphere/appgroup_vms_vm.html?ver=100

NEW QUESTION: 27

If you need to run a script to stop a service in order to get an application-consistent backup on a Windows server, where can the script be run?

- A. Configure the script to run on the Veeam Backup & Replication server using the Windows Task Scheduler
- B. In the guest processing setting of the job, enable application-aware processing and add a pre-freeze script to the VM
- C. In the virtual machines setting of the job, add a script in the scripts tab under "Run the following script before the job:"
- D. Copy the script to the VM and schedule the script to run prior to the start of the backup job using the Windows Task Scheduler in the VM

Answer: (SHOW ANSWER)

NEW QUESTION: 28

Which storage optimization option uses a block size of 512 KB?

- A. LAN target
- B. WAN target
- C. Local target (large blocks)
- D. Local target

Answer: (SHOW ANSWER)

Explanation/Reference:

https://helpcenter.veeam.com/docs/backup/hyperv/compression_deduplication.html?ver=100

NEW QUESTION: 29

When deploying an advanced single-host virtual lab in a VMware environment, what will Veeam create?

- A.** A distributed virtual switch with uplink(s)
- B.** A standard virtual switch with uplink(s)
- C.** A distributed virtual switch without uplink(s)
- D.** A standard virtual switch without uplink(s)

Answer: (SHOW ANSWER)

Explanation/Reference:

https://helpcenter.veeam.com/docs/backup/vsphere/surebackup_advanced_vlab.html?ver=100

NEW QUESTION: 30

A company has been running off replicated, business-critical VMs at their disaster recovery location since an earthquake near the primary data center occurred. Since the threat has passed, they want to stop the replicas and switch to the VMs at the primary data center without losing data. Which of the following actions is the first step they should take?

- A.** Planned failover
- B.** Failover
- C.** Failback to production
- D.** Permanent failover
- E.** Commit failback
- F.** Undo failover

Answer: E (LEAVE A REPLY)

NEW QUESTION: 31

Veeam ONE has been installed in the typical data collection mode and historical data is the installation default. A customer is looking at performance charts in Veeam ONE Monitor.

When troubleshooting a performance event from two days ago, what will they see?

- A.** Raw data every 20 seconds
- B.** Aggregated data every two hours
- C.** Data does not exist
- D.** Aggregated data every five minutes

Answer: B (LEAVE A REPLY)

NEW QUESTION: 32

An SMB customer installed Veeam Backup & Replication in a simple deployment. How can the customer comply with the 3-2-1 rule?

- A. Create a Scale-out Backup Repository with object storage in the public cloud used as the capacity tier leveraging move mode
- B. Create a Scale-out Backup Repository with object storage in the public cloud used as the capacity tier leveraging copy mode
- C. Copy the backups to a separate local NAS device
- D. Create a backup to tape job to a local virtual tape library

Answer: (SHOW ANSWER)

NEW QUESTION: 33

A company has been running off replicated, business-critical VMs at their disaster recovery location since an earthquake near the primary data center occurred. Since the threat has passed, they want to stop the replicas and switch to the VMs at the primary data center without losing data. Which of the following actions is the first step they should take?

- A. Planned failover
- B. Permanent failover
- C. Undo failover
- D. Failover
- E. Commit failback
- F. Failback to production

Answer: (SHOW ANSWER)

NEW QUESTION: 34

A backup administrator needs to restore two data drives to a VM where the operating system remains intact. The target machine must remain powered on. What recovery option is most appropriate to perform this operation?

- A. Instant VM Recovery
- B. Instant disk recovery
- C. Restore entire VM
- D. Restore VM files

Answer: (SHOW ANSWER)

Explanation/Reference:
